

OKILAN 310e+ Installation Guide

- 1** **Warning: Disconnect the printer from a.c. power before installing board.**

Turn the printer around so that the rear is facing you.

- 4** Insert the OKILAN 310e+ into the printer making sure that the board locates in the guide rails. Push the board firmly into place. Tighten the screws (if fitted) on the option board. If the screws do not locate, the board may not be properly seated.

2

Use a screwdriver to remove serial interface board from back panel of printer.

If a SIMM module is present on the serial interface board, you will need to migrate it to the SIMM 1 slot on the OKILAN 310e+ card (see **Installing SIMM Options**, step 1, below).

- 5** **After you have installed the Network Print Server:** Confirm that your printer recognizes the new components, including any additional RAM memory, by printing the menu. Refer to your printer's User's Guide for this procedure. Refer to your *OKILAN 310e+ Network Administrator's Guide* for additional information regarding configuring and cabling details.

Installing SIMM Options

- 1** Use SIMM 1 slot for additional memory only.

- Use SIMM 2 for FLASH ROM option only.

3

Locate guide rails ❶ and edge connector ❷.

2

Insert the gold metallic contact edge of the SIMM firmly into the socket at a 30 degree angle. Bring the SIMM upright to a 90 degree angle until the SIMM clicks into place.
