Safety Recall Notice – Firmware Update

HP Photosmart R707 digital camera

Hewlett-Packard is conducting a voluntary worldwide firmware update program for the HP Photosmart R707 digital cameras. There is a safety hazard if a single-use, non-rechargeable battery, such as a Duracell CP1, is installed in the camera and the camera is connected to the AC Power adapter or docking station. Consumers are encouraged to update their camera even if they do not use or intend to use a non-rechargeable battery.

What to do:

Update the R707 digital camera firmware either by downloading it from the web or by calling HP for instructions.
