# SANYO

## SAFETY MANUAL

## USING YOUR DIGITAL CAMERA SAFELY AND CORRECTLY

- Before using your camera, please read and understand these safety instructions as well as the instruction manual for your camera.
- Keep all manuals in a safe place for later reference.
- These safety instructions cover both the camera and its accessories. Depending on which product was purchased, the camera specifications and accessories may differ.

## **CAUTIONS CONCERNING BOTH CAMERA AND ACCESSORIES**

## WARNING

- If a device makes a strange noise, emits a strange odor, or if smoke comes out from it, immediately turn off the power and proceed as follows
  - If a device is used under these conditions, it may cause a fire or electric shock.
  - ① Turn off the device.
- When use the docking station or AC adaptor/charger, unplug the power cord from the power outlet.
- ③ Remove the battery.
  - After completing these actions, wait to make sure no more smoke comes from the device. Then take it to the dealer for service. Do not try to repair or open the device yourself.

## Do not use during a storm

- To avoid the risk of being struck by lightning, do not use the devices during a thunderstorm. In particular, if used in an open field, you have an increased chance of being struck by lightning. Quickly seek refuge in a place that will protect you from lightning.
- Keep the devices out of the reach of children
   The following may happen if children play with the
  - devices:
    They may wrap the strap around their neck and suffocate.
  - They may swallow the battery or other small parts.
  - In such a case, consult a physician immediately.
  - They may damage their eyesight if the flash goes off too close to their eyes.
    They may get hurt by the camera or other devices.
- Do not disassemble or modify
  - It is dangerous to touch the inside of the devices.
  - Doing so may cause a fire or electric shock.
  - The camera, especially, incorporates high-voltage circuits.
    Any internal check, setting, or repair should be
  - Provide the dealer.
    Do not use the AC adaptor as a direct current
  - Do not use the AC adaptor as a direct current generator.

## **CAUTIONS CONCERNING THE CAMERA**

## WARNING

- Use within the specified time and depth parameters

   This camera complies with the JIS IPX8 (formerly "JIS protection grade 8") standard and can be safely used in water at a maximum depth of approximately 1.5 m (4.92 ft.), for a maximum consecutive period of time of approximately 60 minutes. Using the camera in conditions that exceed these parameters may expose the interior to water and cause the camera to malfunction.
  - If the inside of the camera gets wet, immediately turn it off and remove the battery pack. Then take it to a dealer for repair. Using the camera after it has been become wet may cause a fire, electric shock, or other accident.

#### Do not use while driving

- Do not capture images, play back images, or watch the LCD monitor while driving a vehicle. Doing so may cause an accident.
- Be careful where you put down the camera inside an automobile. During sudden stops or turns it may fall behind the brake pedal and prevent braking.
- Be aware of your surroundings when using the camera
  - Pay close attention to your surroundings when using the camera. Failure to do so may lead to an accident or injury.
  - When using the camera while walking, be very careful of your surroundings and especially the traffic to avoid accidents.
  - Do not use the camera inside an airplane or elsewhere where its use may be restricted. Doing so may cause an accident.
- Do not place on an unstable surface
- The camera may fall, resulting in damage to the camera or injury.
   If the camera has fallen and its body is damaged
- If the camera has fallen and its body is damaged, turn it off, remove the battery pack, and take it to the dealer for repair. Using the camera after its body has been damaged may cause a fire or electric shock.
- Do not look through the camera into the sun
  - Do not look through the camera at the sun or any other strong source of light. Doing so may seriously injure your eyes.

Do not use the flash close to a person's face
 To prevent possible eye injury, do not use the flash near a person's face. If the flash is used close to a person's opened eyes, there is a risk that it may damage that person's eyesight. Especially with young children or babies, use the flash from a distance of at least 1 meter away.

Do not use where there is risk of explosion
 Do not use the camera in a location where there is explosive gas, or any other flammable material in the air. Doing so may cause a fire or an explosion.

## CAUTION

- Cautions when carrying the camera
  - Do not walk around with the camera suspended from your neck or dangling from your wrist. It may hit other objects and get damaged. When walking around, hold the camera in your hand or place it in a pocket.
  - Be careful not to drop the camera or subject it to strong shocks.
  - Make sure direct sunlight does not hit the camera lens, as that may damage the internal parts. When not using the camera, be sure to always turn it off and confirm that the lens is covered.
- If the camera is not going to be used for a long period of time
  - For safety's sake, remove the battery pack from the camera. This will prevent any possible excess heat or leakage of battery fluid that may result in injuries or damage to nearby objects.

## Cautions during use and storage

 This camera is a precision instrument. It should not be used or stored where there are extreme changes in temperature or humidity, or where it may be exposed to dust.

#### Operating environment:

- Temperature 0 to 40°C (32 to 104°F) (operation) -20 to 60°C (-4 to 140°F) (storage)
- Humidity
  - y 30 to 90% (operation, no condensation) 10 to 90% (storage, no condensation)

## **CAUTIONS CONCERNING THE CAMERA**

- Do not hold the hot part for a long time
   The camera may become warm during use. A low temperature burn may result if you hold the hot part for a long time.
  - Do not cover or wrap the camera in a cloth or blanket
    - It may generate heat and cause the casing to warp or cause a fire.
  - After using the camera in water, follow these steps to wash it.
  - Securely close the battery/card compartment cover.
     Fill a shallow basin with fresh water, and immerse the camera for about 5 minutes.
  - ③ Rotate the monitor unit several times.
  - ④ Drain the camera completely, and use a dry cloth to wipe off any remaining moisture.
  - To maintain your camera's waterproof capability
     It is recommended that the waterproof seal be replaced with a new one every year. (There is a
  - charge for replacing it.)For replacing the waterproof seal, please contact your dealer.

## **CAUTIONS CONCERNING THE CARD**

## CAUTION

- Cautions concerning the card
- Immediately after use, the card will be very hot. Before removing the card, turn off the camera and wait for the temperature to card down
- wait for the temperature to cool down.
  Keep out of the reach of children. Young children may put the card in their mouth and choke or cause some other unexpected injury or accident.

#### Cautions when handling the cards

- The cards are precision devices. Do not bend, drop, or subject them to strong forces or shocks.
- Avoid using or storing the cards in places with extremely high or low temperatures, subject to direct sunlight, in a completely closed vehicle, near air conditioners or heaters, or in humid or dusty locations.
- Avoid using or storing the cards in locations where strong static electrical charges or electrical noise can be easily generated.
- Do not allow the edges of the cards to become contaminated with foreign materials. Gently wipe away any contamination with a soft, dry cloth.
- Do not carry the cards in trouser pockets, as the cards may become damaged when you sit down or make other movements that may apply force.
- Before using a new card or a card that was used in other equipment, be sure to format it using the camera. Please see the Instruction Manual for information regarding how to format the card.
- When buying commercially available products, carefully read the instructions and warnings that come with the card.

## **CAUTIONS CONCERNING THE CHARGER**

## DANGER

- Do not recharge a battery pack other than the specified battery pack
   Recharging a dry-cell battery or other type of rechargeable battery may cause excess heat,
- combustion, or leakage, and cause a fire, injuries, burns, or damage to nearby objects.

#### Concerning the power cord

• The voltage rating for the power cord supplied with this camera conforms to the standards of the country in which the camera was sold.

## Do not get the charger wet

- Make sure it does not get wet, as doing so may cause a fire or electric shock.
- Do not use it in a bathroom.
- If the charger gets wet, immediately unplug it from the power outlet and remove the battery pack. Then contact the place of purchase. If used while wet, it may cause a fire, electric shock, or an accident.

### WARNING

- Cautions when plugging in the power cord
   Securely plug the power cord all the way into the power outlet. If the charger is used with the power cord not fully plugged in, heat may be generated and cause a fire.
  - Do not use if the power cord is damaged or cannot be correctly plugged into the power outlet. Using in this condition may cause a fire or electric shock
  - condition may cause a fire or electric shock.
    Do not allow dust, etc., to build up on the power cord or power outlet. A build-up of dust may cause a short circuit or generate heat and cause a fire. Use a dry cloth to remove dust or dirt build-up after unplugging the cord from the power outlet.
  - When unplugging the power cord, be sure to hold the plug part and slowly pull it out of the power outlet.
     Pulling the cord portion may damage the power cord and cause a fire or electric shock.

#### Do not damage the power cord

- Do not place heavy objects on the power cord. Do not place the power cord near a heat source. Do not excessively bend the power cord, modify it, or secure it with staples. Doing so may damage the power cord and cause a fire or electric shock.
- If the power cord is damaged, or if it does not plug properly into the charger or wall outlet, contact the place of purchase.

- Cautions concerning the power cord
  - Do not leave the power cord plugged into an electrical outlet while the other end is not plugged into the charger. The loose end can cause electrocution if touched with wet hands or if handled by children.
  - Use only the supplied power cord. If a different power cord is used, it may be rated for a different current load, and that may cause a fire.
  - The supplied power cord is for exclusive use with the charger supplied with your camera. Do not use it with other devices, as doing so may cause a fire or electric shock.
  - Do not use a bundled power cord, as the heat generated may cause a fire.
- Do not touch the power cord plug with wet hands
   Doing so may cause an electric shock.

## CAUTION

- Do not place on an unstable surface
- If may fall, resulting in damage or injury.
   If it falls and the body is damaged, remove the battery pack and contact the place of purchase. If used while damaged, it may cause a fire, electric shock, or other damage.

#### Other cautions

- Use only the supplied or specified charger with your camera.
- If a charger other than the one specified is used, it may damage the camera and cause a fire or electric shock.
  - Use the supplied or specified charger only with the specified camera. Do not connect to other cameras, as doing so may result in damage.

#### Cautions during use and storage

6

 Do not use or store close to a heat source (close to a stove or heater) or leave it exposed to direct sunlight, as doing so may result in defective operation or damage.

 Operating environment:

 • Temperature
 0 to 40°C (32 to 104°F) (charging)

 -20 to 60°C (-4 to 140°F) (storage)

 • Humidity
 10 to 80% (charging and storage)

To avoid the danger of possible fire, be sure to remove the power cord from the power outlet before leaving home for a trip or if otherwise the devices will not be used for a long time.

देना

#### General precautions concerning the batteries (when using alkaline batteries)

- Use only alkaline batteries or other specified batteries in this camera. Manganese batteries cannot be used, as they have a short battery life and may overheat, causing damage to the digital camera.
- Use of an alkaline battery together with a Ni-Cd battery, or a new battery with an old or consumed battery, may generate heat or cause the batteries to leak, resulting in fire, injury or burns, or damage to the camera and any other nearby object.
- · Use of batteries without protective casings or other inferior products may cause a fire, injury, or burns.
- Do not attempt to recharge dry-cell batteries.
- If the digital camera is not going to be used for a long period of time, remove the batteries and store them in a cool place. (When the batteries are removed for a long period, the time and date settings will be cleared.)
- · If using rechargeable batteries instead of alkaline batteries, use after fully recharging with the exclusive battery charger. Be sure to read and understand the instruction manuals that may come with the batteries you purchase, as well as the instruction manual for the battery charger, before use

- Cautions concerning use and storage of the rechargeable Li-ion battery pack
  - Temperature when using or recharging: 0 to 40°C (32 to 104°F)
  - Do not use the battery pack near fire or inside a car exposed to the hot sun, etc. (locations in which the temperature reaches  $60^{\circ}C$  [140°F] or • hiaher.)
  - At high temperatures, the safety mechanisms and protective devices inside the battery pack may be damaged by corrosion, causing an abnormal chemical reaction to occur, or cause the battery pack to catch fire, explode, leak or spew battery fluid, or generate heat. If the safety mechanisms and protective devices are damaged, the battery pack will become unusable.
  - An environment with extremely high or low temperatures will cause the battery capacity to deteriorate and shorten the usable time, and may even shorten the battery life.
  - Avoid storing the battery pack with it near full charge. It is recommended to store the battery pack when it is near fully discharged.
  - If the battery pack is completely discharged, it may become unable to be recharged again. To avoid this, charge the battery pack for at least five minutes every six months.
  - Storage temperature: -10 to 30°C (14 to 86°F)
  - When not using the battery pack, remove it from the camera and store at -10 to 30°C (14 to 86°F) in a place with no condensation.
  - Do not keep in a place where the temperature reaches 45°C (113°F) or higher
  - · Humidity: 10 to 90% (no condensation)

## FOR CORRECT USE OF YOUR CAMERA

#### Cautions before capturing important images

- Before capturing important images, make sure that the camera is operating properly and in condition to capture the images properly.
- Sanyo Electric shall not be held responsible for any losses that result from images that could not be recorded, are erased, destroyed, or damaged in any way due to a problem with the camera, any of its accessories, or its software

#### Caution concerning copyrights

- The images you capture with your camera are for your own private use; any other use may violate the rights of copyrights owners. Please note that photography may be restricted at stage
- performances, shows or exhibitions, even in presentations whose purpose is entertaining or amusing individuals.
- Also note that images that are intended to be copyrighted cannot be used outside those limits defined by the regulations of the relevant copyright laws.

## Cautions when cleaning the camera

## Cleaning procedure

- ① Turn off the camera and remove the battery pack (For safety, remove the power cord plug of the AC adaptor from the power
- outlet.) (2) Remove the dirt with a soft cloth.

## If the camera is extremely dirty

③ Wipe with a soft cloth moistened with a mild detergent diluted with water and wrung dry.

## CAUTION

- Do not use benzene or thinner products to clean the camera. Doing so may cause deformation, discoloration, or paint peeling. When using a chemically treated cloth, carefully read its instructions and warnings.
- Do not spray insecticides or volatile sprays on the camera. Do not let rubber or vinyl objects contact the camera for a long period. They may cause deformation, discoloration, or paint peeling.

Caution concerning the battery pack
Periodically clean with a dry cloth the terminals (contacts) of the battery pack. Do not touch the battery terminals with your bare hands. Doing so will allow contaminants from your hands to adhere to the terminals and oxidize, increasing the contact resistance. If the contact resistance increases, the usable life of the batteries will diminish.

#### Caution when cleaning the lens

 If the lens gets dirty, use a commercially available air blower or a cleaning cloth for photographic equipment to clean it.

#### When not using the camera for a long period

- Remove the battery pack. However, when the battery pack is removed for a long time, the camera functions may begin to not work properly. Periodically reinstall the battery pack and check the camera functions.
- · If the battery pack is left in the camera, a small amount of power is still used even if the camera is turned off. If a rechargeable battery pack is left in the camera for a long period, it may become completely discharged and lose its ability to be recharged again.

#### Cautions concerning condensation

- Using the camera with condensation inside it may damage the camera. If condensation seems likely to form
- Place the camera in a plastic bag and seal it, and then wait until the camera has reached the ambient temperature.

### Be careful of condensation under the following conditions

- When moving the camera suddenly from a cold place to a warm place. When the ambient temperature changes drastically, such as when a heater is
- turned on to quickly heat the room. When the camera is placed in the path of cool air from an air conditioner.
- When the camera is placed in a location of high humidity.

#### Caution concerning undesired interference

 The camera may create undesired interference if used close to a television or radio. To avoid this type of interference, make sure the cores on the supplied cables are not removed.

Core

- The type (shape) and quantity of cable(s) supplied may differ depending on which product was purchased.
- If the docking station or AC adaptor/charger is used in close proximity to a radio or TV set, it may cause interference such as static in AM broadcast signals or noise in the TV image. In this case, increase the distance between the radio or TV and the device.

#### ■ Caution concerning magnetism (for cameras with a speaker)

Do not place credit cards, bank cards, floppy disks, or other items that may be damaged by magnetic fields near the speaker. Data may be lost or the magnetic strips on cards may be damaged.

## Cautions concerning data storage

- It is recommended that any important data be copied onto a separate media (such as a hard disk, MO disk, or CD-R disk).
- Stored data may be lost (or corrupted) in cases such as those listed below.
- Sanyo Electric will not be held responsible for any damage or lost profits arising from the loss of data.
  - If the card is used incorrectly.
  - If the card is not inserted correctly into the camera.
  - If the card is subjected to electrical or mechanical shocks or other forces.
  - If the card is removed from the camera or if the camera is turned off during reading or writing operations.
  - If the card has reached the end of its usable life.

### Caution concerning rise in temperature

- During camera use, if the temperature of the battery or inside the camera (excluding the battery) rises, a A icon lights on the monitor. It is still possible to record and play back even when the Imlicon is lit; however it is advised that you discontinue use as soon as possible and turn the camera off.
- If the temperature rises further, the Allicon will start to flash, and the camera will turn off automatically.

The camera cannot be turned on until the temperature has dropped (or as long as the 🕼 icon remains flashing). Please wait until the temperature has dropped before resuming use.

During video recording, a countdown indicator will show the time starting about 15 seconds before shutdown. When the indicator shows 0 seconds, recording stops.
