

MobileCommuter rollerbags

Trolley bag with separate notebook case

The MobileCommuter is the perfect companion on business trips. With a simple action the notebook case can be turned into a trolley bag.

A combination of a notebook case, trolley, and carry-on luggage - ideal for short business trips.

The notebook is stored in a separate, specially cushioned case. If necessary the notebook case can be fixed to the trolley. The MobileCommuter has a solid back, a compartment for clothes and two large document compartments. Mobile accessories can be stowed away in small pockets inside the bag, and the two front pockets offer ample space for pens, business cards, and mobile phones. In addition there is a cable pocket and a flexible shoulder strap.
