OWNER'S MANUAL

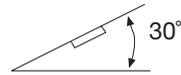

COLOUR LCD TV/RECEIVER

INSTALLATION

Notes:

- Choose the mounting location where the unit will not interfere with the normal driving function of the driver.
- Before finally installing the unit, connect the wiring temporarily and make sure it is all connected up properly and the unit and the system work properly.
- Use only the parts included with the unit to ensure proper installation. The use of unauthorized parts can cause malfunctions.
- Consult with your nearest dealer if installation requires the drilling of holes or other modifications of the vehicle.
- Install the unit where it does not get in the driver's way and cannot injure the passenger if there is a sudden stop, like an emergency stop.
- If installation angle exceeds 30° from horizontal, the unit might not give its optimum performance.

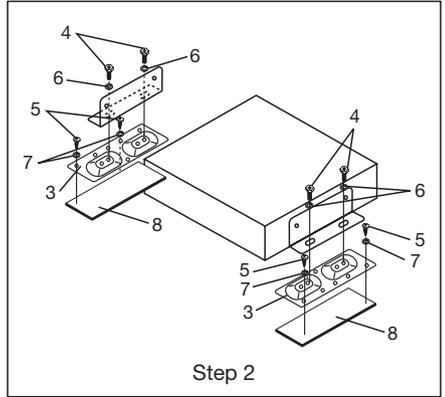

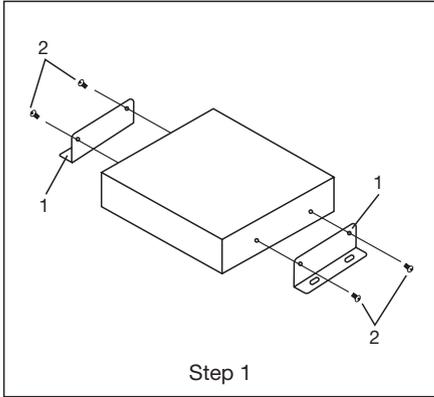

- Avoid installing the unit where it would be subject to high temperature, such as from direct sunlight, or from hot air, from the heater, or where it would be subject to dust, dirt or excessive vibration.

MOUNTING THE TUNER UNIT

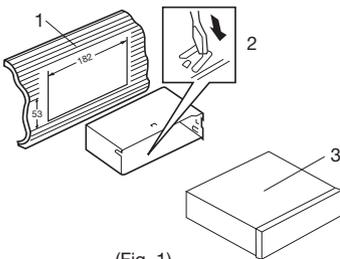

- 1. Bracket (A)
- 2. Mounting Bolt (M5 x 5)
- 3. Bracket (B)
- 4. Hexagonal Bolt with Washer (M6 x 12)
- 5. Tapping Screw with Washer (M5 x 12)
- 6. Spring Washer (M6)
- 7. Spring Washer (M5)
- 8. Double Sided Tape

INSTALL THE DISPLAY UNIT

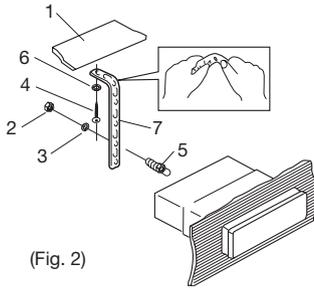

Before install the display unit, please remove its tail screw and cable parts. This unit can be properly installed either from “front” (conversional DIN Front-mount) or “rear” (DIN Rear-mount installation, utilizing threaded screw holes at the sides of the unit chassis). For details, refer to the following illustrated installation methods.

DIN FRONT-MOUNT

Installing the unit

- 1. Dashboard
- 2. Holder
After inserting the holder into the dashboard, select the appropriate tab according to the thickness of the dashboard material and bend them inwards to secure the holder in place.
- 3. Display Unit

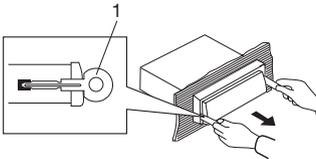

(Fig. 2)

1. Dashboard
2. Nut (M5)
3. Spring Washer
4. Tapping Screw with Washer (M5 x 25)
5. Screw
6. Plain Washer
7. Strap

Be sure to use the strap to secure the back of the unit in place. The strap can be bent by hand to the desired angle.

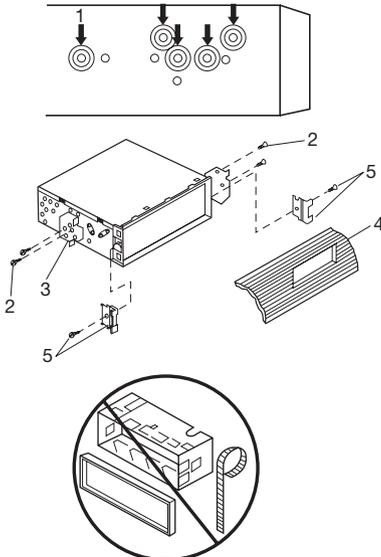

Removing the unit

1. Lever
Insert the levers supplied with the unit into the grooves at both sides of the unit as shown in figure until they click. Pulling the levers upward and out to makes it possible to remove the unit.

DIN REAR-MOUNT

Installation using the screw holes on the both sides of the unit.

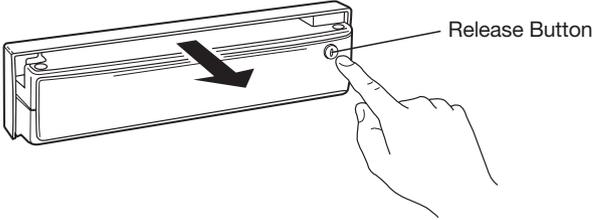

Fastening the unit to the factory radio mounting bracket.

1. Select a position where the screw holes of the bracket and the screw holes of the main unit become aligned (are fitted), and tighten the screws at 2 places on each side.
Use either truss screws (5 x 6mm) or screws (4 x 6mm), depending on the shape of the screw holes in the bracket.
2. Screw
3. Factory Radio Mounting Bracket
4. Dashboard or Console
5. Hook and Screw (Remove this part)

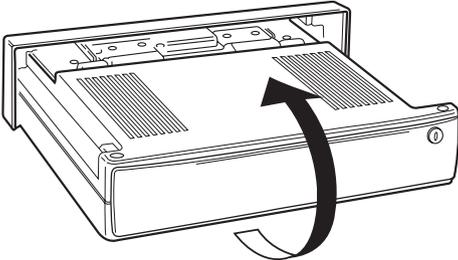

Note: The frame, strap, and half-sleeve are not used for REAR-MOUNT.

HOW TO OPEN AND CLOSE THE SCREEN DISPLAY

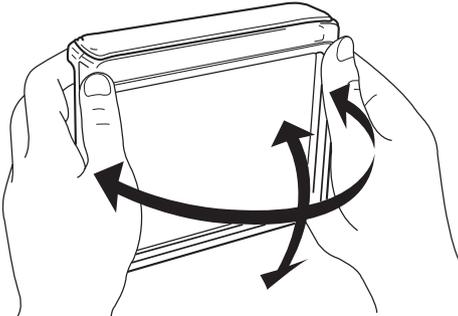

1. Press release button to draw out the screen display.

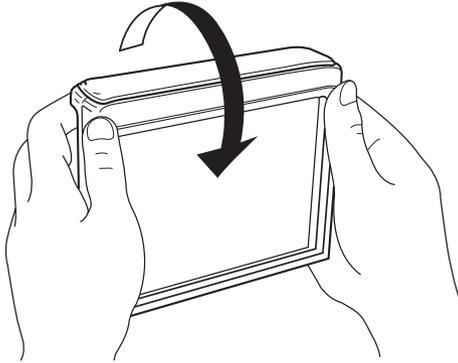

2. Turning the display upward.

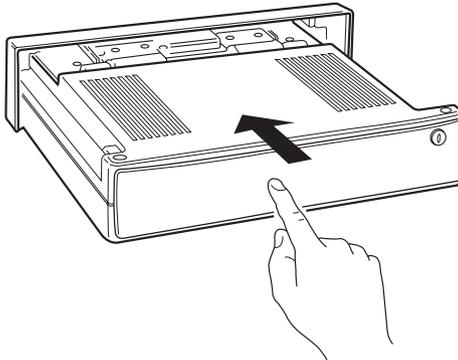

3. Adjusting the viewing angle. Angle should be adjusted slowly without applying unreasonable force.

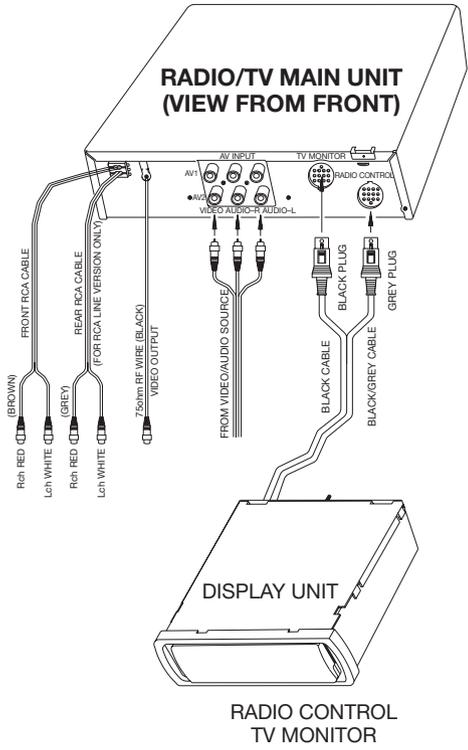

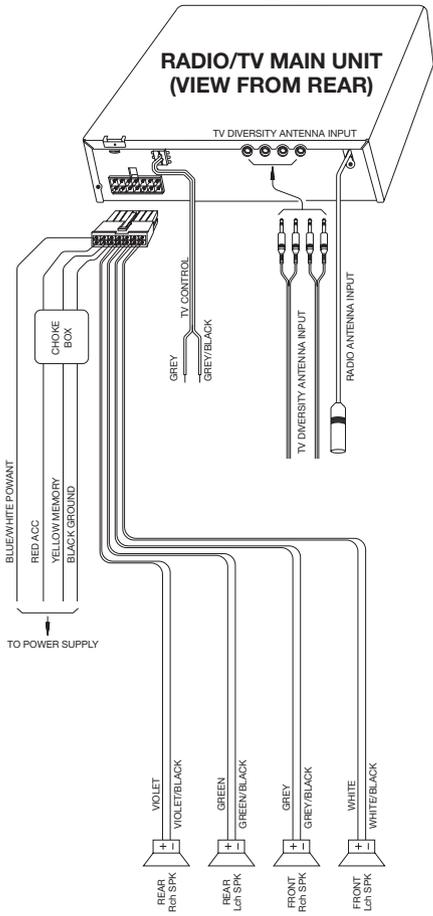

4. Turning the display downward. Make sure to return the display to centre position before drawing in. It cannot be draw in with its angles adjusted.

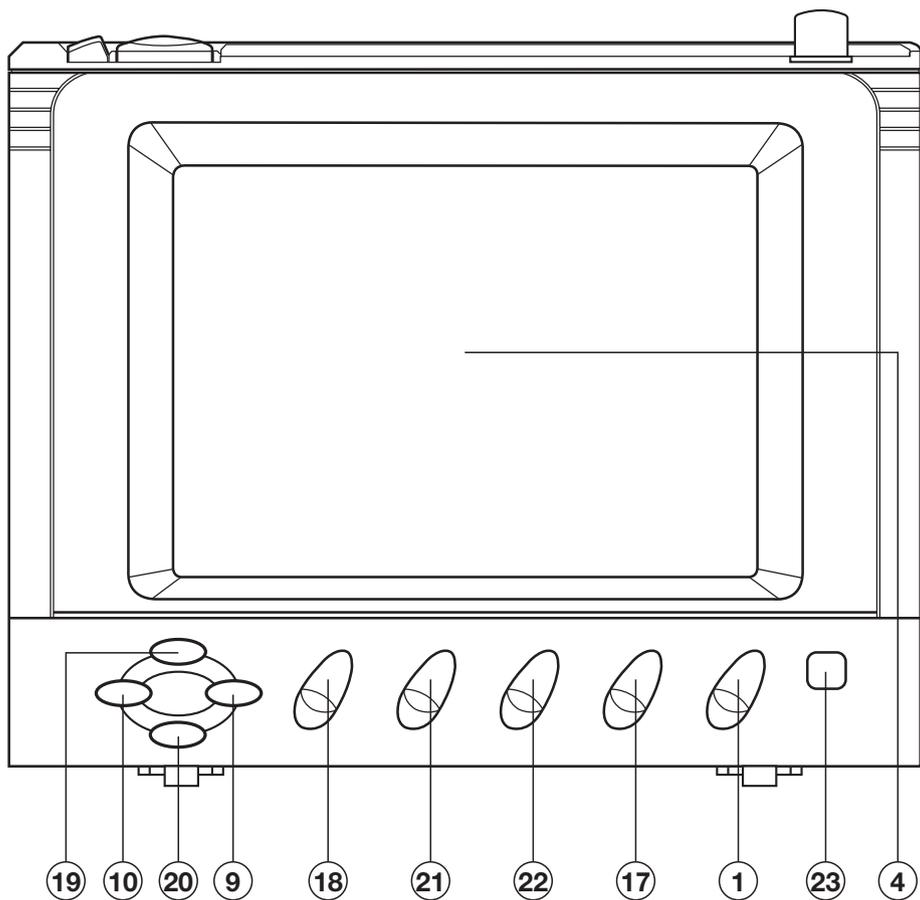

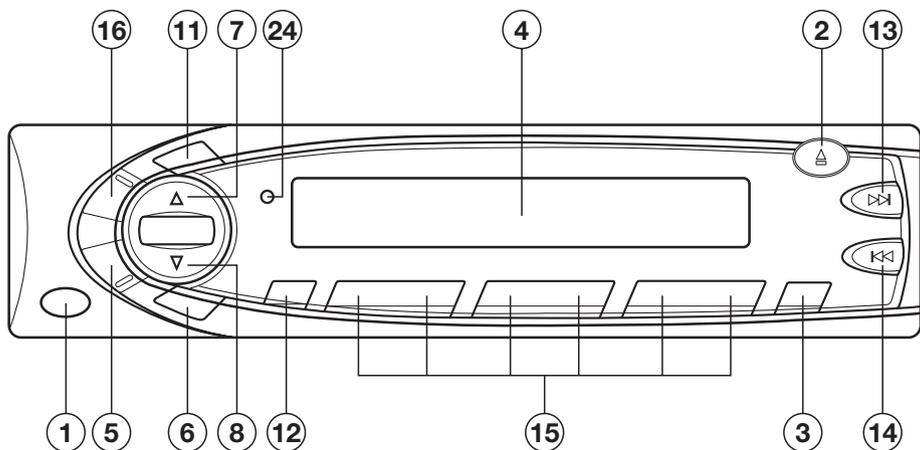

5. Push the panel, the display will be drawn in.

ELECTRICAL CONNECTION

OPERATION

GENERAL OPERATION

- **ON/OFF**

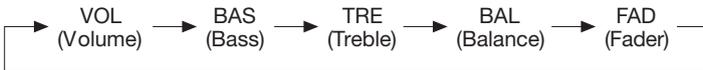

Switch on the unit by pressing **PWR** button (1). When system is on, press it again to turn it off.

- **FACEPLATE RELEASE**

Press **REL** button (2) to draw out the faceplate, push the panel to draw in. When the faceplate is drawn out, turn the faceplate upward and adjust TV display.

- **SELECTING SOUND MODE**

Press **SEL** button (6) to move display through volume, bass, treble, balance and fader functions. Use Δ (7) and ∇ (8) buttons to adjust the selected mode. When mode has not been adjusted for several seconds, display returns to previous display status.

Volume

Adjust volume level using Δ (7) and ∇ (8) buttons.

Bass

Press **SEL** button (6) for one time. Adjust bass level using Δ (7) and ∇ (8) buttons.

Treble

Press **SEL** button (6) for two times. Adjust treble level using Δ (7) and ∇ (8) buttons.

Balance

Press **SEL** button (6) for three times. Adjust sound balance between left and right speakers using Δ (7) and ∇ (8) buttons.

Fader

Press **SEL** button (6) for four times. Adjust sound balance between front and rear speakers using Δ (7) and ∇ (8) buttons.

- **SELECTING PLAYING MODE**

When the screen display is drawn out, the unit would automatically switch into TV mode. By pressing **MOD** button (12), you can select desired playing mode among TV and radio.

CAUTION: The unit cannot be switched into TV mode, when the car is running. So at this time, you just select playing mode in radio.

- **MUTE**

Press **MUT** button (3) to cut down sound output, “**MUTE**” appears on display. Press it again to resume the previous volume level.

- **SETTING THE CLOCK**

Press **T/F** button (5) to change the display into clock display. While the current time is appeared on the display, press it again to return to frequency showing.

Time Setting

- Set hours:
Holding down **T/F** button (5) for several seconds, and the clock is blinking on the display, press **⏪** button (14) to adjust the hour.
- Set minutes:
Holding down **T/F** button (5) for several seconds, and the clock is blinking on the display, press **⏩** button (13) to adjust the minutes.

- **LIQUID CRYSTAL DISPLAY**

The **LCD** (4) can show the current state of the unit.

- **RESET**

Reset button (24) must be activated with either a ball-point pen or thin metal object. The reset button is to be activated for the following reasons:

- Initial installation of the unit when all wiring is completed.
- All the function buttons do not operate.
- Error symbol on the display.

RADIO OPERATION

- **SELECTING BAND**

Press **BAND** button (11) to change between three FM bands and two AM bands. Each band stores up to six preset stations.

- **SELECTING STATION**

During radio mode, press **MAN/SKP** button ▷◁ (13) to increase frequency or ◁◁ (14) to decrease frequency by one step of channel spacing. Hold the button longer for fast tuning. The frequency is updated correspondingly on display.

- **SELECTING MEMORY**

Press preset memory buttons (15) to preset stations at tuner mode. With this system, a total of 30 stations can be stored in the memory of six buttons. The stations might be FM1, FM2, FM3, AM1 and AM2 band. The operation is as below:

- **Store in Memory**

Press and hold desired memory location button for several seconds. The current listening station will be stored into the number button.

- **Retrieve a Preset Station**

Press any one of the buttons (15) to retrieve a station which had been stored in the memory in advance the chosen number is shown on display.

- **AUTO MEMORY STORING & SCANNING**

- **Auto Memory Scanning**

Check the stations stored in the preset memories.

Press to retrieve automatically the current stations stored in six preset memories and it will display for several seconds. Press either the **AS/PS** button (16) again or anyone of the memory buttons to stop the scan operation. During the preset scan operation, the channel number flashes on the display for several seconds. Preset station scan continuously in the pre-selected band.

- **Auto Memory Storing**

Seeks the six strongest stations in the pre-selected band automatically and stores the stations automatically in preset memories.

Initially the tuner seeks and memories the stations in local mode until 6 stations are fully occupied. Otherwise, seeking is proceeded in distance mode.

TV OPERATION

- **SELECTING RECEIVING MODE**

Press **TV/AV** button (17) to select among **TVch/AV1/AV2**.

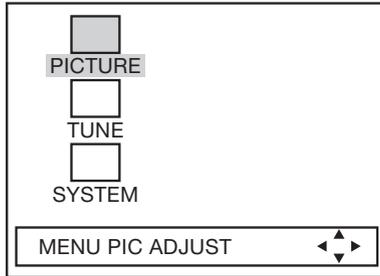

- **SELECTING CHANNEL**

Press **CH+** button (9) or **CH-** button (10) to choose channel upward or downward

- **MENU CONTROL**

In TV mode

Press **MENU** button (18) to switch the MENU CONTROL mode. And the main menu includes three sub-menus: PICTURE MENU, TUNER MENU and SYSTEM MENU. Press **MENU** button (18) for the first time:

Press the **MENU** button repeatedly or press **CH+** button (9) or **CH-** button (10) to select the desired sub-menu then press **CONTROL+** button (19) or **CONTROL-** button (20) to enter the corresponding sub-menu to set.

1. **PICTURE MENU**

This menu includes all item of picture feature. The menu allows picture adjustment such as bright, contrast, color, and etc. The details please refer to **PICTURE MENU**.

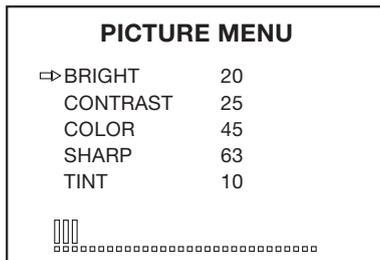

2. **TUNER MENU**

This is to activate program setting. The details please refer to **TUNER MENU**.

3. **SYSTEM MENU**

This menu includes the items for system control, such as color, sound, language, and etc. The details please refer to **SYSTEM MENU**.

PICTURE MENU

Use **CH+** button (9) or **CH-** button (10) to select picture mode upward or downward. Then use **CONTROL+** button (19) or **CONTROL-** button (20) to adjust the selected item.

Note: When you set the color mode to “PAL” in SYSTEM MENU, there is no “TINT” item to display.

In this menu, the range of setting value is 00~63, and the recommended range of these values are listed below:

BRIGHT: 10~32
CONTRAST: 20~40
COLOR: 40~50
SHARP: 63
TINT: 10

TUNER MENU
