# Which **Manual** Satellite TV Antenna is Right for You?

## For Single Satellite Viewing

**View one of any available KU Band Satellites**  
 \*Not compatible with DIRECTV 110° or DIRECTV KA-band satellites

### Roof Mount

#### RM-DM46

Crank-up antenna views one satellite at a time. Stows to 8" high and is equipped with Digital Magic™ elevation sensor.

### Ground Mount

#### GM-MP1

Fully enclosed in durable case. Includes bubble level, compass, & easy to read azimuth settings for simple set up. 25' coaxial cable.

#### TR-1518

Adjustable height and leveling settings of 14.5" – 22". Quickly disassembles for compact storage. Compatible with GM-1518 and GM-MP1.

#### PM-2000

Includes ground stakes and 20' coaxial cable.

#### DS-4248

18" Antenna with dual feed LNBF for 2 receiver viewing. Includes wall/roof/pole mount for various installations. For use with TR-2000 Tripod mount.

#### TR-2000

Tripod/base mount. Works with standard 18" single LNB satellite (DS-4248). Includes flat base, 18" antenna pole, detachable legs, ground anchor/bungee, compass and level.

## For Multiple Satellite Viewing

**View 2-3 available KU Band Satellites**  
 \*\*DIRECTV satellite antennas available through DIRECTV

#### DS-5005

For DISH 500 programming. View programming at 110° and 119°, including available HD programming. For use with TR-3535 Tripod mount.

#### DS-1005

For DISH 1000 programming. View all three satellites on 110°, 119° and 129°. Includes all available HD programming. For use with TR-3535 Tripod mount.

#### TR-3535

Heavy duty powder-coated steel tripod mount with 1.66 OD mount pipe for multi-satellite antennas (DS-5005 & DS-1005). Fully adjustable legs for secure mount on uneven surfaces. Includes bubble level, compass, and ground anchors.

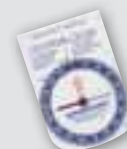

### ACCESSORIES FOR MANUAL SATELLITE TV ANTENNAS

*Find the Satellite Fast and Easy!*

• **SF-1000** satellite finder meter has an audio tone to help you align the satellite antenna signal without using receiver menu.

• **SC-2000** is a compact satellite alignment compass. Use Local zip code to obtain azimuth setting from satellite receiver and aim your dish in the direction indicated by the compass.
