Precautions

- Before using the camera, please ensure that you read and understand the safety precautions described below. Always ensure that the camera is operated correctly.
- Do not aim the camera directly into the sun or other intense light sources which could damage your eyesight.
- Do not try to open the case of the camera or attempt to modify this camera in any way. High-voltage internal components create the risk of electric shock when exposed. Maintenance and repairs should be carried out only by authorized service providers.
- Do not fire the flash too close to the eyes of animals or people, especially for young children. Eye damage may result. In particular, remain at least one meter away from infants when using flash.
- Keep the camera away from water and other liquids. Do not use the camera with wet hands. Never use the camera in the rain or snow. Moisture creates the danger of electric shock.
- Keep the camera and its accessories out of the reach of children and animals to prevent accidents or damage to the camera.
- If you notice smoke or a strange odor coming from the camera, turn the power off immediately. Take the camera to the nearest authorized service center for repair. Never attempt to repair the camera on your own.
- Use only the recommended power accessories. Use of power sources not expressly recommended for this equipment may lead to overheating, distortion of the equipment, fire, electrical shock or other hazards.

Getting Started

Using This Menu

Getting Started

This section contains information you should know before using this camera.

Basic Operation

This section explains all recording features of this camera.

Basic Recording

This section explains how to record still images, movies, and audio files.

Other Recording Functions

This section explains common operations about recording images.

Playback

This section explains playback, delete, and edit functions of still images, movies and audio files.

Making Connections

This section tells you how to connect this camera to a computer or TV.

Appendix

This section describes the troubleshooting and the camera specification.

The meanings of the symbols used in this user's manual are explained below:

! **Caution**	This indicates cautions that should be read before using these functions.
? **Tips**	This indicates the useful information when using this camera.
☞	This indicates the reference page.

Inserting the Batteries

1 ·

Open the battery cover.

- Slide the battery cover in the direction indicated by the arrow.
2 ·

Insert the batteries.

- Insert two AA-size batteries with the positive (+) and negative (-) poles matching the directions indicated inside the battery room.

3 ·
Close the battery cover.
Low Battery Indicator

A low battery indicator 🔋 appears on the LCD screen when the batteries are nearly exhausted. Batteries should be replaced promptly when the low battery indicator appears.

Caution

- Risk of explosion if battery is replaced by an incorrect type dispose of used batteries according to the instructions.
- Be sure to turn off the camera power before insert or remove batteries.
- It is recommended to use the provided battery. For other compatible batteries, please refer to Battery types. (☞ page 19).
- Replace all batteries at the same time. Never mix old and new batteries.
- Remove batteries if you will not be using them for a long time.
- The camera body may feel warm after extended use. This is normal.

About Battery Type

After replacing the batteries, please check the Battery Type in the setup menu (☞ page 19).

Inserting the Memory Card

You can use SD Card with this digital camera. The memory card slot is located beneath the battery cover, adjacent to the battery compartment.

1 **Open the battery cover.**
- Slide the battery cover in the direction indicated by the arrow.
2 **Insert the card.**
- Insert the card with the label facing up and the arrow pointing in.
? Tips
- To remove the card, gently press on the edge of the card and release it. Pull the card out and close the battery cover.

3 **Close the battery cover.**
! Caution
- It may cause damage to the card if removed while the camera is on.
- Do not touch the connection terminals on the back side of the card.

About Camera Memory

This camera is equipped with internal memory. If the memory card is not inserted in the camera, all images and movie clips recorded by the camera will be stored in the internal memory. If the memory card is inserted, images and movie clips are stored on the memory card.

DCF Protocol

The DCF protocol defines the format for image file data as well as the directory structure for the memory card. Images that are taken by a DCF camera can be viewed on DCF-compatible cameras from other manufacturers.

Setting the Display Language / Date & Time

When using the camera for the first time after purchasing, be sure to choose a language and set the date & time before using the camera.

Setting the Display Liamuage

1 **Turn the power on, and set the camera to the Setup Menu (☞ page 17).**

2 **Select [ᴅ⁹ Language].**
- Press ▲ or ▼ to select **[LANGUAGE]** then press ▶ or the **SET** button to launch the submenu.

Setup Menu 1/3	
🔊 Sounds	**English**

Caution

- Some information may not display correctly if you display images captured by other camera model.

10

Changing the LCD Status

Press the **SET/DISP** button changes the LCD status as shown below:

■ **REC mode**
(A) OSD on   (B) Full OSD   (C)Guide line   (D) OSD off

? Tips

- Use the "Guide line" to compose images easily before shooting images.

■ **PLAYBACK mode**
(A) OSD on   (B) Full OSD   (D) OSD off

Caution

- You cannot change the LCD status in the following situation:
    ◦ Manual exposure
    ◦ Recording movie clips or audio files
    ◦ Playing movie clips or audio files
    ◦ Playing the slideshow
    ◦ Viewing in thumbnail
    ◦ Trimming a still image

Basic Operation

Turning the Power On and Off

1 Press the POWER button (❶) to turn on the camera in the REC mode.

- The power turns on, the lens extends and the LED lights in green.

Press the PLAYBACK button (❷) to turn on the camera in the PLAYBACK mode.

- The power turns on, and an image displays on the LCD monitor (❸).
2 Press the POWER button (❶) again to turn the power off.

- The power turns off, the lens retracts and the LED turns off.

? **Tips**

- You can turn on the camera without the start-up and operating sound by pressing and holding the **POWER** (❶) or the **PLAYBACK** (❷) button over 1.5 seconds.
- Switch between REC mode and PLAYBACK mode (☞page 13).

Power Saving Function

For saving the battery power, the LCD monitor automatically turns off 1 minute after the last control accessed (factory-preset setting). Press any button other than the power button to turn on the LCD monitor. You can change the power save setting in Setup menu (☞page 18).

After the power saving function has been active for 1 minute, the power will turn off completely. Press the **POWER** (❶) or the **PLAYBACK** (❷) button to restore the power.

The power save feature will not activate in the following situation:

- Recording movie clips or audio files
- Playing movie clips or audio files
- Playing the slideshow
- Connecting the camera to a computer or printer with the USB cable

12

Changing the Mode

You can record images and voices in the REC mode. And using the PLAYBACK mode to replay, delete, or edit images on the LCD monitor.

Switching between REC mode and PLAYBACK mode

In REC mode, press the **PLAYBACK** button (❶) to switch to the PLAY mode.
In PLAY mode, press the **PLAYBACK** (❶) or the **MODE** (❷) button to switch to the REC mode.

Selecting the REC mode

1 Set the camera to the REC mode (☞page 13).

2 Launch the mode palette.
- Press the **MODE** button (❷) to show the scene mode palette.

3 Select a mode.
- Use the four-way control to select a desired mode and press the **SET** button to confirm the setting.

Format	To erase all data stored in the memory card if you are using a card, or all data stored in the internal memory if there is no card inserted. • A "BUSY...PLEASE WAIT" message displays and the memory card is starting format. • A "COMPLETED" message displays when finish formatting. • All data will be deleted including protected files. Be sure to download important files to your computer before formatting.
Battery Type	To ensure the camera displays battery level correctly, set the type to match the batteries used. Alkaline / NiMH / Lithium / Qxyride
Reset All	Resets the entire menu and button operation settings to initial default. The following settings do not change after Reset All: • Date & Time setting • Language setting • TV out setting • Battery Type

Basic Recording

Recording Still Images

1 Turn the power on, and set the
camera to the REC mode
(☞page 13).

2 Compose the subject on the
monitor.

- Aim the focus area (❶) to the
  subject that you want to take.

3 Half press the shutter button to focus the image.

- The focus area (❶) becomes green while in focus, then shutter speed (❷),
  aperture value (❸) and ISO value (❹) are displayed.
- If the shutter speed is slow or the possibility that image may be blurred, the
  shake warning icon 🔆🖐 may appear on the LCD monitor. To avoid this, use a
  tripod to stabilize the camera when recording images.

4 Take a picture.

- Press the shutter button fully to
  take a picture.

⚡ **Caution**

- Make sure that your fingers or
  the wrist strap does not block the
  lens.
The Q mode provides a simplified camera interface.   Larger icons and fewer controls make it easier to take pictures anytime, especially for the beginners and elder users.
You can use only the basic settings in the Q mode:

Button	**Flash**: Auto / Red eye / Force on / Slow sync / Force off
	Macro: Off / On
	SET/DISP: OSD on / Guide line / OSD off
Menu	**Resolution**: 7M / 3:2 / 16:9 / 5M / 3M / 1M / VGA
	Drive Mode: Off / 2 sec. / 10 sec. / Double / Burst
	Stabilizer: Off / On
	Face Tracking: Off / On
	Photo Frame: 10 frames can be selected
	Beep: Off / On
	Auto Review: Off / 1 sec. / 3 sec. / 5 sec.

Rest of settings will not be controlled as below:

Fixed setting (*)	• Quality: S.Fine	• Highlight: Off
	• Metering: Multi	• Sharpness: Normal
	• White balance: Auto	• Effect: Off
	• ISO: Auto	• Date Stamp: Date & Time
	• Exposure: Auto	• Digital Zoom: Off
	• AEB: Off	
Utility setting (**)	• Shutter sound	• File No.
	• Start-up sound	• TV out
	• Power save	• USB
	• Date & Time	• Start-up image
	• Language	

(*)Fixed setting: Settings are fixed in Q mode.

(**)Utility setting: Use the same setting as last mode used.

21

You can select lower image resolution and quality to decrease the image size to capture more images. Choose a suitable setting according to the desired image quality and purpose.   For details, see page 15.

Resolution Values

Image Size		Print Size	
7M	3072 x 2304	Printing larger than A4-size.	Larger
3:2	3072 x 2048		
16:9	3072 x 1728		↕
5M	2560 x 1920		
3M	2048 x 1536		
1M	1024 x 768		
VGA	640 x 480	Printing to postcards or attaching to e-mail.	Smaller

Quality Values

Compression		Purpose	
	Super Fine	Shoot higher quality images.	Higher Quality
	Fine	Shoot normal quality images.	↕
	Normal	Shoot for more images.	Lower Quality

22

Using the Zoom Function

Your camera has a combination of optical and digital zoom functions that allows you to zoom in on far away subjects or zoom out for a wide angle shot.

The optical zoom is achieved by mechanically adjusting the lens of the camera. The digital zoom enlarges or shrinks the image using a software process.

1 **Select the zoom setting, and point the camera at the subject.**

2 **Press the zoom button (❶) to compose the image.**

[W]: zoom out for a wide-angle shot.

[T]: zoom in for a telephoto shot.

- When the zoom button is pressed, the zoom bar appears on the LCD monitor.
- When the optical zoom (❷) factor is at maximum, zooming stops temporarily. Press the [T] again, the camera switches to the digital zoom (❸) automatically and zooming continues.
- The digital zoom (❸) will not activate in movie recording.

3 **Press shutter button to take a picture.**
? Tips

- Digital zoom works by enlarging the center portion of an image through a software interpolation process.
- The digital zoom is used to achieve magnification levels up to approx. 4 times.

23

The flash is not only for taking pictures when there is insufficient light, but also when the subject is in shade or in backlight conditions. Press the flash button to cycle your camera through the various flash modes. The flash will not activate when continuous shooting or movie recording.

1 **Turn the power on, and set the camera to the REC mode (☞ page 13).**

2 **Press the flash button (❶) to change the flash mode.**

- Each time the flash button is pressed, the flash icon (❷) changes.

⚡A **Auto flash**:

Flash fires automatically when shooting conditions require extra lighting.

⚡⊙ **Red-eye reduction**:

Flash strobes to let the subject's eyes adjust to the flash, then fires again to take the actual image. Your camera will detect the subject brightness and use the flash only when required.

⚡ **Force on**:

Flash fires every time you take a photo, regardless of lighting conditions.

S⚡ **Slow sync**:

Flash fires with a slow shutter speed.

⚡ **Force off**:

The flash never fires even in dark situation.

3 **Press shutter button to take a picture.**

Caution

- The flash charging time may increase when the battery is low.
- The available flash settings are limited depending on the REC mode you selected (☞ page 53).
Your camera is equipped with a macro function that allows you to focus on very close subjects. In macro mode you can focus on subjects 15 cm from the lens when in the maximum wide angle setting and 40 cm in the maximum telephoto setting.

1 **Turn the power on, and set the camera to the REC mode (page 13).**

2 **Press the macro button (❶) enters the macro mode.**

- The macro icon (❷) displays in the LCD monitor.
- To leave the macro mode, press the macro button (❶) again.

3 **Press shutter button to take a picture.**
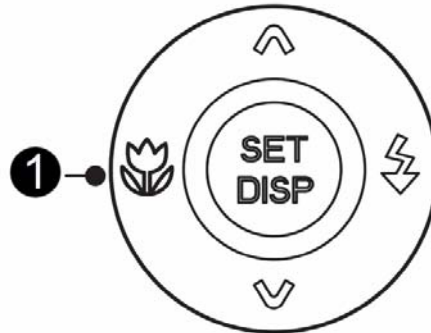

? Tips

- Distances referred to measure the distance between the camera lens surface and the subject.

Use the self-timer to set a delay from the time the shutter button is pressed to the time the image is shot. Use the burst to record continuous still images shooting.

1 **Turn the power on, and set the camera to the REC mode (☞ page 13).**

2 **Open the REC menu (☞ page 15).**

• Use ◀ or ▶ to select **[Drive mode]** from the REC menu.

3 **Change the setting.**

• Press ▲ or ▼ to select a drive mode, then press the **SET** button.

Off:

Record a single image.

⏱₂ **2 sec.**:

The shutter release will be delay for 2 seconds.

⏱₁₀ **10 sec.**:

The shutter release will be delay for 10 seconds.

⏱ **Double**:

Record two images in a shot after pressing the shutter release button 10 and 12 seconds.

▤ **Burst**:

Keep pressing the shutter button fully to take continuous shooting. Release the shutter button to stop shooting.

4 **Press shutter button to take a picture.**

? Tips

• When using the self-timer function, be sure to use a tripod or place the digital camera on a level, stable surface.

26

In this mode, you can set an aperture value to match the brightness. A higher aperture value brings the background out of focus. Selecting a lower aperture value allows you to soft the background.

1 Turn the power on, and set the camera to the Aperture Priority (☞ page 14).

2 Adjust the aperture value by pressing ▲ or ▼ button.

3 Press shutter button to take a picture.
? Tips

- The larger the aperture value the smaller the lens opening, allowing less light to enter the camera.

In this mode, you can set a shutter speed to match the brightness. Faster shutter speeds allow you to take a sharp picture of a moving subject while slower speeds create a trail effect and allow you to shoot without a flash in dark areas.

1 Turn the power on, and set the camera to the Shutter Priority (☞ page 14).

2 Adjust the shutter speed by pressing ▲ or ▼ button.
3 Press shutter button to take a picture.

You can manually set the shutter speed and aperture to achieve a particular effect.

1 **Turn the power on, and set the camera to the Manual Exposure ($\mathcal{P}$ page 14).**

2 **Use the SET button to switch between aperture value and shutter speed control. Press ▲ or ▼ to adjust the setting.**

3 **Press shutter button to take a picture.**

- Press the shutter button halfway, the difference between the standard exposure and the selected exposure appears in red.
Recording Movie Clips

1 Turn the power on, and set the camera to the Movie mode (☞page 13).

2 Compose the subject on the monitor.

  - Aim the focus area (❹) to the subject that you want to take.
  - The LCD monitor displays the available recording time (❸).

3 Start recording.

  - Press the shutter button (❶) to start recording.
  - Using the zoom button (❷) to adjust the image size.
  - The White Balance is set and locked to the settings of the first frame
Caution

  - Sound cannot be recorded while pressing the zoom button..
  - The digital zoom cannot be used in Movie mode.

4 Finish recording.

  - Press the shutter again to end recording.
  - The camera will stop recording automatically when the memory capacity has been reached.

Setting the Movie Size

Movie Size and Frame Rate

Resolution		Frame Rate	
16:9	720 x 400		Higher Quality
640	640 x 480	30 frames/sec.	↕
320	320 x 240		Lower Quality

Recording Audio Clips

1 Turn the power on, and set the camera to the Voice REC mode (☞page 13).

2 Press the shutter button (❶) to start recording.

- The voices are recorded from the microphone (❷) of the camera. Be careful to avoid touching the microphone while recording.
3 Press the shutter button again to end recording.

- The camera will stop recording automatically when the memory capacity has been reached.

Playing Back Audio Clips

1 Turn the power on, and set the camera to the PLAYBACK mode (☞page 13).

2 Press ◄ or ► to select the audio clip that you want to playback.

3 Start playing back.

- Press ▲ to start playing the audio clip.
- Press ▼ to stop the audio clip, or press ▲ to pause it. When audio clip paused, press ▲ again to resume.

30

Recording a Voice Memo

You can add a voice memo to the still images after you record it.

1 Turn the power on, and set the camera to the PLAYBACK mode (page 13).

2 Press ◄ or ► to select a still image that you want to add a voice memo.

- If the image already has the voice memo recorded, the 🎤 appears on the LCD monitor. The new recording will replace the previous one.
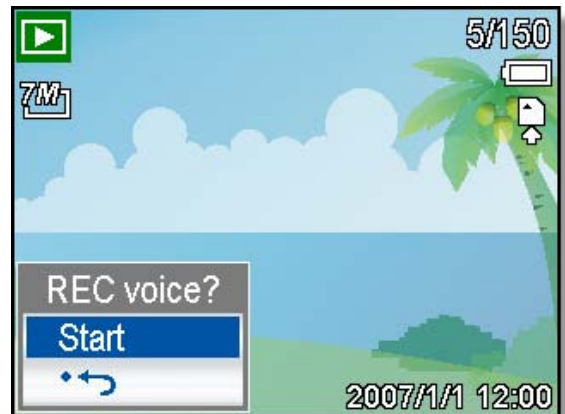

3 Open the PLAYBACK menu.

- Press the **MENU** button, using four-way control to select **Voice Memo** (▶🎤) and press the **SET** button.

4 Press the SET button to start recording for 30 seconds.

- Press the **SET** button again to end recording.

⚡ **Caution**

- The voice memo cannot be added to a movie clip or a protected image.
- You cannot delete only the voice memo. When you delete the image, the attached voice memo is also deleted.

Playing Back a Voice Memo

1 Turn the power on, and set the camera to the PLAY mode (page 13).

2 Press ◄ or ► to select the image that has the voice memo recorded.

3 Start playing back.

- Press ▲ to start playing the voice memo.
- Press ▼ to stop the voice memo, or press ▲ to pause it. When voice memo paused, press ▲ again to resume.

Other Recording Functions

Setting the Metering

There are 3 different light metering options available on your camera.

Option	Description
[◉]	Light is measured from the entire shooting screen, but gives more importance to the values near the center.
[■]	Selects an exposure based on readings from multiple points in the subject area.
[•]	Selects an exposure based on a single reading taken from the center of your picture.

Setting the White Balance

Adjust the white balance to match different light sources such as sunlight, incandescent (tungsten) lighting or, fluorescent lighting.

Option	Description
AUTO	Automatically corrects white balance. Ideal for general photography.
☀	Adjusts for bright sun conditions, or natural light conditions.
⛅	Adjusts for cloudy days or twilight conditions.
💡	Adjusts for normal indoor lighting conditions. Corrects the orange hue of household light bulbs. Ideal for indoor photos under tungsten or halogen lighting without a flash.
🔆H	Adjusts for fluorescent lighting. Corrects the green hue of fluorescent lighting. Ideal for indoor photos under fluorescent lighting without a flash.
🔆L	
🔳	For more accurate adjustment or when the light source cannot be specified.

? **Tips**

- Point the camera at a white piece of paper or similar object under the lighting conditions for which you want to set the white balance, and then press the Shutter button.

Setting the ISO

With the initial settings, the ISO sensitivity is automatically set according to the brightness of the subject.

Option	Description
Auto	Sets the ISO sensitivity automatically.
ISO 50	Sets the sensitivity to ISO 50 equivalent.
ISO 100	Sets the sensitivity to ISO 100 equivalent.
ISO 200	Sets the sensitivity to ISO 200 equivalent.
ISO 400	Sets the sensitivity to ISO 400 equivalent.
ISO 800	Sets the sensitivity to ISO 800 equivalent.
ISO 1600	Sets the sensitivity to ISO 1600 equivalent.

? Tips

- Higher ISO speeds increase the image noise. To take clean images, use as low an ISO speed as possible.

Setting the Exposure

Set the exposure value manually to compensate for unusual lighting conditions such as indirect indoor lighting, dark backgrounds, and strong backlighting.

Setting the AEB

Sets the auto exposure bracketing (AEB) to shoot 3 continuous images, each with a different exposure setting: correctly exposed, underexposed, and overexposed.

Setting the Highlight

Make the subject stand out from its surroundings. The subject will be in focus in three different ranges: ▢ / ▣ / ◪

Setting the Sharpness

You can select whether you want the image to have sharp or soft outlines.

Option	Description
◣	The edges of the image are emphasized. The edges will become sharp, but noise may occur in the recording image.
◣	The edges of the image are sharp. This is suitable for printing.
◣	The edges of the image are softened. This is suitable for editing images on PC.

Setting the Photo Effect

You can add special effects to your images in Record mode or in Playback mode.

Option	Description
Off	No effect is added to the image.
👁	Red eye removal. (Playback only)
B&W	Convert image to black & white.
Sepia	Recorded image will be stored in a sepia tone.
Negative	Opposite what they were in the original image.
Mosaic	Add mosaic tiles to the images. (Playback only)
Red	The image becomes reddish.
Green	The image becomes greenish.
Blue	The image becomes bluish.

34

Setting Date Stamp

The Date Stamp function can be used to add a date to your pictures as you take them.

Option	Description
Off	Do not add the recorded date & time to printed images.
Date	Only add the recorded date to printed images.
Date & Time	Add the recorded date & time to printed images.

Setting Stabilizer

With more sensibility and faster shutter speed to bright up the pictures, effectively prevent blur image caused by hand shack or target movement, one can take good pictures with little effort.

Setting Face tracking

After initializing face tracking function, the lens will lock the main character in the picture and follow the movements. Also use auto digital zoom technology to retract and extract zoom lens that allows you to become the focus of lens.

? **Tips**

- Pressing the shutter halfway showing green AF area means focus is complete.
- Face tracking is powered by Arcsoft.
- Under some environmental influences, face tracking function may be limited.
- The Highlight and Photo Frame cannot be used as using the Face Tracking.

Setting Photo Frame

You can add 10 kinds of frames to still images, making them more interesting.

? **Tips**

- This feature only available with still images (except 3:2 and 16:9).
- The Highlight and Face Tracking cannot be used as using the Photo Frame.

Playback

Playing Back Images

1 Turn the power on, and set the camera to the PLAYBACK mode (☞ page 13).

- The latest recorded image appears on the LCD monitor.
- If there are no images stored, a message **[No image]** appears.

2 Press the four-way control ◀ or ▶ (❶).

- ◀: displays the previous image.
- ▶: displays the next image.

? Tips

- Holding down ◀ or ▶ scrolls images in a high speed.

Playing Back Movie Clips

1 Turn the power on, and set the camera to the PLAYBACK mode (☞ page 13).

2 Press ◀ or ▶ to select a movie clip that you want to playback.

3 Start playing back.

- Press ▲ to start playing the movie clip.
- Press ▼ to stop the movie clip, or press ▲ to pause it. When the movie paused, press ▲ again to resume.

? Tips

- During movie playing back, press ▶ to fast forward or press ◀ to rewind it.
- Press the shutter to capture the still image from the movie clip while it had paused.

1

Turn the power on, and set the camera to the PLAYBACK mode (☞ page 13).

2

Select an image.

- Press ◀ or ▶ (❸) to select the image that you want to magnify or trimming.
- Only still images can be magnified and trimmed.
3

Magnify the image.

- Press **[T]** (❶) to magnify the image, and the central portion of the image is displayed. You can use the arrow button (❸) to view different parts of the magnified image.
- Press the **MENU** button (❷) to return to the normal size.

4

Trim the image.

- Press the **SET** button (❸) to set the image trimming.

5

Save the image.

- Press the **SET** button (❸) again to trim the selected image and save it as a new one.

37

1 Turn the power on, and set the camera to the PLAYBACK mode (☞page 13).

2 Press the zoom button [W], a thumbnail screen is displayed.

SET Full screen

3 Use the four-way control to select the desired image, and press [T] or the SET button to show the selected image in full screen.

? **Tips**

• You can protect or delete multiple images in thumbnail, see page 40, 42.

Playing a Slide Show

1 Turn the power on, and set the camera to the PLAYBACK mode (☞page 13).

2 Enter the slide show.

Slide Show

⊙ 3 sec.

↻ Yes

Start

↩

◄► Select   SET OK

❶

❷

• Press the **MENU** button (❶), use the four-way control (❷) to select **Slide Show** (▶) and press the **SET** button (❷).

3 Change the slide show settings.

• Use the four-way control (❷) to set the slideshow interval (⊙), effect (↪) and repeat (↻).

• You can set the interval between 1~10 seconds.

4 Playing the slide show.

• Press the **SET** button (❷) to start the slideshow.

• During the slideshow, press the **SET** button (❷) to pause the slideshow and press the **SET** button again to resume.

Deleting Files

Deleting a Single File

1 Turn the power on, and set the camera to the PLAYBACK mode (☞page 13).

2 Open the menu.
- Press the **MENU** button (❶), then use the four-way control (❷) to select **Delete** (🗑) and press the **SET** button (❷).
3 Press ▲ or ▼(❷) to select [SINGLE], and then press the SET button (❷).

4 Press ◀ or ▶ (❷) to select the image you want to delete.

5 Press the SET button (❷) to delete the image.
- Repeat step 4~5 to delete images.

? Tips

- To quickly delete the current display image

  1. Select the image you want to delete.

  2. Press the **Delete** button (❸) to show a confirmation.

  3. Press the **SET** button (❷) to delete the current display image.

- Protected images cannot be deleted with this function.

1 Turn the power on, and set the camera to the thumbnail screen (☞ page 38).

2 Open the menu.

- Press the **MENU** button, then Press ◀ or ▶ to select to select **Delete** (🗑) and press the **SET** button.

3 Press ▲ or ▼ to select [Select], and then press the SET button.

- The frame of the selected image turns green.

4 Select multiple images.

- Use the four-way control to select the image.
- Press the **SET** button toggles the 🗑 on and off.   Repeat this step until all images that you want to delete are displayed with an icon 🗑 .

5 Delete images.

- Press the **MENU** button, then select **[Yes]** and press the **SET** button.   All selected images will be deleted.
- To cancel delete, press the **MENU** button in this step.

1 Turn the power on, and set the camera to the PLAYBACK mode (☞ page 13).

2 Open the menu.

- Press the **MENU** button, then use the four-way control to select **Delete** (🗑)and press the **SET** button.
- You can open the menu in full screen or in thumbnail.

3 Press ▲ or ▼ to select [ALL], and then press the SET button.

4 Press the SET button to delete all unprotected images.

40

1 Turn the power on, and set the camera to the PLAYBACK mode
(page 13).

2 Open the menu.
- Press the **MENU** button, then use the four-way control to select **Protect**
( ) and press the **SET** button.

3 Press ▲ or ▼ to select [SINGLE], and then press the SET button.

4 Press ◀ or ▶ to select the image you want to protect.

5 Press the SET button to protect the image.
- When the file is locked, the displays on the LCD monitor.
- Repeat step 4~5 to protect images.
- To unlock the file, press the **SET** button again in step 5. The will
disappear and the file is unlocked.

1 Turn the power on, and set the camera
to the PLAYBACK mode (page 13).

2 Open the menu.
- Press the **MENU** button, then use
the four-way control to select
Protect ( ) and press the **SET**
button.
- You can open the menu in full screen
or in thumbnail.

3 Press ▲ or ▼ to select [Lock all], and then press the SET button.
- To unlock all files, select **[Unlock all]** in this step, then press the **SET** button.

4 Press the SET button to protect all images.

1
Turn the power on, and set the camera to the thumbnail screen (☞ page 38).

2
Open the menu.
- Press the **MENU** button, then Press ◀ or ▶ to select to select **Protect** (⊙ㄲ) and press the **SET** button.

3
Press ▲ or ▼ to select [Select], and then press the SET button.
- The frame of the selected image turns green.

4
Select multiple images.
- Use the four-way control to select the image.
- Press the **SET** button toggles the ⊙ㄲ on and off. Repeat this step until all images that you want to protect are displayed with an icon ⊙ㄲ.

5
Protect images.
- Press the **MENU** button, then select **[Yes]** and press the **SET** button.   All selected images will be protected.
- To cancel protect, press the **MENU** button in this step.

Editing Images

1 Turn the power on, and set the camera to the PLAYBACK mode (☞ page 13).

2 Press ◀ or ▶ to select the image you want to rotate.

3 Open the menu.

• Press the **MENU** button, then use the four-way control to select **Rotate** (⊞) and press the **SET** button.

4 Press the SET button to rotate the image.

• Each press rotates the image 90 degrees in clockwise.

5 Press ▲ or ▼ to select OK, and then press the SET button to finish rotating.
1 Turn the power on, and set the camera to the PLAYBACK mode (☞ page 13).

2 Press ◀ or ▶ to select the image you want to resize.

3 Open the menu.

• Press the **MENU** button, then use the four-way control to select **Resize** (⬛) and press the **SET** button.

4 Press ▲ or ▼ to select an option, and then press the SET button.

• The resized image will be saved as a new file.

⚡ Caution

• Only a large size image can be resize to a smaller one.

43

You may use Red Eye Removal remove the red eye caused by flash from original photo.
Or use color filters to save as a new image.

1 Turn the power on, and set the camera to the PLAYBACK mode
(☞page 13).

2 Press ◄ or ► to select the image you want to add the effect.

3 Open the menu.
  • Press the **MENU** button, then use the four-way control to select **Photo Edit**
    (✐) and press the **SET** button.

4 Press ▲ or ▼ to select an option, and then press the SET button.
  • The edited image will be saved as a new file.

1 Turn the power on, and set the camera to the PLAYBACK mode
(☞page 13).

2 Press ◄ or ► to select the image you want to add the photo frame.

3 Open the menu.
  • Press the **MENU** button, then use the four-way control to select **Photo**
    Fames (▢) and press the **SET** button.

4 Press ▲ or ▼ to select the image you want, then press the SET button to
apply the choice.
  • The edited image will be saved as a new file.

Copying the Files

You may copy the data from the camera's internal memory to the memory card for convenience.

1 **Be sure you have inserted a memory card into your digital camera. Set the camera to the PLAYBACK mode. (page 13).**

2 **Open the menu.**
- Press the **MENU** button, then use the four-way control to select **Copy to card** ( ) and press the **SET** button.
3 **Press ▲ or ▼ to select [Single], then press the SET button.**
- To copy all images to a memory card, select **[All].**

4 **Press ◀ or ▶ to select the image you want to copy to a card.**

5 **Select [Yes] and then press the SET button to start copy.**
- Repeat step 4~5 to copy other images.
- Press the **MENU** button to complete the setting.

Setting the DPOF

The Digital Print Order Format (DPOF) setting allows you to select images on the memory card for printing and specify the number of print copies in advance using the camera.   This is extremely convenient for sending the images to a photo developing service or for printing on a direct print function compatible printer.

1 **Turn the power on, and set the camera to the PLAYBACK mode (page 13).**

2 **Open the menu.**
   • Press the **MENU** button, then use the four-way control to select **DPOF** ( ) and press the **SET** button.
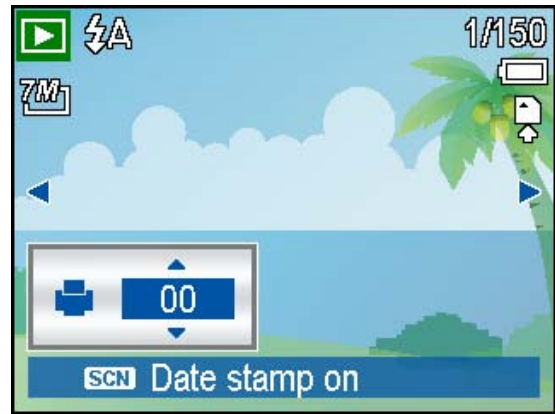

3 **Press ▲ or ▼ to select [Single], then press the SET button.**
   • To set the DPOF setting for all images, select **[All]** in this step.
   • To reset all DPOF settings to initial default, select **[Reset]** in this step.

4 **Press ◀ or ▶ to select the image you want to print out.**

5 **Set the number of copies.**
   • Press ▲ or ▼ to specify the number of copies.
   • The number of copies can be set from 0 to 30.
   • To cancel this image DPOF setting, set the number of copies to 0.

6 **Print the date stamp out.**
   • Press SCN button to set the date stamp of current image.   Press SCN button again to turn off date stamp.
   • Repeat step 4~6 to other images for printing.

7 **After you finished all image settings, press the SET or MENU button to apply it.**

Choosing a Startup Image

1 Turn the power on, and set the camera to the PLAYBACK mode
(☞page 13).

2 Open the menu.
- Press the **MENU** button, then use the four-way control to select **S.Image**
(💌🖼) and press the **SET** button.

3 Press ◀ or ▶ to select the image you want, then press the SET button to
apply the choice.
- A message "Completed" appears.

4 Set the camera to the Setup Menu (☞page 17).

5 Press ▲ or ▼ to select S.Image
(💌🖼) then press ▶ or the SET
button.

6 Press ▲ or ▼ to select a desired
option and press the SET button to
apply the setting.
[Off]: Disable the start-up image.
[System]: Use camera default image.
[My image]: Use the image that you just specified in step 3.

7 Press the MENU button to close the menu.

💌🖼 Start-up Image

Off
System
My image

‡ Select   SET OK
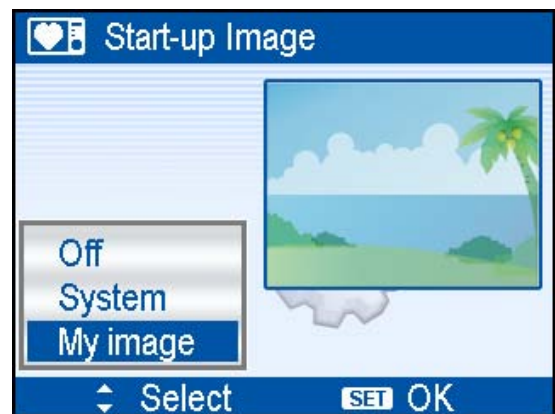

⚠ **Caution**

- The start-up image will not be deleted even if the original image is deleted or
memory formatted.

Making Connections

Connecting the Camera to a TV

You can display recorded images on a television with a supplied AV cable.
1 Set the TV out to match the TV system that you are using (☞page 19).

2 Turn off the camera and the TV.

3 Use the supplied AV cable to connect the camera to the TV set.

4 Set the TV input signal to Video In.
- Refer to the documentation included with your TV for more information.

5 Display on TV.
- Everything that would normally appear on the camera's LCD screen, such as photo and video clip playback, slide shows, and image or video capture, appears on the TV.

Connecting the Camera to a PC

There are two ways to download files from the camera's internal memory or memory card to a computer:

- Inserting the memory card into a card reader
- Connecting the camera to a computer using the supplied USB cable

Using the Card Reader

1
Eject the memory card from the camera and insert it in a card reader that is connected to a computer.

2
Open [My Computer] or [Windows Explorer] and double-click the removable drive icon that represents the memory card.

3
Copy images from the card into a directory of your choice on the computer's hard disk.
Connecting the Camera to a Computer with the USB Cable

1
Install the USB software driver included with the bundled CD-ROM.

2
Connect the supplied USB cable to the computer's USB port and turn on the camera.

- The LCD screen turns off when the connection to the computer has been successfully completed.

3
Open [My Computer] or [Windows Explorer]. A "Removable Disk" appears in the drive list.

4
Double-click the "Removable Disk" icon to view its contents.

- Files stored on camera are located in the folder name "DCIM".

49
Appendix

About the Folder & File Name

Your digital camera automatically creates a directory of folders in the internal memory or memory card that it uses to organize still images, movie clips and other information.

Folder Structure

Folder name begins with a 3-digit number from 100 to 999 and followed by "DICAM", each folder holds up to 9999 files.   If new files are made, a new folder named in sequence will be made automatically.

```
INTERNAL (F:)
  DCIM
    100DICAM
      DSCI0001.JPG
      DSCI0002.JPG
      DSCI0003.JPG
      DSCI0004.AVI
      DSCI0005.WAV
    101DICAM
    102DICAM
  MISC
    AUTPRINT.MRK
```
File Naming

File name begins with "DSCI" and are followed by a 4-digit number that increases in sequence.   File numbering starts from 0001 when a new folder is created.

If the highest folder number is 999 and highest file number exceeds 9999, the camera will display the warning message "Folder cannot be created". When it appears, try one of the following ways:

- Reset the file number and plug in a new memory card.
- The folder number and file number are initialized and renumbered from 100 and 0001 respectively.

Caution

- Do not change the folder and file names in the memory card using your computer. It may be unable to playback the data using the digital camera.

Troubleshooting

Problem	Cause	Solution
Power does not turn on.	Battery is inserted in the wrong direction.	Reload battery in the correct direction.
	Batteries are dead.	Replace or recharge batteries.
	The battery compartment door is open.	Make sure the battery compartment door is securely closed.
The camera does not take pictures.	The flash is charging.	Wait for the flash to charge.
	Memory is full.	Insert a new memory card.
	Memory card is not formatted correctly.	The card may be defective, use a new card.
Image is not recorded when the shutter button is pressed.	The Flash is charge.	Wait for the flash to charge.
	Memory is full.	Insert a new memory card.
The flash does not fire.	Flash is set to OFF.	Set the flash to any mode except off.
Image is blurry or out of focus.	The camera was moving when the image was captured.	Hold the camera steady when shooting picture.
	The subject was beyond the range within which the camera can focus.	Turn the Macro mode on it the subject is within 15 cm or 40 cm. Do not use Macro mode when shooting distant subjects.
Image is not displayed on the LCD monitor.	A memory card with non-DCIF images (recorded with other camera) is loaded.	This camera cannot display non-DCIF images.
Recorded images are not saved in memory.	The camera was turned off / powered down before the image was stored in memory.	If the battery low indicator appears on the LCD monitor, replace the battery immediately.
Cannot transfer images to a computer after connecting the USB cable.	USB driver is not installed.	Install the USB driver before you connect the camera to a computer / turn the camera on.
Card error	The memory card format may not be correct.	Re-format the memory card to the FAT format using a card reader in Windows.

Specifications
