

## Pro Ventilation Hood Liners

Whether you prefer French country or modernist, the Wolf Pro hood liners allow you to incorporate superior ventilation within your kitchen design. All you have to do is decide what it will look like. Sometimes referred to as power packs, these liners bring all of the controls, lighting and convenience of our Pro ventilation line for those applications with a custom exterior treatment.

Model PL462212 shown. Also shown is Model R484CG gas range and Sub-Zero Models 700BR and 700TCI integrated refrigeration.

Discharge	Vertical
Duct Size	10" Round
Electrical Requirements	110/120 V AC 60 Hz, 15 amp dedicated circuit
Shipping Weight	54–82 lbs

### Installation Notes

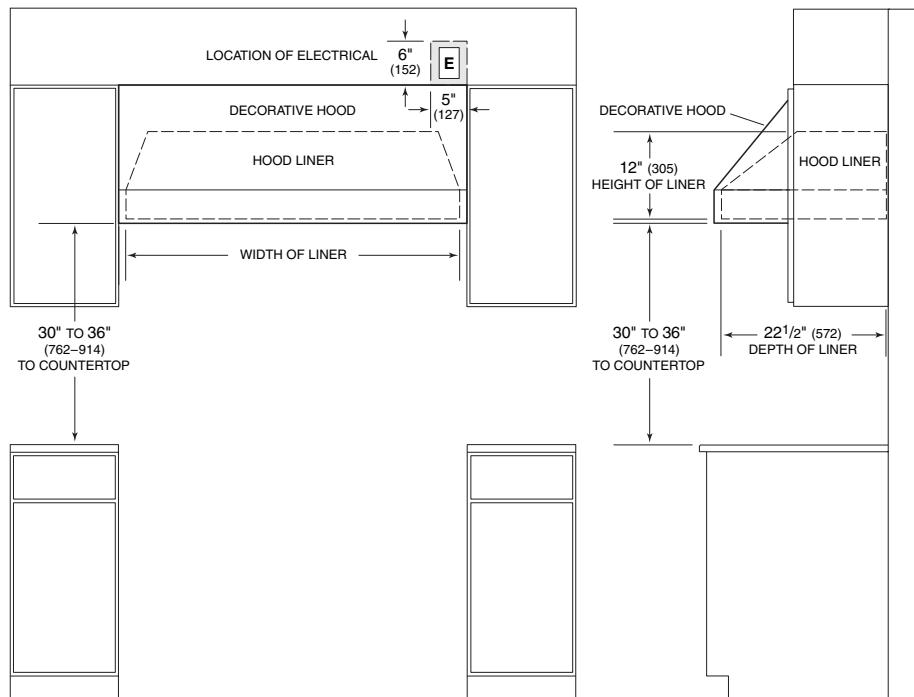

Pro hood liners are sold as a shell only. An internal, in-line or remote blower is required. For blower recommendations, visit our website, [wolfappliance.com](http://wolfappliance.com). Transition with backdraft damper is included.

Pro hood liners are recommended for use with all Wolf cooking appliances.

A decorative hood can be created out of wood, plaster, tile or metal. The shape of the decorative hood is not critical, the only place where the liner and outside cover must meet is at the bottom edge of the metal liner. The decorative hood and liner must fit at the bottom edge in both width and depth. The height of the liner does not have to be the same as the height of the decorative hood, and is generally shorter.

Complete installation specifications can be found on our website, [wolfappliance.com](http://wolfappliance.com).
