

Cross.Over backpack

A trendy sling bag for 15.4" notebooks

The Cross.Over is an up to date and very practical 15.4" notebook bag that is worn across the back. It offers plenty of storage room and perfect safety for your notebook, in a casual style.

The notebook is transported safely in the padded notebook compartment inside the bag, Everything else finds room in the zip-secured front compartment - CD-Roms, pens, power supply units, documents etc. There is also an attached pocket which offers storage space and fast access to a mobile phone and/or mp3 player with an integrated earphone cable opening on the shoulder strap.

The softly padded and adjustable shoulder strap makes for comfortable carrying, and the additional hip strap means the Cross.Over can be securely 'tied' to the back.

Available in black and olive.
