Connectivity

- **Aux in:** Line in
- **Headphone:** 3.5 mm
- **Other connections:** FM Antenna, MW Antenna

Convenience

- **Alarms:** CD Alarm, Radio Alarm, Tape alarm, Snooze, Sleep timer
- **Clock:** On main display
- **Display Type:** White FTD
- **Indications:** DIM mode
- **Eco Power Standby:** 0.5 watt

Accessories

- **Included Accessories:** AC Power Cord, FM/MW Antenna
- **Remote control:** 32-key with 2xAA batteries

Dimensions

- **Set dimensions (W x H x D):**
175 x 252 x 350 mm
- **Main speaker dimensions (W x H x D):**
175 x 252 x 215 mm
- **Packaging dimensions (W x H x D):**
524 x 353 x 408 mm
- **Weight incl. Packaging:** 12.9 kg

Product highlights

MP3-CD or WMA-CD playback

MP3 is a revolutionary compression technology by which large digital music files can be made up to 10 times smaller without radically degrading their audio quality. A single CD can store up to 10 hrs of music. MP3 has become the standard audio compression format, allowing quick and easy audio file transfer. Windows Media Audio (WMA) is a highly compressed digital audio format from Microsoft that delivers great sound with music files that take up half the disk space and download in half the time. A single CD can store up to 20 hours of good quality WMA music recorded at a bit rate of 64 Kbps.

Incredible Surround™

Incredible Surround is an audio technology from Philips that dramatically magnifies the sound field to immerse you in the audio. Using state-of-the-art electronic phase shifting, Incredible Surround mixes sounds from left and right in such a way that it expands the virtual distance between the two speakers. This wider spread greatly enhances the stereo effect and creates a more natural sound dimension. Incredible Surround allows you to experience total surround with greater depth and width of sound, without the use of additional speakers.

Treble and Bass Control

Treble and bass are equaliser features that control the high and low frequency sound levels of your audio respectively. Treble specifically regulates the amplification of the high tones in the music while bass controls the amplification level of the low tones. Using the up and down keys, the listener can conveniently place more or less emphasis on the low and high tones, or leave treble and bass flat to playback music according to its original recorded setting. Treble and Bass Control lets you listen to your music the way you like it.
