

CORE AERATORS

Land Pride's Core Aerator is built just right for the weekend landscaper, or the fully professional landscape contractor to help reduce compaction in heavy soil conditions. Once cores are pulled, nutrients and air are able to bring life and vitality back to hard stressed turf areas. An annual aeration program is an important part of many landscapers' services, and will play a vital role in keeping premium turf areas maintained to high quality standards.

Available in 5' and 6' units, these Aerators feature case hardened 3/4" spoons to penetrate the ground to a depth of 4-1/2", depending on soil conditions and additional weight needed. A core is pulled every 7" of forward travel from each of the spoon gangs. Each gang is mounted independently, which minimizes torque on the spoons during slight turns.

Optional Water Tanks are available on the 60" and 72" Core Aerators for additional weight to aid in spoon penetration. Water drains easily from the tanks through the bottom drain holes, reducing weight to the desired amount.

Shown with Optional Water Tanks.

- 60" Tanks add up to 490 lbs.
- 72" Tanks add up to 600 lbs.

CA25 SERIES

Cat. 1 — 60" 72"

- Cat. 1 hitch
- Heavy-duty 2-1/2" x 2-1/2" x 3/16" tubular construction
- Expanded metal protection over spoon gangs
- Grease zerks on each spoon gang
- Each gang is independent to reduce side load on spoons while turning
- Storage stand on each corner for stability

The 3/4" spoon is beveled to easily penetrate the ground and create a nice clean hole.
