Product highlights

FotoCall

When the phone rings, the screen displays a specific picture you've selected to be associated with the caller so that you can quickly and easily identify who's calling you. You can also select a specific melody to play to identify who's calling you.

Integrated VGA digital camera

The integrated digital camera with VGA resolution (640x480 pixels) allows you to take high-quality pictures anytime, anywhere with your phone, then send them via MMS or email, or store the pictures in your phone's memory.

65,000 color display

65,000 color display brings you incredible clear bright and colorful images and pictures. With this superb display you can have a more enjoyable and convenient use of your Philips device.

MMS messaging

MMS (Multimedia Messaging Service) allows you to use your mobile phone to send and receive pictures, video, and audio files with your text messages.

50-minute recording time

SMS with Predictive Text Input

The Predictive Text Input saves you time and hassle while typing an SMS text. An internal software guesses the word you want to write, based on the letters you have already typed in. It greatly quickens the seizing process.

Ringtone download

This function offers the possibility to personalize your phone by downloading ringtones. Simply call the dedicated service provider and select your favourite song. An SMS is sent to you, together with the attached melody. You can select this melody as any other ringtones (country and network dependent).

Embedded Games

Your phone comes with built-in games for you to play while enjoying your bright color screen

Selectable wallpapers

An illustration is worth more than a thousand words. Scroll through the selection of images integrated into the handset. Select the one that best suits your mood of the day and have it displayed as a background on your screen.
