Manual Usage

CHAUVET® authorizes its customers to download and print this manual for professional information purposes only. CHAUVET® expressly prohibits the usage, copy, storage, distribution, modification, or printing of this manual or its content for any other purpose without its written consent.

Document Printing

For better results, print this document in color, on letter size paper (8.5 x 11 inches), double sided. If using A4 paper (210 x 297 mm), configure your printer to scale the content accordingly.

Intended Audience

Any person in charge of installing, operating, and/or maintaining this product should read the guide that shipped with it as well as this manual in their entirety before installing, operating, or maintaining this product.

Disclaimer

CHAUVET® believes that the information contained in this manual is accurate in all respects. However, CHAUVET® assumes no responsibility for any error or omissions in this document. CHAUVET® reserves the right to revise this document and to make changes from time to time in the content hereof without obligation of CHAUVET® to notify any person or company of such revision or changes. This does not constitute in any way a commitment by CHAUVET® to make such changes. CHAUVET® may issue a revision of this manual or a new edition of it to incorporate such changes.

Document Revision

The Q-Spot[™] 560-LED User Manual Rev. 06 supersedes all previous versions of this manual. Please discard any older versions of this manual you may have, whether in printed or electronic format, and replace them with this version.

What Is Included

- One Q-Spot[™] 560-LED
- One IEC Power Cord with Edison Plug (US Market)
- · Two Omega Brackets
- One Safety Cable
- Warranty Card
- · Quick Reference Guide

Unpacking Instructions

Immediately upon receiving this product, carefully unpack and check the container. Make sure you have received all the parts indicated above and all the parts are in good condition.

Claims

If the container or the material inside the container (the product and included accessories) appear damaged from shipping, or show signs of mishandling, upon receipt notify the carrier immediately, not CHAUVET®,. Failure to do so in a timely manner may invalidate your claim with the carrier. In addition, keep the container and all the packing material for inspection.

For other issues such as missing components or parts, damage not related to shipping, or concealed damage, file a claim with CHAUVET® within seven (7) days of receiving the merchandise.

Typographic Conventions

Convention	Meaning	
1~512	A range of values in the text	
50/60	A set of mutually exclusive values in the text	
Claims	A new term, another document reference, or section or chapter in this document	
<set></set>	A button on the product's control panel

Safety Notes

Read all these Safety Notes before starting to work with this product. These notes include important safety information about the installation, usage, and maintenance of this product.

There are no user serviceable parts in this product. Any reference to servicing you find in this User Manual only applies to properly CHAUVET® certified technicians. Do not open the housing or attempt any repairs unless you are one of them.

Please refer to all applicable local codes and regulations for the proper installation of this product.

Personal Safety

- Avoid direct eye exposure to the light source while the product is on.
- Always disconnect this product from its power source before servicing.
- Always connect this product to a grounded circuit to avoid the risk of electrocution.
- Do not touch this product's housing when operating because it may be very hot.

Mounting and Rigging

- This product is for indoor use only! To prevent risk of fire or shock, do not expose this product to rain or moisture.
- Make sure there are no flammable materials close to this product while operating.
- When hanging this product, always secure it to a fastening device using a safety chain/cable (included).
- Do not carry this product from the head. Always use the handles.

Power and Wiring

- Always make sure that you are connecting this product to the proper voltage, as per the specifications in this manual or on the product's sticker.
- Never connect this product to a dimmer pack or rheostat.
- Never disconnect this product by pulling or tugging on the power cable.

Operation

- Do not operate this product if you see damage on the housing, lenses, or cables. In any of these cases, have the damaged parts replaced by an authorized technician at once.
- Do not cover the ventilation slots when this product is operating to avoid internal overheating.
- Do not aim this product toward the Sun. The lenses could concentrate the solar energy and cause internal overheating.
- The maximum ambient temperature is 104° F (40° C). Do not operate this product at a higher temperature.
- In case of a serious operating problem, stop using this product immediately!

In the unlikely event that your CHAUVET® product may require service, contact CHAUVET® Technical Support.

Expected LED Lifespan

LEDs gradually decline in brightness over time, mostly because of heat. Packaged in clusters, LEDs exhibit higher operating temperatures than in ideal, single LED conditions. For this reason, using clustered LEDs at their fullest intensity significantly reduces the LEDs' lifespan. Under normal conditions, this lifespan can be of 40,000 to 50,000 hours. If extending this lifespan is vital, lower the operational temperature by improving the product's ventilation and reducing the external temperature. In addition, limiting the overall projection intensity may also help to extend the LEDs' lifespan.

2. Introduction

Product Description

The Q-Spot[™] 560-LED is a high-power moving yoke product equipped with three (3) 60-watt white LEDs. This product includes a color wheel with seven slots plus white, and two gobo wheels. One gobo wheel has seven fixed gobos, plus open. The other gobo wheel has six rotating slot-n-lock gobos, plus open. In addition, the Q-Spot[™] 560-LED includes remote focus and a rotating 3-facet prism.

Features

- 13 or 17-channel DMX-512 LED moving yoke
- Pan: 540° / tilt: 270°
- Color wheel:

7 colors + white

Split colors

Rainbow color spin at variable speeds

• Gobo wheel 1:

Gobo shake

7 gobos + open

Gobo wheel spin at variable speeds

· Gobo wheel 2:

Indexed, rotating gobo wheel with gobo shake

6 slot-n-lock gobos + open

2 glass, 4 metal

Rotating gobo wheel spin at variable speeds

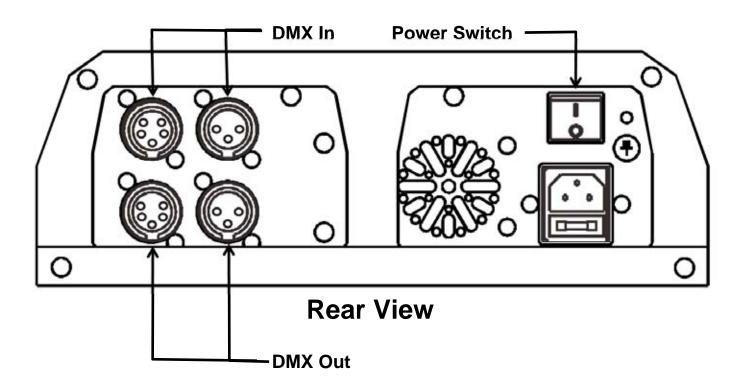

- Extremely bright with 19 degree beam angle for big looks
- 3-facet, high-speed rotating prism at variable speeds
- Variable focus
- · Variable iris
- Variable electronic shutter (for strobing)
- Remote fixture reset and vector speed channel
- 255 user-programmable steps without DMX controller
- Move-in-black for pan/tilt
- Built-in automated programs
- Built-in sound activated programs
- 3 high-powered, 60 W (14 A) LEDs
- User-selectable pan/tilt ranges
- Automatic pan and tilt correction
- Quiet operation

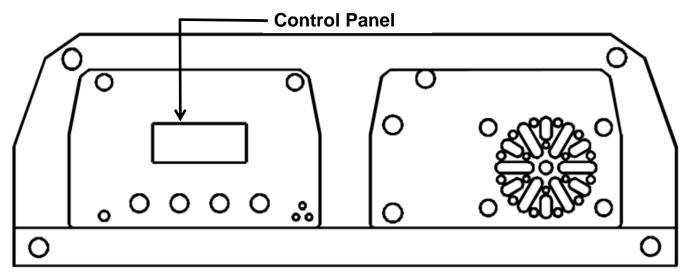

Additional Features

• 3-pin and 5-pin DMX connections

Product Overview

Product Dimensions

3. Setup

AC Power

The Q-Spot[™] 560-LED has an auto-ranging power supply that works with an input voltage range of 100~240 VAC, 50/60 Hz.

Make sure that you are connecting this product to the proper voltage, as per the specifications in this manual or on the product's sticker.

Always connect this product to a protected circuit with an appropriate electrical ground to avoid the risk of electrocution or fire.

To determine the power requirements for the Q-Spot[™] 560-LED, refer to the label affixed to the side of the product. You can also refer to the <u>Technical Specifications</u> chart in the *Technical Information* chapter of this manual.

The listed current rating indicates the maximum current draw during normal operation. For more information, you may download the document *Sizing the Circuit Breakers* from the CHAUVET® website: www.chauvetpro.com.

Never connect this product to a rheostat (variable resistor) or dimmer circuit, even if the rheostat or dimmer channel serves only as a 0 to 100% switch.

AC Plug

The Q-Spot[™] 560-LED comes with a power input cord terminated with an IEC connector on one end and an Edison plug on the other end (US market). If the power input cord that came with your product has no plug or you need to change the Edison plug, use the table below to wire the new plug.

Connection	Wire (US)	Wire (Europe)	Screw Color
AC Live	Black	Brown	Yellow or Brass
AC Neutral	White	Blue	Silver
AC Ground	Green/Yellow	Green/Yellow	Green

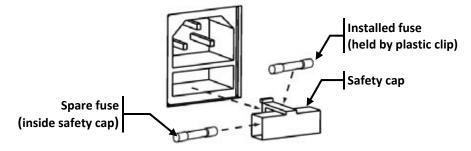

Fuse Replacement

This product uses a T 5 A, 250 V fuse.

Make sure to disconnect the product's power cord before replacing a blown fuse, and always replace with a fuse of the same type and rating.

- 1. Disconnect the product from the power outlet.
- 2. Wedge the tip of a flat head screwdriver into the slot of the fuse holder.
- 3. Pry the safety cap out of the housing to pull out the installed fuse.
- 4. Remove the blown fuse from the safety cap and replace with a fuse of the exact same type and rating (T5 A, 250 V).
- 5. Insert the fuse holder back in place and reconnect power.

DMX Linking

You may link the Q-Spot[™] 560-LED to a DMX controller using a standard DMX serial connection. If using other DMX compatible products with the Q-Spot[™] 560-LED, you can control each product individually with a single DMX controller.

DMX Modes

The Q-Spot[™] 560-LED uses the standard DMX data connection for its DMX personalities, **Basic** and **Advanced**. You will find information about these DMX modes in this manual. Refer to the <u>Introduction</u> chapter for a brief description, the <u>Operation</u> chapter for configuration details, and the <u>DMX Values</u> section for individual channel values.

Master/Slave Connectivity

The Master/Slave mode enables a Q-Spot[™] 560-LED (the "master unit") to control one or more Q-Spot[™] 560-LED's (the "slave units") without a DMX controller. A Q-Spot[™] 560-LED becomes the master unit when running an **AUTO**, **SOUND**, **TEST**, or **CUSTOM** program. You must configure the slave units to operate in **SLAVE** mode from their respective control panels. During the master/slave operation, the slave units will operate in unison with the master unit.

If you are not familiar with the DMX standard, master/slave connectivity, or if you need information about the DMX cables needed to link this product to a DMX controller, you may download the document *DMX Primer* from the CHAUVET® website: www.chauvetpro.com.

DO NOT connect a DMX controller to the products operating in Master/Slave mode. The DMX controller signals may interfere with the signals from the master unit.

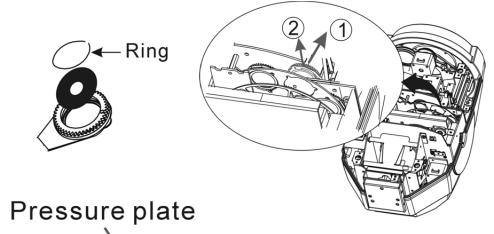

The *Operation* chapter of this manual provides detailed instructions on how to configure the Master and Slave units.

Gobo Replacement

- 1. Turn the product off and disconnect from the power outlet.
- 2. Open the head cover by loosening the four fastening screws at the sides of the top cover.
- 3. Separate the gobo plate from the gobo wheel by pushing the gobo plate toward the front of the moving head (direction 1 in the diagram). Be careful not to push the gobo out of the gobo plate.
- **4.** Take out the gobo plate by pulling the gobo plate outward (direction 2 in the diagram).
- **5.** On a flat surface, remove the expansion ring that holds the gobo in place.
- **6.** Remove the gobo from the gobo plate.
- 7. Insert a new gobo and hold in place with the expansion ring.
- **8.** Slide the tip of the gobo plate under the pressure plate near the center of the gobo wheel.
- Push the gobo plate inward. DO NOT force the gobo plate into the gobo wheel slot.

Note: If correctly installed, the gobo plate should easily snap into the gobo wheel slot.

Mounting

Before mounting this product, read and follow the Safety Notes in the <u>Before You Begin</u> chapter of this manual.

Orientation

Always mount this product in any safe position while making sure that there is adequate room for ventilation, configuration, and maintenance.

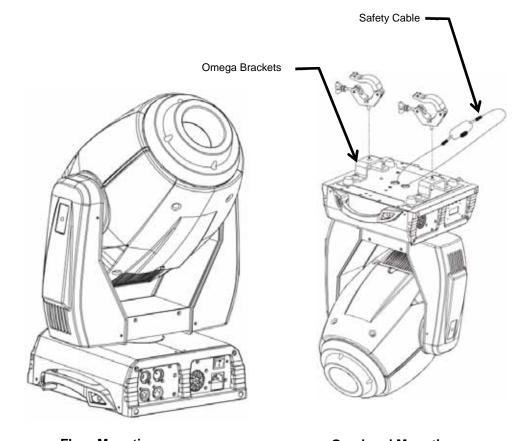

Rigging

CHAUVET® recommends following the general guidelines below when mounting this product.

- When selecting an installation location, consider easy access to this product for operation, programming adjustments, and routine maintenance.
- Make sure to mount this product away from any flammable material as indicated in the Safety Notes section.
- Never mount the product in places where rain, high humidity, extreme temperature changes, or restricted ventilation may affect it.
- If hanging this product, make sure that the mounting location can support the product's weight. Please see the <u>Technical Specifications</u> section of this manual for the weight requirement of this product.

Procedure

The Q-Spot[™] 560-LED comes with two (2) omega brackets to which you can attach clamps. You must supply your own clamps. Make sure the clamps are capable of supporting the weight of this product. You must use two mounting points per unit.

Product Mounting Diagram

4. Operation

Control Panel Description

Button	Function	
<menu></menu>	Exits from the current menu or function	
<enter></enter>	Enables the currently displayed menu or sets the currently selected value in to the current function	
<up></up>	Navigates upward through the menu list and increases the numeric value when in a function	
<down></down>	Navigates downward through the menu list and decreases the numeric value when in a function	

Control Options

You can set the Q-Spot[™] 560-LED start address in the 001~512 DMX range. This enables control of up to 30 units in the 17-channel **ADVANCED** personality.

Programming

Refer to the Menu Map to learn about the menu options. The Menu Map has a Menu Level and a variety of programming levels for each option.

- To go to an option in the Menu Level, press <MENU> repeatedly until the option shows on the display. Press <ENTER> to select. This will take you to the first programming level for that option.
- To select an option or value within the current programming level, press <UP> or <DOWN> until the option shows on the display. Press <ENTER> to select. In this case, if there is another programming level, you will see that first option or you will see the selected value.
- To exit to the previous menu level, press <MENU>.

DMX Operation

In the EDIT menu, <UP> and <DOWN> will only change the value of the current option. To change to the next option, press <ENTER>.

- 1. Select DMX operation.
 - a) Go to **MENU > INTRO > RUN**.
 - b) Select DMX 512.
- 2. Select a DMX mode.
 - a) Go to MENU > INTRO > PERSON.
 - b) Select BASIC or ADVANCED.
- 3. Select the starting address.
 - a) Go to MENU > INTRO > ADDRESS.
 - b) Select a starting address, 001~496 (Advanced) or 001~500 (Basic).

The highest possible starting address for each DMX mode is as follows:

DMX Mode	DMX Address
Basic	500
Advanced	496

Stand-alone Operation

- 1. Go to MENU > INTRO > RUN.
- Select a stand-alone operation mode (AUTO 1, AUTO 2, CUSTOM, SOUND 1, SOUND 2, or TEST).

Of all the stand-alone operation modes indicated above, only CUSTOM is editable (see Edit Custom).

Master/Slave

The Master/Slave mode enables one or more Q-Spot[™] 560-LED products (the slaves) to simultaneously duplicate the output of another Q-Spot[™] 560-LED (the master), without a DMX controller, whether in auto/custom or static modes..

- 1. Set the master unit:
 - a) Select a stand-alone mode, as indicated above.
- 2. Set each of the slave units:
 - a) Go to **MENU > INTRO > RUN**.
 - b) Select **SLAVE**.

- Do not connect a DMX controller to the master or slave products.
- The master unit should be the first unit in the DMX daisy chain.

Display Mode

- 1. Go to MENU > INTRO > DISPLAY.
- 2. Select a display mode (60 CLOSE or BRIGHT).

- When in the "60 CLOSE" setting, the LCD's backlight will turn off after 60 s.
- When in the "BRIGHT" setting, the LCD's backlight will stay on.

Software Version

- 1. Go to MENU > INTRO > INFO.
- 2. The display will show **Edition**.
- 3. Press **<ENTER>** to see the installed software version.

Keylock

Locks or unlocks the product's display.

- 1. Go to MENU > INTRO > KEYLOCK.
- 2. Select YES or NO.

When Keylock is in the YES setting, you will have to enter the password after 30 seconds of control panel inactivity or each time you turn the product on.

The default (non-modifiable) password is <UP>, <DOWN>, <UP>, <DOWN>, and <ENTER>.

Reset

Reset all custom settings to their default values.

- 1. Go to MENU > INTRO > RESET.
- 2. Select YES or NO.

Dimmer Curve

This option defines the output speed when you modify the dimmer fader values. You have four different options to simulate the dimming curve of an incandescent lighting product.

- 1. Go to MENU > INTRO > DIMMER.
- Select DIMMER 0~4.

DIMMER 0: The output is proportional (linear) to the dimmer channel.

DIMMER 1~4: The output follows the dimmer channel values based on the

corresponding dimmer curve, being **DIM1** the fastest and **DIM4** the

slowest.

Fader Reversal

Define how the pan, tilt, and dimmer increase.

- 1. Go to MENU > INVERT > PAN.
- 2. Select a fader direction (NORMAL or REVERSE).
- 3. Go to MENU > INVERT > TILT.
- Select a fader direction (NORMAL or REVERSE).
- 5. Go to MENU > INVERT > DIMMER.
- 6. Select a fader direction (NORMAL or REVERSE).
- 7. Go to MENU > INVERT > USE.
- 8. Select **YES** to activate the new settings or **NO** to stop using them.

- When in NORMAL, the pan, tilt, and dimmer values will <u>increase</u> as the position of the respective fader increases.
- When in REVERSE, the pan, tilt, and dimmer values will <u>decrease</u> as the position of the respective fader increases.

Range Limitation

Limit the pan or tilt range.

- 1. Go to MENU > RANGE > P/START.
- 2. Select the starting point for the limited pan (000~255).
- Go to MENU > RANGE > P/FINISH.
- 4. Select the finishing point for the limited pan (000~255).
- 5. Go to MENU > RANGE > T/START.
- 6. Select the starting point for the limited tilt (000~255).
- 7. Go to MENU > RANGE > T/FINISH.
- 8. Select the finishing point for the limited tilt (000~255).
- Go to MENU > RANGE > USE.
- 10. Select **YES** to activate the new settings or **NO** to stop using them.

Select how you reset the product, either using the DMX controller or from the control panel.

Reset Control

- 1. Go to MENU > SPECIAL > RESET.
- Select DMX or SYSTEM.

DMY: Enables the DMY

DMX: Enables the DMX controller to reset the product (**Control** function).

SYSTEM: Restricts the reset function to the control panel.

Move-in Black

Activate or deactivate the move-in black 3-second delay.

- 1. Go to MENU > SPECIAL > BLACKD.
- 2. Select **YES** to enable the 3 seconds delay or **NO** to make the blackout immediate.

Loss of DMX Settings

Define the product's response to a DMX failure.

- 1. Go to MENU > SPECIAL > DMXERROR.
- 2. Select **SAVE** to show the last look when DMX is lost or **BLAK** to make the product blackout immediately.

Fan Wait

Stop the fan during a blackout.

- 1. Go to MENU > SPECIAL > FAN WAIT.
- Select ON or OFF.

System Default

Default all product parameters to their default values.

- 1. Go to MENU > EXTRA.
- Press <ENTER> (PASSWORD) will show on the display.
- Press <ENTER> (**** will show on the display).
- 4. Enter the password, as explained in **Keylock**.
- 5. Use **<UP>** to select **DEFAULT**.
- 6. Press **<ENTER>** (**NO** will show on the display).
- Select YES and press <ENTER> to default the product or press <MENU> to exit.

Edit Custom

Program up to 255 steps in a single custom program.

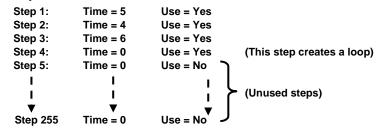

- 1. Go to MENU > EDIT.
- Press **<ENTER>** to go to **STEP**.
- 3. Press **<ENTER>** to select a value. The current value (**001~255**) will show on the LCD.
- Press **<UP>** or **<DOWN>** to select a new value.
- 5. Press **<ENTER>** to accept the value.
- 6. Press **<ENTER>** to go to **PAN**.
- 7. Repeat steps "1" through "6" for TILT, SPEED, COLOR, GOBO1, GOBO2, GOBO2ROT, PRISM, PRISMT, IRIS, FOCUS, DIMMER, STROBE, and TIME.
- 8. Press **<ENTER>** to go to **USE**.
- 9. Select **YES** to save the settings for this step or **NO** to delete them.
- 10. Repeat steps "3" to "8" for the other steps.

The product will execute all the steps in the CUSTOM program and stop.

To make the product start over, add a last step whose duration is 0 seconds.

Example:

Q-Spot[™] 560-LED User Manual Rev. 06

Menu Map

5. Technical Information

Product Maintenance

To maintain optimum performance and minimize wear, the user should clean this product frequently. Usage and environment are contributing factors in determining the cleaning frequency.

As a rule, you should clean this product at least twice a month. Dust build up reduces light output performance and can cause overheating. This can lead to reduced light source life and increased mechanical wear.

To clean a product, follow the recommendations below:

- Unplug the unit from power.
- Wait until the unit has cooled.
- Use a vacuum (or dry compressed air) and a soft brush to remove dust collected on the external vents and accessible internal components.
- Clean all external glass lenses with a mild solution of non-ammonia glass cleaner or isopropyl alcohol.
- Apply the solution directly to a soft, lint-free cotton cloth or a lens cleaning tissue.
- Drag any dirt or grime to the outside of the glass lens.
- Gently polish the glass lens until it is free of haze and lint.

Always dry the external glass lens carefully after cleaning it.

Refrain from spinning this product's fans using compressed air.

Troubleshooting Guide

Symptom	Cause(s)	Action(s)	
	Dimmer fader set to "0"	Increase the value of the dimmer channel	
	color fader set to "0"	Increase the value of the color channel	
	All colors in CUSTOM mode	Increase the values of the colors	
Product does not light up	are set to "0"		
	No power Faulty internal power supply	Verify external power circuit and wiring	
	Faulty main control board	Send unit for repair	
-	Faulty LED		
One of the LEDs does	Faulty LED module	Send unit for repair	
not work	Faulty LED driver		
Circuit breaker/fuse	Excessive circuit load	Reduce total load placed on the electrical circuit	
keeps tripping/blowing	Short circuit along the power wires	Check electrical wiring	
	No power	Check for voltage on outlet	
Unit dans not normania	Loose or damaged power cord	Check power cord	
Unit does not power up	Blown fuse	Replace fuse	
	Faulty internal power supply	Send unit for repair	
	Wrong DMX addressing	Check unit addressing	
	Damaged DMX cables	Check DMX cables	
	Wrong polarity on the controller	Check polarity switch settings on the controller	
	Loose DMX cables	Check cable connections	
	Non DMX cables	Use only DMX compatible cables	
	Bouncing signals	Install terminator as suggested	
Unit does not respond to wired DMX or responds erratically	Long cable / low level signal	Install an optically coupled DMX splitter before a long section of cable or right after the unit with the strong signal	
	Too many units	Install an optically coupled DMX splitter after unit #32	
	Interference from AC wires	Keep DMX cables separated from power cables or fluorescent/black lights	
	Faulty DMX interface board	Send unit for repair	
	Faulty Display/Main board	Send unit for repair	

If you still experience technical problems after trying the above solutions or if you need to send the unit for repair, contact CHAUVET \circledR Technical Support.

Returns **Procedure**

Send the merchandise prepaid, in the original box, and with its original packing and accessories. CHAUVET® will not issue call tags.

Call CHAUVET® and request a Return Merchandise Authorization (RMA) number before shipping the product. Be prepared to provide the model number, serial number, and a brief description of the cause for the return.

Clearly label the package with a Return Merchandise Authorization (RMA) number. CHAUVET® will refuse any product returned without an RMA number.

DO NOT write the RMA number directly on the box. Instead, write it on a properly affixed label.

Once you have received the RMA number, include the following information on a piece of paper inside the box:

- Your name
- Your address
- Your phone number
- The RMA number
- A brief description of the problem

Be sure to pack the product properly. Any shipping damage resulting from inadequate packaging will be the customer's responsibility. As a suggestion, proper FedEx packing or double-boxing is the method CHAUVET® recommends.

CHAUVET® reserves the right to use its own discretion to repair or replace returned product(s).
