Tablet Mode Bump Case User's Guide

INSTRUCTIONS

These instructions provide details on using your new bump case. This case is designed for use with your LifeBook notebook when it is in tablet mode (i.e., with the display facing out). The bump case provides added protection when transporting, using, or storing the notebook.

We strongly recommend that you read these instructions prior to using the bump case with your computer.

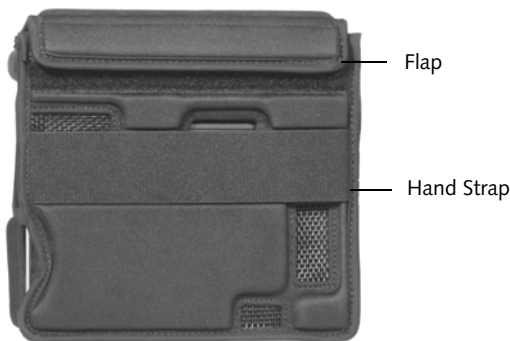

Figure 1. Bump case - Front

Installing the notebook

> **i** Prior to installing the notebook into the bump case, remove the pen. Once the system is installed, you will not be able to remove the pen. Store the pen in the pen holder. (Figure 1)

Flap

Hand Strap

Figure 2.   Bump case - Rear

To install your notebook into the bump case:

1. **Be sure your notebook is in tablet mode** (i.e., with the display facing out). For instructions on putting the notebook into tablet mode, please see your system user's guide.
2. Open the flap on the rear of the case *(Figure 2)*. The flap is secured by a long strip of Velcro® that is attached to the back of the bump case.
3. Position the notebook so that the system goes into the case with the battery going in <u>last</u>. Slide the notebook all the way into the bump case until it meets the opposite end of the case.
4.   Reattach the flap to the side of the case.

Attaching a Shoulder Strap

At the ends of the bottom of the case are two D-rings to which you can attach the shoulder strap. To secure the shoulder strap, attach the strap clips to two of the D-rings.

The D-rings are located at the bottom of the case so that when it suspended from your neck, you can simply lift the notebook in

front of you and it will be in the correct orientation. Since the system hangs down "head first", however, always be sure the Velcro flap is securely fastened when the system is installed.

Caring for the bump case

The bump case is made of rugged materials, and is designed to withstand daily use. Treat the case as you would a briefcase or purse. Occasionally, the bump case may become soiled. To clean it, use a clean cloth and warm soapy water to wash the soiled area.
