

WT15

Ultra-compact theatre enclosure

features

- ▶ Ultra-compact trapezoid enclosure
- ▶ ICT™ technology
- ▶ Vertical or horizontal orientation
- ▶ High SPL capability

applications

- ▶ Background music for clubs and bars
- ▶ Theatre delay/in-fill
- ▶ AV presentations

The ultra-compact WT15 is a trapezoid full-range speaker capable of producing SPL's associated with much larger enclosures. It is designed specifically for theatre applications where minimum size is a priority.

Only 11" high, it produces extended bandwidth and has high output capability from twin 5" (125mm) drivers assembled in an innovative two-way configuration utilising ICT™ technology. To maximise output, the 5" (125mm) loudspeaker is augmented by a second 5" (125mm) driver operating in tandem over the bass and mid-range region. HF dispersion is identical in both horizontal and vertical planes.
