DVD 

All your favorite Disney characters in this magical DVD Bingo game for hours of fun!

# BINGO

From the makers of  
**sceneit?**

**You may have played Bingo before, but have you ever played on a DVD?!**

### How to play Disney DVD Bingo:

First, choose a game card. Cards have two different sides to them, but you will only use one side for each game.

Next, place a chip on the FREE space. It's the one in the middle of the game card marked with the mouse ears. The other spaces can only be covered by a chip when the character and number are called on screen.

From the game menu, choose a type of Bingo game. You can choose standard bingo, blackout, or pattern.

### Bingo Options

In standard bingo you win by having 5 chips across, 5 down or 5 diagonally. If you have any of these on your card, shout "BINGO!" and choose REVIEW on the screen to make sure all of your bingo numbers were called. If all of them are listed, press the BINGO button on screen and you win. If the review screen shows arrows along the side, that means there are more numbers to check on the next page.

### Review

The same REVIEW and BINGO buttons are used for blackout and pattern, but you need to fill your card differently. In blackout, the first player to cover ALL of the spaces wins. If you choose to play a pattern, the DVD will tell you which kind of pattern to make. It could be the letter 'T', the letter 'L', or the letter 'X'.

### Bingo Caller

The DVD will automatically call out new numbers during game play every 15 seconds, unless you choose CONTROLS from the game menu and select REMOTE CONTROL CALL. This way, players can take turns being the Bingo Caller. The number calls will stay onscreen until the bingo caller pushes the NEXT button.

### Film Clips

One of the features that make Disney DVD Bingo fun are the clips from your favorite Disney movies. When you see a clip come up during the game, pay close attention to the direction that follows. Clips are WILD and just might help you win the game. Wild calls are color specific and can be placed on any open space in the row that is the same color as the one on the TV screen. For example, if you watch a Peter Pan clip and at the end of it a GREEN wild screen appears, you can place a chip on any green space that doesn't already have a chip on it.

**That's it! You are now ready to play Disney's DVD Bingo!**
