

Universal Mounting Bracket

SAFETY INSTRUCTIONS

The **UNIVERSAL MOUNTING BRACKET** is a versatile assembly which allows you to mount your backboard to a pole, on a wall, or on a flat roof or a slanted roof of any pitch. Although the shape of a backboard may vary, it will not affect the installation procedure. Keep in mind that the official height of a basketball goal is 10 feet from the playing surface to the top of the goal rim.

 **WARNING:** To ensure your safety, **DO NOT** attempt to assemble this system without following the instructions carefully. **BEFORE BEGINNING ASSEMBLY READ THE INSTRUCTIONS, AND IDENTIFY PARTS** using the hardware identifier and parts list in this document.

 **WARNING:** Mounting the backboard is performed at an elevated height, for your own safety, use a ladder. Two people are required for this operation, one person should not attempt this alone. Use proper precautions.

 **WARNING:** This system is not designed to support a player hanging from the goal or net. Failure to observe this caution may cause bodily injury and/or property damage.

IMPORTANT!! Because installation circumstances cannot be predicted, anchoring and fastening hardware cannot be provided with this kit to mount the **UNIVERSAL MOUNTING BRACKET** to your particular wall or roof. Long wood screws are recommended for wood and shingled walls and roofs. Expandable anchors are recommended for cement or brick walls and roofs. Consult your local hardware store for the appropriate anchoring and fastening hardware.

IMPORTANT!

We appreciate your purchasing one of our many fine products. We are sure that you will be very satisfied with your selection. Although great care and effort have been taken, problems may occur. To ensure prompt and correct handling of any problems, or to answer any questions, please
