

INSPIRED. BY CANON.

CANON ZOOM LENS

Three new cameras designed to inspire. Starting with the totally new **EOS-IDs Mark III**. With a 21.1-megapixel full-frame CMOS sensor, dual "DiGIC III" Image Processors, and a 3-inch LCD monitor, it's far and away the most remarkable camera Canon has ever created. The newly redesigned 10.1-megapixel **EOS 40D** lets photographers take the next leap forward, with its DiGIC III Image Processor and 6.5 frames-per-second shooting. Along with the exceptional **EOS-ID Mark III** with its blazingly fast 10.5 frames-per-second shooting and 10.1-megapixel CMOS sensor, Canon makes the creative process easy, rewarding and, most important, inspiring.
