

CamPocket Focus camera bags

A practical camera bag for digital equipment

The CamPocket Focus is equipped with a thick cushioned compartment to safely transport and store digital equipment. The front flap of the Focus is secured with a velcro fastening keeping the camera safe but at the same time allowing for fast retrieval when needed. The two side flaps of the main compartment additionally protect the contents from above and prevent water and dirt from entering the bag and possibly damaging the equipment.

The CamPocket Focus offers lots of room in the attached front compartment for batteries, whilst the two integrated pockets can carry your memory cards.

The CamPocket Focus can be carried in the hand, on the removable shoulder strap, or by using the button-activated belt loop.

Focus is made of high-quality, robust, artificial leather, available in black.
