ADDITIONALINFORMATION

INTEGRATED KEYHEAD TRANSMITTER (IKT) AND REMOTE ENTRY SYSTEM FEATURES

Your vehicle comes equipped with two programmed Integrated Keyhead Transmitters (IKTs) which are same time (you do not need to both a programmed ignition key and a remote keyless entry Refer to your Owner's Guide for transmitter. Handle the IKT carefully when starting the car to avoid accidentally pressing any of the remote entry buttons. Press 🔊 once to unlock the driver's door. The interior lamps Your vehicle is equipped with will illuminate. Press 🗳 twice to 🛛 the AdvanceTrac® stability unlock all the doors, the liftgate enhancement system. This and liftgate glass. Press 🗗 once to lock all the doors. If all doors and the liftgate are closed, the turn lamps will flash.

Press A twice to confirm all the avoid a vehicle roll-over, and doors and liftgate are closed Electronic Stability Control, and locked. The doors will lock which helps avoid skids or aeain, the horn will chirp once. Press 🕬 to activate the panic alarm. The horn will sound and the turn lamps will flash. Press 🕬 again or turn the ignition on to deactivate the panic alarm. Press 🕸 twice within three seconds to open the liftgate glass. Car finder: Press Atwice within three seconds. The horn will chirp and the turn lamps will flash. It is recommended to use this method to locate your vehicle, rather than using the panic alarm. Note: Ensure that you keep the adhesive security labels in a safe place for future reference. Replacements are only available through an authorized dealer.

KEYLESS ENTRY KEYPAD (if equipped)

You can use the kevless entry keypad to lock or unlock the doors as well as release the lifteate without a key. To unlock second time. To close, press on the owner's wallet card in moving . To open the moon roof

the elove box or from vour authorized dealer.) To unlock front portion of the control. within five seconds, press 3-4. glass stops moving. To lock all doors and the liftgate, OVERDRIVE CONTROL/CANCEL simply press 7-8 and 9-0 at the enter your factory code first). more information.

ADVANCETRAC[®] WITH ROLL STABILITY CONTROL" (RSC[®]) STABILITY ÈNHANCEMENT SYSTEM

system consists of: Traction control, which helps avoid wheel selection and additional spin and loss of traction, Roll Stability control[™] which helps lateral slides. These features work toeether to help vou to maintain stability and steerability of your vehicle during a variety of road conditions. If your vehicle becomes stuck in the snow, mud or sand, try turning off the AdvanceTrac® system to allow wheel spin and help increase momentum to dig the vehicle out. The system defaults to on and the control will illuminate when turned off. Refer to your Owner's Guide for safety information and more details.

MOON ROOF (if equipped)

The moon roof is equipped with an automatic, one-touch, opening, closing and venting feature. To open. press and release the rear portion of the control located in the overhead console. To stop motion at any time during the one-touch opening, press the control a the driver's door, enter your and release the front portion of five digit factory code (available the control until the glass stops

to the vent position, press the all doors and the liftgate, enter To close, press and hold the rear your five digit factory code and, portion of the control until the

WITH GRADE ASSIST

Drive with the vehicle in Overdrive (D) for the best fuel economy. You can deactivate overdrive by pressing the transmission control switch on the side of the shift handle. Your vehicle is equipped with a special Grade Assist feature which is automatically activated when overdrive is turned off. Grade assist helps to provide optimal gear engine braking on hilly terrain. It is recommended that you return to O/D (Overdrive) once you return to flat terrain. To return to overdrive, simply press the transmission control switch again.

AMBIENT LIGHTING (if equipped)

Your vehicle may be equipped with an ambient lighting feature which, when activated. illuminates the footwells, cup holders and console bin with a choice of seven colors. Ambient ighting is operational when the ienition is on or in the accessory position. Press the 🗞 control repeatedly to turn on, cycle through your color choices, and turn off.

SYNC (if equipped) Your vehicle may

be equipped with SYNC – a hands-free communications and entertainment system with special phone and media features. For more information, please refer to the SYNC Supplement or to the SYNC section in the Navieation Supplement. Please feel free to visit www.SvncMvRide.com.

Location of Spare Tire: If you get a flat tire while driving, do not apply the brake heavily. Instead, gradually decrease your speed. Hold the steering wheel firmly and slowly move to a safe place on the side of the oad. Your vehicle is equipped with a temporary spare tire located under the vehicle, just forward of the rear bumper. The temporary spare tire is designed for emergency use only and should be replaced as soon as possible. The jack and tools are located under the carpeted floor panel in the rear cargo area. For complete details on how to change your tire, refer to the Roadside

Easy Fuel™ 'No Cap' Fuel System: Your vehicle has a 'no cap' fuel system which allows you o simply open the fuel filler door, insert the nozzle and start fueling. <u>The Easy Fuel™ system</u> is self-sealing and therefore protected against dust, dirt, water, snow and ice. If you need to fill your fuel tank with a portable fuel container, use the fuel funnel which is located inside the rear passenger side cargo compartment access door. Slowly insert the funnel into the Easy Fuel™ system and fill the tank with fuel from the container. When done, clean the funnel or properly dispose of it. Extra funnels can be purchased from your authorized dealer. Do not use aftermarket funnels as they will not work with the Easy Fuel™ system and may cause damage.

Fuel Type and Tank Capacity: Your fuel tank capacity is 16.5 gallons (62.5L). Your vehicle is designed to use "Regular" unleaded gasoline with an octane rating of 87. Do not use gasoline labeled as "Regular" in high altitude areas that are sold with octane ratings less than 87. Do not use E85 fuels that are blended with a maximum of 85% ethanol.

S.D.S. Post Crash Alert System: Your vehicle is equipped with the S.D.S. Post Crash Alert system. This system provides audible and visual alarms in the event of a crash which causes the deployment of airbags or the activation of the safety belt pretensioners. The turn signals will flash and the horn will sound. To deactivate the system, press the hazard flasher control riangle or you can press the $r_{
m W}$ button on your remote transmitter.

Roadside Assistance: Your new Mercury Mariner comes with the assurance and support of 24-hour emergency roadside assistance. Roadside assistance includes such services as: lockout assistance, limited fuel delivery, battery jump starts, changing a flat tire, towing, and winch out. To receive roadside assistance in the United States, call 1 (800) 241-3673. In Canada, call 1 (800) 665-2006. For more information on coverage period and details of service, refer to your roadside assistance information.

Fuses: If your electrical components are not working properly a fuse may have blown. For more information, please see your Dwner's Guide.

Fuel Pump Shut-off Switch: This device stops the electric fuel pump from sending fuel to the engine when your vehicle has had ranks, but does not start, this switch may have been activated. Th fuel pump shut-off switch is located in the front passenger's footwell behind a flip-up cover, by the kick panel access cover

Tire Pressure: Your tire pressure is properly set at the dealership according to the recommended specifications found on the Safety Compliance Certification el or Tire Label located on the B-Pillar or the edge of the driver's door. Che your tire pressure at least once a month and before long trips (including spare). As an added safety feature, your vehicle has been equipped with a Tire Pressure As an added safety feature, your vehicle has been equipped with a Tire Pressure Monitoring System (TPMS) that illuminates a low tire pressure warning light (1) when one or more of your tires is significantly under-inflated. Improperly inflated tires can affect vehicle handling and can fail suddenly, possibly resulting in loss of vehicle control. Refer to the Tires, Wheels and Loading chapter in your Owner's Guide for more details and safety information.
