Storage Bag

The Davis & Sanford Monopod Duo is an innovatively designed product that boasts two “pods” in one: a 60 inch Monopod and a removeable Mini Tripod that is concealed in the patented SwitchGrip handle. Now, camera operators in the field have more control of their camera with much less physical effort. Simply attach your camera to the ballhead or the fixed platform and begin shooting.

The 60 inch standard monopod with ball-head supports cameras weighing 2.5 pounds on the ballhead or up to 7 pounds on the platform provided on the cap. The ball-head is actually a mini tripod that is hidden inside the handle of the monopod. The mini tripod disconnects from the inside of the tripod handle to be used as a tabletop tripod for added versatility or close-up shots.

The Monopod Duo is designed for photographers who need a table top and full size monopod for a variety of applications. It is ideal when a tripod is not practical, i.e. sporting events, concerts, hiking, field activities and more.

The monopod is made of aircraft quality aluminum with a non-glare black finish and weighs only two pounds. The quick-flip levers on the leg sections provide fast and easy setup. The Monopod Duo folds to a compact 21 inch and expands to 60 inch in height. The all-metal 2-section mini-tripod is 7.5 inch high. A quick disconnect lock and foam grip handle make the Monopod Duo easy to use even in inclement weather. The Monopod Duo combination offers stability, durability and practicality.

The Monopod Duo – Two great “pods” in one – A Great Value!
