PLEASE READ CAREFULLY BEFORE USE

IB-1125-WM-E-010304

LOCATION OF CONTROLS

1. FUNCTION SWITCH
2. TUNING CONTROL
3. STEREO HEADPHONE JACK
4. VOLUME CONTROL
5. FAST FORWARD BUTTON (FAST F.)
6. PLAY BUTTON
7. STOP BUTTON
8. 3 BAND GRAPHIC EQUALIZER - Adjusts for the tones you prefer.
9. BELT CLIP (at the back of the set)
10. BATTERY DOOR (at the back of the set)

AUTOMATIC STOP - This set will automatically shut itself off when the tape has finished playing, and the PLAY button will pop up.

Congratulations! You now own a personal radio cassette player, able to offer personal listening with your headphones, and custom sound with your 3 band graphic equalizer.

BATTERY INSTALLATION

Slide the BATTERY DOOR as the arrow direction to open it, and insert 2 size "AA" batteries, taking care not to reverse the positive and negative polarities.

Alkaline batteries are recommended and will normally provide more playing time.

- Do not mix old and new batteries.
- Do not mix alkaline, standard (carbon-zinc) or rechargeable (nickel-cadmium) batteries.

NOTE:

- Remove both batteries during long periods (about 30 days or more) of non-use, possible battery leakage and corrosion can damage the set.
- If the sound becomes weak and unclear, the batteries may be weak. Replace both batteries at once.

LISTENING TO THE RADIO

You may listen to the radio through the stereo headphones.

1. Plug the headphone plug into the HEADPHONE jack.
2. Slide the FUNCTION switch to AM or FM position.
3. Select the desired station with the TUNING control (adjust for clearest sound).
4. Adjust the VOLUME control for the most pleasing sound.
5. Adjust the 3 BAND EQUALIZER CONTROLS to your taste.
6. When listening is completed, slide the FUNCTION switch to the TAPE position.

As the headphone cord functions as the FM antenna, do not bunch it up. Unwind and extend the cord as much as possible.

TO INSERT THE TAPE

1. Open the cassette door by holding the door as shown and gently pulling it to you.
2. Insert a recorded tape into the cassette holder **ON THE DOOR.**
3. Close the cassette door gently till it clicks shut.

CAUTION: Do not pull door too strongly, or you may damage the door. Treat this set with care and it will last a long time.

TAPE PLAY

1. Check whether or not the tape is tight before it is inserted.

To keep the tape from tangling, firmly wind the tape before inserting it into the player.

Use of a cassette with more than 90 minutes, such as C-120 (120 minutes), is not recommended. The extreme thinness of this tape may damage this set.

2. Open the cassette door by hand, face the side to be played toward you, and insert the cassette tape. Close the cassette door.
3. Connect the headphones to the HEADPHONE jack and adjust the headphone band for proper fit.
4. Press the PLAY button.
5. Adjust the VOLUME to control the sound level you like.
6. To skip portions of the cassette tape, press the FAST FORWARD button.
7. To stop playing, press the STOP button, and the power source is also shut off.
(This set has a built-in auto-stop and the tape mechanism will stop playing and shut off when it reaches the end of the tape.)
8. To hear the other side of tape, flip it over and press PLAY.

TO HEAR THE SAME SONG AGAIN

1. Remove the tape, flip it around to the other side and insert it.
2. Press the FAST FORWARD button for a short time.
3. Remove tape, flip it around to the original side, re-insert and press the PLAY button.

GRAPHIC EQUALIZER

This set has a 3 BAND GRAPHIC EQUALIZER which you may adjust the tone of the music to your taste.

CLEANING TAPE HEAD

If the sound drops out or excessive noise occurs, clean the magnetic head, capstan and pinch roller with a cotton swab moistened with alcohol.

TROUBLE SHOOTING

PROBLEM	CHECK THE FOLLOWING
No sound	Is the headphone plugged into the jack? - Plug it in now. Is the VOLUME control at minimum? - Raise the volume. Are the batteries old or dead? - Replace both batteries.
PLAY button will not stay down	The tape has reached the end. Remove the tape, flip it over to the other side and insert into cassette door and press PLAY.
AM/FM reception weak	Rotate the set for better AM or bring it closer to a window. For FM, extend the headphone wire straight.
Poor quality playback after playing a long time	1. Check if both batteries are fresh and inserted correctly. 2. Use a tape cleaning cassette tape to clean the tapehead (available at most radio stores).
Tape stops in middle of play	Try a different tape. Tape may be damaged. Also try fast forwarding tape till the end.
Tape jamming or tangling	1. Use only better quality tapes. 2. Do not use a cassette with more than 90 minutes. 3. Make sure there are no loose layers of tape visible before inserting the cassette.

NORMAL BATTERY LIFE USING ALKALINE BATTERIES IS ABOUT 6 HOURS OF CASSETTE PLAYING TIME.

GENERAL SPECIFICATION

Output power (Max) : More than 20 mw/ch
Power source : 2 size "AA" alkaline batteries

Tape Section

Speed deviation : +3% -2%
Frequency response : Standard normal bias cassette tape
70Hz - 10kHz

Radio Section

Frequency range: FM: 88 - 108 MHz
AM: 530 - 1700 kHz
