GENERAL DESCRIPTIONS

1. Multi-functional portable wireless amplifier and wireless karaoke system, which enjoys pure & perfect sound and everlasting quality, is characterized by the simple and convenient operation.
2. The system is equipped with VHF wireless microphone transmitter & receiver
3. To a built-in 3 " tweeter & a 8 " woofer and DVD/MP3/VCD/CD-G/CD-PLAYER/MP3/CDR, TAPE & TAPE RECORDER assembled, it owes the excellent power output and will be your best choice.
4. The system is perfect for Karaoke, conference, training, auditorium, hotel, church & teaching etc that engages inside or outside.
6. The system is equipped with headset mic & bodypack transmitter, and the hand-held mic is optional to you. Normally the effective distance is 50 meters.
7. Can connect three wired mic at the same time and volume of the mic can be adjusted according to your request.
8. Treble and bass control is supplied.
9. Echo control is supplied.
10. Including two lines of guitar input, volume can be adjusted by main volume control.
11. CD/TAPE IN volume control is supplied.
12. Audio/Video input and output jacks are installed on the front panel for your choice, while Audio/Video output jacks are installed on the rear panel.
13. Main volume control for amplifier is supplied.
14. Can record the voice and music that come from the amplifier by recorder.
15. Additional trailer is equipped for your convenience.

PARAMETER

AMPLIFIER

Power supply: AC220V/50Hz AC110V/60Hz
including a built-in 12V/7AH rechargeable battery.

Frequency response: 35Hz-20KHz

SPL: 94dB(1W/M)

T.H.D: <1%

PARAMETER

Input wired mic:	-58dBV600
Speaker:	8 " woofer,3 " tweeter
RMS power:	185W
Input jack:	2×1/4 " wired mic jack, 1×1/4 " GUITAR IN jack 1×Audio/Video input jack
Output jack:	3×RCA×(VIDEO+L/R AUDIO) jack

RECEIVER

Carrier frequency range:	177-193MHz
RF sensitivity:	≤-101dB
Image rejection:	≥60dB
S/N ration:	≥65dB
Operation range:	100 ft

TRANSMITTER

Carrier frequency range:	177-193 MHz
RF power output:	≤10mW
Modulation level:	15K
Operation temperature:	-18°C ~60°C
Power supply:	9V
Unit Battery Life:	Approx. 5 Hours
Mic Battery Life:	Approx. 45 Hours

OPERATION

1. Make sure the power supply

A.For AC power

- ① Connect the power socket of the unit and AC power socket with the supplied cable.
- ② Power on DVD/MP3/VCD/CD-G/CD player & the amplifier and both of red indicators come that indicates the system is under the situation.
- ③ 110/220V voltage switchable

B. For built-in rechargeable battery

- ① Should exist enough energy for rechargeable battery, do not connect AC power socket.
- ② Power on the DVD/MP3/VCD/CD-G/CD player & the amplifier and both of red indicators come that means the system can be operated now.

③ If the low voltage indicator on the back of the unit is red, it indicates insufficient voltage and need to charge it right now.

C. Charge by built-in rechargeable battery

① Connect the power socket of the unit and AC power socket with the supplied cable.

② The charge indicator will turn from red to green that means it has got the sufficient voltage.

③ The charge time should be 8-10 hours.

2. For DVD/MP3/ VCD/CD-G/CD PLAYER

① Turn on the amplifier and the red indicator will be light.

② Power on DVD/MP3/VCD/CD-G/CD PLAYER and the red indicator comes.

③ Open the compartment of DVD/MP3/VCD/CD-G/CD by pressing OPEN/CLOSE button and insert the disc, DVD/MP3/VCD/ CD-G/CD PLAYER is under the situation once press OPEN/CLOSE button again.

④ Connect the VIDEO output jack on either side of the unit and TV, the picture will be transferred from DVD/MP3/VCD/CD-G/CD PLAYER to TV screen.

⑤ Adjust main volume controls of the amplifier and CD/TAPE to the suitable level.

⑥ Adjust treble control and bass control as per your request.

⑦ Press the previous button for previous song.

⑧ Press the next button for next song.

⑨ Press pause button for pause.
