Operating Instructions

## Location: Rear of the unit

### IMPORTANT

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

### CAUTION

**RISK OF ELECTRIC SHOCK  
DO NOT OPEN**

#### CAUTION:

TO PREVENT THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

D3-4-2-1-1\_En-A

### WARNING

**This equipment is not waterproof. To prevent a fire or shock hazard, do not place any container filled with liquid near this equipment (such as a vase or flower pot) or expose it to dripping, splashing, rain or moisture.**

D3-4-2-1-3\_A\_En

### CAUTION

These speaker terminals carry **HAZARDOUS LIVE voltage**. To prevent the risk of electric shock when connecting or disconnecting the speaker cables, disconnect the power cord before touching any uninsulated parts.

D3-4-2-2-3\_A\_En

### WARNING

**To prevent a fire hazard, do not place any naked flame sources (such as a lighted candle) on the equipment.**

D3-4-2-1-7a\_A\_En

### Operating Environment

Operating environment temperature and humidity:  
+5 °C to +35 °C (+41 °F to +95 °F); less than 85 %RH  
(cooling vents not blocked)

Do not install this unit in a poorly ventilated area, or in locations exposed to high humidity or direct sunlight (or strong artificial light)

D3-4-2-1-7c\_A\_En

### VENTILATION CAUTION

**When installing this unit, make sure to leave space around the unit for ventilation to improve heat radiation (at least 15 cm at top, 10 cm at rear, and 10 cm at each side).**

### WARNING

**Slots and openings in the cabinet are provided for ventilation to ensure reliable operation of the product, and to protect it from overheating. To prevent fire hazard, the openings should never be blocked or covered with items (such as newspapers, table-cloths, curtains) or by operating the equipment on thick carpet or a bed.**

D3-4-2-1-7b\_A\_En

### CAUTION

The STANDBY/ON switch on this unit will not completely shut off all power from the AC outlet. Since the power cord serves as the main disconnect device for the unit, you will need to unplug it from the AC outlet to shut down all power. Therefore, make sure the unit has been installed so that the power cord can be easily unplugged from the AC outlet in case of an accident. To avoid fire hazard, the power cord should also be unplugged from the AC outlet when left unused for a long period of time (for example, when on vacation).

D3-4-2-2-2a\_A\_En

### CAUTION

This product is a class 1 laser product, but this product contains a laser diode higher than Class 1. To ensure continued safety, do not remove any covers or attempt to gain access to the inside of the product. Refer all servicing to qualified personnel.

The following caution label appears on your unit.

Location: rear of the unit

D3-4-2-1-8\_B\_En

This product is for general household purposes. Any failure due to use for other than household purposes (such as long-term use for business purposes in a restaurant or use in a car or ship) and which requires repair will be charged for even during the warranty period.

K041\_En

### WARNING

*Before plugging in for the first time, read the following section carefully.*

**The voltage of the available power supply differs according to country or region. Be sure that the power supply voltage of the area where this unit will be used meets the required voltage (e.g., 230 V or 120 V) written on the rear panel.**

D3-4-2-1-4\_A\_En

## The following does not apply to the Asian and Oceanic models:

**NOTE:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

D8-10-1-2\_En

### Information to User

Alteration or modifications carried out without appropriate authorization may invalidate the user's right to operate the equipment.

D8-10-2\_En

**CAUTION :** USE OF CONTROLS OR ADJUSTMENTS OR PERFORMANCE OF PROCEDURES OTHER THAN THOSE SPECIFIED HEREIN MAY RESULT IN HAZARDOUS RADIATION EXPOSURE.

**CAUTION :** THE USE OF OPTICAL INSTRUMENTS WITH THIS PRODUCT WILL INCREASE EYE HAZARD.

D6-8-2-1\_En

If the AC plug of this unit does not match the AC outlet you want to use, the plug must be removed and appropriate one fitted. Replacement and mounting of an AC plug on the power supply cord of this unit should be performed only by qualified service personnel. If connected to an AC outlet, the cut-off plug can cause severe electrical shock. Make sure it is properly disposed of after removal. The equipment should be disconnected by removing the mains plug from the wall socket when left unused for a long period of time (for example, when on vacation).

D3-4-2-2-1a\_A\_En

## Energy-saving design

This system is designed to use 0.5 W of electricity when power is switched to standby.

This product incorporates copyright protection technology that is protected by method claims of certain U.S. patents and other intellectual property rights owned by Macrovision Corporation and other rights owners. Use of this copyright protection technology must be authorized by Macrovision Corporation, and is intended for home and other limited viewing uses only unless otherwise authorized by Macrovision Corporation. Reverse engineering or disassembly is prohibited.

## Voltage selector [Excluding Taiwan model]

You can find the voltage selector switch on the rear panel of multi-voltage models.

**The factory setting for the voltage selector is 220–230 V. Please set it to the correct voltage for your country or region.**

- Saudi Arabia operates on 127 V and 220 V mains voltage. Please set to the correct voltage before using.

For Australian and New Zealand models:

**The factory setting for the voltage selector is 240 V. Please set it to the correct voltage for your country or region.**

Before changing the voltage, disconnect the AC power cord. Use a medium size screwdriver to change the voltage selector switch.

For Australian and New Zealand models only

D3-4-2-1-5\_En

For U.S. and Australia Model

C67-7-3\_En

# Thank you for buying this Pioneer product.

Please read through these operating instructions so that you will know how to operate your model properly. After you have finished reading the instructions, put them in a safe place for future reference.

## Chapter 1

# Before you start

### Features

- **24-bit / 96 kHz compatible DAC**

This system is fully compatible with high sampling-rate discs, capable of delivering exceptional sound quality in terms of dynamic range, low-level resolution and high-frequency detail.

- **Surround sound entertainment with Dolby Digital and DTS software**

The built-in Dolby Digital and DTS decoders let you enjoy great surround sound with Dolby Digital and DTS discs.

- **Pure Cinema progressive scan video**

When connected to a progressive scan-compatible TV or monitor using the component video outputs, you can enjoy extremely stable, flicker free images, with the same frame refresh rate as the original movie.

- **Super VCD compatibility**

See *Disc / content format playback compatibility* on page 8.

- **Picture zoom**

See *Zooming the screen* on page 51.

- **MP3 and WMA compatibility**

See *Compressed audio compatibility* on page 9.

- **JPEG compatibility**

See *JPEG file compatibility* on page 9.

- **Graphical on-screen displays**

Setting up and using your DVD home theater system is made easy using the graphical on-screen displays.

- **Energy saving design**

This system is designed to use 0.5 W of power when in standby.

### What's in the box

Please confirm that the following accessories are in the main system box when you open it.

- Remote control
- AA/R6P dry cell batteries (HTD88DVD model – to confirm system operation) x2
- Video cable (yellow plugs)
- AM loop antenna
- FM wire antenna
- Power cord (Central and South American model x2)
- Power plug adapter (Central and South American model, PX model)
- These operating instructions
- Warranty card (Australian and PX model only)

Please confirm that the following accessories are in the speaker box when you open it.

- Speaker cables x6 (HTD8DVD model only)
- Non-skid pads for speakers (HTD8DVD model – 2 sheets) (HTD88DVD model – 1 sheet)

### Putting the batteries in the remote control

- **Open the battery compartment cover and insert the batteries as shown.**

Use two AA/R6P batteries and follow the indications (⊕, ⊖) inside the compartment. Close the cover when you're finished.

### Important

Incorrect use of batteries can result in hazards such as leakage and bursting. Please observe the following:

- Don't mix new and old batteries together.
- Don't use different kinds of battery together—although they may look similar, different batteries may have different voltages.
- Make sure that the plus and minus ends of each battery match the indications in the battery compartment.
- Remove batteries from equipment that isn't going to be used for a month or more.
- When disposing of used batteries, please comply with governmental regulations or environmental public instruction's rules that apply in your country or area.

H048 En

## Using the remote control

Keep in mind the following when using the remote control:

- Make sure that there are no obstacles between the remote and the remote sensor on the system unit.
- The remote has a range of about 7 m at an angle of less than 30°.
- Remote operation may become unreliable if strong sunlight or fluorescent light is shining on the system unit's remote sensor.
- Remote controllers for different devices can interfere with each other. Avoid using remotes for other equipment located close to this system.
- Replace the batteries when you notice a fall off in the operating range of the remote.

## Disc / content format playback compatibility

This player is compatible with a wide range of disc types (media) and formats. Playable discs will generally feature one of the following logos on the disc and/or disc packaging. Note however that some disc types, such as recordable CD and DVD, may be in an unplayable format—see below for further compatibility information.

Fujicolor CD

- KODAK Picture CD
-  is a trademark of Fuji Photo Film Co. Ltd.

This player supports the IEC's Super VCD standard for superior picture quality, dual soundtracks, and widescreen support.

Super Video CD (Super VCD)

## CD-R/RW compatibility

- This system will play CD-R and CD-RW discs recorded in CD Audio or Video CD/ Super VCD format, or as a CD-ROM containing MP3, WMA or JPEG files. However, any other content may cause the disc not to play, or create noise/distortion in the output.

- This system cannot record CD-R or CD-RW discs.
- Unfinalized CD-R/RW discs recorded as CD Audio can be played, but the full Table of Contents (playing time, etc.) will not be displayed.

### DVD-R/RW compatibility

- Compatible formats: DVD-Video, Video Recording (VR)\*  
\* *Edit points may not play exactly as edited; screen may go momentarily blank at edited points.*
- Unfinalized playback: No
- WMA/MP3/JPEG file playback on DVD-R/RW: No

### PC-created disc compatibility

Discs recorded using a personal computer may not be playable in this unit due to the setting of the application software used to create the disc. In these particular instances, check with the software publisher for more detailed information.

Discs recorded in packet write mode (UDF format) are not compatible with this player.

Check the DVD-R/RW or CD-R/RW software disc boxes for additional compatibility information.

### Compressed audio compatibility

- Compatible formats: MPEG-1 Audio Layer 3 (MP3), Windows Media Audio (WMA)
- Sampling rates: 32 kHz, 44.1 kHz or 48 kHz
- Bit-rates: Any (128 kbps or higher recommended)
- VBR (variable bit rate) MP3 playback: Yes
- VBR WMA playback: No
- WMA lossless encoding compatible: No

- DRM (Digital Rights Management) compatible: Yes (DRM-protected audio files will *not* play in this player). See also DRM in the *Glossary* on page 81.
- File extensions: .mp3, .wma (these must be used for the player to recognize MP3 and WMA files – do not use for other file types)
- File structure: Up to 999 files per folder

### About WMA

The Windows Media<sup>®</sup> logo printed on the box indicates that this player can playback Windows Media Audio content.

WMA is an acronym for Windows Media Audio and refers to an audio compression technology developed by Microsoft Corporation. WMA content can be encoded by using Windows Media<sup>®</sup> Player version 7, 7.1, Windows Media<sup>®</sup> Player for Windows<sup>®</sup> XP, or Windows Media<sup>®</sup> Player 9 Series.

*Microsoft, Windows Media, and the Windows logo are trademarks, or registered trademarks of Microsoft Corporation in the United States and/or other countries.*

### JPEG file compatibility

- Compatible formats: Baseline JPEG and EXIF 2.1\* still image files up to 8 megapixels are supported (maximum resolution is 5120 pixels x 5120 pixels).  
\* *File format used by digital still cameras*
- File extensions: .jpg (must be used for the player to recognize JPEG files – do not use for other file types)
- File structure: Up to 999 files per folder

## Chapter 2

## Connecting up

## Connecting the speakers

**Important**

- Before making or changing any rear panel connections, make sure that all the components are switched off and unplugged from the power supply.

Connect each speaker using the color-coded speaker cable. Match them to the colored labels above the speaker terminals.

*HTD88DVD model* – Speaker cables on the HTD88DVD model are factory connected directly to the speakers, so there is no need for the user to connect them to speaker terminals.

**Caution**

- These speaker terminals can be under **HAZARDOUS VOLTAGE**. When you connect or disconnect the speaker cables, to prevent the risk of electric shock, do not touch uninsulated parts before disconnecting the power cord.
- Do not connect any of the supplied speakers to any other amplifier. This may result in malfunction or fire. This system has been designed for best performance when connected to the supplied speakers. We do not, therefore, recommend that you connect and use other speakers with this system.

**1 Twist and pull off the protective shields on each wire.**

**2 Connect to the speaker terminals on the rear of the system unit.**

Match the colored wire with the color-coded label (above the tabs), then insert the colored wire into the red (+) tab and the other wire with the black (-) tab.

**3 HTD8DVD model only – Connect to the speaker terminals on the rear of the speakers in the same way.**

**Attaching the non-skid pads for front, center and surround speakers**

Remove the supplied non-skid pads from their paper backing, and apply them to the four corners of the bottom surface of each speaker.

**Placing the speakers**

Depending on the size and characteristics of your room, you can choose to place your speakers in one of two ways using this system:

- **Standard surround 5-spot setup** – This is a standard multichannel surround sound speaker setup for optimal 5.1 channel home theatre sound.

- **Front surround 3-spot setup** – This setup is ideal when rear surround speaker placement isn't possible or you want to avoid running long speaker cables in your listening area. Use this setup together with the Front Surround modes to take advantage of wall and ceiling reflections for a very realistic surround effect.

See *About the listening modes* on page 37 for more on using the different listening modes with each speaker setup.

Where you put your speakers in the room has a big effect on the quality of the sound. The following guidelines should help you to get the best sound from your system.

- The subwoofer can be placed on the floor. Ideally, the other speakers should be at about ear-level when you're listening to them. Putting the speakers on the floor (except the subwoofer), or mounting them very high on a wall is not recommended.
- For the best stereo effect, place the front speakers 2 m to 3 m apart, at equal distance from the TV.
- Install the center speaker above or below the TV so that the sound of the center channel is localized at the TV screen.
- When using a 5-spot setup, install the surround speakers slightly above ear level, if possible.

### Caution

- Make sure that all speakers are securely installed (if you choose to install the center speaker on top of the TV, be sure to secure it by suitable means). This not only improves sound quality, but also reduces the risk of damage or injury resulting from speakers being knocked over or falling in the event of external shocks such as earthquakes.

**Note**

- The front, center and surround speakers supplied with this system are magnetically shielded. However, placing them extremely close to a television may result in color distortion on the screen. If this happens, move the speakers a little further away and switch off the television for 15 to 30 minutes.
- The subwoofer is not magnetically shielded and so should not be placed near a TV or monitor.

## Wall-mounting the center and surround speaker system

*(The HTD88DVD model supports wall mounting of the surround speakers only)*

### Before mounting

- Remember that the speaker system is heavy and that its weight could cause the wood screws to work loose, or the wall material to fail to support it, resulting in the speaker falling. Make sure that the wall you intend to mount the speakers on is strong enough to support them. Do not mount on plywood or soft surface walls.
- Mounting screws are not supplied. Use screws that are suitable for the wall material and that will support the weight of the speaker.

**Note**

- If you are unsure of the qualities and strength of the walls, consult a professional for advice.
- Pioneer is not responsible for any accidents or damage that result from improper installation.

## Connecting to your TV

This system has three different kinds of video output that you can use to connect up your TV. Check the available inputs on your TV to see which you can use.

**Important**

- Do not connect a VCR between this system and your TV as DVD playback will be affected.
- **Use the supplied video cable to connect the VIDEO OUT jack to a video input on your TV.**

**Note**

- Placing the system unit too close to your TV may cause interference, especially if you're using an indoor antenna. If you notice interference, move the system unit away from the TV.

### Connecting using the S-video output

If your TV has an S-video input, you can use this instead of the standard video output for a better quality picture.

- Use an S-video cable (not supplied) to connect the S-VIDEO OUT to an S-video input on your TV.

Line up the small triangle below the jack with the same mark on the plug before plugging in.

**Note**

- The S-video output is switchable between S1 and S2 formats for compatibility with all TVs. See *Video Output settings* on page 63 for more on this.

### Connecting using the component video output

If your TV has component video inputs, you can use these instead of the standard video output to connect this system to your TV. This should give you the best quality picture from the three types of video output available.

- Use a component video cable (not supplied) to connect the COMPONENT VIDEO OUT to a set of component inputs on your TV.

**Note**

- The component video output is switchable between interlaced and progressive formats. See *Video Output settings* on page 63 and *Watching progressive scan video from the component video outputs* below for more on this.

### Watching progressive scan video from the component video outputs

Compared to interlace video, progressive scan video effectively doubles the scanning rate of the picture, resulting in a very stable, flicker-free image. Progressive scan video is available only from the component video output. There are a few things to keep in mind when switching the **Component Out** (page 63) setting to **Progressive**:

- When set to **Progressive**, there is no video output from the **VIDEO OUT** (composite) and **S** (S-video) jacks.
- If you want to display video on more than one monitor simultaneously, make sure the player is set to **Interlace**.
- If you connect a TV that is not compatible with a progressive scan signal and switch the setting to **Progressive**, you will not be able to see any picture at all. In this case, press **⏻** **STANDBY/ON** to put the system in standby, then press and hold the front panel **■** (stop) button for about 8 seconds until the display shows **Mem.Clr.?** Press the front panel **⏪⏪⏪** or **⏩⏩⏩** button so that the display shows **Interlace?** Press the front panel **▶/||** button to set to interlace and switch the system back on.

When TV format is set to **AUTO** or **NTSC**:

- When set to **Progressive**, PAL and NTSC discs are both output as progressive NTSC video. See also *TV format setting* on page 68.
- When set to **Progressive**, there is no video output from the **VIDEO** and **S-VIDEO** jacks. If you want to display video on more than one monitor simultaneously, make sure that it is set to **Interlace**. See also *TV format setting* on page 68.

When TV format is set to **PAL**:

- **Progressive** cannot be selected. See also *TV format setting* on page 68.

### Compatibility of this player with progressive-scan and high-definition TVs.

This player is compatible with progressive video Macro Vision System Copy Guard.

Consumers should note that not all high-definition television sets are fully compatible with this product and may cause artifacts to be displayed in the picture. In case of 525 progressive scan picture problems, it is recommended that the user switch the connection to the 'standard definition' output (Interlace). If there are questions regarding our TV set compatibility with this model, please contact our customer service center.

## Listening to TV audio through this system

You can connect the audio output of your TV to this system so that broadcast TV sound is played through this system.

- **Connect a stereo audio cable (not supplied) from the audio outputs of your TV to the TV IN jacks on this system.**

### Tip

- If you find that the TV audio is distorting when played through this system, you can set the input attenuator to reduce the input signal level. See *Optional system settings* on page 67 to do this.

## Using this unit with a Pioneer plasma display

If you have a Pioneer plasma display (This system is compatible with all Pioneer plasma displays from 2003 onward), you can use an SR+ cable (see note below) to connect it to this unit and take advantage of various convenient features, such as automatic video input switching of the plasma display when the input is changed.

- **Use a 3-ringed miniplug SR+ cable to connect the CONTROL IN jack of this unit through a media receiver to the CONTROL OUT jack of your plasma display.**

Before you can use the extra SR+ features, you need to make a few settings in the unit. See *SR+ control options for Pioneer plasma displays* on page 59 for detailed instructions.

## Using the SR+ mode with a Pioneer plasma display

When connected using an SR+ cable, a number of features (such as automatic video input switching and volume muting on the plasma display) become available to make using this unit with your Pioneer plasma display even easier.

See also *SR+ control options for Pioneer plasma displays* on page 59 for information on setting up the unit.

### 1 Make sure that the plasma display and this unit are switched on and that they are connected with an SR+ cable.

See *Using this unit with a Pioneer plasma display* above for more on connecting these components.

### 2 To switch SR+ mode on/off, press SR+ (SHIFT + 7).

The front panel display shows the new setting; **SR+ ON** or **SR+ OFF**.

- If **SR+ Error** shows in the display, it means there is a communication problem between the unit and the plasma display. Check all connections and retry.

#### Note

- The 3-ringed SR+ cable from Pioneer is commercially available under the part number ADE7095. Contact the Pioneer Customer Support division for more information on obtaining an SR+ cable.
- You won't be able to use the remote sensor of this unit with the **CONTROL IN** jack of this unit connected to the **CONTROL OUT** jack of your plasma display. You can use the remote sensor of the plasma display (even in standby) as long as the power isn't switched off.

- The automatic volume muting feature is enabled separately; see *SR+ control options for Pioneer plasma displays* on page 59. (You can also use the System Setup menu to switch the SR+ mode of this unit.)
- If you disconnect the SR+ cable or switch the plasma display off while SR+ is on, the setting automatically reverts to **SR+ OFF**. This displays an error if you switch the input of the unit with the plasma display switched off. Likewise, if this unit is switched off, the link with the plasma display will be terminated.

## Connecting the supplied antennas

The supplied antennas provide a simple way to listen to AM and FM radio. If you find that reception quality is poor, an outdoor antenna should give you better sound quality—see *Connecting external antennas* on page 71 for more on how to do this.

### Assembling the loop antenna

**1** Bend the stand in the direction indicated.

**2** Clip the loop onto the stand.

### AM loop antenna

**1** Pull off the protective shields of both AM antenna wires.

**2** Press the antenna terminal tabs to open and insert one wire into each terminal.

**3** Release the tabs to secure the AM antenna wires.

**4** Place the AM antenna on a flat surface and point in the direction giving the best reception.

Avoid placing near computers, television sets or other electrical appliances and do not let it come into contact with metal objects.

 **Note**

- It's also possible to fix the AM antenna to a wall using two screws (see illustration below). Before fixing, make sure that the reception is satisfactory.

## FM wire antenna

- **Connect the FM wire antenna to the FM UNBAL 75 Ω terminal in the same way as the AM loop antenna.**

For best results, extend the FM antenna fully and fix to a wall or door frame. Don't drape loosely or leave coiled up.

 **Note**

- The signal ground (⚡) is designed to reduce noise that occurs when an antenna is connected. It is not an electrical safety ground.

## Connecting the power

Before connecting the power and switching on for the first time make sure that everything is connected properly.

- 1 **Plug one end of the supplied power cord into the AC INLET.**
- 2 **Plug the other end into a household power outlet.**

 **Note**

- See *Connecting auxiliary components* on page 72 for details of other connections you can make with this system.

## Chapter 3

## Controls and displays

## Front panel

- 1 **⏻ STANDBY/ON** (page 26)  
Press to switch the system on or into standby.
- 2 **DIRECT PLAY buttons** (page 30)  
Press to start playback of any disc in the player.
- 3 **DVD/CD** (page 29)  
Press to switch to the **DVD/CD** function. Also starts/pauses/resumes playback of the currently loaded disc.
- 4 **TUNER FM/AM/ST.** (page 34)  
Press to switch to the tuner function, then between bands and station presets.
- 5 **TV/L1/L2** (page 36)  
Press to switch between the external sources, **TV**, **LINE 1 (L1)** and **LINE 2 (L2)**.
- 6 **⏮⏮⏮ and ⏭⏭⏭**  
Press to skip tracks/chapters; press and hold to scan backwards/forwards.
- 7 **■**  
Press to stop playback.
- 8 **▶/⏸**  
Press to start or resume playback. During playback, press to pause; press again to restart playback.
- 9 **DISC SKIP** (page 30, 32)
  - During playback, press to start playing the next disc in the player.
  - If the disc tray is open while no disc is playing, the tray rotates one disc space.
  - If the disc tray was opened using the **EXCHANGE** button, then pressing **DISC SKIP** rotates the disc tray two disc spaces.
- 10 **DISC TRAY**  
Press to open the disc tray.
- 11 **VOLUME**  
Turn to adjust the volume.
- 12 **POWER**  
Press to turn the system on or off.
- 13 **VOLUME**  
Turn to adjust the volume.
- 14 **DISC TRAY**  
Press to open the disc tray.
- 15 **DISC SKIP**  
Press to skip to the next disc.
- 16 **REPEAT**  
Press to repeat the current disc.
- 17 **CD MODE/TIMER**  
Press to toggle between CD mode and timer.
- 18 **DISPLAY**  
The display window shows track numbers and other information.
- 19 **PRESET**  
Press to select a preset station.
- 20 **REMOTE SENSING**  
The remote sensor receives signals from the remote control.
- 21 **MICROPHONE**  
The microphone input for external speakers.

## 10 EXCHANGE (page 32)

Press during playback to open the disc tray without stopping playback. Press again to close the disc tray.

## 11 ▲ OPEN/CLOSE

Press to open/close the disc tray.

## 12 Disc tray

## 13 VOLUME control

Use to adjust the volume.

## 14 Timer indicator (page 55)

Lights when the timer is set.

## 15 RW COMPATIBLE

This mark indicates compatibility with DVD-RW discs recorded on a DVD recorder in Video Recording (VR) mode.

## 16 CD MODE indicator (page 43)

Lights when the CD Mode is on. In this mode, the system only plays audio CDs and WMA/MP3 discs.

## 17 Display

See *Display* on page 21 for detailed information.

## 18 DISC indicators

Shows which disc spaces are currently occupied.

## 19 MIC volume (page 36)

## 20 MIC jack (page 36)

## 21 PHONES jack

Headphone jack.

## Display

## 1 Tuner indicators (page 34)

Lights when a broadcast is being received.

Lights when a stereo FM broadcast is being received in auto stereo mode.

Lights when FM mono reception is selected.

Lights when a disc is playing.

## 3 MIDNIGHT (page 41)

Lights when the Midnight mode is selected.

## 4 QUIET (page 41)

Lights when the Quiet mode is selected.

**5** 

Lights to indicate random or repeat play of all discs loaded.

**6 PGM** (page 47)

Lights when a program list has been programmed.

**7 RPT and RPT-1** (page 45)

**RPT** lights during repeat play. **RPT-1** lights during repeat one-track play.

**8 RDM** (page 46)

Lights during random play.

**9 ATT** (page 67)

Lights when the input attenuator is active for the currently selected analog input.

**10 REC MODE** (page 72)

Lights when Rec Mode is on.

**11 Timer indicators** (page 55)

Lights when the timer is set

Lights when the sleep timer is active

**12  PRO LOGIC II** (page 38)

Lights during Dolby Pro Logic II decoding.

**13  DIGITAL** (page 38)

Lights during playback of a Dolby Digital source.

**14 Speaker indicators**

These show which speakers are being used to output the current source (they are not placement diagrams). The illustrations below show some example displays.

*5.1 channel surround sound*

*Stereo (2.1 channel) sound*

*3.1 channel sound with Dialogue enhancement on the center channel*

*5.1 channel surround sound with Virtual Surround Back mode active*

(When headphones are connected, none of the speaker indicators are lit.)

**15 PRGSVE** (page 63)

Lights when progressive scan video output is selected.

**16 ADV.SURR.** (page 39)

Lights when one of the Advanced or Front Surround listening modes is selected.

**17 ** (page 38)

Lights during playback of a DTS source.

**18 kHz / MHz**

Indicates the unit of the frequency shown in the character display (**kHz** for AM, **MHz** for FM)

**19 Character display****20 ** (page 52)

Lights during multi-angle scenes on a DVD disc.

## Remote control

### Important

- Functions printed in green on the remote control are accessed using the **SHIFT** button. Press the function button you want while holding down **SHIFT**.

**1** **⏻ STANDBY/ON** (page 26)  
Press to switch the system on or into standby.

**2** **▲ OPEN/CLOSE**  
Press to open/close the disc tray.

**3** **Function select buttons**  
Press to select the source you want to listen to (**DVD/CD, TUNER, TV, LINE**).

**4** **SOUND MODE**  
Use to adjust the tone and effect levels/ settings. (pages 38 to 42)

**5** **Surround sound and enhancement buttons**

**SURROUND** (page 38)  
Use to select a Surround mode.

**DIALOGUE (SHIFT + SUR MENU)**  
(page 41)  
Use to select a Dialogue mode.

**ADVANCED** (page 39)  
Use to select an Advanced Surround mode.

**VIR. SB (SHIFT + ADVANCED)** (page 41)  
Press to switch the Virtual Surround Back speaker effect on/off.

**FRONT SURROUND** (page 39)  
Use to select a Front Surround listening mode.

**BASS MODE (SHIFT + FRONT SURROUND)** (page 42)  
Use to select a Bass Mode.

**6** **DVD buttons**

**AUDIO** (page 51)  
Press to select an audio channel or language.

**SUBTITLE** (page 51)  
Press to display/change the subtitle display.

**ANGLE** (page 52)  
Press to change camera angle during DVD multi-angle scene playback.

**ZOOM** (page 51)

Press to change the screen zoom level.

**7 ROOM SETUP** (page 27)

Press to start Room Setup.

**8 Disc selection buttons****DISC select buttons** (page 29)

Use to select discs in the player.

**DISC SKIP / CD MODE**

- During playback, press to start playing the next disc in the player.
- If the disc tray is open while no disc is playing, the tray rotates one disc space.
- If the disc tray was opened using the **EXCHANGE** button (front panel only), then pressing **DISC SKIP** rotates the disc tray two disc spaces. (page 30, 32)
- Use with **SHIFT** for **CD MODE**: Use to switch CD Mode on/off. (page 43)

**9 MUTE**

Press to mute all sound from the speakers and headphones (press again to cancel).

**10 VOLUME**

Use to adjust the volume.

**11 HOME MENU / SYSTEM SETUP**

- Press to display (or exit) the on-screen menu for Initial Settings, Play Mode functions, etc.
- Use with **SHIFT** for **SYSTEM SETUP**: Use to make various system and surround sound settings. (page 58)

**12 DVD MENU / TOP MENU**

- Press to display a DVD-Video disc menu, or the Disc Navigator if a VR mode DVD-RW, CD, Video CD/Super VCD, WMA/MP3 or JPEG disc is loaded.
- Use with **SHIFT** for **TOP MENU**: Use to display the top menu of a DVD disc in the play position (this may be the same as pressing **DVD MENU**).

**13 Cursor buttons, ENTER and tuning buttons****Cursor buttons**

Use the cursor buttons (**↑/↓/←/→**) to navigate on-screen displays and menus.

**ENTER**

Press to select an option or execute a command.

**TUNE +/-**

Use to tune the radio.

**ST +/-**

Use to select station presets when listening to the radio.

**14 QUIET/MIDNIGHT** (page 41)

Use to select Quiet and Midnight listening modes.

**15 RETURN**

Press to return to a previous menu screen.

**16 Playback controls**

Press to start or resume playback.

Use for reverse slow motion playback, frame reverse and reverse scanning.

Use for forward slow motion playback, frame advance and forward scanning.

Press to jump to the beginning of the current chapter/track, then to previous chapters/tracks.

Press **SHIFT + ◀◀** to jump to the beginning of the previous folder

Press to jump to the next chapter/track (or folder by pressing **SHIFT + ▶▶**).

**II**

Press to pause playback; press again to restart.

Press to stop playback.

**17 Number buttons and SHIFT functions**

Use the number buttons for selecting chapters/tracks from a disc directly; use with the **SHIFT** button to access the functions printed in green.

**PROGRAM (SHIFT + 1)** (page 47)

Use to program/play a program list.

**REPEAT (SHIFT + 2)** (page 45)

Use to select a repeat play mode.

**RANDOM (SHIFT + 3)** (page 46)

Use to select a random play mode.

**TEST TONE (SHIFT + 4)** (page 60)

Use to output the test tone (for speaker setup).

**CH LEVEL (SHIFT + 5)** (page 60)

Use to adjust the speaker level.

**TIMER (SHIFT + 6)** (page 55)

Press to display the clock and to access the timer menu.

**SR+ (SHIFT + 7)** (page 17)

Press to switch SR+ on or off.

**DISPLAY (SHIFT + 8)** (page 52)

Press to display/change disc information shown on-screen.

**DIMMER (SHIFT + 9)**

Press to switch between normal and dimmed front panel display.

**CLEAR**

Press to clear an entry.

**ENTER**

Press to select menu options, etc. (works exactly the same as the **ENTER** button in **13** above).

**18 TV CONTROL buttons**

These buttons are dedicated to control the TV assigned to the **TV** button.

Use to turn on/off the power of the TV.

**INPUT**

Use to select the TV function.

**TV CHANNEL +/-**

Use to select channels.

**TV VOLUME +/-**

Use to adjust the volume on your TV.

**19 SHIFT**

Use to access the functions/commands printed in green on the remote (press the button for the function you want while holding down **SHIFT**).

## Chapter 4

## Getting started

## Switching on and setting up

After making sure everything is connected up properly, you're ready to switch on. The first thing to do is to tell the system what kind of TV you're using, standard or widescreen.

After that you can set up the surround sound for your room, and set the clock so that you can use the timer features.

- 1 Press **STANDBY/ON** (on the remote or on the front panel) to switch the system on.

Also make sure that your TV is switched on and that the video input is set to this system. You should see the welcome screen displayed.

- 2 Press **ENTER** to move on to the next screen.

- 3 Use the **←/→** (cursor left/right) buttons to select either 'Wide screen' or 'Standard size screen' according to the kind of TV you have, then press **ENTER**.

See also *Screen sizes and disc formats* on page 78 if you're not sure which one to choose.

#### 4 Press ENTER again to finish setting up.

- Use the **→** (cursor right) button to select **BACK** then press **ENTER** if you want to go back and change the setting you just made.

#### Tip

- You can also use the **▲ OPEN/CLOSE** button on the front panel or the function buttons (**DVD/CD**, **TUNER**, etc.) to switch the system on from standby.

#### FAQ

- *The system switches on, but there is nothing displayed on my TV.*  
Make sure that the TV is set to the correct video input (not a TV channel). For example, if you connected this system to the **VIDEO 1** input on your TV, switch your TV to **VIDEO 1**.

### Setting the clock

Setting the clock allows you to use the timer features.

- 1 Press **TIMER (SHIFT + 6)**.
  - If you are adjusting the clock, rather than setting it for the first time, press **TIMER (SHIFT + 6)** again.

2 If '**Clock ADJ?**' isn't already shown in the display, press **←** or **→** (cursor left or right) until you see it.

3 Press **ENTER**.

4 Use the **↑/↓** (cursor up/down) buttons to set the hour.

5 Press **ENTER**.

6 Use the **↑/↓** (cursor up/down) buttons to set the minute.

7 Press **ENTER** to confirm.

The display flashes to indicate the clock is set.

#### Tip

- Press **TIMER (SHIFT + 6)** anytime to display the clock.

#### Note

- If you unplug the system from the wall outlet, or there is a power outage, you will need to set the clock again.

### Using the Room Setup

After you have set up your speakers to your liking (see *Placing the speakers* on page 11), make sure you calibrate your system for surround sound. This is a quick and easy way to get good surround sound for your room. For more detailed surround sound setup, see *Surround sound and other settings* on page 58.

1 If the system isn't already on, press **⏻ STANDBY/ON** to switch it on.

2 Press **ROOM SETUP**.

- If you have previously set up the room type and seating position, the display will show the current room settings.

### 3 Press ENTER.

### 4 Use the ↑/↓ (cursor up/down) buttons to select a room type then press ENTER.

Choose one of the following depending on your room size:

- **S** – Smaller than average room
- **M** – Average room
- **L** – Larger than average room

### 5 Use the ↑/↓ (cursor up/down) buttons to select a seating position setting, then press ENTER.

Choose one of the following depending on where your main listening position is:

- **Fwd** – If you are nearer to the front speakers than the surround speakers
- **Mid** – If you are equal distance from the front and surround speakers
- **Back** – If you are nearer to the surround speakers than the front speakers

#### Note

- The Room Setup automatically sets up channel levels and channel delay. If you have already set the channel levels manually (see *Setting the channel levels* on page 60), you will see **Room Set?** in the display when you first press the **ROOM SETUP** button. If you continue, the previous settings will be overwritten.

## Setting up the remote to control your TV

You can set up the supplied remote to control your TV using the **TV CONTROL** buttons.

### 1 Switch on your TV.

### 2 Find the name of the manufacturer of your TV in the Preset Code List on page 80.

Next to each manufacturer is one or more three digit codes. These tell the remote what kind of TV you have.

If the name of the manufacturer of your TV does not appear in the table, you won't be able to set up this remote to control your TV. Note that there are also cases where the preset codes listed for a manufacturer in the table may not work for your TV.

### 3 Point the remote at your TV, hold down the CLEAR button, then enter the three digit code for your TV.

The remote transmits an on/off signal to the TV. If you've entered the correct code, your TV should switch off.

If your TV doesn't turn off, repeat the procedure using the next code in the list until your TV switches off successfully. Once set, you can then use the individual TV controls shown below.

Button	What it does
	Switches your TV on or into standby.
<b>CHANNEL +/-</b>	Changes the TV channel.
<b>VOLUME +/-</b>	Adjusts the volume.
<b>INPUT</b>	Switches the TV's input between the built in TV tuner and an external video source.

#### Note

- The default setting is for a Pioneer TV.

## Using the on-screen displays

For ease of use, this system makes extensive use of graphical on-screen displays (OSDs). You should get used to the way these work as you'll need to use them when setting up the system, using some of the playback features, such as program play, and when making more advanced settings for audio and video.

All the screens are navigated in basically the same way, using the cursor buttons to change the highlighted item and pressing **ENTER** to select it.

Button	What it does
<b>HOME MENU</b>	Displays/exits the on-screen display
<b>← ↑ ↓ →</b>	Changes the highlighted menu item
<b>ENTER</b>	Selects the highlighted menu item (both <b>ENTER</b> buttons work in exactly the same way)
<b>RETURN</b>	Returns to the main menu without saving changes

### Important

- Throughout this manual, 'Select' means use the cursor buttons to highlight an item on-screen, then press **ENTER**.

### Tip

- The button guide at the bottom of every OSD screen shows you which buttons you'll need to use for that screen.

## Playing discs

The basic playback controls for playing DVD, CD, Video CD/Super VCD and WMA/MP3 discs are covered here. Further functions are detailed in chapter 6.

### 1 If the system isn't already on, press **⏻** **STANDBY/ON** to switch on.

If you're playing a DVD or Video CD/Super VCD, also turn on your TV and make sure that it is set to the correct video input.

**2 Press ▲ OPEN/CLOSE to open the disc tray.**

**3 Load a disc.**

Load a disc with the label side facing up in the front-most disc space, using the disc tray guide to align the disc. (If you're loading a double-sided DVD disc, load it with the side you want to play face down.)

If you want to load more discs, press **DISC SKIP** (remote or front panel) to rotate the disc tray. You can load up to five discs at once.

- Do not place discs in the two partially accessible disc spaces, as it is easy to misalign them. Use only the front-most disc space.
- Do not load more than one disc in a space.
- Before loading or removing discs, always wait for the disc mechanism to come to a complete stop.
- Do not rotate the disc tray by hand. Always use the **DISC SKIP** button.
- Sometimes, when the disc tray mechanism is moving, the controls are inoperative.

**4 Press ► (remote) or ►/II (front panel) to start playback of the disc loaded in the front-most disc space.**

Alternatively, use the **DVD/CD** or **DISC** buttons on the remote, or the **DIRECT PLAY** buttons on the front panel to start playback of other discs.

If you're playing a DVD or Video CD/Super VCD, a menu may appear. See *DVD-Video disc menus* on page 33 and *Video CD/Super VCD PBC menus* on page 34 for how to navigate these.

If you're playing an MP3, WMA or JPEG disc, it may take a few seconds before playback starts, depending on the complexity of the file structure on the disc.

If you loaded a CD/CD-R/RW containing JPEGs, a slideshow will start. See *Viewing JPEG discs* on page 53 for more on playing these discs.

- See also *Options* on page 65 if the disc contains both WMA/MP3 audio files and JPEG picture files.

**5 Use the VOLUME +/- button (or the front panel VOLUME knob) to adjust the volume.**

## Basic playback controls

The following table shows the basic controls on the remote for playing discs. You can find other playback features in *Playing discs* on page 43.

Button	What it does
	Starts playback. <i>DVD and Video CD:</i> If the display shows <b>Resume</b> or <b>Last Mem</b> playback starts from the resume or last memory point (see also <i>Resume and Last Memory</i> below.)
	Pauses a disc that's playing, or restarts a paused disc.
	Stops playback. <i>DVD and Video CD:</i> The display shows <b>Resume</b> . Press  again if you want to cancel the resume function. (See also <i>Resume and Last Memory</i> below.)
	Press to start fast reverse scanning. Press  (play) to resume normal playback.
	Press to start fast forward scanning. Press  (play) to resume normal playback.
	Skips to the start of the current track or chapter, then to previous tracks/chapters.
	Skips to the next track or chapter.
<b>FOLDER +/-</b>	Skips to the next/previous folder when playing MP3 or WMA discs.

Button	What it does
<b>Numbers</b>	Use to enter a title/track number. Press <b>ENTER</b> to select (or wait a few seconds). <ul style="list-style-type: none"> <li>• If the disc is stopped, playback starts from the selected title (for DVD) or track number (for CD/Video CD/Super VCD/WMA/MP3).</li> <li>• If the disc is playing, playback jumps to the start of the selected chapter or track.</li> </ul>

#### Note

- You may find with some DVD discs that some playback controls don't work in certain parts of the disc. This is not a malfunction.

### Using the front panel controls

The  **OPEN/CLOSE** and  (stop) buttons on the front panel work the same way as the remote control equivalents.

The front panel scan and skip buttons (  and            ) are combined. Press once for chapter/track skip, or press and hold for scanning.

### Resume and Last Memory

When you stop playback of a DVD or Video CD disc, **Resume** is shown in the display indicating that you can resume playback again from that point.

If the disc tray is not opened, the next time you start playback the display shows **Resume** and playback resumes from the resume point.

*For DVD discs only:* If you change discs using the **DISC SKIP**, **DISC** or **DIRECT PLAY** buttons, or take the disc out of the player, the play position is stored in memory. When you load the disc next time, the display shows **Last Mem** and you can resume playback (this works for up to five discs).

If you want to clear the resume/last memory point, press **■** (stop) while **Resume** or **Last Mem** is displayed.

#### Note

- When a Video CD is loaded, the Resume point is lost if the system is switched off, or switched to a function other than **DVD/CD**.
- For the Last Memory function to work, you must press **■** (stop) to stop playback before opening the disc tray or changing the disc.
- The Last Memory function doesn't work with VR format DVD-RW discs.

## Changing discs

You can change any of the discs not in the play position using the **EXCHANGE** button on the front panel. Because the disc in the play position is unaffected, you can use this button to change discs even during playback.

### 1 Press **EXCHANGE** to open the disc tray.

- The **EXCHANGE** button only works when there is at least one disc loaded.

### 2 Load a disc with the label side facing up, using the disc tray guide to align the disc.

- If you want to load more discs, press **DISC SKIP** to rotate the disc tray two disc spaces.
- Before loading or removing discs, always wait for the disc mechanism to come to a complete stop.
- Load discs only in the two fully accessible disc spaces. Do not try and load discs into any of the other spaces; they may not load correctly and cause the system to malfunction.
- Do not rotate the disc tray by hand. Always use the **DISC SKIP** button.
- Do not obstruct the movement of the disc tray.

### 3 Press **EXCHANGE** or **▲ OPEN/CLOSE** to close the disc tray.

- Always use the **▲ OPEN/CLOSE** or **EXCHANGE** button to close the disc tray after exchanging discs. Never push the disc tray shut by force.

#### FAQ

- *After I load a DVD disc, it ejects automatically after a few seconds!*

Most likely, the disc is the wrong region for your system. The region number should be printed on the disc; check it against the region number of the system (which you can find on the rear panel). See also *DVD Video regions* on page 69.

If the region number is OK, it may be that the disc is damaged or dirty. Clean the disc and look for signs of damage. See also *Using and taking care of discs* on page 69.

- *Why won't the disc I loaded play?*

First check that you loaded the disc the right way up (label side up), and that it's clean and not damaged. See *Using and taking care of discs* on page 69 for information on cleaning discs.

If a disc loaded correctly won't play, it's probably an incompatible format or disc type, such as DVD Audio or DVD-ROM. See *Disc / content format playback compatibility* on page 8 for more on disc compatibility.

- *I have a widescreen TV so why are there black bars at the top and bottom of the screen when I play some discs?*

Some movie formats are such that even when played on a widescreen TV, black bars are necessary at the top and bottom of the screen. This is not a malfunction.

- *I have a standard (4:3) TV and set the system to show widescreen DVDs in pan & scan format, so why do I still get black bars top and bottom with some discs?*

Some discs override the display preferences of the system, so even if you have **4:3 (Pan & Scan)** selected, those discs will still be shown in letterbox format. This is not a malfunction.

## DVD-Video disc menus

Many DVD-Video discs contain menus from which you can select what you want to watch. They may give access to additional features, such as subtitle and audio language selection, or special features such as slideshows. See the disc packaging for details.

Sometimes DVD-Video menus are displayed automatically when you start playback; others only appear when you press **DVD MENU** or **TOP MENU**.

Button	What it does
<b>TOP MENU (SHIFT + DVD MENU)</b>	Displays the 'top menu' of a DVD disc—this varies with the disc.
<b>DVD MENU</b>	Displays a DVD disc menu—this varies with the disc and may be the same as the 'top menu'.
<b>← ↑ ↓ →</b>	Moves the cursor around the screen.

Button	What it does
<b>ENTER</b>	Selects the current menu option.
<b>RETURN</b>	Returns to the previously displayed menu screen.
<b>Numbers</b>	Highlights a numbered menu option (some discs only). Press <b>ENTER</b> to select.

## Video CD/Super VCD PBC menus

Some Video CD/Super VCDs have menus from which you can choose what you want to watch. These are called PBC (Playback control) menus.

You can play a PBC Video CD/Super VCD without having to navigate the PBC menu by pressing **■** (stop) then starting playback using a number button to select a track, rather than **▶** (play) (or **▶/||** on the front panel).

Button	What it does
<b>RETURN</b>	Displays the PBC menu.

Button	What it does
<b>Numbers</b>	Selects a numbered menu option.
<b>◀◀</b>	Displays the previous menu page (if there is one).
<b>▶▶</b>	Displays the next menu page (if there is one).
<b>ENTER</b>	Press to select highlighted menu option.

## Listening to the radio

The tuner can receive both FM and AM broadcasts, and lets you memorize your favorite stations so you don't have to manually tune in every time you want to listen.

**1** If the system isn't already on, press  **STANDBY/ON** to switch on.

**2** Press **TUNER** to switch to the tuner, then press repeatedly to select the **AM** or **FM** band.

The display indicates the tuner band and the frequency.

- If you're using the front panel controls, the **TUNER** button switches between FM, AM and station presets (see *Memorizing stations* on page 35).

**3** **Tune to a frequency.**

There are three tuning modes—manual, auto, and high-speed:

- **Manual tuning:** Press **TUNE +/-** repeatedly to change the displayed frequency.
- **Auto tuning:** Press and hold **TUNE +/-** until the frequency display starts to move, then release. The tuner will stop on the next station it finds. Repeat to search for other stations.
- **High-speed tuning:** Press and hold **TUNE +/-** until the frequency display starts to move rapidly. Keep the button held down until you reach the frequency you want. If necessary, fine tune the frequency using the manual tuning method.

#### Tip

- You can use the **◀◀◀** and **▶▶▶** buttons on the front panel instead of the **TUNE +/-** buttons.

## Improving poor FM reception

If you're listening to an FM station in stereo but the reception is weak, you can improve the sound quality by switching to mono.

**1** Press **SYSTEM SETUP (SHIFT + HOME MENU)**.

**2** Use the **←/→** (cursor left/right) buttons to choose 'FM Mode?', then press **ENTER**.

**3** Use the **↑/↓** (cursor up/down) buttons to select 'FM Mono' or 'FM Auto', then press **ENTER**.

Select **Auto** in step **3** to switch back to auto-stereo mode (the stereo indicator lights when receiving a stereo broadcast).

## Memorizing stations

You can save up to 30 station presets so that you always have easy access to your favorite stations without having to tune in manually each time.

**1** **Tune to an AM or FM radio station.**

For the FM band, select mono or auto-stereo reception as necessary. This setting is saved along with the preset.

**2** Press **SYSTEM SETUP (SHIFT + HOME MENU)**.

**3** Use the **←/→** (cursor left/right) buttons to choose 'St. Memory?' then press **ENTER**.

**4** Use the **↑/↓** (cursor up/down) buttons to select the station preset you want.

There are 30 preset locations; each can store one station preset.

**5** Press **ENTER** to save the station preset.

#### Note

- If the system is unplugged from the power supply completely, saved stations will remain for several days, after which you'll have to save them again.

## Listening to station presets

- 1 **Make sure the TUNER function is selected.**
- 2 **Use ST +/- or the number buttons to select a station preset.**
  - If you are using the front panel controls, press **TUNER FM/AM/ST.** until you're in station preset mode, then use the ◀◀◀◀ and ▶▶▶▶ buttons to select a station preset.

## Listening to other sources

You can connect up to three external sources (TV, satellite receiver, etc.) to this system, including one digital source. See also *Listening to TV audio through this system* on page 16 and *Connecting auxiliary components* on page 72.

- 1 **If the system isn't already on, press ⏻ STANDBY/ON to switch on.**  
Also make sure that the external source (TV, satellite receiver, etc.) is switched on.
- 2 **Select the source you want to listen to.**
  - If you're using the remote control, press **TV** to select the **TV** input, or use the **LINE (L1/L2)** button to select the **LINE 1** or **LINE 2** input.
  - The **TV/L1/L2** button on the front panel switches between the three inputs.
- 3 **If necessary, start playback of the external source.**

## Singing karaoke

Using the karaoke features you can plug in a microphone and mix the sound of your own voice with a backing track. The backing track can be anything you like, from a song on the radio, to a dedicated DVD karaoke disc.

- 1 **Set the MIC LEVEL to minimum.**
- 2 **Plug in the microphone.**  
The mic jacks is located on the front panel.
  - If the microphone has an on/off switch, make sure it's on.
- 3 **Load a karaoke backing disc or tape.**  
You can also use the radio or a component connected to the auxiliary inputs as source material for a backing track.
- 4 **To change the mix (Video CD/Super VCD only), press AUDIO.**  
Pressing repeatedly switches between:
  - **STEREO** – Use for backing tracks with no vocals
  - **L CH** – Left channel only. Use for tracks with the vocal recorded in the right channel.
  - **R CH** – Right channel only. Use for tracks with the vocal recorded in the left channel.
- 5 **Play the backing track.**
- 6 **Adjust the MIC VOL knob to get the sound you want.**  
To avoid unpleasant feedback, make sure you don't point the microphone(s) at the speakers.
- 7 **Sing!**
  - Depending on the microphone level, the sound of the disc may distort. If this happens, turn down the volume.

## Chapter 5

# Listening to your system

### About the listening modes

As explained in *Placing the speakers* on page 11, there are two basic surround speaker setup options available. Of course you can select any of the listening modes regardless of how you place your speakers, but you will achieve the best surround effect by using the listening modes in conjunction with your speaker setup:

- **Standard surround 5-spot setup** – Use the Standard (*Listening in surround sound* on page 38) and Advanced (*Using the Advanced Surround effects* on page 39) surround listening modes with this setup.
- **Front surround 3-spot setup** – See *Using Front Surround* on page 39 for the options available with this speaker setup.

Make sure you have completed *Using the Room Setup* on page 27. For a more detailed surround sound setup, see *Using the System Setup menu* on page 58.

#### Note

- Certain features explained in this section may not be possible depending on the source (for example, 88.2 kHz / 96 kHz sources), or a conflicting system setting. See *Error Messages* on page 77 for more on this.

### Auto listening mode

The Auto listening mode is the simplest way to listen to any source as it was mastered: the output from the speakers mirrors the channels from the source material.

- **Press SURROUND to select the 'Auto' listening mode.**

If the source is Dolby Digital or DTS, the  **DIGITAL** or **DTS** indicator on the front panel lights.

#### Note

- Any previously active Dolby Pro Logic or Advanced Surround mode is canceled when Auto listening mode is selected.

## Listening in surround sound

You can listen to any source—stereo or multichannel, analog or digital—in surround sound. Surround sound is generated from stereo sources using one of the Dolby Pro Logic decoding modes.

- Press **SURROUND** repeatedly to select a listening mode (or press **SURROUND** then use the **↑/↓** (cursor up/down) buttons).

The listening mode choices that appear in the display will vary according to the type of source that's playing.

- **Auto** – See *Auto listening mode* above.
- **Dolby Digital / DTS** – Dolby Digital or DTS decoding (depending on the source).
- **Pro Logic** – 4.1 channel surround sound for use with any two-channel source
- **PL II Movie** – Pro Logic II 5.1 channel surround sound, especially suited to movie sources, for use with any two-channel source
- **PL II Music** – Pro Logic II 5.1 channel surround sound, especially suited to music sources, for use with any two-channel source (see also *Dolby Pro Logic II Music settings* below)
- **Stereo** – See *Listening in stereo* below

### Note

- When listening in **Dolby Digital / DTS** mode, two-channel material will automatically be played in surround sound using Dolby Pro Logic II decoding.
- Dolby Digital / DTS sources that use only the center channel cannot be played back in surround sound.

## Dolby Pro Logic II Music settings

When listening in Dolby Pro Logic II Music mode, there are three further parameters you can adjust: Center Width, Dimension, and Panorama.

**1 With Dolby Pro Logic II Music mode active, press SOUND MODE.**

**2 Use the **←/→** (cursor left/right) buttons to select 'C Width', 'Dimen.' or 'Pnrm.'**

- **C Width** (Center Width): Makes the center channel wider (higher settings) or narrower (lower settings)
- **Dimen.** (Dimension): Makes the sound more distant (minus settings), or more forward (positive settings)
- **Pnrm.** (Panorama): Creates more spacious surround sound

**3 Use the **↑/↓** (cursor up/down) buttons to adjust the setting.**

Center Width is adjustable between **0** and **7**; Dimension between **-3** and **+3**. Panorama is **On** or **Off**.

**4 Press ENTER to confirm.**

## Using the Advanced Surround effects

Advanced Surround effects can be used with multichannel or stereo sources for a variety of additional surround sound effects. The 5-spot setup described in *Placing the speakers* on page 11 should be used with these effects.

For more options, see *Adjusting the Advanced and Front Surround effect level* below.

- Press **ADVANCED** to select an Advanced Surround mode (or press **ADVANCED** then use the **↑/↓** (cursor up/down) buttons).

Press repeatedly to select from:

- **Adv. Movie** – Gives a movie theater-type sound
- **Adv. Music** – Gives a concert hall-type sound
- **Expanded** – Creates an extra wide surround field
- **TV Surr.** – Designed for mono or stereo TV broadcasts and other sources
- **Sports** – Designed for sports and other programs based on commentary
- **Game** – Creates surround sound from video game sources
- **5ch Stereo** – Designed to give powerful surround sound to stereo music sources

## Using Front Surround

The Front Surround modes are effective when you are using the Front surround 3-spot speaker setup as described in *Placing the speakers* on page 11. The surround speakers should be placed on top of the front speakers and oriented either towards the walls, or straight ahead, depending on which mode you are using (see below).

For more options, see *Adjusting the Advanced and Front Surround effect level* below.

- Press **FRONT SURROUND** to select an Front Surround mode (or press **FRONT SURROUND** then use the **↑/↓** buttons).

Press repeatedly to select from:

- **Frnt. Movie** – The Front Surround Movie mode emphasizes directionality, giving you a realistic movie theater-type sound.
- **Frnt. Music** – The Front Surround Music mode provides greater breadth and depth to music sources, enveloping you with a concert hall-type sound.
- **ExtraPower** – The Extra Power mode gives additional energy and depth to a stereo source by using the surround speakers in addition to the front speakers.

If you have selected **Frnt. Movie** or **Frnt. Music**, you will achieve best results by turning each surround speaker about 60° towards the closest wall. With **ExtraPower**, orient the surround speakers in the same direction as the front speakers (towards the listening position).

### Adjusting the Advanced and Front Surround effect level

You can emphasize or reduce the effect of the Advanced and Front Surround modes as you like. You can set the effect level for all modes independently.

- 1 With one of the Advanced or Front Surround modes active, press **SOUND MODE**.
- 2 Use the **←/→** (cursor left/right) buttons to select 'Effect'.
- 3 Use the **↑/↓** (cursor up/down) buttons to adjust the effect level.  
The effect level can be adjusted from **10** (min) to **90** (max).
- 4 Press **ENTER** to confirm.

### Listening in stereo

You can listen to any source—stereo or multichannel, analog or digital—in stereo. When playing a multichannel source, stereo sound is created by downmixing all channels to the front left/right speakers and the subwoofer.

- Press **SURROUND** repeatedly until 'Stereo' shows in the display.

Any active Advanced Surround or Front Surround mode is canceled.

### Listening with headphones

When headphones are connected, only the **Stereo** (default) and **Phones Surround** (virtual surround sound for headphones) modes are available.

When you disconnect them it reverts to the previous mode.

- With headphones connected, press **ADVANCED** or **FRONT SURROUND** to select 'Phones Surround' or **SURROUND** to select 'Stereo'.

## Enhancing dialogue

- Default setting: **Dialog Off**

The Dialogue Enhancement feature is designed to make the dialog stand out from other background sounds in a TV or movie soundtrack.

- Press **DIALOGUE (SHIFT + SURROUND)** to select the amount dialog enhancement.

Press repeatedly to select from:

- **Dialog Off** – No dialog enhancement
- **Dialog Mid** – Moderate dialog enhancement
- **Dialog Max** – Strong dialog enhancement

## Listening with a virtual surround back speaker

- Default setting: **Vir. SB Off**

The Virtual Surround Back feature can be used when listening in surround sound (using the 5-spot setup described in *Placing the speakers* on page 11) to simulate an added surround back channel. In a real theater the surround back speaker would be directly behind you, creating more cohesive and realistic surround sound.

- Press **VIR. SB (SHIFT + ADVANCED)** repeatedly to switch between 'Vir. SB On' and 'Vir. SB Off'.

### Note

- You can't use Virtual Surround Back when using the **Stereo** listening mode (or **Auto** with stereo sources).
- If you are using the The Front surround 3-spot setup (see *Placing the speakers* on page 11), switch the Virtual Surround Back feature off.
- If there is no surround channel, Virtual Surround Back has no effect.

## Using Quiet and Midnight listening modes

- Default setting: **Off**

The Quiet listening feature reduces excessive bass or treble in a sound source. You can use this feature if the music is a little bit harsh and you would like a smoother sound.

The Midnight listening feature allows you to hear effective surround sound of movies at low volume levels. The effect automatically adjusts according to the volume at which you're listening.

- Press **QUIET/MIDNIGHT** repeatedly to switch between 'Quiet', 'Midnight' and 'Off'.

## Adjusting the bass and treble

Use the bass and treble controls to adjust the overall tone.

- 1 Press **SOUND MODE**.
- 2 Use the **←/→** (cursor left/right) buttons to select 'Bass' or 'Treble'.
- 3 Use the **↑/↓** (cursor up/down) buttons to adjust the sound.  
The bass and treble can be adjusted from **-3** to **+3**.
- 4 Press **ENTER** to confirm.

### Note

- Bass and treble adjustment is not possible when the **Quiet** or **Midnight** modes are active.

## Boosting the bass level

There are three bass modes you can use to enhance the bass in a source.

- Press **BASS MODE (SHIFT + FRONT SURROUND)** repeatedly to choose an option that fits the source you're listening to.
  - **Music** – Can be used with music to give a deeper bass sound
  - **Cinema** – Good for action movies or movies with lots of sound effects
  - **P. Bass** – Can be used with music sources to bring the beat of the music (or soundtrack) to the forefront
  - **Off** – Switch off the bass boost if it causes excessive bass (i.e. it sounds 'boomy') in the source

## Chapter 6

# Playing discs

### Note

- Some DVD discs restrict the use of some functions (random or repeat, for example). This is not a malfunction.
- When playing Video CD/Super VCDs, some of the functions are not available during PBC playback. If you want to use them, start the disc playing using a number button to select a track.
- Many features are not available when using unfinalized CD-R/RW discs.

## Playing only CDs and WMA/MP3 discs (CD mode)

Using this feature you can play only the CDs and WMA/MP3 discs loaded in the disc tray—automatically skipping over any DVDs and Video CD/Super VCDs loaded. This may be useful if you have a mixture of discs loaded but only want to play music: you don't have to keep track of what kind of disc is where in the disc tray.

### 1 Press **CD MODE (SHIFT + DISC SKIP)** to switch CD mode on.

- The indicator on the front panel lights when CD mode is on.

### 2 Press **▶ (play)** to start playback.

The first CD loaded automatically starts to play.

Once all the CD/WMA/MP3 discs loaded have played, playback automatically stops.

- To cancel the CD mode, press **CD MODE (SHIFT + DISC SKIP)** again.

- If you open the disc tray and load a DVD, Video CD/Super VCD or JPEG disc in the front-most position then press **▶ (play)** (on the front panel), CD mode is canceled.

### Note

- You can't switch on CD mode while playing a DVD or Video CD/Super VCD. Stop playback first.
- Although program play is not possible in CD mode, it is possible to program a playlist. When you start program play-back, however, CD mode is canceled.
- Repeat and random play is possible in CD mode (see *Using repeat play* on page 45 and *Using random play* on page 46).

## Scanning discs

You can fast-scan discs forward or backward at various different speeds.

### 1 During playback, press **◀◀** or **▶▶** to start scanning.

- There is no sound while scanning DVDs and Video CD/Super VCDs, and no subtitles while scanning DVDs.

### 2 Press repeatedly to increase the scanning speed.

- The scanning speed is shown on-screen.

### 3 To resume playback, press **▶ (play)**.

- When scanning a Video CD/Super VCD or a WMA/MP3 track, playback automatically resumes at the end or beginning of the track.

- Depending on the disc, normal playback may automatically resume when a new chapter is reached on a DVD disc.

## Playing in slow motion

You can play DVDs and Video CD/Super VCDs at four different forward slow motion speeds. DVD discs can also be played at two reverse speeds.

**1 During playback, press II (pause).**

**2 Press and hold ◀I/◀II or II▶/▶▶ until slow motion playback starts.**

- The slow motion speed is shown on-screen.
- There is no sound during slow motion playback.

**3 Press repeatedly to change the slow motion speed.**

**4 To resume normal playback, press ▶ (play).**

- Depending on the disc, normal playback may automatically resume when a new chapter is reached.

## Frame advance/frame reverse

You can advance or back up DVD discs frame-by-frame. With Video CD/Super VCDs you can only use frame advance.

**1 During playback, press II (pause).**

**2 Press ◀I/◀II or II▶/▶▶ to reverse or advance a frame at a time.**

**3 To resume normal playback, press ▶ (play).**

- Depending on the disc, normal playback may automatically resume when a new chapter is reached.

## Using the Disc Navigator to browse the contents of a disc

Use the Disc Navigator to browse through the contents of a disc to find the part you want to play. You can use the Disc Navigator when a disc is playing or stopped (a disc must be loaded).

**1 Press HOME MENU and select 'Disc Navigator' from the on-screen display.**

- With most discs, you can also press **DVD MENU** to go directly to the Disc Navigator.

**2 Select what you want to play.**

Depending on the type of disc you have loaded, the Disc Navigator looks slightly different.

The screen for DVD discs shows the titles on the left and the chapters on the right. Select a title, or a chapter within a title.

For a VR format DVD-RW disc select between the **PlayList** and **Original** areas of the disc, or a title. Press → (cursor right) to preview the title.

- You can't switch between **Original** and **PlayList** during playback.

- Not all VR format DVD-RW discs have a Playlist.

The screen for CDs and Video CD/Super VCDs shows a list of tracks.

The screen for WMA/MP3 discs shows the folder names on the left and the track names on the right (note that any folder and track names that contain accented or non-roman characters, will show up with generic names – **F\_033**, **T\_035**, etc.).

Select a folder, or a track within a folder.

Playback starts after you press **ENTER**.

**Tip**

- Another way to find a particular place on a disc is to use one of the search modes. See *Searching a disc* on page 50.

## Looping a section of a disc

The A-B Repeat function allows you to specify two points (A and B) within a track (CD and Video CD) or title (DVD) that form a loop which is played over and over.

- You can't use A-B Repeat with Super VCDs or WMA/MP3 discs.

**1 During playback, press HOME MENU and select 'Play Mode'.**

**2 Select 'A-B Repeat' from the list of functions on the left.**

**3 Press ENTER on 'A(Start Point)' to set the loop start point.**

**4 Press ENTER on 'B(End Point)' to set the loop end point.**

After pressing **ENTER**, playback jumps back to the start point and plays the loop.

- The minimum loop time is 2 seconds.

**5 To resume normal playback, select 'Off' from the menu.**

## Using repeat play

There are various repeat play options, depending on the kind of disc loaded. It's also possible to use repeat play together with program play to repeat the tracks/chapters in the program list (see *Creating and editing a DVD program list* on page 47 and *Creating and editing a non-DVD program list* on page 48).

- 1 During playback, press **HOME MENU** and select 'Play Mode'.
- 2 Select 'Repeat' from the list of functions on the left.

- 3 Select a repeat play option. If program play is active, select **Program Repeat** to repeat the program list, or **Repeat Off** to cancel.

- For DVD discs, select **Title Repeat** or **Chapter Repeat** (or **Repeat Off**).

- For CDs and Video CD/Super VCDs, select **All Discs Repeat**, **Disc Repeat** or **Track Repeat** (or **Repeat Off**).
- For WMA/MP3 discs, select **All Discs Repeat**, **Disc Repeat**, **Folder Repeat** or **Track Repeat** (or **Repeat Off**).

### Tip

- You can also use the **REPEAT (SHIFT + 2)** button on the remote to select a repeat play mode. The repeat mode is indicated in the front panel display and on-screen. The repeat modes available are the same as when choosing from the **Play Mode** menu.

- If you've created a program list, **Program Repeat** is also available.
- During random playback (see below), **Random Repeat** is also available.

## Using random play

With a DVD you can choose to play titles or chapters within a title in a random order. With CDs, Video CD/Super VCDs, MP3 or WMA discs, you can play all the discs at random, or just the contents of a single disc.

You can set the random play option when a disc is playing or stopped. However, you can't use random play together with program play.

- You can't use random play with VR format DVD-RW discs, or while a DVD disc menu is being displayed.

- 1 Press **HOME MENU** and select 'Play Mode'.

- 2 Select 'Random' from the list of functions on the left.

- 3 Select a random play option.
  - For DVD-Video discs, select **Random Title** or **Random Chapter** (or **Random Off**)

- For CDs, Video CD/Super VCDs and WMA/MP3 discs, select **Random All**, **Random Disc** (or **Random Off**).
- The **Random All** function ignores DVDs loaded in the player.

**Tip**

- Use the following controls during random play:

Button	What it does
■	Stop and cancel random play.
▶▶	Selects another track/chapter at random from those remaining.
◀◀	Returns to the beginning of the current track/chapter. You can't go back further than this.

- You can also use the **RANDOM (SHIFT + 3)** button on the remote to select a random play mode. The random mode is indicated in the front panel display and on-screen. The random modes available are the same as when choosing from the **Play Mode** menu. Press **ENTER** to start random play.
- To cancel random playback without stopping playback, press **CLEAR**. The disc will play to the end, then stop.

## Creating and editing a DVD program list

This feature lets you program the play order of titles and chapters on the DVD disc currently in the play position.

If you want to program the play order of CDs, Video CD/Super VCDs or WMA/MP3 discs, see *Creating and editing a non-DVD program list* on page 48.

- You can't use Program play with VR format DVD-RW discs, or while a DVD disc menu is being displayed.

### 1 Make sure that the DVD disc you want to make the program list for is in the play position.

Use the **DISC** select buttons on the remote, or the **DIRECT PLAY** buttons on the front panel to select the disc.

### 2 Press HOME MENU and select 'Play Mode'.

- Alternatively, press **PROGRAM (SHIFT + 1)** and skip to step 5.

### 3 Select 'Program' from the list of functions on the left.

### 4 Select 'Create/Edit' from the list of program options.

### 5 Select a title or chapter for the first/next step in the program list.

Program Step	Disc	Title 1-38	Chapter 1-4
01. 1-01	1. DVD	Title 01	Chapter 001
02.	2. CD	Title 02	Chapter 002
03.	3. DVD	Title 03	Chapter 003
04.	4. ???	Title 04	Chapter 004
05.	5. ---	Title 05	
06.		Title 06	
07.		Title 07	
08.		Title 08	

- When this screen first appears, the first title on the disc is highlighted. From here you can select a title, or a chapter within a title.
- Some titles and/or chapters of DVD discs may be grayed out, depending on the disc. Grayed out titles/chapters can't be added to the program list.

### 6 Press ENTER to add the highlighted item to the program list.

The program step number automatically moves to the next position.

Program Step	Disc	Title 1-38	Chapter 1-4
01. 2-01	2. DVD	Title 02	Chapter 001
02.	3. CD	Title 03	Chapter 002
03.	4. DVD	Title 04	Chapter 003
04.	5. ???	Title 05	Chapter 004
05.	6. ---	Title 06	
06.		Title 07	
07.		Title 08	

### 7 Add further items to the program list in the same way.

- A program list can contain up to 24 steps.
- To clear a step in the program list, move to the **Program Step** column, highlight the step to clear and press **CLEAR**.

- To insert a step in the program list, move to the **Program Step** column and highlight the step where you want a new step to appear. After you select a title/chapter, all the program steps will move down one to make space for the new one.

### 8 To play the program list, press ► (play).

- Program play remains active until you turn off program play (see below), erase the program list (see below), or switch off the system.

## Creating and editing a non-DVD program list

This feature lets you program the play order of folders and tracks on the CDs, Video CD/Super VCDs and WMA/MP3 discs loaded.

If you want to program the play order of a DVD disc, see *Creating and editing a DVD program list* on page 47.

#### 1 Make sure that a non-DVD disc is in the play position.

Use the **DIRECT PLAY** buttons on the front panel to select a disc.

#### 2 Press HOME MENU and select 'Play Mode'.

- Alternatively, press **PROGRAM (SHIFT + 1)** and skip to step 5.

#### 3 Select 'Program' from the list of functions on the left.

Play Mode	
A-B Repeat	Create/Edit
Repeat	Playback Start
Random	Playback Stop
<b>Program</b>	Program Delete
Search Mode	

## 4 Select 'Create/Edit' from the list of program options.

## 5 Select a folder or track for the first/next step in the program list.

- When this screen first appears, the first folder or track of the disc in the play position is highlighted. From here you can select something on this disc, or move left to the **Disc** column and select something from one of the other discs loaded.
- With WMA/MP3 discs, you can select a folder, or an individual track in a folder.
- With CDs and Video CD/Super VCDs, select a track.
- Any DVDs loaded are shown grayed out and can't be selected.
- If the system has not yet determined the type of disc in a tray position, '???' is displayed as the disc type. If you select it, '???' is displayed in the middle and right columns. You can add items to the program list from this disc, although what you select must actually exist on the disc for it to play. Also, if the disc is a DVD, program play will be canceled when it comes to that disc in the program list

- If a tray position is empty, '---' is displayed.

## 6 Press ENTER to add the highlighted item to the program list.

The program step number automatically moves to the next position.

## 7 Add further items to the program list in the same way.

- A program list can contain up to 24 steps.
- To clear a step in the program list, move to the **Program Step** column, highlight the step to clear and press **CLEAR**.
- To insert a step in the program list, move to the **Program Step** column and highlight the step where you want a new step to appear. After you select a folder/track, all the program steps will move down one to make space for the new one.

## 8 To play the program list, press ► (play).

- Program play remains active until you turn off program play (see below), erase the program list (see below), or switch off the system.

**Tip**

- Use the following controls during program play:

Button	What it does
<b>HOME</b>	Save the program list and exit the program edit screen without starting playback.
<b>MENU</b>	

Button	What it does
▶▶	Skip to the next step in the program list.
<b>CLEAR</b>	Switch off program play. Press while stopped to erase the program list.
<b>RETURN</b>	Exit the program edit screen without saving any changes.

**Note**

- The current playlist is erased if you change the type of disc in the play position (DVD or non-DVD) or select **Program Delete** from the **Play Mode** menu.
- DVD playback follows commands recorded on the disc. There may be cases where program play is automatically canceled or may not work. This is not a malfunction
- With Video CD/Super VCDs that feature PBC playback, make sure that the disc is stopped before you start making the program list.

## Other functions available from the program menu

There are a number of other options in the program menu in addition to Create/Edit.

- **Playback Start** – Starts playback of a saved program list
- **Playback Stop** – Turns off program play, but does not erase the program list
- **Program Delete** – Erases the program list and turns off program play

## Searching a disc

You can search DVD discs by title or chapter number, or by time. CDs can be searched by track number, and Video CD/Super VCDs by track number or time. WMA/MP3 discs can be searched by folder or track number.

**1 Press HOME MENU and select 'Play Mode'.**

**2 Select 'Search Mode' from the list of functions on the left.**

The search options that appear depend on the kind of disc loaded. The screen below shows the DVD search options.

**3 Select a search mode.**

- The disc must be playing in order to use time search.

**4 Use the number buttons to enter a title, chapter, folder or track number, or a time.**

- For a time search, enter the number of minutes and seconds into the currently playing title (DVD) or track (Video CD/ Super VCD) you want playback to resume from. For example, press **4, 5, 0, 0** to have playback start from 45 minutes into the disc. For 1 hour, 20 minutes and 30 seconds, press **8, 0, 3, 0**.

5 Press **ENTER** to start playback.

## Switching subtitles

Some DVD discs have subtitles in one or more languages; the disc box will usually tell you which subtitle languages are available. You can switch subtitle language during playback.

- Press **SUBTITLE** repeatedly to select a subtitle option.

### Note

- Some discs only allow you to change subtitle language from the disc menu. Press **DVD MENU** to access.
- To set subtitle preferences, see *Language settings* on page 64.

## Switching DVD audio language

When playing a DVD disc recorded with dialog in two or more languages, you can switch audio language during playback.

- Press **AUDIO** repeatedly to select an audio language option.

### Note

- Some discs only allow you to change audio language from the disc menu. Press **DVD MENU** to access.
- To set audio language preferences, see *Language settings* on page 64.

## Switching audio channels when playing a Video CD/ Super VCD

When playing a Video CD, you can switch between stereo, just the left channel or just the right channel.

Super VCD supports four channels of audio. You can switch the playback channel between Stereo 1, Left 1, Right 1, Stereo 2, Left 2 and Right 2 (note that not all Super VCDs have a second soundtrack).

- Press **AUDIO** repeatedly to select an audio channel option.

## Zooming the screen

Using the zoom feature you can magnify a part of the screen by a factor of 2 or 4, while watching a DVD or Video CD/Super VCD.

- 1 During playback, use the **ZOOM** button to select the zoom factor (Normal, 2x or 4x).

- Since DVD and Video CD/Super VCD has a fixed resolution, picture quality will deteriorate, especially at 4x zoom. This is not a malfunction.

- 2 Use the cursor buttons to change the zoomed area.

You can change the zoom factor and the zoomed area freely during playback.

- If the navigation square at the top of the screen disappears, press **ZOOM** again to display it.

**Note**

- If you are displaying subtitles, these will disappear when the screen is zoomed. They will reappear when you return the screen to normal.

## Switching camera angles

Some DVD discs feature scenes shot from two or more angles—check the disc box for details.

When a multi-angle scene is playing, a  icon appears on screen and in the front panel display to let you know that other angles are available (this can be switched off if you prefer—see *Display settings* on page 64).

- **During playback (or when paused), press ANGLE to switch angle.**

## Displaying disc information

### OSD disc information

Various track, chapter and title information can be displayed on-screen while a disc is playing.

- **To show/switch/hide the information displayed, press DISPLAY (SHIFT + 8) repeatedly.**
  - When a disc is playing, the information appears at the top of the screen.

### Front panel display information

Limited disc information also appears in the front panel display. Press **DISPLAY (SHIFT + 8)** to change the displayed information.

- DVD / DVD-RW displays

**2 · 2 8' 49"** Disc no.  
Chapter no.  
Elapsed title time

- DVD / DVD-RW displays

**2 · T · 1 1 07' 00"** Disc no.  
Title no.  
Remaining title time

**2 · 2 0' 42"** Disc no.  
Chapter no.

## Chapter 7

# Viewing JPEG discs

### Playing a JPEG slideshow

After loading a CD/CD-R/RW containing JPEG pictures, press ► (play) to start a slideshow from the first folder/picture on the disc. The pictures in each folder are displayed in alphabetical order.

Pictures are automatically adjusted so that they fill as much of the screen as possible (if the aspect ratio of the picture is different to your TV screen you may notice black bars at the sides, or at the top and bottom of the screen).

While the slideshow is running:

Button	What it does
II	Pauses the slideshow; press again to restart.
◀◀	Displays the previous picture. Use with <b>SHIFT</b> to jump to the first file in the previous folder.
▶▶	Displays the next picture. Use with <b>SHIFT</b> to jump to the first file in the next folder.
<b>ANGLE</b>	Pauses the slideshow and rotates the currently displayed picture 90° clockwise. Press ► (play) to restart slideshow).
<b>ZOOM</b>	Pauses the slideshow and zooms the screen (see below). Press ► (play) to restart slideshow).
<b>DVD MENU</b>	Displays the Disc Navigator screen (see below).
<b>FOLDER +/ FOLDER -</b>	Skips to the next/previous folder when playing a JPEG disc.

#### Note

- The **II** (pause), **ANGLE** and **ZOOM** buttons do not work while the display shows **LOADING**.
- The time it takes for a file to load increases with large file sizes.
- Up to 999 files are viewable on a disc. If there are more files than this on a disc, only the first 999 files are viewable.
- If you want to play the WMA/MP3 tracks on a disc that also contains JPEG picture files, you should first set the **Photoviewer** option to **Off**. See *Options* on page 65.

### Using the JPEG Disc Navigator and Photo Browser

Use the JPEG Disc Navigator to find a particular folder or picture by filename on the disc in the play position; use the Photo Browser to find a picture within a folder by thumbnail image.

#### 1 Press DVD MENU to display the Disc Navigator screen.

The left column shows the folders on the disc, the right column shows the files in a folder.

## 2 Use the cursor buttons (↑/↓/←/→) to navigate.

When a file is highlighted, a thumbnail image is displayed.

- When a folder is highlighted you can press **ENTER** to open the Photo Browser screen for that folder. See below for more on using the Photo Browser.

## 3 To resume the slideshow from the highlighted file, press **ENTER**.

### Using the Photo Browser

The Photo Browser displays nine thumbnail images at a time from the current folder.

## 1 From the Disc Navigator screen, highlight a folder to display then press **ENTER**.

The Photo Browser screen opens with the first nine pictures displayed as thumbnails.

## 2 Use the cursor buttons (↑/↓/←/→) to highlight a thumbnail picture.

- Use the track skip buttons (◀◀ and ▶▶) to see the previous / next page of thumbnails. Keep the button pressed if you want to skip several pages; release when you reach the page you want.
- To return to the Disc Navigator screen, press **RETURN**.

## 3 Press **ENTER** to display the selected thumbnail full size on screen.

The slideshow resumes from the selected picture.

## Zooming the screen

Using the zoom feature you can magnify a part of the screen by a factor of 2 or 4, while viewing pictures from a JPEG disc.

## 1 During slideshow playback, use the **ZOOM** button to select the zoom factor.

- **Normal**
- **2x**
- **4x**

- The slideshow is paused when the screen is zoomed.
- Since JPEG pictures have a fixed resolution, picture quality may deteriorate, especially at 4x zoom. This is not a malfunction.

## 2 Use the cursor buttons (↑/↓/←/→) to change the zoomed area.

You can change the zoom factor and the zoomed area freely.

## 3 To resume the slideshow, press ► (play).

## Chapter 8

# Using the timer

### Setting the wake-up timer

Use the wake-up timer to set the system to switch on at any time and start playing whatever source you want.

#### Important

- The clock must be set to the correct time for the wake-up timer to work properly (see *Setting the clock* on page 27).

#### 1 Select the source you want played.

For example, press **TUNER** (**TUNER FM/AM/ST.** on the front panel) to select the radio as your source.

#### 2 Prepare the source.

For example, tune in the radio station you want to wake up to.

#### 3 Set the volume.

#### 4 Press **TIMER** (**SHIFT + 6**) twice to reach the timer menu.

#### 5 Use the **←/→** (cursor left/right) buttons to select 'Wake-Up?' then press **ENTER**.

#### 6 Use the **←/→** (cursor left/right) buttons to select 'Timer Edit?' then press **ENTER**.

#### 7 Set the switch-on time.

Use the **↑/↓** (cursor up/down) buttons to set the hour, then press **ENTER**. Set the minute in the same way, pressing **ENTER** when you're done.

#### 8 Set the switch-off time.

Use the **↑/↓** (cursor up/down) buttons to set the hour, then press **ENTER**. Set the minute in the same way, pressing **ENTER** when you're done.

After pressing **ENTER** this last time, the wake-up indicator lights, and the switch-on, switch-off times, the function (**DVD/CD**, etc.) and volume are confirmed in the display.

#### 9 Switch the system into standby mode.

The wake-up timer will not work if the system is left on!

**Tip**

- You can check the timer settings in standby by pressing **TIMER (SHIFT + 6)** twice. (Press **TIMER (SHIFT + 6)** once to display the current time.)

**Turning the wake-up timer on/off**

If the wake-up timer is on, it will switch on the system everyday at the time you have set.

- 1 Press **TIMER (SHIFT + 6)** twice to reach the timer menu.
- 2 Use the **←/→** (cursor left/right) buttons to select 'Wake-Up?' then press **ENTER**.
- 3 Use the **←/→** (cursor left/right) buttons to select 'Timer On?' or 'Timer Off?'.
  - You must have the timer set (see above) to select **On**. The wake-up timer switches on and off according to your previous settings.
- 4 Press **ENTER**.

**Note**

- The wake-up timer will automatically be canceled if the clock is reset.

**Setting the sleep timer**

The sleep timer switches off the system after a specified time so you can fall asleep without worrying about it.

**Important**

- If you set the sleep timer while either the wake-up timer is active, the earlier switch off time takes priority.

- 1 Press TIMER (SHIFT + 6) twice to reach the timer menu.**
- 2 Use the ←/→ (cursor left/right) buttons to select 'Sleep?' then press ENTER.**
- 3 Use the ↑/↓ (cursor up/down) buttons to select a switch-off time then press ENTER.**

Choose between the following options:

- **Sleep Auto** – Available only in CD mode; the system switches off automatically after the currently playing disc has finished.
  - **Sleep 90** – System switches off after 90 minutes
  - **Sleep 60** – System switches off after an hour
  - **Sleep 30** – System switches off after 30 minutes
  - **Off** – cancels the sleep timer
- 4 To check how much time is left, repeat steps 1 and 2.**

The remaining time is displayed momentarily.

## Chapter 9

# Surround sound and other settings

### Using the System Setup menu

All the available settings in the setup menu are listed in *Surround and sound setup options* and *SR+ control options for Pioneer plasma displays* below. See the notes in each section for additional information about the settings. Follow the steps below to customize the settings in the System Setup menu.

**1 Press SYSTEM SETUP (SHIFT + HOME MENU).**

**2 Use the ←/→ (cursor left/right) buttons to choose the setting you want to adjust.**

The current setting is shown for each option as you cycle through the display. See below for a full list and description of each.

**3 Use the ↑/↓ (cursor up/down) buttons to adjust the setting.**

**4 Repeat steps 2 and 3 to make other settings.**

**5 When you're done, press ENTER to leave the System Setup menu.**

#### Note

- The System Setup menu is exited automatically after 5 minutes of inactivity.
- You can't make these settings with the Recording Mode (page 72) switched on.

### Surround and sound setup options

The Room Setup feature (page 27) is designed to give you a basic surround sound setup, however you can make more detailed settings that may improve the surround sound in your listening room. Note that the first setting in each section is the default.

#### Front speakers distance setting

Specifies the distance from your listening position to the front speakers:

- **Front 0.3 m to Front 9 m** – Distance can be set in increments of 0.3 m. The default is 3 m.

#### Center speaker distance setting

Specifies the distance from your listening position to the center speaker:

- **Center 0.3 m to Center 9 m** – Distance can be set in increments of 0.3 m. The default is 3 m.

#### Surround speakers distance setting

Specifies the distance from your listening position to the surround speakers:

- **Surr. 0.3 m to Surr. 9 m** – Distance can be set in increments of 0.3 m. The default is 3 m.

### Dynamic Range Control

Specifies the amount of dynamic range adjustment to Dolby Digital or DTS soundtracks:

- **DRC Off** – No dynamic range adjustment (use when listening at higher volume)
- **DRC Mid.** – Mid setting
- **DRC High** – Dynamic range is reduced (loud sounds are reduced in volume while quieter sounds are increased)

#### Note

- This setting works only with Dolby Digital and some DTS soundtracks. For other sources you can create a similar effect using the Midnight mode (see *Using Quiet and Midnight listening modes* on page 41).

### Dual mono setting

Specifies how dual mono encoded Dolby Digital or DTS soundtracks should be played. You can also use this setting to switch the audio channel on DVD-RW discs recorded with two separate soundtracks.

- **L-Ch1 R-Ch2** – Both channels are played through the front speakers
- **Ch1 Mono** – Only channel 1 is played
- **Ch2 Mono** – Only channel 2 is played

#### Note

- On the **Ch1 Mono** and **Ch2 Mono** settings the sound comes only from the center speaker (or from the front speakers if listening in **STEREO** mode).

- This setting works only with dual mono encoded Dolby Digital or DTS soundtracks. See the disc packaging for channel information.

### LFE attenuator setting

Dolby Digital and DTS audio sources include ultra-low bass tones. Set the LFE attenuator as needed to prevent the ultra-low bass from distorting the sound.

- **LFE ATT 0** – The LFE channel is played with no attenuation
- **LFE ATT 10** – LFE channel is attenuated by 10 dB
- **LFE Off** – LFE channel is not played

### SR+ control options for Pioneer plasma displays

Make the following settings if you have connected a Pioneer plasma display to this unit using an SR+ cable (not supplied).

Note that in the function settings below, the number of video inputs may change depending on your display. See also *Using this unit with a Pioneer plasma display* on page 16.

### Control mode setting

- **SR+ Off** – Switches SR+ off (this unit and the plasma display work independently)
- **SR+ On** – Switches SR+ on (this unit sends control signals to the plasma display)

*The following settings are only available if the Control mode setting (above) is switched on.*

### Volume control setting

- **Vol C.Off** – This unit does not control the volume of the plasma display

- **Vol C.On** – When this unit is switched to an input that used the plasma display (DVD, for example), the volume on the plasma display is muted so only sound from this unit is heard.

### Function setting for DVD input

- **DVD -> OFF/PDP1-5/PDPTV** – Matches the **DVD** function of this unit with a numbered video input on the plasma display. For example, **DVD -> PDP2** matches the **DVD** input with video input 2 on the plasma display.

### Function setting for TV input

- **TV -> OFF/PDP1-5/PDPTV** – Matches the **TV** function of this unit with a numbered video input on the plasma display. For example, **TV -> PDP1** matches the **TV** input with video input 1 on the plasma display.

### Function setting for L1 input

- **LINE1 -> OFF/PDP1-5/PDPTV** – Matches the **LINE (L1)** function of this unit with a numbered video input on the plasma display. For example, **LINE1 -> PDP3** matches the **LINE1** input with video input 3 on the plasma display.

### Function setting for L2 input

- **LINE2 -> OFF/PDP1-5/PDPTV** – Matches the **LINE (L2)** function of this unit with a numbered video input on the plasma display. For example, **LINE2 -> PDP3** matches the **LINE2** input with video input 3 on the plasma display.

## Setting the channel levels

You can set the relative channel levels from your main listening position for all of the listening modes independently (except **STEREO**).

If you used the Room Setup feature (page 27), the channel levels for each listening mode will already be set. However, you can still fine-tune the levels here if you need to.

### 1 Select a listening mode.

Press **SURROUND**, **ADVANCED** or **FRONT SURROUND** repeatedly to select the listening mode you want.

### 2 Press TEST TONE (SHIFT + 4) to hear the test tone.

The test tone is output in the following order (from the speakers active in the current listening mode):

- **L** – Front left speaker
- **C** – Center speaker
- **R** – Front right speaker
- **RS** – Right surround speaker

- **LS** – Left surround speaker
- **SW** – Subwoofer

### 3 Use the **VOLUME +/-** button to adjust the volume to an appropriate level.

Turn down the volume to **-40 dB** or less to ensure you have adequate headroom.

### 4 Use the **↑/↓** (cursor up/down) buttons to adjust the speaker levels in turn.

You should hear the test tone at the same volume from each speaker when seated in the main listening position. The channel level range is  $\pm 10$  dB.

### 5 When you're done, press **ENTER** to exit test tone setup.

#### Tip

- The speaker volume can be adjusted while listening to any sound source you want by pressing **CH LEVEL (SHIFT + 5)** and then using the **↑/↓** (cursor up/down) buttons to adjust the channel levels. After you're finished with one channel, use the **←/→** (cursor left/right) buttons to move to the next.

#### Note

- When the **AUTO** listening mode is selected, using the test tone method will adjust levels for multichannel sources only. Use **CH LEVEL (SHIFT + 5)** and the **↑/↓** (cursor up/down) buttons (see tip above) to set levels for the **AUTO** listening mode with two channel sources.
- Since the subwoofer produces ultra-low frequencies its sound may seem quieter than it actually is.

## Chapter 10

# Video Adjust menu

## Video Adjust

- Default setting: **Standard**

From the Video Adjust screen you can select the standard video presentation or define presets of your own.

- 1 Press **HOME MENU** and select 'Video Adjust' from the on-screen display.

- 2 Use the **←/→** (cursor left/right) buttons to select a preset.

- **Standard**
- **Memory1–2** – Use for saving your own presets (see below)

- 3 Press **ENTER** to make the setting and exit the Video Adjust screen.

### Note

- Depending on the disc and the TV/monitor, you may not see the effect clearly.

## Creating your own presets

You can create up to two presets of your own.

- 1 Select one of the Memory presets (see above).

- 2 Press **↓** (cursor down) to select 'Detailed Settings' then press **ENTER**.

- 3 Adjust the picture quality settings.

- Use the **↑/↓** (cursor up/down) buttons to select a setting.
- Use the **←/→** (cursor left/right) buttons to adjust the current setting.
- Press **DISPLAY (SHIFT + 8)** to switch between full and single view.
- You can switch between preset numbers in the **Recall Settings** menu item.

You can adjust any or all of the following picture quality settings:

- **Contrast** – Adjusts the contrast between light and dark.
- **Brightness** – Adjusts the overall brightness.
- **Chroma Level** – Adjusts how saturated colors appear.

- 4 Press **ENTER** to save the preset and exit the Video Adjust screen.

## Chapter 11

# Initial Settings menu

### Using the Initial Settings menu

The Initial Settings menu gives you complete control in setting up your DVD system, including video output settings and parental lock settings, among others.

If an option is grayed out it means that it cannot be changed at the current time. This is usually because a disc is playing. Stop the disc, then change the setting.

#### 1 Press HOME MENU and select 'Initial Settings' from the on-screen display.

#### 2 Use the cursor buttons and ENTER to select the setting and option you want to set.

All the settings and options are explained on the following pages.

#### Note

- In the table below, the default setting is shown in **bold**; other settings are shown in *italics*.
- Some settings, such as **TV Screen**, **Audio Language** and **Subtitle Language** may be overridden by the DVD disc. Often these settings can also be made from the DVD disc menu.

### Video Output settings

Setting	Option	What it means
<b>TV Screen</b> (See also <i>Screen sizes and disc formats</i> on page 78.)	<b>4:3 (Letter Box)</b>	Set if you have a conventional 4:3 TV. Widescreen movies are shown with black bars top and bottom.
	<i>4:3 (Pan &amp; Scan)</i>	Set if you have a conventional 4:3 TV. Widescreen movies are shown with the sides cropped so that the image fills the screen.
	<i>16:9 (Wide)</i>	Set if you have a widescreen TV.
<b>Component Out</b> (See also <i>Connecting using the component video output</i> on page 14.)	<b>Interlace</b>	Set if your TV is not compatible with progressive scan video.
	<i>Progressive</i>	Set if your TV is compatible with progressive scan video (see your TV's instruction manual for details). Press <b>ENTER</b> once more to confirm (or <b>RETURN</b> to cancel). <i>Note that progressive scan video is only output from the component video jacks and that there is no output from the composite and S-video jacks when this setting is selected.</i>

Setting	Option	What it means
<b>S-Video Out</b> (See also <i>Connecting using the S-video output</i> on page 14.)	<b>S2</b>	Standard setting.
	<i>S1</i>	If you find that the picture is stretched or distorted on the default <b>S2</b> setting, try changing it to this setting.

## Language settings

Setting	Option	What it means
<b>Audio Language</b>	<b>English</b>	If there is an English soundtrack on the disc then it will be played.
	<i>Languages as displayed</i>	If there is the language selected on the disc, then it will be played.
	<i>Other Language</i>	Select to choose a language other than the ones displayed (see <i>Selecting languages using the language code list</i> on page 78).
<b>Subtitle Language</b>	<b>English</b>	If there is are English subtitles on the disc then they will be displayed.
	<i>Languages as displayed</i>	If there is the subtitle language selected on the disc, then it will be displayed.
	<i>Other Language</i>	Select to choose a language other than the ones displayed (see <i>Selecting languages using the language code list</i> on page 78).
<b>DVD Menu Language</b>	<b>w/Subtitle Lang.</b>	DVD disc menus will be displayed in the same language as your selected subtitle language, if possible.
	<i>Languages as displayed</i>	DVD disc menus will be displayed in the selected language, if possible.
	<i>Other Language</i>	Select to choose a language other than the ones displayed (see <i>Selecting languages using the language code list</i> on page 78).
<b>Subtitle Display</b>	<b>On</b>	Subtitles are displayed according to your selected subtitle language (see above).
	<i>Off</i>	Subtitles are always off by default when you play a DVD disc (note that some discs override this setting).

## Display settings

Setting	Option	What it means
<b>OSD Language</b>	<b>English</b>	On-screen displays of the player are in English.
	<i>Languages as displayed</i>	On-screen displays are shown in the language selected.

Setting	Option	What it means
On Screen Display	On	Operation displays ( <b>Play</b> , <b>Resume</b> , <b>Scan</b> , and so on) are shown on-screen.
	Off	Operation displays are not shown.
Angle Indicator	On	A camera icon is displayed on-screen during multi-angle scenes on a DVD disc.
	Off	No multi-angle indication is shown.

## Options

Setting	Option	What it means
Parental Lock	See below	See <i>Parental Lock</i> below.
Photo Viewer	On	Only the JPEG files are shown on discs that contains both WMA/MP3 audio files and JPEG picture files.
	Off	WMA/MP3 audio file playback is possible.

## Parental Lock

- Default level: **Off**; Default password: *none*;  
Default Country code: **us (2119)**

To give you some control over what your children watch on your DVD player, some DVD-Video discs feature a Parental Lock level. If your player is set to a lower level than the disc, the disc won't play.

Some discs also support the Country Code feature. The player does not play certain scenes on these discs, depending on the Country Code you set.

### Note

- Not all discs use Parental Lock, and will play without requiring the password first.
- If you forget your password, you'll need to reset the player to register a new password. (see *Resetting the system* on page 68)

## Registering a new password

You must register a password before you can change the Parental Lock level or enter a Country code.

### 1 Select 'Password'.

### 2 Use the number buttons to enter a 4-digit password.

The numbers you enter show up as asterisks (\*) on-screen.

### 3 Press ENTER to register the password.

You will return to the **Options** menu screen.

### Changing your password

To change your password, confirm your existing password then enter a new one.

- 1 Select 'Password Change'.
- 2 Use the number buttons to enter your existing password, then press ENTER.
- 3 Enter a new password and press ENTER.

This registers the new password and you will return to the Options menu screen.

### Setting/changing the Parental Lock

- 1 Select 'Level Change'.
- 2 Use number buttons to enter your password, then press ENTER.
- 3 Select a new level and press ENTER.
  - Press ← (cursor left) repeatedly to lock more levels (more discs will require the password); press → (cursor right) to unlock levels. You can't lock level 1.

This sets the new level and you will return to the Options menu screen.

### Setting/changing the Country code

You can find the *Country code list* on page 79.

- 1 Select 'Country Code'.
- 2 Use number buttons to enter your password, then press ENTER.
- 3 Select a Country code and press ENTER.

There are two ways you can do this:

- Select by code letter: Use ↑/↓ (cursor up/down) to change the Country code.
- Select by code number: Press → (cursor right) then use the number buttons to enter the 4-digit Country code.

- The new Country code is set and you will return to the Options menu screen. Note that the new Country code doesn't take effect until the next disc is loaded (or the current disc is reloaded).

## Chapter 12

## Additional information

## Optional system settings

These settings are accessed by using the System Setup menu while in standby.

- 1 Switch the system into standby.
- 2 Press **SYSTEM SETUP (SHIFT + HOME MENU)**.
- 3 Use the **←/→ (cursor left/right)** buttons to choose the setting you want to adjust then press **ENTER**.  
The current setting is shown for each option as you cycle through the display. See below for a full list and description of each.
- 4 Use the **↑/↓ (cursor up/down)** buttons to adjust the setting.
- 5 Repeat steps 2 and 3 to make other settings.
- 6 Press **ENTER** to confirm.

## System Setup menu options in standby

Below are all the available settings in the setup menu. The first setting in each section is the default. See also the notes in each section for additional information about the settings.

## Child lock setting

The Child Lock feature is useful when you've set the wake-up timer and don't want the system switched on before it activates.

- **Lock On** – Makes the front panel buttons and controls inoperative.
- **Lock Off** – Restores regular use of the front panel buttons and controls.

## Clock format setting

Specifies how the clock is displayed:

- **12-Hour** – Sets the clock to show in 12-hour format in the display.
- **24-Hour** – Sets the clock to show in 24-hour format in the display.

## TV attenuator setting

If the source connected to the **TV** analog input is producing distortion through the speakers, the attenuator will reduce the signal level.

- **ATT 6dB** – Reduces the signal level by 6 dB.
- **ATT 10dB** – Reduces the signal level by 10 dB.
- **ATT Off** – No attenuation

## Line attenuator setting

If the source connected to the **LINE** analog input is distorting, the attenuator can reduce the signal level.

- **ATT 6dB** – Reduces the signal level by 6 dB.

- **ATT 10dB** – Reduces the signal level by 10 dB.
- **ATT Off** – No attenuation

### Frequency step setting

*Not applicable to the Saudi Arabian model*

If you find that you can't tune into stations successfully, the frequency step may not be suitable for your country/region.

- **FM 50. AM 9**
- **FM 100. AM 10**

### TV format setting

The default setting of this system is **AUTO**, and unless you notice that the picture is distorted when playing some discs, you should leave it set to **AUTO**. If you experience picture distortion with some discs, set the TV system to match your country or region's system. Doing this, however, may restrict the kinds of disc you can watch. The table below shows what kinds of disc are compatible with each setting (**AUTO**, **PAL** and **NTSC**).

Disc		Player setting		
Type	Format	NTSC	PAL	AUTO
DVD	NTSC	NTSC	MOD.PAL	NTSC
/Super VCD	PAL	NTSC	PAL	PAL
Video CD	NTSC	NTSC	MOD.PAL	NTSC
	PAL	NTSC	PAL	PAL
CD/no disc	—	NTSC	PAL	NTSC or PAL

### System demo setting

Switches the automatic demo feature on or off (this starts when the system is plugged in for the first time):

- **Demo On** – Switches the demo feature on.
- **Demo Off** – Switches the demo feature off.

#### Note

- After setting the clock, the demo mode switches off automatically. However, if you unplug the system from the wall outlet, the demo mode will revert to **Demo On** (and the clock will be reset).

## Watching NTSC on a PAL TV (MOD. PAL)

Most models of the newly developed count-down PAL TV system detect 50 Hz (PAL)/60 Hz (NTSC) and automatically switch vertical amplitude, resulting in a display without vertical shrinkage. However, in some cases, the image may appear without color.

If your PAL TV does not have a V-Hold control, you may not be able to watch NTSC discs because of picture roll. If the TV has a V-Hold control, adjust it until the picture stops rolling. On some TVs, the picture may shrink vertically, leaving black bands at the top and bottom of the screen. This is not a malfunction; it is caused by the NTSC to PAL conversion.

## Resetting the system

Use this procedure to reset all system settings to the factory default.

- 1 **Switch the system into standby.**
- 2 **Press and hold the front panel  (stop) button for about 8 seconds until the display shows 'Mem.Clr.?'**
- 3 **Press the front panel /II button.** All the system's settings are now reset, and you should see the 'Let's Get Started' screen.

## Using and taking care of discs

### Titles, chapters and tracks

DVD discs are generally divided into one or more titles. Titles may be further subdivided into chapters.

CDs and Video CD/Super VCDs are divided into tracks.

CD-ROMs contain folders and files. WMA/MP3 files are referred to as tracks. Folders may contain further folders.

### DVD Video regions

All DVD Video discs carry a region mark on the case somewhere that indicates which region(s) of the world the disc is compatible with. Your DVD system also has a region mark, which you can find on the rear panel. Discs from incompatible regions will not play in this system. Discs marked **ALL** will play in any system.

The diagram below shows the various DVD regions of the world.

### Handling discs

When holding discs of any type, take care not to leave fingerprints, dirt or scratches on the disc surface. Hold the disc by its edge or by the center hole and edge.

Damaged or dirty discs can affect playback performance. Take care also not to scratch the label side of the disc. Although not as fragile as the recorded side, scratches can still result in a disc becoming unusable.

Should a disc become marked with fingerprints, dust, etc., clean using a soft, dry cloth, wiping the disc lightly from the center to the outside edge as shown in the diagram below.

*Wipe lightly from the center of the disc using straight strokes.*

*Don't wipe the disc surface using circular strokes.*

If necessary, use a cloth soaked in alcohol, or a commercially available CD/DVD cleaning kit to clean a disc more thoroughly. Never use benzine, thinner or other cleaning agents, including products designed for cleaning vinyl records.

### Storing discs

Although CDs and DVD discs are more durable than vinyl records, you should still take care to handle and store discs correctly. When you're not using a disc, return it to its case and store upright. Avoid leaving discs in excessively cold, humid, or hot environments (including under direct sunlight).

Don't glue paper or put stickers onto the disc, or use a pencil, ball-point pen or other sharp-tipped writing instrument. These could all damage the disc.

For more detailed care information see the instructions that come with discs.

Do not load more than one disc into the player at a time.

### Discs to avoid

Discs spin at high speed inside the player. If you can see that a disc is cracked, chipped, warped, or otherwise damaged, don't risk using it—you could end up damaging the player.

This system is designed for use with conventional, fully circular discs only. Use of shaped discs is not recommended for this product. Pioneer disclaims all liability arising in connection with the use of shaped discs.

## Proper installation and maintenance of this system

### Hints on installation

We want you to enjoy using this system for years to come, so please bear in mind the following points when choosing a suitable location for it:

#### Do...

- ✓ Use in a well-ventilated room.
- ✓ Place on a solid, flat, level surface, such as a table, shelf or stereo rack.

#### Don't...

- ✗ Use in a place exposed to high temperatures or humidity, including near radiators and other heat-generating appliances.
- ✗ Place on a window sill or other place where the system will be exposed to direct sunlight.
- ✗ Use in an excessively dusty or damp environment.
- ✗ Place directly on top of an amplifier, or other component in your stereo system that becomes hot in use.
- ✗ Use near a television or monitor as you may experience interference—especially if the television uses an indoor antenna.
- ✗ Use in a kitchen or other room where the system may be exposed to smoke or steam.
- ✗ Use on a thick rug or carpet, or cover with cloth—this may prevent proper cooling of the system unit.

- ✗ Place on an unstable surface, or one that is not large enough to support all four of the system unit's feet.

### Cleaning the pickup lens

The DVD player's lens should not become dirty in normal use, but if for some reason it should malfunction due to dust or dirt, consult your nearest Pioneer authorized service center. Although lens cleaners are commercially available, we do not recommend using them since some may damage the lens.

### Problems with condensation

Condensation may form inside the system unit if it is brought into a warm room from outside, or if the temperature of the room rises quickly. Although the condensation won't damage the system, it may temporarily impair its performance. For this reason you should leave it to adjust to the warmer temperature for about an hour before switching on and using.

### Moving the system unit

If you need to move the main unit, first remove all discs, then press **STANDBY/ON** on the front panel to turn the system off. Wait for **Good Bye** to disappear from the display, then unplug the power cord. Never lift or move the system during playback—discs rotate at a high speed and may be damaged.

#### Note

- Unplugging the system before **Good Bye** disappears from the display may cause the system to return to the factory settings.

### Power cord caution

Handle the power cord by the plug part. Do not pull out the plug by tugging the cord, and never touch the power cord when your hands are wet, as this could cause a short circuit or

electric shock. Do not place the system unit, a piece of furniture, or other object on the power cord or pinch the cord in any other way. Never make a knot in the cord or tie it with other cords. The power cord should be routed so that they are not likely to be stepped on. A damaged power cord can cause a fire or give you an electric shock. Check the power cord once in a while. If you find it damaged, ask your nearest Pioneer authorized service center or your dealer for a replacement.

## Connecting external antennas

### External AM antenna

Use 5 to 6 meters of vinyl-insulated wire and set up either indoors or outdoors. Leave the AM loop antenna connected.

### External FM antenna

Use 75 Ω coaxial cable to hook up an external FM antenna.

## Connecting auxiliary components

This system has both stereo analog inputs and outputs, as well as a coaxial digital input. Use these to connect external components, such as your VCR, MD or CD-R recorder.

- Connect the **LINE 1 (IN)** jacks to the analog outputs of an external playback component.

These include components such as a VCR or cassette deck. Connect using RCA pin-plug stereo cables.

- Connect the **LINE 1 (OUT)** jacks to the analog inputs of an external recording component.

These include components such as a cassette deck, VCR, MD or another recorder with analog inputs. Connect using RCA pin-plug stereo cables.

- Connect the **COAX IN (LINE 2)** jack on the rear panel to the coaxial digital output of an external playback component.

These include digital components such as an MD player, digital satellite, or a game system. Connect using a coaxial digital cable (not supplied).

### Tip

- If you find that the **LINE 1** audio is distorting when played through this system, you can set the input attenuator to reduce the input signal level. See *Optional system settings* on page 67 to do this.

## Recording mode

The Recording mode allows you to make surround-compatible analog recordings from the **LINE 1 (OUT)** jacks. Dolby multichannel sources will be downmixed to stereo for improved playback with systems that can provide matrix-decoding (like Dolby Pro Logic).

- 1 Press **SOUND MODE**.
- 2 Use the Use the **←/→ (cursor left/right)** buttons to select '**Rec Mode?**'.
- 3 Press **ENTER**.
- 4 Use the **↑/↓ (cursor up/down)** buttons to select '**R.Mode On**' or '**R.Mode Off**'.
  - **R.Mode On** – A surround-compatible downmix (left-total/right-total, or Lt/Rt) of Dolby multichannel sources is output, (suitable for Dolby Surround Pro Logic or other matrix decoding).
  - **R.Mode Off** – A simple stereo downmix (left-only/right-only, or Lo/Ro) is output (suitable for playback on a two-channel stereo system or on headphones).

### Note

- When Recording mode is on, most surround sound-related functions cannot be used. The display will briefly blink **RecMode On** if you try and use a prohibited function while Recording mode is on.
- When Recording mode is off, the audio from the analog output may be interrupted, depending on the operation.
- The Recording mode automatically switches off if you change the input function (**DVD/CD**, **TUNER**, etc.) or switch the power off.

## Troubleshooting

Incorrect operations are often mistaken for trouble and malfunctions. If you think that there is something wrong with this component, check the points below. Sometimes the trouble may lie in another component. Investigate the other components and electrical appliances being used. If the trouble cannot be rectified even after exercising the checks listed below, ask your nearest Pioneer authorized service center or your dealer to carry out repair work.

### Important

- If the system is not operating normally due to external effects such as static electricity, disconnect the power plug from the outlet and insert again to resume normal operation.

## General

Problem	Remedy
The power does not turn on.	<ul style="list-style-type: none"> <li>• Connect the power plug to the wall outlet.</li> <li>• Disconnect the power plug from the outlet, and insert again.</li> <li>• Make sure there are no loose strands of speaker wire touching the rear panel. This could cause the system to shut off automatically.</li> </ul>
No sound is output when a function is selected.	<ul style="list-style-type: none"> <li>• If you're using the line input, make sure the component is connected correctly (see <i>Connecting auxiliary components</i> on page 72).</li> <li>• Press <b>MUTE</b> on the remote control to turn muting off.</li> <li>• Adjust the <b>VOLUME</b>.</li> </ul>
No image is output when playing discs.	<ul style="list-style-type: none"> <li>• Make sure the TV is connected correctly (see <i>Connecting to your TV</i> on page 13).</li> <li>• Reset the video output to interlace (see <i>Watching progressive scan video from the component video outputs</i> on page 15).</li> </ul>
No sound from surround or center speakers.	<ul style="list-style-type: none"> <li>• Refer to <i>Setting the channel levels</i> on page 60 to check speaker levels.</li> <li>• Check that you haven't selected the <b>STEREO</b> sound mode (see <i>Listening in stereo</i> on page 40).</li> <li>• Make sure the speakers are connected properly (see <i>Connecting the speakers</i> on page 10).</li> </ul>
Can't operate the remote control.	<ul style="list-style-type: none"> <li>• Replace the batteries (see <i>Putting the batteries in the remote control</i> on page 7).</li> <li>• Operate within 7 m, 30° of the remote sensor on the front panel (see <i>Using the remote control</i> on page 8).</li> <li>• Remove any obstacles or operate from another position.</li> <li>• Avoid exposing the remote sensor on the front panel to direct light.</li> <li>• You won't be able to use the remote sensor of this unit with the <b>CONTROL IN</b> jack of this unit connected to the <b>CONTROL OUT</b> jack of your plasma display. You can use the remote sensor of the plasma display (even in standby) as long as the power isn't switched off.</li> </ul>

Problem	Remedy
<p><b>Sound Demo</b> shows in the display and the unit can't be controlled.</p>	<ul style="list-style-type: none"> <li>• Press and hold <b>■</b> (stop) on the front panel for about five seconds. The disc tray ejects automatically to indicate the Sound Demo mode is disabled.</li> </ul>
<p>Timer indicator is blinking and the system will not switch on.</p>	<ul style="list-style-type: none"> <li>• Unplug the system, then plug back in. Wait for one minute then switch on.</li> <li>• Make sure the fan at the rear of the system unit is not being blocked.</li> <li>• Check that the speakers are connected correctly.</li> <li>• Make sure the voltage of the mains power source is correct for the model.</li> <li>• If the problem persists, take it to your nearest Pioneer authorized service center or your dealer for servicing.</li> </ul>

### DVD/CD/Video CD/Super VCD player

Problem	Remedy
<p>The disc is ejected automatically after loading.</p>	<ul style="list-style-type: none"> <li>• Clean the disc.</li> <li>• Align the disc properly in the disc guide.</li> <li>• If the region number on a DVD-video disc does not match the number on the system unit, the disc cannot be used (see <i>DVD Video regions</i> on page 69).</li> <li>• Allow time for any condensation inside the system unit to evaporate. Avoid using the system near an air-conditioning unit.</li> </ul>
<p>Playback is not possible.</p>	<ul style="list-style-type: none"> <li>• If the disc is loaded upside down, reload the disc with the label side face up.</li> </ul>
<p>Picture playback stops and the operation buttons cannot be used.</p>	<ul style="list-style-type: none"> <li>• Press <b>■</b> (stop), then <b>▶</b> (play) to start playback again.</li> <li>• Switch the power off once, then on again using the front panel <b>⏻ STANDBY/ON</b> button.</li> </ul>
<p>Settings are canceled.</p>	<ul style="list-style-type: none"> <li>• When the power is cut due to power failure or by unplugging the power cord, settings will be canceled.</li> </ul>
<p>No picture/No color.</p>	<ul style="list-style-type: none"> <li>• Check that connections are correct and that plugs are inserted fully.</li> <li>• Check the instruction manual of the TV/monitor to make sure the TV/monitor settings are incorrect.</li> </ul>
<p>Screen is stretched or aspect does not change.</p>	<ul style="list-style-type: none"> <li>• The <b>TV Screen</b> setting is incorrect. Set the TV Screen option to match the TV/monitor you're using (see <i>Video Output settings</i> on page 63).</li> </ul>
<p>CD won't play.</p>	<ul style="list-style-type: none"> <li>• Set the PhotoViewer menu option in the Initial Settings menu to <b>Off</b> to be able to play some copy-protected CDs. See <i>Options</i> on page 65.</li> </ul>

Problem	Remedy
When recorded on a VCR or passed through an AV selector, there is disturbance in the playback picture.	<ul style="list-style-type: none"> <li>This system uses copy-protection technology which may prevent recording or cause picture problems when connected through a VCR or AV selector. This is not a malfunction.</li> </ul>
Picture disturbance during playback or dark.	<ul style="list-style-type: none"> <li>This system is compatible with Macro-Vision System copy guard. Some discs include a copy prevention signal, and when this type of disc is played back, stripes etc., may appear on some sections of the picture depending on the TV. This is not a malfunction.</li> <li>Discs respond differently to particular system functions. This may result in the screen becoming black for a brief instant or shaking slightly when the function is executed. These problems are largely due to differences between discs and disc content and are not malfunctions of this system.</li> </ul>
Noticeable difference in DVD and CD volume.	<ul style="list-style-type: none"> <li>DVDs and CDs use different recording methods. This is not a malfunction.</li> </ul>

### WMA/MP3/JPEG discs

Problem	Remedy
CD-ROM disc is not recognized by the system.	<ul style="list-style-type: none"> <li>Make sure that the CD-ROM was recorded using the ISO 9660 disc format. See <i>Disc / content format playback compatibility</i> on page 8 for other disc compatibility information.</li> </ul>
Files don't show up in the Disc Navigator/Photo Browser.	<ul style="list-style-type: none"> <li>The files on the disc must be named with the correct file extension: .mp3 for MP3 files; .wma for WMA files; .jpg for JPEG files (upper or lower-case is OK). See <i>Disc / content format playback compatibility</i> on page 8 for other disc compatibility information.</li> </ul>
Can play JPEG files, but not WMA/MP3 files on the same disc (or vice versa).	<ul style="list-style-type: none"> <li>Set the PhotoViewer menu option in the Initial Settings menu to <b>Off</b> to be able to access the WMA/MP3 files. Set to <b>On</b> to be able to play the JPEG files. See <i>Options</i> on page 65.</li> </ul>
Can't play WMA files.	<ul style="list-style-type: none"> <li>The files were recorded using DRM (digital rights management). This is not a malfunction. See <i>DRM</i> in the <i>Glossary</i> on page 81.</li> </ul>

### Tuner

Problem	Remedy
Auto tuning does not pick up some stations.	<ul style="list-style-type: none"> <li>The radio signal is weak. Auto tuning will only detect radio stations with a good signal. For more sensitive tuning, connect an outdoor antenna.</li> </ul>

Problem	Remedy
Sound is mono only.	<ul style="list-style-type: none"> <li>• Check that the tuner is not set to FM mono (see <i>Improving poor FM reception</i> on page 35).</li> </ul>
Considerable noise in radio broadcasts.	<ul style="list-style-type: none"> <li>• Tune into the correct frequency.</li> <li>• Connect the antenna (see <i>Connecting the supplied antennas</i> on page 18 and <i>Connecting external antennas</i> on page 71).</li> <li>• Fully extend the FM wire antenna, position for best reception, and secure to a wall.</li> <li>• Connect an outdoor FM antenna (see <i>Connecting external antennas</i> on page 71).</li> <li>• Adjust the direction and position for best reception.</li> <li>• Connect an additional internal or external AM antenna (see <i>AM loop antenna</i> on page 18 and <i>Connecting external antennas</i> on page 71).</li> <li>• Turn off any other equipment that may be causing the noise or move it away from the system unit.</li> <li>• The tuning interval is incorrect for your country or region. Try switching the tuning interval (frequency step) (see <i>TV attenuator setting</i> on page 67).</li> </ul>

## Error Messages

Message	Description
<b>Child Lock</b>	<ul style="list-style-type: none"> <li>• This message appears when the front panel buttons are pressed when the child lock feature is active. See <i>Child lock setting</i> on page 67 for more on switching on/off the child lock.</li> </ul>
<b>Rec Mode On</b>	<ul style="list-style-type: none"> <li>• Blinks rapidly for 2 seconds when an operation is prohibited because the Recording Mode is on (see <i>Recording mode</i> on page 72).</li> </ul>
<b>Phones In</b>	<ul style="list-style-type: none"> <li>• Blinks rapidly for 2 seconds when an operation is prohibited because headphones are connected.</li> </ul>
<b>96k Stereo</b>	<ul style="list-style-type: none"> <li>• Blinks rapidly for 2 seconds when an operation is prohibited because the source is digital 88.2 kHz or 96 kHz PCM.</li> </ul>
<b>No Surr. SP</b>	<ul style="list-style-type: none"> <li>• Blinks rapidly for 2 seconds when an operation is prohibited because there is no surround speaker output.</li> </ul>
<b>Muting</b>	<ul style="list-style-type: none"> <li>• Blinks rapidly for 2 seconds when an operation is prohibited because the sound is muted (press the <b>MUTE</b> button to turn the sound on).</li> </ul>
<b>Exit</b>	<ul style="list-style-type: none"> <li>• Appears briefly when a menu is automatically exited after a set period of inactivity.</li> </ul>
<b>SR+ Error</b>	<ul style="list-style-type: none"> <li>• Appears when there is a communication problem between the unit and the plasma display. Check all connections and retry.</li> </ul>

## Screen sizes and disc formats

DVD-Video discs come in several different screen aspects, ranging from TV programs, which are generally 4:3, to CinemaScope widescreen movies, with an aspect ratio of up to about 7:3.

Televisions also come in different aspect ratios; 'standard' 4:3 and widescreen 16:9.

### Widescreen TV users

If you have a widescreen TV, the **TV Screen** setting (page 63) of this system should be set to **16:9 (Wide)**.

When you watch discs recorded in 4:3 format, you can use the TV controls to select how the picture is presented. Your TV may offer various zoom and stretch options; see the instructions that came with your TV for details.

Please note that some movie aspect ratios are wider than 16:9, so even though you have a widescreen TV, these discs will still play in a 'letterbox' style with black bars at the top and bottom of the screen.

### Standard TV users

If you have a standard TV, the TV Screen setting (page 63) of this system should be set to **4:3 (Letter Box)** or **4:3 (Pan&Scan)**, depending on which you prefer.

Set to **4:3 (Letter Box)**, widescreen discs are shown with black bars top and bottom.

Set to **4:3 (Pan&Scan)**, widescreen discs are shown with the left and right sides cropped. Although the picture looks larger, you don't actually see the whole picture.

Please note that many widescreen discs override the system's settings so that the disc is shown in letterbox format regardless of the setting.

#### Tip

- Using the **16:9 (Wide)** setting with a standard 4:3 TV, or either of the **4:3** settings with a widescreen TV, will result in a distorted picture.

## Selecting languages using the language code list

Some of the language options allow you to set your preferred language from any of the 136 languages listed in the *Language code list* on page 79.

- 1 Select 'Other Language'.**
- 2 Use the ←/→ (cursor left/right) buttons to select either a code letter or a code number.**
- 3 Use the ↑/↓ (cursor up/down) buttons to select a code letter or a code number.** See *Language code list* on page 79 for a complete list of languages and codes.

## Glossary

**Analog audio** Direct representation of sound by an electrical signal. See also *Digital audio*.

**Aspect ratio** The width of a TV screen relative to its height. Conventional TVs are 4:3; widescreen models are 16:9.

**Digital audio** Indirect representation of sound using numbers. See also *Sampling frequency* and *Analog audio*.

**Dolby Digital** A multichannel audio encoding system developed by Dolby Laboratories that enables far more audio to be stored on a disc than PCM encoding. See also *PCM (Pulse Code Modulation)*.

**DRM** DRM (digital rights management) is a technology designed to prevent unauthorized copying by restricting playback of material on devices other than the PC used to record it. For detailed information, please see the instruction manuals or help files that came with your PC and WMA recording software.

**DTS** A multichannel audio encoding system developed by Digital Theater Systems that enables far more audio to be stored on a disc than PCM encoding. See also *PCM (Pulse Code Modulation)*.

**Dynamic range** The difference between the quietest and loudest sounds possible in an audio signal.

**EXIF (Exchangeable Image File)** A file format developed by Fuji Photo Film for digital still cameras. Digital cameras from various manufacturers use this compressed file format which carries date, time and thumbnail information, as well as the picture data.

**File extension** A tag added to the end of a filename to indicate the type of file. For example, ".mp3" indicates an MP3 file.

**ISO 9660 format** International standard for the volume and file structure of CD-ROM discs.

**JPEG** A standard file format used for still images. JPEG files are identified by the file extension ".jpg".

**MP3** MP3 (MPEG1 audio layer 3) is a compressed stereo audio file format. Files are recognized by their file extension ".mp3".

**MPEG audio** An audio format used on Video CD/ Super VCDs and some DVD discs.

**MPEG video** A video format used on Video CD/ Super VCDs and some DVD discs.

**PBC (PlayBack Control)** A system of navigating a Video CD/ Super VCD through on-screen menus recorded onto the disc.

**PCM (Pulse Code Modulation)** Digital audio encoding system found on CDs. Good quality, but requires a lot of data compared to Dolby Digital, DTS and MPEG encoded audio. See also *Digital audio*.

**Progressive scan video** All the lines that make up a video picture are updated in one pass (compared to interlace which takes two passes to update the whole picture).

**Regions** These associate DVD-Video discs and players with particular areas of the world. See *DVD Video regions* on page 69 for more information.

**Sampling frequency** The rate at which sound is measured to be turned into digital audio data. The higher the rate, the better the sound quality. CD is 44.1 kHz; DVD can be up to 96 kHz. See also *Digital audio*.

**WMA** WMA is short for Windows Media Audio and refers to an audio compression technology developed by Microsoft Corporation. Files are recognized by their file extension ".wma".

*Manufactured under license from Dolby Laboratories. "Dolby", "Pro Logic" and the double-D symbol are trademarks of Dolby Laboratories. "DTS" and "DTS Digital Surround" are registered trademarks of Digital Theater Systems, Inc.*

## Specifications

### Amplifier section

Continuous Power Output (RMS):

Front, center, surround . . . . . 100 W per channel  
(1 kHz, 10 % T.H.D., 6  $\Omega$ )

Subwoofer . . . . . 100 W (100 Hz, 10 % T.H.D., 6  $\Omega$ )

### FM tuner section

Frequency range . . . . . 87.5 MHz to 108 MHz

Antenna . . . . . 75  $\Omega$ , unbalanced

### AM tuner section

Frequency range

With 9 kHz step . . . . . 531 kHz to 1602 kHz

With 10 kHz step . . . . . 530 kHz to 1700 kHz

(*Not applicable to the Saudi Arabian model*)

Antenna . . . . . Loop antenna

### Miscellaneous

Power requirements

Taiwan model . . . . . AC 110 V to 120 V, 60 Hz

All other models

. . . . . AC 120–127 V/220–230 V/  
240 V (switchable), 50 Hz/60 Hz

Power consumption . . . . . 180 W

Power consumption in standby . . . . . 0.5 W

Dimensions

. . . . . 420 (W) mm x 126 (H) mm x 445 (D) mm

Weight . . . . . 9.8 kg

### Accessories (DVD/CD receiver)

Remote control . . . . . 1

AA/R6P dry cell batteries (HTD88DVD model – to confirm system operation) . . . . . 2

Video cable (yellow plugs) . . . . . 1

AM loop antenna . . . . . 1

FM antenna . . . . . 1

Power cord

Central and South American models . . . . . 2

All other models . . . . . 1

Power plug adapter (Central and South American models, PX model) . . . . . 1

These operating instructions . . . . . 1

Warranty Card (Australian and PX model) . . . . . 1

### Speaker System

(*Front speakers x2, surround speakers x2, center speaker x1, subwoofer x1*)

#### Front speakers (S-DV8)

Enclosure . . . . . Closed-box bookshelf type  
(magnetically shielded)

System . . . . . 2-way system

Speakers

Woofer . . . . . 10 cm cone type

Tweeter . . . . . 5.2 cm cone type

Nominal impedance . . . . . 6  $\Omega$

Frequency range . . . . . 50 Hz to 20 kHz

Maximum Input Power . . . . . 100 W

Dimensions

. . . . . 155 (W) mm x 364 (H) mm x 190 (D) mm

Weight . . . . . 2.6 kg

#### Front speakers (S-DV88)

Enclosure . . . . . Bass-reflex bookshelf type  
(magnetically shielded)

System . . . . . 1-way system

Speakers

Woofer . . . . . 10 cm cone type

Nominal impedance . . . . . 6  $\Omega$

Frequency range . . . . . 50 Hz to 20 kHz

Maximum Input Power . . . . . 100 W

Dimensions

. . . . . 155 (W) mm x 360 (H) mm x 190 (D) mm

Weight . . . . . 2.3 kg

#### Center speaker (S-DV8)

Enclosure . . . . . Closed-box bookshelf type  
(magnetically shielded)

System . . . . . 8.7 cm 1-way system

Speakers . . . . . 8.7 cm cone type

Nominal impedance . . . . . 6  $\Omega$

Frequency range . . . . . 65 Hz to 20 kHz

Maximum Input Power . . . . . 100 W

Dimensions

. . . . . 350 (W) mm x 120 (H) mm x 75 (D) mm

Weight . . . . . 1 kg

**Center speaker (S-DV88)**

Enclosure . . . . . Bass-reflex bookshelf type  
 (magnetically shielded)  
 System . . . . . 7.7 cm 1-way system  
 Speakers . . . . . 7.7 cm cone type  
 Nominal impedance . . . . . 6 Ω  
 Frequency range . . . . . 65 Hz to 20 kHz  
 Maximum Input Power . . . . . 100 W  
 Dimensions  
 . . . . . 340 (W) mm x 108 (H) mm x 100 (D) mm  
 Weight . . . . . 1.4 kg

**Surround speakers (S-DV8)**

Enclosure . . . . . Closed-box bookshelf type  
 (magnetically shielded)  
 System . . . . . 8.7 cm 1-way system  
 Speakers . . . . . 8.7 cm cone type  
 Nominal impedance . . . . . 6 Ω  
 Frequency range . . . . . 95 Hz to 20 kHz  
 Maximum Input Power . . . . . 100 W  
 Dimensions  
 . . . . . 155 (W) mm x 110 (H) mm x 110 (D) mm  
 Weight . . . . . 0.8 kg

**Surround speakers (S-DV88)**

Enclosure . . . . . Closed-box bookshelf type  
 System . . . . . 7.7 cm 1-way system  
 Speakers . . . . . 7.7 cm cone type  
 Nominal impedance . . . . . 6 Ω  
 Frequency range . . . . . 95 Hz to 20 kHz  
 Maximum Input Power . . . . . 100 W  
 Dimensions  
 . . . . . 145 (W) mm x 108 (H) mm x 100 (D) mm  
 Weight . . . . . 0.7 kg

**Subwoofer (S-DV8)**

Enclosure . . . . . Bass-reflex floor type  
 System . . . . . 16 cm 1-way system  
 Speaker . . . . . 16 cm cone type  
 Nominal impedance . . . . . 6 Ω  
 Frequency range . . . . . 35 Hz to 2 kHz  
 Maximum Input Power . . . . . 100 W  
 Dimensions  
 . . . . . 190 (W) mm x 360 (H) mm x 327 (D) mm  
 Weight . . . . . 5.0 kg

**Subwoofer (S-DV88)**

Enclosure . . . . . Bass-reflex floor type  
 System . . . . . 16 cm 1-way system  
 Speaker . . . . . 16 cm cone type  
 Nominal impedance . . . . . 6 Ω  
 Frequency range . . . . . 35 Hz to 2 kHz  
 Maximum Input Power . . . . . 100 W  
 Dimensions  
 . . . . . 190 (W) mm x 360 (H) mm x 315 (D) mm  
 Weight . . . . . 4.7 kg

**Accessories (S-DV8 Speaker system)**

Speaker cables . . . . . 6  
 Non-skid pads . . . . . 2 sheets

**Accessories (S-DV88 Speaker system)**

Non-skid pads . . . . . 1 sheet
