### **Manual abstract:**

*Installation* If you would like to install your new car stereo yourself or add other audio components to the existing ones, then please read the instructions on installation and connection at the end of this manual carefully. *International telephone information* Have you got any questions on the operation of this equipment or do you require more information? Give us a call! You will find the international telephone and fax numbers on the last page of this manual.

*Accessories* Use only Blaupunkt-approved accessories. *Remote control unit* The optionally available RC 08 infrared remote control unit allows you to conveniently operate the most important system functions from the steering wheel. **6 THEFT PROTECTION SYSTEM** *Removable front panel* To prevent your car audio system from being stolen, it has been equipped with a removable front panel (release panel). Without the front panel, the car audio system is useless to thieves. Protect your car audio system against theft and take the operating panel with you each time you leave the vehicle. Never leave the release panel in the car, even when it is well hidden. The panel has been designed so that it is easy to remove. *Notes:* Do not drop the release panel.

Do not expose the release panel to direct sunlight or other heat sources. Protect the panel from exposure to moisture. Store the release panel in the case supplied. If the car audio system was on when you removed the panel, it will automatically switch back on using the same settings when you replace it (radio, CD or CD changer). *Removing the operating panel* **ENGLISH** Theft protection system 1 First pull the operating panel forward and then slide it to the left to remove it.

When you remove the operating panel, the car audio system will automatically switch off. All of the settings will remain stored. A CD inserted into the car audio system will remain in place. *Replacing the operating panel* Slide the operating panel into the guides from left to right. Press the left-hand side of the panel onto the car audio system until it locks into place.

Press 1. The release panel will unlock. *Note:* While replacing the panel, be careful not to press on the display. **7 PORTUGUÊS ESPAÑOL SVENSKA NEDERLANDS ITALIANO FRANÇAIS ENGLISH** **SWITCHING ON/OFF** Switching the car audio system on/off The car audio system can be switched on/off in a number of ways. Switching the car audio system on/ off with the vehicle ignition. If the car audio system has been connected to your vehicle ignition, it is possible to switch it on and off with the ignition. You can also switch the car audio system on when the ignition is switched off. **VOLUME CONTROL** Volume control The car audio system volume can be adjusted to levels from 0 (off) to 66 (maximum). To increase the volume, turn the volume control knob 3 to the right. To decrease the volume, turn the volume control knob 3 to the left.

*Adjusting the power-on volume* It is possible to adjust the volume at which the car audio system switches on. *Note:* To prevent the car battery from running down, the radio will switch off again automatically after one hour. Press MENU [. Press : repeatedly until "ON VOL" appears in the display. : to adjust the volume. To make it easier to select the desired volume, you will be able to hear any changes made while you are adjusting the volume. If you adjust this setting to 0, the car audio system will switch on at the volume used before it was switched off.

Press Switching the car audio system on/ off with the removable front panel Remove the release panel. The car audio system will switch off. Replace the release panel. The car audio system will switch on again. The last settings used (radio, CD or CD changer) will be activated. Switching the car audio system on/ off by pressing 4. Press 4 to switch the car audio system on.

Press 4 for longer than 2 seconds to switch the car audio system off again. *Warning of serious injury* When the power-on volume is set to the maximum level, it may be extremely loud when the car audio system is switched on..
