# Elite Pro Systems™

## EPS-168T

## Installation Guidelines

Congratulations on purchasing an EPS-168T™ System from Auralex® Acoustics. You're now on your way to creating a world class listening environment.
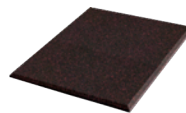

Elite Pro Systems offer a sophisticated look by utilizing products covered with specialized acoustical fabrics. The EPS-168T system contains B22 ProPanels™, CT45 Bass Traps™ and ProFusors™, which when used together, provide incredibly effective acoustical control in any room. Use the EPS-168T alone for treatment of small to medium-sized rooms or in combination with other Auralex products for full control of larger spaces.

### Thank you for Purchasing Auralex® Total Sound Control® Products!

### Elite Pro System EPS-168T Components

| 20 | 8 | 6 |
|---|---|---|
| B22 ProPanels™ | CT45 Bass Traps™ | ProFusors™ |
| 2 | 48 | 80 |
| Tubetak Pro™ | Z-Clips | Impaling Clips |

# Elite Pro System EPS-168T General Information

## Recommended Additional Installation Materials

| | |
|---|---|
| • Power Drill | • Tape measure |
| • Carpenters Level | • Small ladder *(depending on ceiling height)* |
| • Nail Set | • Hammer |
| • Pencil | • 32 2.5" 4D finish nails |
| • Straight Edge | • 256 .75"-1" drywall screws |

## B22 ProPanel Installation Guide

**1** Mark intended location of each **B22 ProPanel** on the wall or ceiling.

**2** Install four impaling clips within marked **B22 ProPanel** location using drywall screws. Exact placement of each clip is not necessary.

Marked panel outline

**3** Start the **B22 ProPanel** 5/8" above its intended final height and press downward at a 45° angle until the panel is flush with the wall surface.

**TIP**
For permanent mounting, apply Tubetak Pro adhesive to the back of the B22 ProPanel before completing Step 3.
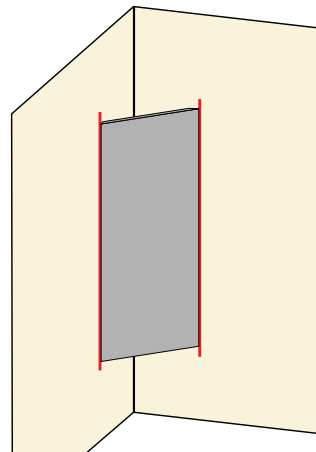

**CAUTION**
Always use Tubetak Pro on the back of the panel when attaching it to the ceiling.

# CT45 Bass Trap Installation Guide

**1** Mark a vertical line 16.75" from the intended placement corner on both sides.

16.75"

**2** Hold **CT45 Bass Trap** in corner with edges aligned to the marked vertical lines.

**3** While continuing to hold panel in place, install one finish nail though the fabric face and the hardened edge of the **CT45**. Make sure finish nail is installed perpendicular to the wall surface. Repeat in each of the four corners.

**4** Using a nail set or other finish nail, carefully countersink installed nail so its head goes through the fabric surface of the **CT45** but not through the hardened edge.

**5** Once finish nail has been countersunk into the panel, there may be a small hole remaining in the fabric covering. Simply scrape the fabric in this area with your fingernail and the hole will completely disappear.
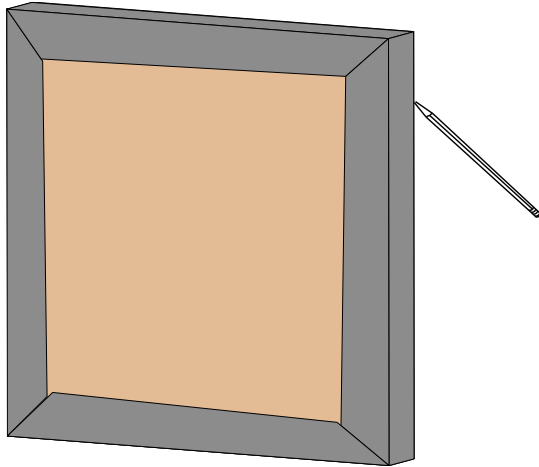

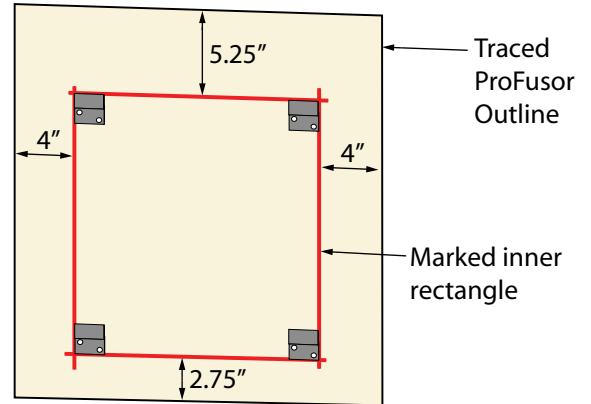

**TIP**
When using lighter colored fabrics, make sure your hands are clean!

# Elite Pro System Installations

**1** Hold the **ProFusor** to the wall or ceiling in its intended location with the back facing out. Make sure diffusor is level. Completely trace its outline.
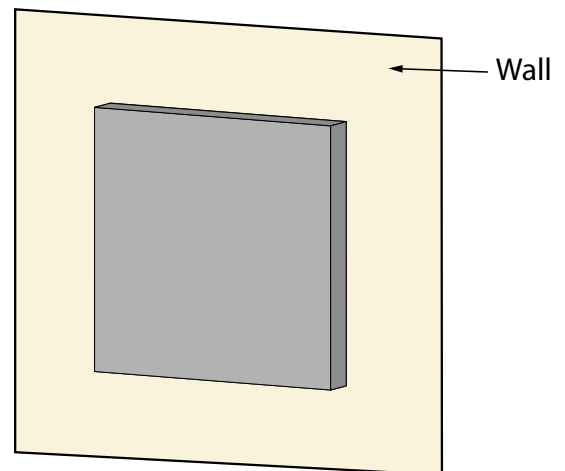

**2** Within traced **ProFusor** outline, mark another rectangle 4" in from both sides, 5.25" down from the top and 2.75" up from the bottom. Install one **Z-Clip** in each corner of the marked inner rectangle using drywall screws, as shown.
