

ENJOYING THE LAUNDRY

Now you can sit back and relax and let Zanussi take the strain out of the laundry. Time and energy saving features will help make washdays easier and give you the time to do the things you want to.

JETSYSTEM

Keeping water and energy costs to a minimum, your Zanussi washing machine washes a one kilo load as efficiently as a 6 kilo load, thanks to the intelligent technology that measures the amount of water needed for your laundry. So although the size of your wash load may vary, the results will always be perfect.

BIGGER CAPACITY

You can now wash bigger loads more easily and less often thanks to Zanussi's 6kg washing machines. This results in less washing and drying loads, saving you time, energy and water to make your life easier. Not even mentioning less visits to the laundry!

LARGE PORTHOLE

Zanussi offers large 31cm portholes across the range – for easier loading and unloading.

ENERGY LABEL

Help the environment and your pocket by saving energy and water. A-rated machines mean Zanussi offers a low level of energy consumption coupled with reduced water consumption, proving that every little helps.

ZANUSSI PROGRAMMES & OPTIONS

COTTONS This standard programme delivers an 'A' wash performance for family sized loads of laundry.

COTTONS ECONOMY Extending the wash phase of the Cottons programme, this programme delivers 'A' wash performance whilst using minimum energy, saving money.

40°C AA Following trends for washing at lower temperatures to care for clothes better, this programme delivers an 'A' wash and energy performance at a low 40°C temperature.

SYNTHETICS To move with the modern day fabric trends, the synthetics programme is great for the everyday fabrics such as viscose, polyester and lycra blends.

EASY IRON By keeping your wash load moving and introducing a cool down phase with cold water, Easy Iron protects delicate and synthetic fabrics from developing permanent creases, saving you ironing time.

DELICATES A gentle programme suitable for delicate fabrics such as fine polyester blends.

HANDWASH For use with 'Handwash Only' labelled clothing, this is an extremely gentle programme where clothes are gently supported in the drum as they are moved delicately through the wash solution.

MIN 30°C A 30°C wash in 30 minutes - ideal for clothes only worn once or clothes you need in a hurry.

RINSE The rinse cycle is ideal for rinsing handwashed items.

EXTRA RINSE OPTION Ideal for anyone with extremely sensitive skin.

VARIABLE SPIN SPEED Allows you to alter the spin speed to suit your requirements whilst still ensuring the safe fabric care of your chosen programme.

PREWASH For extra dirty clothes, the prewash will loosen the dirt and remove it from the clothes prior to the main wash - ideal for children's clothes.

DAILY WASH For lightly soiled clothes this option shortens the wash time by approx. 25 mins but doesn't compromise wash results.

DELAY START For added convenience Zanussi washing machines feature a Delay Start option of up to 24hrs allowing you to wash when it suits you or when lower rate electricity is available.

QUALITY BUILT IN.

SOLID CONSTRUCTION All Zanussi integrated laundry appliances are internally reinforced. This unique cabinet construction helps reduce vibration, noise and aids access in terms of maintenance.

STRONG TUBS All Zanussi integrated laundry tubs are made from Hi - Carboran, a unique and incredibly hard wearing polymer-based material that resists wear and tear but also cuts down on noise and vibration, making these models some of our quietest ever.

SOFT SUSPENSION Zanussi's unique shock absorbers reduce vibration transmitted through to the floor and gives a smooth transition, reducing noise.

Laundry

ZWI2125

6kg washing machine

Laundry Features

- 6kg Load
- Jetsystem Advanced Technology
- Delay start
- Quick wash
- LED display and electronic controls
- 24+ programmes
- 1200rpm spin speed
- Automatic half load
- Programmes include: Easy Iron, Handwash, Mini 30°C, Cottons Economy, Synthetics, Delicates, Wool, Softeners, Rinse, Drain, Spin

Options to tailor Programmes

- Quick wash
- Variable spin speed including rinse hold
- Prewash
- Extra rinse
- Daily wash
- Easy ironing

Washing

A

TURBODRY PLUS

A unique drying circuit where heat is directed into the wash load by a fan. Moisture created through the drying process is channelled through a cleverly designed condenser. This gives faster drying times, reduced energy and water consumptions, with no need to vent!
