FUEL			
Fuel economy (city/highway)	16/21 mpg ¹		
Fuel requirement	Unleaded gasoline (87 octane)		
SYMMETRICAL ALL-WHEEL DRIVE			
Variable Torque Distribution (VTD)	VTD All-Wheel Drive utilizes an electronically controlled variable transfer clutch in conjunction with a planetary-type center differential. Torque distribution is normally configured at a performance-oriented rear-wheel-biased 45/55-split front-to-rear. Utilizing Vehicle Dynamics Control (VDC) sensors, VTD All-Wheel Drive evaluates road conditions by continually estimating surface friction and adjusting torque distribution accordingly front-to-rear for optimum traction.		
STABILITY AND TRACTION			
Vehicle Dynamics Control (VDC)	Standard VDC electronic stability control utilizes sensors which constantly monitor wheel speeds, steering angle, brake pressure, vehicle yaw rate and lateral g-forces. If VDC detects a difference between the driver's intended path and the one the vehicle is actually taking, VDC applies braking power and/or reduces engine torque to help correct vehicle path.		
Traction Control System (TCS)	VDC also incorporates an all-wheel, all-speed traction control system which senses a loss of traction and applies braking force to the slipping wheel or wheels as necessary to maintain vehicle motion.		
CHASSIS			
Steering	Engine-speed-sensing power-assisted rack-and-pinion. Turning circle: 37.4 feet.		
Suspension	4-wheel independent suspension. Front: Strut-type with lower L-arm. Stabilizer bar. Rear: Double wishbone. Stabilizer bar.		
Brakes	4-wheel disc, ventilated front. 4-channel, 4-sensor ABS with Electronic Brake-force Distribution (EBD).
