

Gas & Electric
Stoves

Your Gazco stockist:	£3.00

A warm welcome

Nothing creates an inviting atmosphere quite like a Gazco stove.

The centrepiece of any home, a Gazco stove adds warmth and character to a room or living space – even if you don't have a chimney!

Whether you want to achieve a minimalist, contemporary look, or have your heart set on a more traditional stove, this brochure will help you make the perfect choice, whatever your style or budget.

This season we have also introduced a new, stunningly realistic, electric log-effect range of stoves; opening up new possibilities such as conservatories, kitchens, dining rooms and bedrooms for you to have the warmth and character of a Gazco stove in your home.

Relax – it's a Gazco stove

When you choose Gazco, quality and technology are assured. From traditional models to state-of-the-art designs, Gazco is committed to creating the ultimate flame-effect gas and electric stoves.

Our research and development laboratories are amongst the most advanced in the world, ensuring that the very latest innovations are incorporated into our appliances.

Gazco is a BSI registered firm. Our rigorous quality control systems ensure that all our appliances comply with British safety standards as well as stringent European regulations. We also carry the quality standard CE mark on all our gas and electric stoves.

What's your type?

Before you select your stove, your local Gazco retailer will need to make sure it's suitable for your home. Firstly, you need to know what fuel you will be running. Secondly, you will need to be aware of what type of chimney or flue you have. If you do not have a chimney then don't worry, Gazco have models developed to suit your home too! To assist you in selecting the right stove for your home, a general guide to which models can be installed with the various flue types is given on each page.

Fuel - Gas or Electric?

The majority of our stoves are available in either gas or electric versions. All the electric models run on a standard 13amp plug and have no need for a chimney.

Which Gas type...

All Gazco gas stoves in this brochure can be specified for use with either Natural Gas or LPG. Natural Gas is provided through mains pipelines, whilst LPG is usually supplied to homes in rural areas from a tank in the garden or gas bottles.

Your home...

The type of chimney or flue you have usually dictates your choice of stove. To help you understand which stoves are suitable for your home, please use the information and pictures shown opposite to identify your chimney. Don't worry, if you don't have a chimney though, you can still find the perfect stove for your home! Once you have identified your chimney (or confirmed you do not have one), take note of the symbol that represents this, as this will be used throughout the brochure to represent the stoves that are suitable for installation in your home.

Brick or Stone Chimney (Class 1) 1

Conventional chimneys are easily recognisable. The stack rises well above the roofline and is topped by a traditional chimney pot or gas terminal. This type of chimney relies on the natural circulation of heated air to expel the products of combustion up your chimney.

Pre-Fabricated Flues (Class 1 & 2) 2

You will see a metal flue cowl on your roof. Some are all metal whilst others may terminate through a short rectangular pot (but without a chimney stack). These flues create the same circulation of heated air as a brick or stone chimney.

Pre-Cast flues (Class 2) 3

Many modern homes have been built with such flues. You can readily identify them by either a metal flue cowl or a raised ridge terminal on your roof. Again, the natural circulation of heated air expels the products of combustion. This option is only available on the small stoves.

Balanced Flue (No chimney required) BF

Balanced flues work in conjunction with glass fronted gas stoves. The appliance is completely sealed from the room into which it is installed (so there are no draughts and heating efficiency is increased!) and a twin-wall pipe vents directly to an outside wall. Air for combustion is drawn in through the outer pipe whilst the inner pipe removes the combustion gases to the exterior of the property. Dependent upon the stove selected, the twin-walled pipe may exit horizontally through an external wall or vertically through the roof. No electric supply is required; therefore there is no sound with this flue system.

Powered Flue (No chimney required) PF

A powered flue uses an extractor unit mounted to vent the combustion gases directly outside. This means that your stove does not have to be installed against an external wall, so it can be located in more rooms around your home. A mains electricity supply is needed to operate this system.

Electric Stoves (No chimney required) E

Gazco produce an excellent selection of electric Marlborough, Stockton, Huntingdon 30, Clarendon, Ashdon and Steel Manhattan stoves which do not, of course, require a chimney or flue of any kind.

No Air Vent required (UK)

All stoves shown with this symbol, boast the advantage of not normally requiring an air vent*. Please discuss this in full with your local retailer.

*Requirements in the Republic Of Ireland are different.

Medium Gas Marlborough with log-effect fire

Gas Marlborough

Country or city, traditional or contemporary, the innovative Gas Marlborough has the flexibility to suit your lifestyle and your décor. It is available in three sizes and each has an extensive window area to allow you to enjoy the dancing flames and warm ambience of the coal or log effect fires to the full.

Operation is simplicity itself too. There's Piezo ignition and a manual control to adjust the flame height and heat output. Choose Gazco's Command upgradable remote control and you can adjust the flames and heat from your armchair. Alternatively, opt for the deluxe Programmable upgradable remote control to set the stove to switch itself on and off and heat the room to the temperature you select.

Electric Marlborough

Featuring the same distinctive styling as the Gas Marlborough, the two electric versions offer you an amazingly realistic log-effect fire at the touch of a switch. At its heart is Gazco's unique VeriFlame™ technology which allows you to choose from 5 different glow settings and 5 different flame speeds to match your mood exactly – and everything is operated from a remote control to save you bending. Furthermore, you can select fire effect only; fire effect + 1kw heat; and fire effect + 2kw heat according to your heating needs.

The Electric Marlborough simply plugs into a 13amp socket, so is particularly suited for conservatories or rooms without a chimney.

Medium Gas Stockton with coal-effect fire

Gas Stockton

Using cast iron for the door and heavy gauge steel for the body, Gas Stockton stoves combine simple, understated lines with Gazco's latest living flame technology.

This means you can enjoy an unrivalled coal or log effect fire together with a heating performance that will keep your room really cosy on those cold winter evenings. In fact, you won't even have to move from your chair if you opt for one of our remote controls!

Electric Huntingdon 30

Electric Huntingdon 30 in Laurel Green enamel

Electric Huntingdon 30 in Ivory enamel

New this year is the electric version of the ever popular Huntingdon 30. The fine castings and beautiful tracery door of the stove are brought alive with Gazco's VeriFlame™ technology which provides you with a selection of 5 flame speeds and 5 glow levels. Your choice of fire is then set against the highly realistic fuel bed and individually hand painted 'logs', perfectly mirroring the look and atmosphere of a real woodburning stove.

Operation is simple too as the remote control not only allows selection of the flame and glow but also fire/heat combinations. These can be fire effect only only; fire effect + 1kw heat; and fire effect + 2kw heat according to the amount of warmth required.

Gas Clarendon

Superb heating efficiency, finely detailed castings, a real fire effect and choice of three sizes make the Gas Clarendon perfect for a wide variety of homes. Further, whilst the tracery of the standard window provides minimal obscuring of the flames, there are also 'clear glass' versions to attain the fullest possible view of the fire. The small and medium clear glass models are also available in two enamelled colours, Laurel Green and Midnight Blue.

According to size of model, the fires may be coal or log effect. All feature a fully adjustable flame and heat setting whether you opt for manual controls, the Standard remote control or the Programmable remote control. Select the Programmable remote control and you can even set the stove to switch itself on and off twice a day and thermostatically maintain the temperature in your room.

Medium Gas Clarendon in Matt Black with log-effect fire

Electric Clarendon

Authentic styling and elegant castings give the small and medium Clarendon all the character of a real stove but with the convenience of electricity. Simply plug in and switch on for Gazco's highly realistic log-effect fire, complete with your choice of different glows and flame speeds, as well as the soothing comfort of instant warmth.

The heater is discreetly located under the stove but, as all functions can be operated from the remote control, there is no stooping or crouching. In fact, you can alter the VeriFlame™ effect or adjust the heat output whilst relaxing in your favourite chair!

Gas Regency

This traditional cast iron stove, originally patented by Benjamin Franklin in 1742, has been updated for the 21st Century with Gazco's impressively realistic open gas fire. In addition to being able to adjust the flame height and heat output, this model includes a variable flame control to allow you to select your preferred flame type – a gentle glow or flickering flames.

There are two sizes of Gas Regency. Each is supplied with a pair of brass ball finials but you can also add an optional set of brass rails if you wish, enhancing the classic styling still further.

Gas Ceramica Manhattan

With its superb contemporary styling and sturdy ceramic panelling, the Manhattan brings a colourful new dimension to home heating. At its centre is a finely detailed, cast iron frame surrounding a panoramic window that allows you to enjoy to the full a realistic picture of dancing flames and glowing coals or logs. To complete the look, a cast iron top grille permits warm, convected air to flow gently into the room.

Gas F67 Riva

If you need a high level of heating performance and efficiency but are seeking a look that is, perhaps, a little closer to a contemporary fire than a stove, then the F67 Riva offers an exceptionally stylish solution.

At the heart of the F67 Riva is a highly efficient, gas log fire. This not only provides a 'real fire' atmosphere, complete with comforting glow and flickering flames, but also up to 4.9kW of effective heating at the turn of a switch. Alternatively, opt for one of our Command remote controls and operation is easier still!

Gas F67 Riva Bench

Gas F67 Riva Bench

As an alternative interior design option to the hearth-mounted F67 Riva, a 'Bench' version is also available. Raised off the hearth on a sturdily constructed and specially designed bench, the extra 350mm of height provides you with an excellent view of the fire through the generously wide window whilst the additional width creates a more striking focal point in your home.

For even more effect, choose Gazco's Command Programmable remote and you can set the fire to switch on/off when you want (so you can come home to a really cosy room) or simply adjust the flames and temperature from your favourite armchair!

Additional Information

Impressive features

All Gazco gas stoves have an outstanding list of standard features:

- **Ceramic fibre coals, logs or driftwood** - skilfully sculpted for maximum 'real fire' effect and atmosphere
- **Multi-purpose control knobs** - for simple, fingertip control of ignition, pilot light and gas supply (except Gas F40 Avanti)
- **Piezo ignition** - automatic sparking without batteries or electricity (except Gas F40 Avanti)
- **Adjustable flame setting** - infinitely adjustable between high and low
- **Convection system** - for improved heating efficiency and safety
- **Flame failure device** - automatically shuts off the gas supply if the pilot light goes out
- **Flue Sure System®** - Gazco's special safety system shuts off the gas supply in the case of accidental flue blockage (conventional flue models only)
- **Choice of flue exit** - top or rear exit options for greater flexibility of installation (except Brunel and small balanced flue models which are rear exit only)

Command remote controls for gas stoves

Gazco was the first UK company to introduce remote controls for gas fires. Today, our Command remote control systems allow most stoves to be upgraded, either at the time of purchase or at a later date, with either:

a) Standard upgradable remote control

Once the pilot light has been ignited manually you can vary the flame height and heat output from the comfort of your armchair.

b) Programmable upgradable remote control

This deluxe version has two additional features. The first allows you to thermostatically control the room temperature whilst the second allows you to programme your stove to switch itself on and off twice a day. Use both and you can even come home to a glowing fire that has heated the room to the temperature you select!

Colour/finish choices

According to model, the colour/finishes available are shown below:

1 = Enamel finish 2 = Paint finish 3 = Steel finish 4 = Glaze Finish

Electric Stoves

Our range of Electric Stoves are as easy to install as plugging in and switching on! Available in a range of designs from traditional to modern, ensuring that there is an electric stove available to suit all pockets and locations. The heater is discreetly located under the stove. Once set, all VeriFlame™ and heat controls are positioned at high level to save you crouching or stooping. They allow you to operate the stove on one of three heat outputs – VeriFlame™ fire effect only, VeriFlame™ fire effect + 1 kW heat and VeriFlame™ fire effect + 2 kW heat. Every VeriFlame™ setting beautifully highlights the highly realistic log-effect engine with a glass fibre fuel bed that is not only hand-painted for maximum aesthetic appeal but also includes separate, individually hand painted logs.

The Gazco VeriFlame™ Difference

Unique on the market, Gazco's VeriFlame™ technology produces the ultimate in realistic fire effects. The complementary remote control allows you to independently adjust the speed of the flames and the fuel bed intensity and flame level on five different settings from low to high, to produce the exact ambience you require. Complete flexibility at the touch of a button. There are also discreetly concealed manual controls should the batteries in the remote control run out of power.

Technical Specifications

All specifications given in the main part of this brochure are approximate. Actual specifications for each individual product will vary according to the exact model and are given on pages 53-62. Your Gazco retailer will be pleased to help explain specific model specifications and provide any further information you may require, or you can view/download specification sheets from www.gazco.com

Installation

Gazco gas stoves must be fitted by a qualified gas installer (CORGI registered in the UK) who should also verify the proposed site conditions are fully suitable for the product selected. Complete installation instructions for many models can be obtained prior to purchase by downloading them from www.gazco.com

Colours

Owing to variations in studio lighting and printing inks, the colours of stoves illustrated in this brochure may differ slightly from actual models.

In addition, the glaze used on the Ceramica Manhattan is fired on to the ceramic shell castings at very high temperatures. These castings sometimes have shading variations in the glaze finish and this does not constitute a fault, indeed, they add to the charm and individuality of every piece.

Product improvement

Gazco's policy is one of constant product improvement. Appliances may therefore sometimes differ from the descriptions or illustrations in this brochure.

Please note: The operation and appearance of gas appliances depends on variable factors such as the gas pressure supplied.

Important Notes:

1. Conventional Flue Pipe and options: for flue pipe codes and options such as flue collars, closure plates and spigot extensions, please see price list.

2. Balanced Flue: in addition, please order appropriate flue kit and optional flue collar. Please see price list for details.

3. Powered Flue: please order powered flue kit and, if terminal is to be less than 2m above ground level, a terminal guard is also required.

4. * indicates product is available with rear flue exit only. All other products top or rear.

5. †: Top flue only.

Gas Flue Systems

1. Closure Plate and Spigot Extension†

This is a flue system suitable for homes with existing conventional chimneys in which an airtight, steel closure plate is fitted over a fireplace opening or Class 2 pre-cast starter block and a short piece of flue extends from the back of the stove, through the plate, into the chimney. The products of combustion are carried up the chimney by natural convection.

Models which can be fitted with a closure plate and spigot extension are:
Small Gas Marlborough, Small Gas Stockton, Medium Gas Marlborough and Gas Brunel.

Models which can be fitted to a pre-cast chimney with a closure plate are:
Small Gas Marlborough, Small Gas Stockton and Gas Brunel.

2. Rigid or Flexible Metal Flue†

With this flue system rigid metal tubes, or a combination of rigid and flexible metal tubes, extend vertically directly from the stove to the outside of the property. This may be either straight through the ceiling or roof with the flue pipe exposed, or by using the channel of a chimney or a studwork enclosure. The products of combustion are carried up the flue by natural convection.

Models which can use this system are:
Small, Medium and Large Gas Marlborough, Small and Medium Gas Stockton, Gas Stockton 5, Huntingdon 30, Small, Medium and Large Gas Clarendon and clear glass, Gas Ashdon and clear glass, Gas Brunel, Ceramica Manhattan, Small and Medium Steel Manhattan, Gas F40 Avanti, Midi and Highline, Gas F67 Riva, Gas F67 Riva Bench, Gas F67 Riva Pedestal. Also Small and Medium Gas Regency with 7" minimum flue.

3. Balanced Flue

Where a room has no chimney, then a Balanced Flue version of a Gazco stove is a practical option. The flue consists of one tube inside another. The outer tube brings air into the stove for combustion whilst the inner one emits the products of combustion.

Options: A - Rear outlet (max 600mm wall thickness).

B - Top outlet/up and out (min rise 500mm, max 3m), horizontal (min 500mm, max 5m).

An additional bend can be incorporated in to the horizontal section of the 'up and out', dependent upon a 1m min vertical rise.

C - Top outlet/vertical (min 3m, max 10m).

D - Top outlet/vertical with offset (min to first bend 500mm, max flue length 10m).

Ask dealer for full technical details and installation requirements. A 4-page information sheet is available.

Models which can use this system are:

Small* and Medium Gas Marlborough, Small* and Medium Gas Stockton, Gas Stockton 5, Gas Huntingdon 30, Gas F40 Avanti, Midi and Highline, Gas F67 Riva†, Gas F67 Riva Bench†, Gas F67 Riva Pedestal†, Small* and Medium Gas Clarendon and Clear Glass, Gas Ashdon and clear glass, Ceramica Manhattan, Small* and Medium Steel Manhattan and Gas Riva Nemos†. (*Rear outlet only † Top outlet only)

All Balanced Flue models are log effect only.

4. Powered Flue

Where a room has no chimney then a Powered Flue is the answer. It is a special extractor unit which attaches to an outside wall and removes the products of combustion, along a rigid metal pipe by fan action. Generally the flue pipe can be of longer lengths than with a Balanced Flue and can also include a number of 90° bends.

Models which can use this system are:

Small, Medium and Large Gas Marlborough, Small and Medium Gas Stockton, Small, Medium and Large Gas Clarendon and clear glass, Gas Ashdon and clear glass, Ceramica Manhattan and Medium Steel Manhattan.

Use Powered Flue with coal effect only.

†Due to the high efficiency and the limited flue flow of the closed convector stoves, a 5" (125mm) flexible flue liner is required when installing the stoves into a brick chimney or a larger than 5" (125mm) diameter lined flue. The only exception to this is stoves that are listed as suitable for installation with a Gazco closure plate and spigot over a standard 22"x16" fire opening.

Technical Information

The following pages provide much of the dimensional, heat input/output, efficiency and product code information you will need to choose your new Gazco Stove. For more detailed specifications, please consult your Gazco retailer. Alternatively, complete installation instructions may be downloaded from www.gazco.com.

† (Balanced flue version 5 1/4" 134mm).
 * (Small balanced flue version 14 1/2" 370mm).
 † (Medium balanced flue version 17 3/4" 453mm).
 Recommended clearances between stove and other surfaces: top 9" (225mm), sides 6" (150mm), rear must be a minimum of 2" (50mm).

The Marlborough has a choice of top or rear flue exit and can be supplied with an optional rear closure plate: Small (8108), Medium (8109) and spigot extension (8111). Small balanced flue stoves are rear exit only.

Matt black stove pipe

Balanced flue versions of the Gas Marlborough must only use the 6" stainless steel flue provided. For additional Matt Black, Midnight Blue, Laurel Green and Ivory enamelled flue collars, please see the Gazco Stoves price list. Gazco recommends the use of 5" matt black enamelled stove pipe with the conventional flue version Marlborough stove. The components usually required are:

Description	Product Code
1" Straight pipe	4500
2" Straight pipe	4501
3" Straight pipe	4502
90° long 'elbow' adaptor (9° projection)	4514
Flue collar	8549

Enamelled stove pipe (Matt Black, Laurel Green or Midnight Blue)

Gazco recommends the use of 5" enamelled stove pipe with the Brunel stove. The components usually required are:

Description	Product Code
1' Straight pipe	4500
2' Straight pipe	4501
3' Straight pipe	4502
90° Short 'elbow' adaptor (6" projection)	4521
90° Long 'elbow' adaptor (9" projection)	4514
1' Straight pipe, Midnight Blue	4500MBL
2' Straight pipe, Midnight Blue	4501MBL
3' Straight pipe, Midnight Blue	4502MBL
1' Straight pipe, Laurel Green	4500LG
2' Straight pipe, Laurel Green	4501LG
3' Straight pipe, Laurel Green	4502LG

Recommended clearances between stove and other surfaces: top 9" (225mm), sides 6" (150mm), rear must be a minimum of 2" (50mm).

The Brunel has a rear flue exit only and can be supplied with an optional rear closure plate (**8107**) and spigot extension (**8111**).

Longer legs

Sets of longer legs, raising the height of the Brunel to 26 1/2" (685mm) are available as an optional extra*.

*Not suitable for use with optional rear closure plate.

Matt Black stove pipe

Balanced flue versions of the Gas Manhattan must only use the 6" stainless steel flue provided. For additional Matt Black, Midnight Blue, Laurel Green and Ivory enamelled flue collars, please see the Gazco Stoves price list. Gazco recommends the use of 5" matt black enamelled stove pipe with the conventional flue version Manhattan stove. The components usually required are:

Description	Product Code
1' Straight pipe	4500
2' Straight pipe	4501
3' Straight pipe	4502
90° Long 'elbow' adaptor (9" projection)	4514
Flue collar	8549

Gas Regency

Product Code	Model	Colour	Logs/ Coals	Fuel Type	Heat Input	Heat Output	Efficiency
8069	Small	Matt Black	Coals	Nat.Gas	10.60kW	2.65kW	25%
8070	Medium	Matt Black	Coals	Nat.Gas	12.30kW	3.05kW	25%
P8069	Small	Matt Black	Coals	LPG	11.00kW	2.75kW	25%
P8070	Medium	Matt Black	Coals	LPG	13.00kW	3.25kW	25%

Regency Dimensions (see letters on diagram)

	A	B	C	D	E	F	G
	ins	mm	ins	mm	ins	mm	ins
SMALL	30	760	23 1/2	600	28 1/2	730	33 1/2
MEDIUM	31 1/2	800	26	660	31 1/2	790	37 1/2

* All Gas Regency Stoves should be installed into a Class 1 chimney.

Recommended clearances between stove and other surfaces: top 9" (225mm), sides 6" (150mm), rear must be a minimum of 2" (50mm).

The Regency has a choice of top or rear flue exit.

Matt Black stove pipe

Gazco recommends the use of Stovax 8" Matt Black enamelled stove pipe with the Regency stove (or 7" pipe using a reducing adaptor). The matching adapters required are:

Description	Product Code
Top exit	1" straight with door 4808 or 7" 4708
	2" straight with door 4809 or 7" 4709
	3" straight with door 4810 or 7" 4710
Rear exit	90° T- Adaptor 4817

Components for balanced flue models

Basic Stainless Steel Kits	Product Code
Rear exit, horizontal - complete with terminal guard	8526
Top exit, up & out, stoves	8523
Top exit, up & out, Nemos & F67	8534
Top exit, vertical	8524
45° offset bend (set of two) for use with 8524	8530

Basic Anthracite Steel Kits	Product Code
Top exit, up & out, stoves	8523AN
Top exit, up & out, Nemos & F67	8534AN
Top exit, vertical	8524AN
45° offset bend (set of two) for use with 8524AN	8530AN

Additional Stainless Steel components for top exit (as required)	Product Code
200mm straight (effective length 140mm)	8527
500mm straight (effective length 440mm)	8528
1000mm straight (effective length 940mm)	8529
45° bend	8507
90° bend	8508

Additional Anthracite Steel components for top exit (as required)	Product Code
200mm straight (effective length 140mm)	8527AN
500mm straight (effective length 440mm)	8528AN
1000mm straight (effective length 940mm)	8529AN
45° bend	8507AN
90° bend	8508AN

Additional Steel components for top exit	Product Code
Flue collar, Matt Black	8548
Flue collar, Midnight Blue	8548MB
Flue collar, Laurel Green	8548LG
Flue collar, Ivory	8548IV

Other products offered by the Gazco family that may be of interest to you include:

Gazco Fires

www.gazco.com

Featuring hundreds of different fire and surround permutations, this brochure really does feature a fire for every home. Offering the wonderful ambience of a real fire-effect with superb efficiency, these built-in appliances give you the choice of gas or electric to heat your home.

Redfyre Range Cookers

www.redfyrecookers.co.uk

Handcrafted by skilled artisans, Redfyre's leading collection of range cookers built upon their heritage dating back to 1931. A multitude of versions and options are available including the Traditional, Central Heating or Universal – combining the heat store efficiencies with the utmost of modern usability. All versions are available in a choice of 6 beautifully enamelled colours and options include a choice of gas, oil or electric; 2 or 4 ovens; round or square hobplate covers; gas, electric or induction hobs; the ability to run up to 24 radiators and provide domestic hot water.

Godin Cookers

www.godincookers.co.uk

Godin cookers and stoves have been manufactured in France since 1840. Now available in the UK and Republic of Ireland through Redfyre range cookers is the Godin cookers family of the Souveraine, Châtelaine and Exclusive cookers. Godin cookers have a reputation as leader in the development of heating and cooking products and artfully blend tradition with innovation to provide the ultimate kitchen accoutrements. Individually handmade to the highest standards, these professional quality appliances are the cookers of choice for many Michelin chefs.

Wamsler Cookers & Stoves

www.wamslercookers.co.uk

Wamsler products, synonymous with the manufacture of solid fuel cookers and heating products, are now available in the UK and Republic of Ireland through Redfyre range cookers. Featuring a wide choice of solid fuel cookers, central heating cookers and multi-fuel stoves that are particularly suited to British & Irish homes, Wamsler offer a viable ecological way to heat your home and cook.

To receive a copy of the Gas Fires brochure, please call 01392 474061. For a copy of Redfyre, Godin or Wamsler brochures please call 01392 474079. Alternatively, details on all the full range of products and brochure PDF's can be found at all the websites as detailed above.
