

Invacare® IVC™ Full Electric Low Bed

Yes, you can.™

Yes, you can.™

Invacare brings the safety and convenience of a low bed into the Home Care Bed Series with the new IVC™ Full Electric Low Bed. The split-spring design incorporated into the standard low bed profile combines the easy, one-person delivery of an Invacare® bed with the benefits of a low bed, where rails are not desirable or appropriate, but injuries from falling out of bed are still a concern. The IVC Low Bed ends are fully compatible with existing Invacare full-electric bed frame inventories and the IVC drive shaft, simplifying inventory management for providers and long-term care facilities.
