WARNING: PHOTSENSITIVITY/EPILEPSY/SEIZURES

A very small percentage of individuals may experience epileptic seizures or blackouts when exposed to certain light patterns or flashing lights. Exposure to certain patterns or backgrounds on a television screen or when playing video games may trigger epileptic seizures or blackouts in these individuals. These conditions may trigger previously undetected epileptic symptoms or seizures in persons who have no history of prior seizures or epilepsy. If you, or anyone in your family, has an epileptic condition or has had seizures of any kind, consult your physician before playing. **IMMEDIATELY DISCONTINUE** use and consult your physician before resuming gameplay if you or your child experience any of the following health problems or symptoms:

- dizziness
- eye or muscle twitches
- disorientation
- any involuntary movement or convulsion.
- altered vision
- loss of awareness
- seizures

RESUME GAMEPLAY ONLY ON APPROVAL OF YOUR PHYSICIAN.

Use and handling of video games to reduce the likelihood of a seizure

- Use in a well-lit area and keep as far away as possible from the television screen.
- Avoid large screen televisions. Use the smallest television screen available.
- Avoid prolonged use of the PLAYSTATION®3 system. Take a 15-minute break during each hour of play.
- Avoid playing when you are tired or need sleep.

Stop using the system immediately if you experience any of the following symptoms: lightheadedness, nausea, or a sensation similar to motion sickness; discomfort or pain in the eyes, ears, hands, arms, or any other part of the body. If the condition persists, consult a doctor.

NOTICE:

Use caution when using the SIXAXIS™ wireless controller motion sensor function. When using the SIXAXIS™ wireless controller motion sensor function, be cautious of the following points. If the controller hits a person or object, this may cause accidental injury or damage. Before using, check that there is plenty of space around you. When using the controller, grip it firmly to make sure it cannot slip out of your hand. If using a controller that is connected to the PS3™ system with a USB cable, make sure there is enough space for the cable so that the cable will not hit a person or object. Also, take care to avoid pulling the cable out of the PS3™ system while using the controller.

WARNING TO OWNERS OF PROJECTION TELEVISIONS:

Do not connect your PLAYSTATION®3 system to a projection TV without first consulting the user manual for your projection TV, unless it is of the LCD type. Otherwise, it may permanently damage your TV screen.

HANDLING YOUR PLAYSTATION®3 FORMAT DISC:

- Do not bend it, crush it or submerge it in liquids.
- Do not leave it in direct sunlight or near a radiator or other source of heat.
- Be sure to take an occasional rest break during extended play.
- Keep this disc clean. Always hold the disc by the edges and keep it in its protective case when not in use. Clean the disc with a lint-free, soft, dry cloth, wiping in straight lines from center to outer edge. Never use solvents or abrasive cleaners.

PLAYSTATION®3 system front

Note: Some models of the PLAYSTATION®3 system do not include media slots. For specific features included, refer to the instructions for use of your model of the PLAYSTATION®3 system.

Starting a game: Before use, carefully read the instructions supplied with the PLAYSTATION®3 computer entertainment system. The documentation contains information on setting up and using your system as well as important safety information.

Check that the MAIN POWER switch (located on the system rear) is turned on. Insert the PURE disc with the label facing up into the disc slot. Select the icon for the software title under [Game] in the PLAYSTATION®3 system's home menu, and then press the **X** button. Refer to this manual for information on using the software.

Quitting a game: During gameplay, press and hold down the PS button on the wireless controller for at least 2 seconds. Then select "Quit Game" from the screen that is displayed.

Hint To remove a disc, touch the eject button after quitting the game.

Using the SIXAXIS™ wireless controller (for PLAYSTATION®3)

* The L3 and R3 buttons function when the sticks are pressed.

Note: To use the controller, you must first register or "pair" the controller with the PLAYSTATION®3 system and assign a number to the controller. For details, refer to the instructions supplied with the system.

Saved data for PLAYSTATION®3 format software

Saved data for PLAYSTATION®3 format software is saved on the system's hard disk. The data is displayed under "Saved Game Utility" in the Game menu.

Game Hint: Set Motion Sensor Adjust to "on" to enable the motion sensitive feature of the wireless controller. Roll the wireless controller from side to side or pitch forwards and backwards to maneuver your vehicle in the air. When on the ground, pitch the controller up when leaving a jump to preload. The amount of in-air control or preload you get will depend on the degree of controller movement applied.

GAME OVERVIEW

Throttle up your ATV and check your fear at the starting line as you compete against fifteen rival riders in unique off-road trick-racing events on 36 different tracks. Leap off snow-capped Italian mountains, jump gaping chasms in New Mexico and ride the rim of active volcanoes in New Zealand on your way to victory. Build your ATV from the ground up to create your own unique quad with handling and performance to suit your riding style. Experience extreme speed, catch massive air and nail spectacular airborne tricks while you leave your competition in the dust. Welcome to Off-Road Trick Racing. Welcome to Pure.

PRE-LOAD

This is how you jump your ATV in Pure. Pull the **left stick** down and flick it up immediately before a ramp to pre-load your ATV and catch air. You should pre-load off of most ramps to get enough air to pull tricks.

*Note: You can use the power accumulated in the Thrill Bar to boost by hitting the **Ⓢ button**. However, this will deplete your Thrill Bar meter, so boost wisely!*

THRILL BAR

The Thrill Bar indicates what level of tricks you are able to pull off. There are four levels, each increasing in complexity and the amount of boost they give you. They can be activated by filling the level on the Thrill Bar meter.

ⓧ button tricks are the most basic. As you successfully land tricks, the Thrill Bar begins to fill up. As the bar fills up, more difficult tricks become available, as indicated by the button icons arranged on the Thrill Bar. When the Thrill Bar is empty, only **ⓧ button** tricks are available.

As you fill it up (by landing tricks without crashing), you will be able to do **Ⓞ button** tricks, and eventually **Ⓢ button** tricks. Watch out though, if you crash or use boost, your Thrill Bar level will reduce and you can temporarily lose the ability to do the more advanced tricks until you build it back up again.

TRICKS

To pull tricks, you have to get air by pre-load jumping. Once you're in the air, you can pull tricks by holding either the **ⓧ**, **Ⓞ**, or **Ⓢ buttons** while pushing the left thumbstick in any one of eight directions – UP, DOWN, LEFT, RIGHT or any of the four diagonals. You can only perform **Ⓞ** or **Ⓢ button** tricks if your Thrill Bar level is high enough at the time. Try pulling trick combos but just make sure you have enough air!

*Note: You can "tweak" tricks by holding **L1** or **R1 buttons** while performing a trick.*

BOOST

You earn boost by doing tricks and you can use boost to help you win races. You can use the power accumulated in the Thrill Bar to boost by hitting the **Ⓢ button**. However, this will deplete your Thrill Bar meter, so boost wisely! Saving up boost is always a good idea.

SPECIAL TRICKS

Each rider has their own signature Special Trick and up to seven further Special Tricks. Some of these extra Special Tricks are available right away and others are unlocked by playing through the World Tour.

Once you've earned a special trick by completely filling your Thrill Bar, it can only be taken away by crashing. Unlike the other trick types, you don't lose your Special Trick when you boost. This means that you can use your entire bar of boost if you need to because you can fill the Bar right back up again if you perform another Special Trick.

GAMEPLAY

PURE WORLD TOUR

Compete in offroad stages across seven locations; Italy, New Mexico, Wyoming, Thailand, New Zealand, Glamis Dunes and Ocotillo Wells. Each stage has races, sprints and freestyle events, so be ready to ride them all. Earn new ATV parts, garage slots, paint jobs, new special tricks and character outfits on your way to becoming the Pure World Champion.

RACES

Pit yourself against up to 15 other riders in an all-out trick-filled race to the finish. Tricks give you boost which will help you to win races.

FREESTYLE

Freestyle races are held on some of the most outrageous outdoor tracks in the world. Earn the highest point total in a session to earn the top spot but keep a close eye on your gas gauge – you could run out! These events are all about trick combos because they yield the biggest scores. A red circle will appear after you land a trick. Pull another trick before the circle disappears and you'll link your scores into a combo.

SPRINT

Sprint races are short and intense. With 15 rival riders and very few jumps, Sprints are crowded and brutally competitive.

ONLINE

PURE features online play for up to 16 players. Race, Freestyle, Sprint and Freeride event types are available in online play. Freeride allows you to hang out with your friends online without time pressure or forced objectives. Your scores and lap times are recorded on extensive online leaderboards

THE GARAGE

GARAGE

In the Garage, build your ride from the ground up. Customize everything from seat to tires and handlebars to shocks. With the huge number of different parts available from real world manufacturers, you can generate more than 65,000 different ATVs.

You can store only two custom ATVs at the start of the game. Unlock more as you play through world tour and experiment with different parts and combinations. Design your ATVs for Sprint, Race or Freestyle. You can even design ATVs for specific tracks. Just watch how vital statistics for your bike change as you choose each part. You can build your bike part by part or simply 'quick-build' your bike by holding the **⊖** or **⊕** buttons for race or freestyle spec respectively. Remember to revisit your old ATV designs when you unlock new parts.

Note: You can't Quick Build sprint quads.

RIDERS

There are six different riders to choose from, each with different riding styles and a unique Special Trick.

MULTIPLAYER

You can play online with up to 15 other players through PLAYSTATION®Network.

By installing Pure onto your PLAYSTATION®3 hard disk drive you can improve loading times. The option is located in the Storage Options menu; please make sure you have at least 1.3 GB of available free space before you attempt the installation.
