Connectivity

- **USB:** USB host

Convenience

- **Display Digits:** 3
- **Display Type:** LCD

Power

- **Battery type:** LR14
- **Battery voltage:** 1.5 V
- **Mains power**
- **Number of batteries:** 6

Accessories

- **Included Accessories:** AC Power Cord, User Manual, Warranty certificate

Dimensions

- **Packaging dimensions (W x H x D):** 377 x 200 x 262 mm
- **Product dimensions (W x H x D):** 330 x 159 x 230 mm
- **Weight:** 1.8 kg
- **Weight incl. Packaging:** 2.5 kg

Product highlights

USB Direct for MP3/WMA music

Simply plug in your device to the USB port on your Philips Hi-Fi system. Your digital music will be played directly from the device. Now you can share your favorite moments with family and friends.

MP3-CD or WMA-CD playback

MP3 is a revolutionary compression technology by which large digital music files can be made up to 10 times smaller without radically degrading their audio quality. A single CD can store up to 10 hrs of music. MP3 has become the standard audio compression format, allowing quick and easy audio file transfer. Windows Media Audio (WMA) is a highly compressed digital audio format from Microsoft that delivers great sound with music files that take up half the disk space and download in half the time. A single CD can store up to 20 hours of good quality WMA music recorded at a bit rate of 64 Kbps.

Dynamic Bass Boost

Dynamic Bass Boost maximizes your music enjoyment by emphasizing the bass content of the music throughout the range of volume settings - from low to high - at the touch of a button! Bottom-end bass frequencies usually get lost when the volume is set at a low level. To counteract this, Dynamic Bass Boost can be switched on to boost bass levels, so you can enjoy consistent sound even when you turn down the volume.
