

Installation Instructions

Part No. 626776/883306 Rev. B

IMPORTANT:
Read and save
these instructions.

IMPORTANT:
Installer: Leave Installation Instructions
with homeowner.
Homeowner: Keep Installation Instructions
for future reference.
Save Installation Instructions for electrical
inspector's use.

30" and 36" Convertible
Range Hood

1196

Before you start...

Proper installation is your responsibility. Make sure you have everything necessary for correct installation. It is the responsibility of the installer to comply with the clearances specified.

Check the location where the range hood will be installed. The location should be away from strong draft areas, such as windows, doors, and strong heating vents.

Tools and materials needed for installation:

Mobile home installation

The installation of this range hood must conform to the Manufactured Home Construction and Safety Standard, Title 24 CFR, Part 3280 (formerly the Federal Standard for Mobile Home Construction and Safety, Title 24, HUD, (Part 280)) or when such standard is not applicable, the Standard for Manufactured Home Installations, ANSI A225.1 and Manufactured Home Installations, Sites, and Communities ANSI/NFPA 501A, or with local codes.

To connect to four-wire power supply, the appliance wiring must be revised. See "Electrical requirements."

Electrical requirements

! WARNING

Electrical Shock Hazard

Electrical ground is required on this range hood.

Do Not ground to a gas pipe.

Take special care when drilling holes into the wall. Electrical wires may be concealed behind the wall covering and contact with them could result in electrical shock.

Locate any electrical circuits that could be affected by the installation of range hood and disconnect power circuit.

Do Not have a fuse in the neutral or grounding circuit. A fuse in the neutral or grounding circuit could result in an electrical shock.

Check with a qualified electrician if you are not sure range hood is properly grounded.

Failure to follow these instructions could result in death or serious injury.

If codes permit and a separate grounding wire is used, it is recommended that a qualified electrician determine that the grounding path is adequate.

! WARNING

Electrical Shock Hazard

It is the customer's responsibility:

To contact a qualified electrical installer.

To assure that the electrical installation is adequate and in conformance with National Electrical Code, ANSI/NFPA 70 — latest edition*, and all local codes and ordinances.

Installation work and electrical wiring must be done by a qualified person(s) in accordance with all applicable codes and standards, including fire-rated construction.

Sufficient air is needed for proper combustion and exhausting of gases through the flue (chimney) of fuel burning equipment to prevent back drafting. Follow the heating equipment manufacturer's guideline and safety standards such as those published by the National Fire Protection Association (NFPA), and the American Society for Heating, Refrigeration and Air Conditioning Engineers (ASHRAE), and the local code authorities.

When cutting or drilling into wall or ceiling, Do Not damage electrical wiring and other hidden utilities.

Vent ducted range hoods to the outdoors. Do Not end duct inside the building.

Failure to follow these instructions could result in death or serious injury.

Injury Hazard

Reaching over a heated cooking surface should be avoided to prevent being burned. The range hood should extend a minimum of 5 inches out from the bottom of the cabinet.

Reaching over a heated cooking surface could result in a serious burn.

Important: Observe all governing codes and ordinances.

A. A 115-volt, 60-Hz, AC-only, fused electrical supply is required. The total ampere load used, including the range hood, must not exceed 90% of the rated capacity of the circuit. The ampere rating of the range hood is located on the model/serial rating plate located on the side cover the motor housing.

B. It is the personal responsibility and obligation of the customer to contact a qualified electrician to assure that the electrical installation is adequate and in conformance with the National Electrical Code ANSI/NFPA 70 — latest edition* and all local codes and ordinances.

C. The range hood must be connected with copper wire only.

D. The range hood should be connected directly to the fused disconnect (or circuit breaker) box through flexible armored or nonmetallic sheathed copper cable. A U.L.-listed strain relief must be provided at each end of the power supply cable. Wire sizes (COPPER WIRE ONLY) and connections must conform with the rating of the appliance as specified on the model/serial rating plate.

Wire sizes must conform to the requirements of the National Electrical Code ANSI/NFPA 70 — latest edition*, and all local codes and ordinances.

Copies of standards listed may be obtained from:

* National Fire Protection Association
Batterymarch Park
Quincy, Massachusetts 02269

Venting requirements

⚠ WARNING

Fire Hazard

Venting system must terminate to the outside.

Do Not vent exhaust air into spaces within walls or ceilings or into attics, crawl spaces or garages.

Use metal duct only.

Do Not use four-inch laundry-type wall caps.

Do Not use plastic ductwork.

Flexible metal duct is Not recommended. If it is used, calculate each foot of flexible metal duct as two feet of straight duct.

Flexible metal elbows count twice as much as standard elbows.

Do Not use to exhaust hazardous or explosive materials and vapors.

Failure to follow these instructions could result in a fire.

Ductwork needed for installation is not included. Wall or roof caps used must have backdraft damper.

Determine which outside venting method needs to be used. NOTE: If a non-vented (recirculating) installation is desired, follow instructions on Panel D.

The length of the ductwork and number of elbows should be kept to a minimum to provide efficient performance. The size of the ductwork should be uniform. Do Not install two elbows together. Use duct tape to seal all joints in the ductwork system.

Ductwork can terminate either through the roof or wall. Use caulking to seal exterior wall or roof opening around exhaust hood. For the most efficient and quiet operation, it is recommended that the range be vented vertically through the roof through 7" round ductwork.

Figures 1-4 show common venting methods and what types of materials are needed.

Vertical Roof Venting

Figure 1

Vertical Roof Venting

Figure 2

Horizontal Wall Venting

Figure 3

Figure 4

Recommended ductwork length

Use 3-1/4" x 10" or 7" ductwork with a maximum length of 26 feet for ductwork system. For best performance, use no more than three 90° elbows. To calculate the length of system you need, add the equivalent feet for each ductwork piece used in the system. See the following examples.

3-1/4" x 10" ductwork system

Recommended standard fittings

| | | |
|--------------------------------|----------------------------------|-------------------------------|
| | | |
| 3-1/4" x 10" 90° elbow = 5 ft. | 3-1/4" x 10" flat elbow = 12 ft. | 3-1/4" x 10" wall cap = 0 ft. |

7" ductwork system

Recommended standard fittings

| | | | |
|------------------------------|--------------------------------------|--------------------------------------|---------------------|
| | | | |
| 3-1/4" x 10" to 7" = 4.5 ft. | 3-1/4" x 10" to 7" 90° elbow = 5 ft. | 7" to 3-1/4" x 10" 90° elbow = 9 ft. | |
| | | | |
| 90° elbow = 5 ft. | 7" to 3-1/4" x 10" = 1 ft. | 45° elbow = 2.5 ft. | 7" wall cap = 0 ft. |

Now start...

With range hood in kitchen.

Slide cardboard or hardboard under range before moving range across floor to prevent damaging floor covering.

Cover countertop, cooktop or set-in range with a thick, protective covering to prevent damaging countertop.

- Put on safety glasses and gloves.
- Disconnect and move freestanding range from cabinet opening to provide easier access to upper cabinet and rear wall. Put a thick, protective covering over cooktop, set-in range or countertop to protect from damage or dirt.
- Determine which venting method (roof or wall venting or non-venting) you need to use. This range hood is shipped for non-vented installation. If non-venting (recirculating) installation is desired, follow instructions on Panel D.

Vented installation

- Remove screws from vent baffle on top of range hood. Remove vent baffle.

- Turn vent baffle and reinsert in slot in top of range hood so that the word "Vented" is facing up. Fasten vent baffle with screws.

- Remove knockout from the wiring opening (top or rear) to be used. For rectangular venting, remove only the 3-1/4" x 10" rectangular opening knockout. For round ductwork venting through roof, remove both opening knockouts.

- Remove terminal box cover from range hood.

! WARNING

Injury Hazard

More than one person is required to help with installation because of the weight and size of range hood.

Failure to follow this instruction could result in serious injury.

8. Lift the range hood into final position and center. Mark on the underside of cabinet the location of the four keyhole mounting slots. Set range hood aside on a protected surface.

9. Determine and clearly mark a vertical centerline on the wall and cabinet in the area the vent opening will be made.

! WARNING

Electrical Shock Hazard

Take special care when drilling holes into the wall.

Contacting electrical wires concealed behind the wall covering could result in death or serious injury.

10. To wire through top, mark a line 7-1/2" from the right of the centerline on the underside of the cabinet. Mark the point on this line that is 1-3/8" from back wall. Drill a 1-1/4" diameter hole through the cabinet at this point.

Numbers correspond to steps.

To wire through rear, mark a line 7-1/2" from the right of the centerline on the wall. Mark the point on this line that is 64-5/8" from the floor (or 1-3/8" from underside of cabinet). Drill a 1-1/4" diameter hole through wall at this point.

11. To vent through the roof with 7" round ductwork, mark 4-1/2" and 5" in from back wall along the centerline on underside of cabinet. Use these points as centers to draw 7-1/8" circles on underside of cabinet. Use a saber saw to cut the openings for the ductwork. Repeat for the underside of the top of the cabinet. This will create slotted openings.

To vent through the roof with 3-1/4" x 10" rectangular ductwork, mark a line 1" and 5" from the back wall on the underside of the cabinet. Mark lines 5-1/4" to the right and left of the centerline on the underside of cabinet that connect the lines just drawn. Use a saber saw to cut a rectangular opening for the ductwork. Repeat for the underside of the top of the cabinet.

To vent through wall with 3-1/4" x 10" rectangular ductwork, measure from floor 65-7/8" and 62-3/8" (or 1/8" and 3-5/8" down from underside of cabinet) and mark on back wall. Measure and mark a line 5-1/4" to right and left of centerline, connecting the two lines. Use a saber saw to cut a rectangular opening for the ductwork.

12. Install ductwork through the vent opening in upper cabinet or wall. Complete venting system according to method needed. See "Venting requirements." Use caulking to seal exterior wall or roof opening.

13. Attach rectangular damper to selected rectangular vent opening. If damper is attached to back of range hood, be sure damper hinge is toward the top. For round vented installations, use round damper in duct to prevent air from flowing back into ductwork. If wall or roof cap has a damper, remove damper blade from range hood.

14. Run wiring through wall or cabinets according to the National Electrical Code and local codes and ordinances. Do Not turn on power until installation is complete.

15. Start screws through neck of each of the four keyhole mounting screw slots marked on the cabinet bottom.

16. Lift range hood into final position, feeding electrical wire through wiring opening. Position the range hood so that the large end of the keyhole slots are over the screws. Then push the hood toward the wall so that the screws are in the neck of the slots. Tighten mounting screws to cabinet, making sure mounting screws are in narrow neck of slots. Make sure that damper blade, if used, rotates up and down freely.

17. Connect the white and black wires of the power supply cable to the white and black leads in the hood with twist-on connectors. Connect the power supply grounding wire to the green, grounding wire inside the range terminal box with a twist-on wire connector. Use caulking to seal wire opening. Replace terminal box cover.

18. Pull firmly on tab to remove filter/light lens from range hood. Turn filter/light lens so that charcoal filter pad is facing up. Lift tabs and remove charcoal filter pad. Discard charcoal filter pad. Place edge of filter/light lens in opening so that right side is above flange and tab faces downward. Press filter/light lens into position.

Non-vented installation

1. Put on safety glasses and gloves.

2. Check vent baffle on top of range hood. "Non-vented" should be facing up.

3. Remove knockout from the wiring opening (rear or top) to be used. Do Not remove venting knockouts.

5. 15. 16.

Numbers correspond to steps.

4. Remove terminal box cover on range hood.

5. Lift range hood into final position and center. Mark on underside of cabinet the location for the four keyhole mounting slots. Set range hood aside on a protected surface.

6. Determine and clearly mark a vertical centerline in the cabinet opening.

7. To wire through top, mark a line 7-1/2" from the right of the centerline on the underside of the cabinet. Mark the point on this line that is 1-3/8" from the back wall. Drill a 1-1/4" diameter hole through cabinet at this point.

To wire through rear, mark a line 7-1/2" from the right of the centerline on the wall. Mark the point on this line that is 64-5/8" from the floor (or 1-3/8" from underside of cabinet). Drill a 1-1/4" diameter hole through wall at this point.

8. Complete Steps 14-17. Do Not complete Step 18. The charcoal filter pad is needed in non-vented installation.

You have just finished installing your new Whirlpool range hood. Keep Installation Instructions close to range hood for easy

Congratulations!

reference. The instructions will make reinstalling your Whirlpool range hood in another home as easy as the first installation.

Use & Care Information

⚠ WARNING

Electrical Shock Hazard

Use this range hood only in the manner intended by the manufacturer. If you have any questions, contact the manufacturer. Before installation and before servicing or cleaning range hood, switch off power at service panel and lock service panel to prevent power from being switched on accidentally.

Failure to follow this instruction could result in death or serious injury.

Fire Hazard

Keep fan, filters and grease-laden surfaces clean.

Turn range hood on when cooking at high heat.

Use high control setting on range only when necessary.

Heat oil slowly on low to medium setting.

Do Not leave range unattended when cooking.

Always use cookware and utensils appropriate for the type and amount of food being prepared.

Smother grease fire flames with a close-fitting lid, cookie sheet, or metal tray. Turn burner off.

Do Not use water, wet dishcloths or towels to smother flames. Using these items could result in steam explosion.

If flames do not go out Do Not pick up the pan. Leave the house or building and call the fire department.

Use a Class ABC fire extinguisher if you know how and the fire is small and within the range area. You must fight the fire with your back to an exit. You still need to call the fire department.

Failure to follow these instructions could result in a fire or other injury.

Filter/light lens

For best results, remove and clean often.

To remove filter/light lens:

Pull firmly on filter tab to remove filter/light lens from range hood.

To clean filter/light lens:

Place filter/light lens in dishwasher or hot sudsy water to clean.

Non-vented installation:

Turn filter/light lens so that charcoal filter pad is facing up. Lift tabs and remove charcoal filter pad. Discard charcoal filter pad. Place filter/light lens in dishwasher or hot sudsy water to clean. Lift tabs and place new charcoal filter pad in filter/light lens.

New charcoal filter pads, Part No. 883151, are available from your dealer.

To reinstall filter/light lens:

Place edge of filter/light lens in opening so that right side is above flange and tab faces downward. Press filter/light lens into position.

Fan motor

Every three years lubricate each motor bearing with a few drops of oil to help prolong motor life.

Clean exterior of motor with a damp cloth and grease-cutting detergent.

Exterior surfaces

Clean the range hood with a mild detergent and soft cloth. Do Not use abrasive cleansers or steel wool pads.

Light

Do Not use bulb larger than 60 watts in light socket.

Light bulb is not included.

Operation of range hood

For best results, turn range hood fan on at beginning of cooking and allow it to run until all smoke and odors are removed from room.

ON and DOWN ARROW pad

To operate fan:

Press "ON" pad. The range hood fan will start at the highest fan speed. To change fan to lowest speed, press the "DOWN ARROW" pad. Speed may be increased or decreased anytime during range hood operation.

To decrease fan speed:

Press "ON" pad several times until fan reaches desired speed. Each time the "ON" pad is pressed, fan speed will decrease until fan reaches lowest setting.

UP ARROW pad

To increase speed:

Press "UP ARROW" pad until fan reaches desired speed. Each time the "UP ARROW" pad is pressed, fan speed will increase until fan reaches highest speed.

OFF pad

To turn fan OFF:

Press fan "OFF" pad.

HI pad LO pad OFF pad

To operate light:

Press "HI" pad for bright light. Press "LO" pad for less light. Light may be changed to "HI" or "LO" during anytime of range hood operation.

To turn light OFF:

Press light "OFF" pad.

If range hood does not operate...

Check that the circuit breaker is not tripped or the house fuse blown.

If you need assistance...

The Whirlpool Consumer Assistance Center will answer any questions about operating or maintaining your range hood not covered in the Installation Instructions. The Whirlpool Consumer Assistance Center is open 24 hours a day, 7 days a week. Just dial 1-(800) 253-1301 — the call is free.

When you call, you will need the range hood model number and serial number. Both numbers can be found on the model/serial rating plate located on the side cover of the motor housing.

If you need service...

In the event your Whirlpool appliance should need service, call the dealer from whom you purchased the appliance or a Whirlpool-authorized service company. A Whirlpool-authorized service company is listed in the Yellow Pages of your phone directory under "Appliance — Household — Major — Service and Repair." You can also obtain the service company's name and number by dialing, free, within the continental United States, the Whirlpool Consumer Assistance Center number, 1-(800) 253-1301. A special operator will tell you the name and number of your nearest Whirlpool-authorized service company.

Maintain the quality built into your Whirlpool appliance — call a Whirlpool-authorized service company.

Whirlpool® Range Hood Warranty

| LENGTH OF WARRANTY | WHIRLPOOL WILL PAY FOR |
|---|--|
| FULL ONE-YEAR WARRANTY From Date of Purchase | FSP® replacement parts and repair labor to correct defects in materials or workmanship. Service must be provided by an authorized Whirlpool SM service company. |
| WHIRLPOOL WILL NOT PAY FOR | |
| <ul style="list-style-type: none"> A. Any labor costs incidental to the replacement of defective parts. B. Consumable parts such as light bulbs and filters. C. Service calls to: <ul style="list-style-type: none"> 1. Correct the installation of the range hood. 2. Instruct you how to use the range hood. 3. Replace house fuses or correct house wiring. D. Repairs when range hood is used in other than normal, single-family household use. E. Pickup and delivery. This product is designed to be repaired in the home. F. Damage to range hood caused by accident, misuse, fire, flood, act of God or use of products not approved by Whirlpool. | |

WHIRLPOOL CORPORATION SHALL NOT BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES. Some states do not allow the exclusion or limitation of incidental or consequential damages so this limitation or exclusion may not apply to you. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state. Outside the United States, a different warranty may also apply. For details, please contact your franchised Whirlpool distributor or military exchange.
