- Green Flagship

Product highlights

Base and handset TAM control
Just look at the base station to know instanttly whether you received messages. Listening or deleting messages then become as simple as pressing one key on the base station - for those who never remember where they left their handset.

Specific Outgoing Messages
When you're away or do not wish to be disturbed you can record a different message for each VIP groups. Like this, your friends are not treated the same way than your professional calls.

15-minute recording time

250-name-and-number phonebook
No need to try learning the phone numbers of your friends and family. By assigning a name to a number, you only have to search for the name and the number automatically comes with it.

300-hours standby autonomy
Leave your handset off the base for more than 12 days without the need to recharge it. This contributes to make a very environment friendly device.

60-SMS memory
Keep traces of the messages you receive. Thanks to the large onboard storage capacity, you do not need to erase precious messages anymore.

Ringtone download
This function offers the possibility to personalize your phone by downloading ringtones. Simply call the dedicated service provider and select your favourite song. An SMS is sent to you, together with the attached melody. You can select this melody as any other ringtones (country and network dependent).

VIP function
Identify who's calling by the ringtone! The VIP icons and melodies indicate to which group in the phonebook the caller belongs. Phonebook entries can be divided in different VIP groups for which you can allocate a specific ringtone.

Personal SMS Boxes
With a personal SMS box, you are assured that nobody except you will read your messages. Your box is protected by a pin-code that you define.
