A grounding type plug has two blades and third grounding prong. The wide blade or third prong are provided for your safety. When the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
10. Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
11. Only use attachments/accessories specified by the manufacturer.
12.  Use only with a cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
13. Unplug this apparatus during lightning storms or when unused for long periods of time.
14. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
15. This product may contain lead and mercury. Disposal of these materials may be regulated due to environmental considerations. For disposal or recycling information, please contact your local authorities or the Electronic Industries Alliance: [www.eiae.org](http://www.eiae.org)

#### DVD Disc Menus...

Some explanations in this manual describe DVD Disc Menus. DVD manufacturers set the menus, which vary among DVDs. Not all DVDs have menus. If the DVD has a menu, access it by pressing DISC MENU on the remote control.

*Details are on page 30.*

#### Setup Menus...

Some instructions explain how to use the Setup Menus of the TV/DVD. There are two Setup Menus: one for the TV features while the unit is in TV mode, and one for the disc features while the unit is in DVD mode. Access the Setup Menus by pressing SET-UP on the remote control.

While in TV mode, you can select only the TV SETUP Menu.

In DVD mode, you can select both the TV SETUP Menu and the Setup Menu for the unit's DVD player. Press SET-UP once to select the TV SETUP Menu. Press SET-UP twice to get to the DVD player's Setup Menu.

Even if you set a DVD feature in the unit's Setup Menu, it will not be available if the current disc does not include that feature.

#### Available Disc Features...

All features described in this manual are not available on every disc. If the feature is not available on the disc, you cannot use the TV/DVD to make it available.

An "X" will appear in the top right corner of the screen if you try to access a feature that is not available.

For example, some features are available only during playback, while others are available only if playback is stopped. If you cannot access a feature, try stopping or starting playback, then try the feature again.

## Playable Discs 7

### Playable Discs

The DVD player of this TV/DVD will play many types of discs, including Digital Video Discs (DVDs) and Audio Compact Discs (CDs). It will play MP3, Windows Media™ Audio and JPEG files as well.

To play a DVD, make sure it meets the requirements for Region Codes and Color Systems as described below. Discs that have the following logos will play on the DVD player of this TV/DVD. Finalize CD-R, CD-RW, DVD+R and DVD+RW Discs before playing them in the TV/DVD.

- A disc may not play properly if the disc's recorded area is less than 55mm across.
- Do not glue paper or put stickers on to the disc. These may damage the disc, and the TV/DVD may not read it correctly.

DVD: Prerecorded Digital Video Discs

Video CDs

CD-RW: Compact Disc Rewritable. CD-RWs can be recorded on multiple times.

DVD+R: DVD Recordable. DVD+Rs can be recorded on only once.

Audio CDs

DVD+RW: DVD Rewritable. DVD+RWs can be recorded on multiple times.

CD-R: Compact Disc Recordable. CD-Rs can be recorded on only once.

**DVD** is a trademark of DVD Format/Logo Licensing Corporation.

Windows Media is a trademark of Microsoft Corporation.

This unit is not compatible with Multiple Bit Rate.

(MBR: a file that contains the same content encoded at several different bit rates).

### ABOUT THE PBC FUNCTION OF VIDEO CD

This unit can play Video CD 1.1 (without PBC) and 2.0 (with PBC).

With version 2.0 (with PBC), you can use interactive menu (e.g., playlists) on the TV screen.

When playing a Video CD with PBC, some operations cannot be performed unless the PBC function is cancelled temporarily. See page 30 for more details.

### Region Codes

This TV/DVD has a Region One (1) DVD player. DVDs must be labeled for ALL regions or for Region 1 in order to play on the unit. You cannot play DVDs that are labeled for other regions. Look for the symbols below on your DVDs. If these region symbols do not appear on your DVD, you cannot play the DVD in this TV/DVD.

The number inside the globe refers to a region of the world. Region 1 represents the United States, Canada, upper regions of North America, Bermuda, the U.S. Virgin Islands, and small regions near Australia. A DVD labelled for a specific region can only play on DVD players with the same region code.

### Color Systems

DVDs are recorded in different color systems throughout the world. The most common color systems are NTSC (which is used primarily in the United States and North America), PAL, and SECAM.

The DVD player of this unit uses NTSC, so DVDs you play must be recorded in the NTSC color system. You cannot play DVDs recorded in other formats. The color system of the DVD may be listed on the DVD or on the disc case.

### Unacceptable Discs

If you insert an unacceptable type of disc, a Disc Error message may appear on the TV screen. The following discs will not play on this DVD player.

- CD-ROM
- Compact Disc-Interactive (CD-I)
- Unfinalized discs
- DVD-RAM
- Video Single Disc (VSD)
- DVD contains MP3, Windows Media™ Audio or JPEG files
- DVD-ROM
- DVD-Audio

On the following disc, the sound may not be heard.

- Super Audio CD - Only the sound on the CD layer can be heard. The sound on the high-density Super Audio CD layer cannot be heard.

# Hooking Up the TV/DVD 9

## 1 Hook up your TV/DVD using one of the connections shown.

### A Hooking Up Your TV/DVD with a Cable TV Signal or Outdoor Antenna

Connect a Cable TV signal or an antenna to the ANT(enna) Jack.

### B Hooking Up Your TV/DVD with a Cable Box/Satellite Receiver

To view any channel, set the TV/DVD to the output channel (channel 03 or 04) of the Cable Box/Satellite Receiver. Then, select channels at the Cable Box/Satellite Receiver.

Connect the Cable TV or Satellite signal to the IN Jack on the Cable Box/Satellite Receiver.

Your Cable Box/Satellite Receiver may have Audio and Video Out jacks instead of the single Antenna Out jack (RF coaxial or 75 ohm) shown here. If so, connect Audio and Video cables to the Audio/Video Out jacks of the Cable Box/Satellite Receiver and to the AUDIO/VIDEO In jacks on the front of the TV/DVD. Press SELECT on the remote to set the TV/DVD to AUX, not channel 3 or 4. Select channels you want to watch at the Cable Box/Satellite Receiver as usual, leaving the TV/DVD on AUX.

Instructions continue on the next page.

## 10 Hooking Up the TV/DVD (cont'd)

Instructions continued from the previous page.

### C Hooking Up Your TV/DVD to Another Video Source (VCR, DVD player, Camcorder, etc.)

You may need this connection if you want to play discs or tapes on other equipment but watch them on the TV/DVD. Press SELECT on the remote to select AUX at the TV/DVD. When you play the materials on the other equipment, it will show on the TV/DVD's AUX channel.

Audio and video cables are not supplied.

**2** When all other connections are complete, plug in the TV/DVD's power cord.

## Optional Connections 11

### Digital Stereo Hookups

You can connect the TV/DVD to a Stereo that has a Digital Coaxial In jack. Use this hookup if you want to hear the TV/DVD sound through the Stereo instead. Use these connections for a Dolby Digital-compatible Stereo or for a Receiver that has a Mini-Disc or Digital Audio Tape deck.

- 1** Connect the antenna/Cable TV signal. Details are on pages 9-10.
- 2** Connect a digital audio coaxial cable (not supplied) to the **COAXIAL** jack on the TV/DVD. Also connect the cable to the Stereo's **COAXIAL DIGITAL AUDIO IN** jack.
- 3** If the Stereo is Dolby Digital-compatible, set **DOLBY DIGITAL** to **BITSTREAM**. If the Stereo is not Dolby Digital-compatible or if you connected to a Mini-Disc or Digital Audio Tape Deck, set **DOLBY DIGITAL** to **PCM**. Details are on page 50. An incorrect setting causes noise distortion and damages speakers.

### Helpful Hints

- You cannot use a Mini-Disc or Digital Audio Tape deck to copy Dolby Digital Multi-channel surround sound discs.
- If the disc is not recorded in Dolby Digital Multi-channel surround sound, you will not hear multi-channel sound even if you use the Digital Stereo hookup.
- To see if your disc is recorded in Dolby Digital, look for a Dolby Digital logo on disc or on its case.
- To see if your Stereo has Dolby Digital, look for a Dolby Digital logo on your Stereo. Or, refer to the Stereo owner's manual.

# 24 Setting V-Chip

● To put the TV/DVD in TV mode, press **SELECT**.

## TV Rating Settings

V-CHIP enables parents to prevent their children from watching inappropriate material on TV. V-CHIP reads the ratings for programming (except for news and sports programs, unedited movies on premium cable channels, and Emergency Broadcast System signals), then denies access to programming if the program's rating meets the limitations you select. In this case, a "PROTECTED PROGRAM by ..." message appears on the TV screen.

If the "PROTECTED..." message appears during your TV viewing, change to a channel that is not blocked. Then, you can access the V-Chip Setup Menu and change the settings to allow all TV viewing.

Programming may be rated by the Motion Picture Association of America (MPAA) or according to the Television Parental Guidelines. To block any inappropriate programming, set your limits in both MPAA RATING and TV RATING.

**1** Press **SET-UP**. Press **▲** or **▼** to select **V-CHIP SET UP**. Then, press **ENTER**.

**2** Press the **Number** buttons to enter the **4-digit access code**. When entering the access code for the first time or if there has been a power failure, enter default code 0000. 4 Xs will appear instead of your code. This protects the identity of your code.

**3** Press **▲** or **▼** to select **TV RATING**. Then, press **ENTER**.

### TV Rating Explanations

- TV-Y7 - Appropriate for children seven and older
