

REMOTEVISION™

24/7 **Wireless** Monitoring
System for the Ultimate
Peace of Mind.

Miele

Anything else is a compromise

RemoteVision™ is currently available on all refrigeration products and select dishwashers and laundry systems.

Miele Supervision 24/7

Revolutionizing the concept of wireless appliance support, Miele RemoteVision™ technology monitors your appliance 24 hours a day, 7 days a week. If a fault occurs, such as the door to your refrigerator, freezer or wine storage unit being accidentally left ajar, you will receive an automated troubleshooting email. If needed, a service appointment can be scheduled and a technician will arrive at your house prepared to handle the task on the first visit.

In addition, the efficiency of RemoteVision™ has positive implications with not only service matters, but our environment as well. Equipping technicians with necessary parts prior to service results in fewer return visits and actively reduces our carbon footprint.

Miele is the first appliance manufacturer in the world to offer this ground-breaking service, ensuring the ultimate in peace of mind, convenience and time savings!

Added Value

with RemoteVision™ - \$198**

REMOTEVISION™

Because We Care™

Miele's quality commitment extends far beyond the initial purchase. We recognize that premium appliances deserve first-class technical support and customer care. Service by highly-trained technicians is part of the Miele experience. Our technicians are required to complete a demanding technical certification program.

Exceeding your expectations... that is our customer care objective. As a Miele owner, your total satisfaction is our first priority.
