Specifications

- **Dimensions:** 3¾" H, 15" W, 9½" D
- **Approx. Shipping Weight:** 8.1 Lbs.

Remote

► Back-Lit Master Touch® Universal Remote CRK235BL

Provides total control of the VCR, plus the basic functions for over 30 brands of televisions. Keys for some of basic functions can be illuminated for night-time operation.

Picture

• AccuSearch™ 4-Head Video System

The double-azimuth video system produces superior, jitter-free special effects for a clear and stable picture during still/pause, slow motion and forward/reverse search.

• Digital Auto Tracking

Allows playing of most VHS tapes without the need for manual tracking adjustments.

• HQ Video Processing

Special recording and playback circuitry enhances video characteristics, producing high-quality pictures.

Sound

• VHS Hi-Fi Stereo Recording/Playback

Incredible stereo audio reproduction. Two high-speed rotating audio heads helically scan the video tape to create stereo sound with dramatically-improved dynamic range, frequency response and signal-to-noise ratio.

• MTS Broadcast Stereo Reception

Receive and record stereo sound from MTS (Multichannel Television Sound) stereo TV broadcasts, where available.

• Second Audio Program (SAP)

Decodes the second audio program available on some broadcasts.

Convenience

► COMMERCIAL ►► ADVANCE¹ *Eliminates Most Commercials During Playback²*

Eliminates having to watch most commercials of a recorded program during tape playback. User records and plays tapes no differently than before. After the recording, the Commercial Advance system locates and electronically marks most of the commercial segments. When a Commercial Advance tape is played back, the VCR automatically scans or fast forwards through the marked segments, displaying a blue screen (or video) during the process. With the Commercial Advance feature, three minutes of commercial time is reduced to approximately 10 seconds (SLP mode), allowing you to conveniently watch your recorded shows in much less time.

► MOVIE ►► ADVANCE³ *Locates the Beginning of Prerecorded Movies*

Automatically finds the beginning of the movie on most rented and purchased video tapes. You can also selectively watch the previews, skipping one to the next. With the Movie Advance feature you can let the VCR find the movie while you take care of other things — like make the popcorn! Once the movie is found, the VCR cues to the beginning, pauses the tape and informs you that the movie is ready to play.

VCR Plus+⁴ Programming with End-Time Adjustment

The VCR Plus+⁴ System simplifies VCR programming by reducing programming entries. Program⁶ the VCR by entering PlusCode⁴ programming numbers which can be found in most newspapers and TV listing magazines, such as *TV Guide*.⁷ Adjust the end-time, so if the program runs long, you won't miss a minute.

• Alpha-Numeric Clock/Function Display

Provides lighted, functional readout of VCR clock, channel and counter; plus functions for Play, Pause, Stop, etc.

► ShowSaver™ Memory Protection

Retains timer programs in permanent memory, indefinitely, so you'll never have to worry about losing your programs due to an extended power outage.

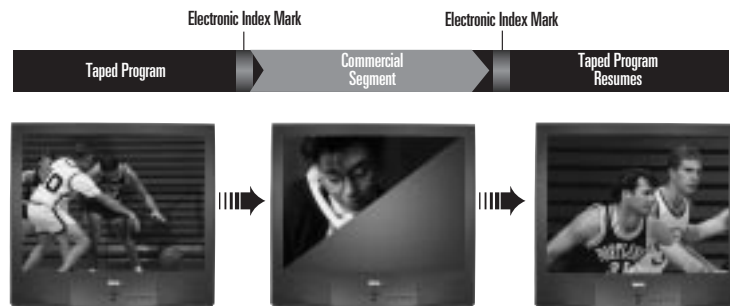

• Pro-Tect Plus™ (Child Lock)

Guards pre-programmed VCRs to help avoid frustrating recording accidents or interruptions from children. Conveniently controlled with the press of a button.

• Auto Repeat

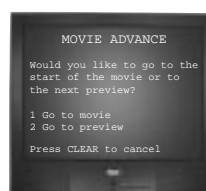

Allows you to specify, by time, a portion of recorded material to play repeatedly.

COMMERCIAL ►► ADVANCE¹ *Eliminates Most Commercials During Playback²*

3 Minutes of Commercial Time Will Fast Forward in About 10 Seconds (SLP Mode).

MOVIE ►► ADVANCE³ *Locates the Beginning of Prerecorded Movies*

► QuickSet Guide

An initial, interactive, on-screen guide makes setting up the VCR easier than ever before by walking you through the setup process.

• EnergySaver

Saves energy by automatically turning off the VCR when it is not being used. Also helps prevent missing timer recordings due to the VCR being left on.

• Auto Daylight Savings Adjustment

Automatically adjusts the VCR's clock twice a year for daylight savings time, so you won't have to.

• On-Screen Setup Menus

A well organized set of menus allow you to conveniently set up time and date, channel lists and personal preferences for automatic features, EnergySaver and remote control address.

• One-Button Express Record (XPR)

Simplifies the recording of a TV show in progress. One button begins recording and sets the program length, so that the VCR records and switches off automatically.

• Trilingual On-Screen Menus

Choose between English, French, and Spanish operating and programming instructions, displayed on your television.

• Go Back (Previous Channel)

Makes it easy to switch between two channels with the press of one button.

• Quick-Start Mechanism

As soon as a tape is loaded into this VCR, it's ready to play.

• Auto Power On/Play/Rewind/Shutoff

Simply inserting a cassette in the VCR turns it on (Auto Power On). When a prerecorded cassette is inserted in the VCR, it automatically starts playing (Auto Play). When the end of the tape is reached, Auto Rewind automatically rewinds the tape. If the VCR is turned off during rewind, it will continue rewinding until end of tape is reached, then shut off.

• 181-Channel Tuning Capability⁸

Selects VHF/UHF broadcast channels, and up to 125 cable channels.

• 8-Event/1-Year

Programmable Timer

The built-in timer memory can be preset up to one year in advance to record as many as eight different programs automatically. Record options include one-time, daily, weekdays and weekly events.

• Auto Channel Search with Auto Cable/Antenna Switch

Automatically selects cable or antenna tuning and stores available off-air or unscrambled cable channels in memory.

• Simplified On-Screen Programming

With the remote control and on-screen displays, all timer programming can be done from the convenience of your chair. On-screen instructions guide the viewer through each programming sequence.

• Real-Time Counter

Front-panel and on-screen displays show elapsed tape time in hours: minutes seconds (on-screen display only). Makes locating segments easier.

• VHS Index Search System

Simplifies locating the start of recorded programs by placing an electronic marker at the beginning of each new recording. Select an index number and the VCR will locate it and begin playback.

• Zero Search

Allows you to fast forward or rewind to the zero position on the counter.

• Auto Clock Set⁶

The Auto Clock Set circuitry reads the XDS broadcast signal⁶ containing time of day and date information, automatically setting the clock during initial setup as well as after most power interruptions.

• Automatic Head Cleaning System

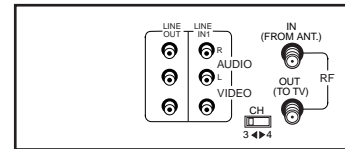

Safely cleans the video and audio heads and helps maintain optimum picture performance during recording and playback.

Connections

► Front Audio/Video Input Jacks

Provides convenient connection for camcorders or other AV components.

• Rear Panel Input/Output Jacks

Plus

• Limited Warranty

See RCA dealer for complete details.
