An attache case for notebook and HP DJ 450 printer. Work straight from the case.

The professional, transportable, and lockable office for working with notebook and printer.

The mobile equipment is perfectly protected through the case's aluminium construction with side walls made of extremely light weight and durable 'Conpearl' fabric. The inner panel which takes in the hardware is manufactured from thermoformed ABS parts.

The notebook is fixed using 3M Dual Lock fastening and a synthetic mount brace. The printer opening has been custom designed to fit it perfectly. The notebook and printer remain hard wired in the case's hull, and the paper feed is processed under the notebook, thus sparing space and preventing creases in the paper.

Two different mounts enable the connection of different sized notebooks (up to 340mm x 310mm x 55mm).

Notebook and printer power supplies are connected via the 220V power socket on the case's outer shell. The lid offers storage space for mobile equipment in a number of compartments - one even featuring a combination lock.

Specification:

Colour:	Black
Dimensions:	565mm x 405mm x 160mm OR 22.2" x 15.9" x 6.3"
Weight:	4.6kg
Material:	Aluminium/Conpearl/ABS
For Notebooks up to:	15.4"
For Printer:	HP DeskJet 450 series

Part Codes:

N9748AHY	DataDesk 450
