CAMCORDER

CC6383

Specifications

- **Dimensions:** 4 $\frac{1}{8}$ " H, 3 $\frac{1}{8}$ " W, 7 $\frac{1}{4}$ " D
- **Approx. Shipping Weight:** 5.1 Lbs.

Camera

- **AutoShot™**
RCA AutoShot Camcorders were specifically designed with ease of use in mind. Let the following RCA AutoShot features take the guesswork out of your video recordings.
 - Auto Focus—Provides fast and accurate automatic focusing from super-close-up to distant shots.
 - Auto Shutter Speed—Automatically selects the optimum shutter speed for the lighting condition.
 - Auto White Balance—Automatically adjusts for various lighting conditions to provide natural color representation.
 - Auto Iris—Allows the camcorder to automatically adjust the amount of light that is let in through the lens to compensate for extremes in lighting conditions.
- **3" LCD ColorView™ Screen**
The large, high-resolution 3" ColorView™ Screen provides for TV-like viewing while recording or during playback. The display screen rotates 270° which allows for self-recording with the camcorder lens and display screen both facing you.
- **ColorView™ Color Viewfinder**
Advanced LCD technology in a compact .55" panel allows you to see the world of color your camcorder is recording—because we don't live in a black-and-white world.
- **300X Digital Zoom**
Zoom beyond the conventional 16X optical system to digitally enhance the zoom range to 300X. The one-button power zoom operation produces smooth, professional looking transitions from wide-angle scenes to close-up shots. A variable speed zoom adds the flexibility of slow or fast zooming.
- **Steady Pix™**
Helps to minimize the unwanted jitters from your video by digitally stabilizing the picture, before recording it on the tape.
- **Built-In Light**
Provides illumination in low light conditions to give accurate color reproduction and sharp detail in your recording. The camcorder light switch has an "Auto" position which will allow the built-in light to automatically turn on when low light conditions are detected by the camcorder.
- **7 Program AE Modes**
Special recording modes allow you to select the right setting for your video recording desires. Choose from Sports, Shadow, Haze, Sepia, Hi-Speed, Negative/Positive, and Twilight.
- **Quick Record**
Allows for five seconds of recording to capture brief moments of scenes quickly and easily.
- **Tele-Macro Focus**
Allows close-up recording of images or small objects such as flowers or insects from as far away as 20".

• Low Light Operation

Don't let low light situations limit your recording. With light sensitivity of less than 1.0 Lux, the advanced image sensor can record viewable pictures in dimly lit conditions.

Video System

- **VCR Compatible**
Simply place the VHS-C tape from your camcorder in the VCR Cassette Adapter and place into your VCR. A real advantage over other camcorder tape formats—there is no need to worry about taking the time to run wires to play back your videos in a VHS VCR.
- **5-Head Video System**
This system offers the traditional two heads for SP mode and an additional two heads for SLP mode, but adds a fifth dedicated Flying Erase Head which allows the camcorder to erase as precisely as it records. Scene transitions are smooth and noise-free, without the usual bands of video interference and "rainbow noise" prominent in recordings made without a Flying Erase Head.
- **Edit Search**
Provides the capability to precisely position the tape for the start of a new recording segment without having to switch out of the Record/Pause camera mode.
- **2-Speed Recording**
Choose between SP and SLP recording speeds, with a maximum record time of 120 minutes when using a 40-minute VHS-C tape.

Special Features

- **Multi-Language Titles**
Conveniently add one of eight quick titles stored in the camcorder memory to your recording. Choose among English, French, or Spanish versions of the following eight quick titles: Happy Birthday, Happy Holidays, Congratulations, Our Family, Someone Special, Vacation, Super Star, and First.
- **4 Digital Fades: Black, Mosaic, Door Wipe, and Scroll Wipe**
Add exciting transitions between scenes during recording by using these popular fades and screen wipes.
- **Self-Timer and Animation Features**
Allows self-recording using the self-timer feature. Just place the camcorder on the tripod to stabilize it while using this feature. Animation recording produces an illusion of movement for an otherwise stationary scene or object by shooting a series of slightly different poses.
- **Time/Date/Auto Date Recording**
Date and time can be recorded on the tape so you will always remember when those special moments took place. Utilize the Auto Date

RCA

feature if the time and date are only desired on the first few seconds of your recording.

- **On-Screen Menu for Feature Selections**
The main recording menu lets you select and set several recording functions including: Exposure, Date/Time, Tele-Macro, Title Language, and White Balance.
- **Auto Demo Mode**
A retail demonstration of this camcorder's main features can be reviewed continuously while the camcorder is in this mode.
- **Quick Connect Audio and Video Jacks**
Your camcorder is equipped with RCA-type jacks that allow for quick connection of RCA-type cables to the jacks on your VCR or TV for playback of your recordings.
- **Built-in Lens Cover**
This camcorder comes with a built-in lens cover to protect the lens from dust or abrasions when the camcorder is not in the recording mode. A simple and convenient lens cover switch located below the lens opens and closes the cover.
- **Built-In Speaker**
Allows the user to listen to recorded audio during playback of taped material.
- **Low Power Consumption**
Allows extended record times. All new digital signal processing requires a low 3.5 watts of power to operate. Over 100 minutes of record time from a 60-minute battery is now possible.

Accessories

- **1-Hour Rechargeable Battery**
- **AC Adapter/Charger**
- **DC Output Cable**
- **Lithium Clock Battery**
- **Shoulder Strap**
- **VHS-C Cassette Adapter**

Plus

- **Limited Warranty**
