

Combi

Combi Ninna Nanna PA-138V

Soft carrier for cradling, cuddling and back-carrying

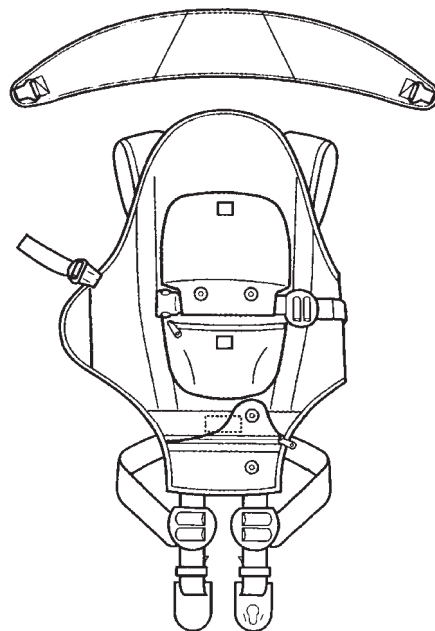

Instruction Manual

Please read the user guide and use accordingly. After reading, store the user guide properly for future reference.

Also attach this user guide when giving the product to the others.

Head support is only used after baby's neck muscle has developed. Store properly at a safe place if removed from pocket.

*Head support is stored inside pocket in sales package.

Before use

Thank you for purchasing Combi Ninna Nanna PA-138V baby soft carrier. This product is a generic single-baby carrier designed for cradling, cuddling or back-carrying a baby during shopping or outdoor activities. Before use, please read "Name of parts" in P.5 and check out the parts.

- **This product can be used for cradling, cuddling or back-carrying a baby.**

Age reference for applicable baby

(Baby's body size may vary according to different growing speed.)

Cradling

New born Until neck muscle has developed

Weight : below 7.0kg

Age reference: from birth to around 4 months (neck muscle has developed)

Cuddling

after neck muscle has developed Up to around 12 months (11.3kg)

Weight : below 11.3kg

Age reference: after neck muscle has developed up to around 12 months.

Back-carrying

after neck muscle has developed Up to around 30 months (14.9kg)

Weight : below 14.9kg

Age reference: after neck muscle has developed up to around 30 months.

※ Applicable waist size for user ranges from 55~110cm.

※ Particular babies in bigger body size may not fit for soft carrier in winter times when wearing thicker clothes. Please choose clothes for baby carefully before using the soft carrier.

For safe use of our product

Caution about safety

The caution items mentioned here are about how to use the product properly and safely so as to prevent any possible injury to user and baby and any damage to the product. Moreover, the caution items are categorized according to the degree of injury and damage to the product which are indicated as "warning" and "caution" respectively.

Caution and using conditions mentioned below are very important. Please read and follow accordingly.

WARNING

Improper operation may directly cause death or severe damage.

CAUTION

Improper operation may cause injury or damage to the product.

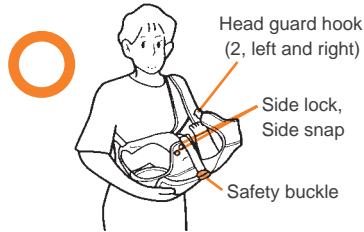

- Details of the caution item is written inside the frame.
-  This sign indicates there is a warning or caution item.
-  This sign indicates there is a prohibited action.

! WARNING

Make sure to secure the following parts when use. Otherwise baby may fall off from carrier accidentally while in use.

< Cradling >

- Head guard hook (2, left and right)
 - Side lock, Side snap
 - Safety buckle
- ※Please attach cradling support seat to use.

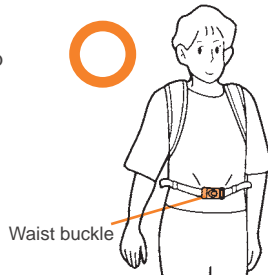

< Cuddling >

- Side lock, Side snap
- Safety buckle
- Combi buckle

< Back-carrying >

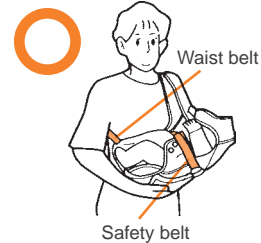

- Waist buckle
- Side lock, Side snap
- Safety buckle

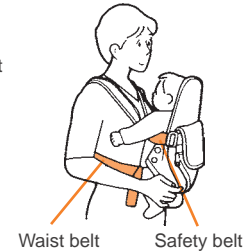

Please try as much as possible to tighten the following belts. Any gap in between baby and user may cause baby to fall off from the carrier while in use.

- Safety belt
- Waist belt

< Cradling >

< Cuddling >

< Back-carrying >

Please seat or unseat baby at a safe place (a third party aid preferred) to avoid the baby may falling off accidentally.

When the carrier is in use, please do not run, jump, lean forward for more than 45 degree, or lean to the side. Otherwise, baby may accidentally fall off from the carrier.

In cradle or cuddle position, always support baby with your hands. Baby's unexpected movement may cause it to fall off from the carrier.

Cradle position is not applicable to the following babies.

- Baby weighing more than 7.0kg.
- Baby whose head protrudes out of head guard when seated.
- Baby who can turn around itself without aid.

Failure to do so may cause injury to baby.

In cradle position, make sure baby's head is in a higher position than its feet, and do support the baby's head with one hand. Improper cradling may exhaust the baby or become cause of injury.

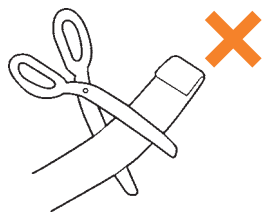

Cuddling is not applicable to baby whose neck muscle is not yet developed, or otherwise may exhaust the baby or become cause of injury.

Remove "Cradling support seat" when cuddling baby. Otherwise the support seat may press on baby's head.

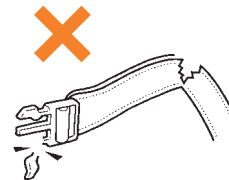

Do not try to unpick stitched belt ends or re-structure the product. Otherwise, damage or accident may be caused while in use.

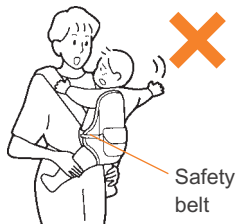

Please do not use the carrier continuously for more than 2 hours, or within 30 minutes after breastfeeding. Otherwise, unexpected burden will be inflicted to user or baby. Also, please stop using the carrier immediately in case of any pain and discomfort.

Stop using the product immediately in case of any damage of product is found.

Release the "adjustment zipper" to use when there is a gap of more than 4cm in between baby's armpit and the safety belt. Otherwise baby may fall off the carrier while in use.

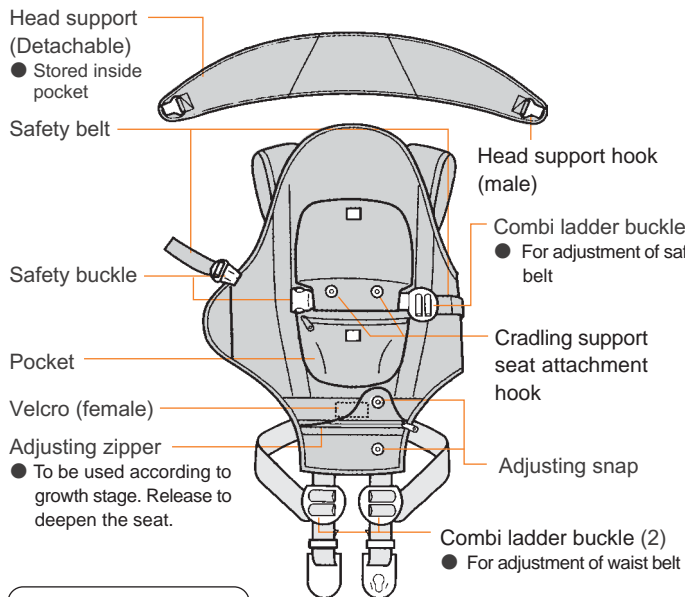

Please do not leave the product near a raw fire or unattended outdoor. Otherwise, buckles or other fabric parts may be deteriorated by heat or rain which may in turn become cause of accidents.

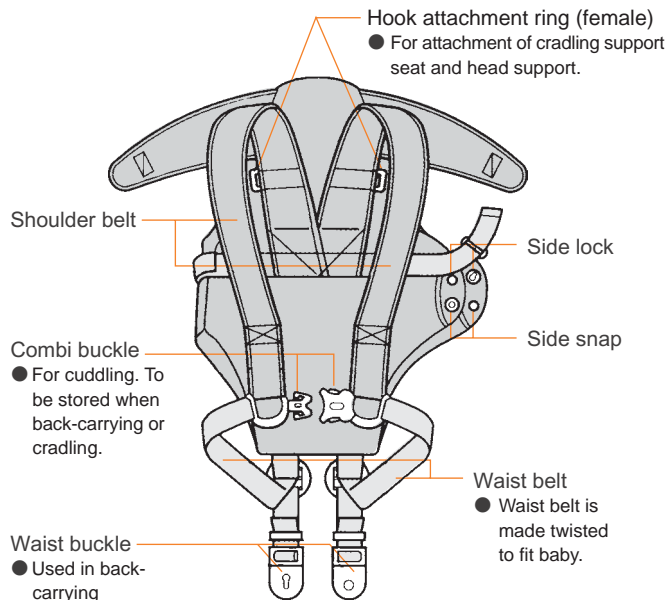

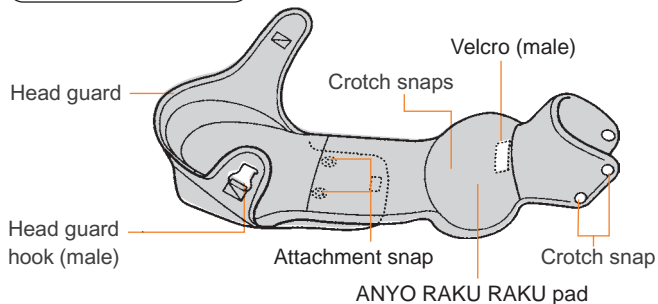

Please do not use this product for the purposes other than those advised by this manual to avoid any damage to the product.

Name of parts

Cradling support seat

※Pocket shape varies according to models.

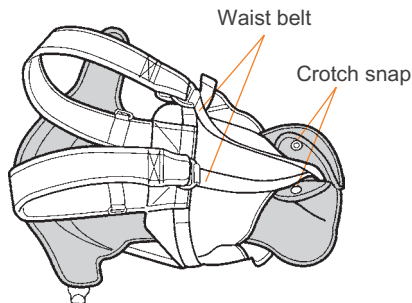

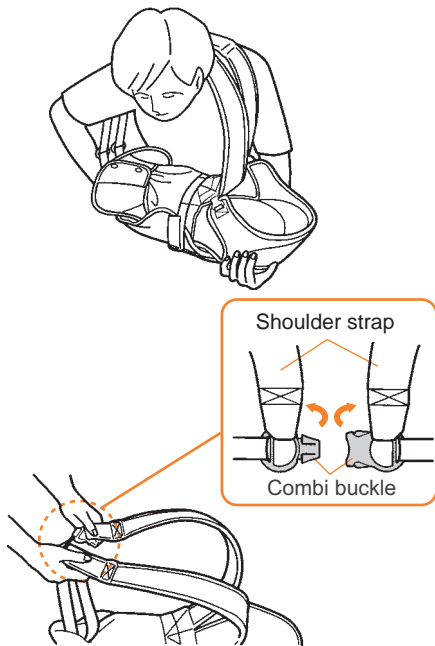

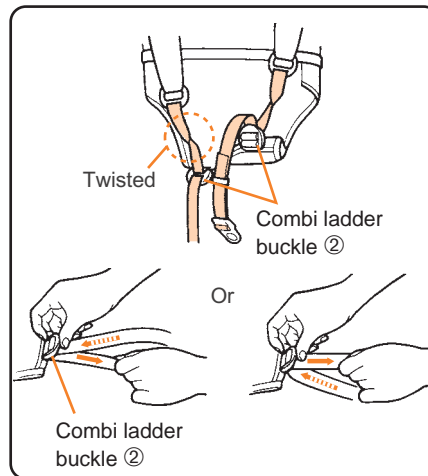

Preparation for cradling

Adjust waist belt length

Before seating baby, carry the soft carrier along the shoulder as illustrated and adjust waist belt with Combi ladder buckle ②. Combi buckle should be in open position and stored inside shoulder strap.

● To adjust

Release crotch snap and pull out waist belt and Combi ladder buckle ②. Lift the end of Combi ladder buckle ② and adjust waist belt length. Waist belt is made twisted to better fit user's body.

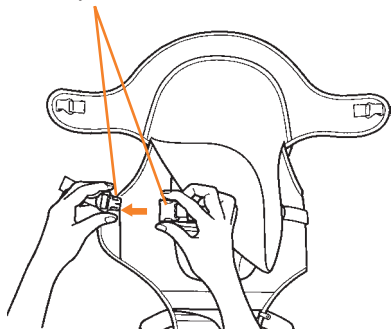

Store belt ends and buckles inside inner side of crotch snap and secure crotch snap.

- It is recommended to set baby's head close to parent's heart position. After putting on shoulder strap, shorten the side closer to the user and baby can be cradled in a better balanced position.

To seat baby whose neck muscle is yet to develop

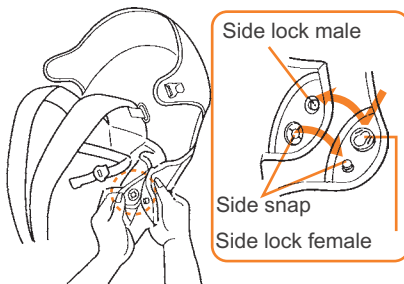

1 Release the safety buckle

Safety buckle

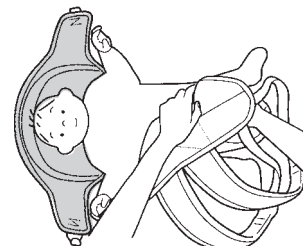

2 Release the side snap and side lock.

To release side lock, slide the side lock male toward the bigger end of the side lock female.

3 Seat the baby

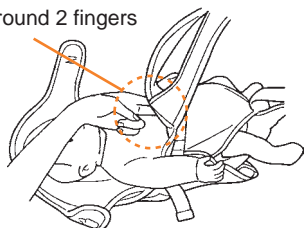

Open carrier at a safe place and seat baby inside. Make sure baby's head is not leaning too tight against head guard.

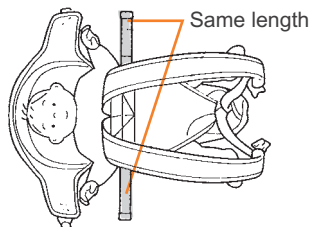

6 Check if the carrier fits baby

Put 2 adult fingers in between carrier and baby and adjust belt length with safety buckle and Combi ladder buckle ① in case of feeling too loose or too tight.

Around 2 fingers

Adjust the left and right belt to the same length

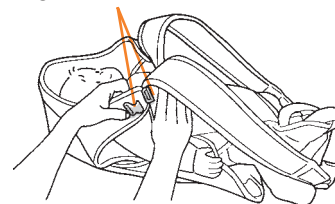

Adjust safety belt regularly according to different growth stages.

7 Set the head guard

Secure left and right head guard hooks to hook attachment rings on shoulder strap.

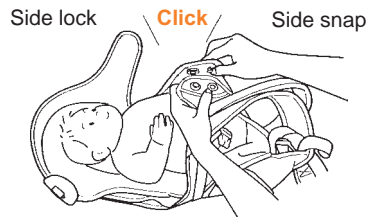

Head guard hook

 If baby's head is being pressed by head guard, seat baby deeply as much as possible into the seat.

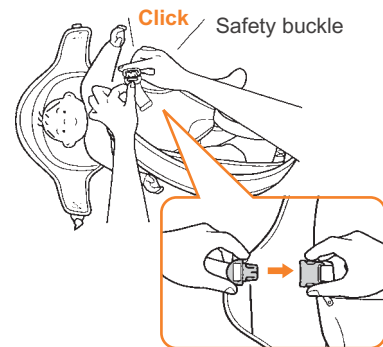

4 Secure side lock and side snap

To secure side lock, place the side lock male into the bigger opening on side lock female and slide upward to secure it. (Refer to step 2)

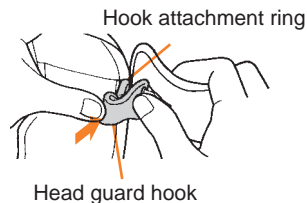

5 Secure safety buckle

Secure safety buckle until heard the "click" sound.

To secure head guard hooks

Lift head guard hook and place it above hook attachment ring. Press the front end of the hook until it clicks into place.

WARNING

Check to make sure "side lock", "side snap" and "safety buckle" are secured to prevent baby from accidentally falling off while in use.

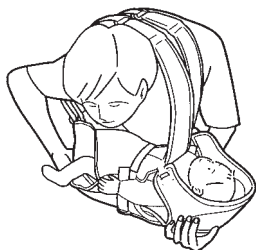

To cradle baby whose neck muscle is yet to develop

Advice

In case of baby with smaller body size, it is recommended to secure the adjustment zipper and apply the cradling support seat to use. (Adjustment zipper is normally open in cradle position.)

1 Seat and cradle baby

Put on shoulder strap across shoulder as shown.

- It is recommended to set baby's head close to parent's heart position. After putting on shoulder strap, shorten the side closer to the user and baby can be cradled in a better balanced position.

⚠ WARNING

In cradle position, make sure baby's head is in a higher position than its feet, and do support the baby's head with one hand. Improper cradling may exhaust the baby or become cause of injury.

2 Support baby with hands

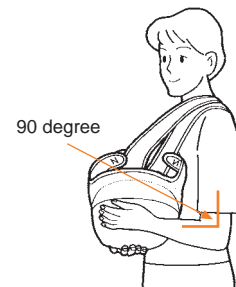

Use hands to support baby's head and hip.

- When cradling baby by your own, it is recommended to operate in front of a mirror to check if baby's head is on the lower side.

Belt is regarded too long if the illustrated angle of the supporting hand is bigger than 90 degree. Re-adjust the length with Combi ladder buckle ② on the waist belt.

To unseat baby from cradle position

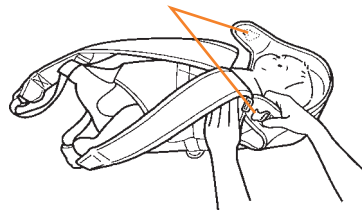

1 Put down baby and then put off shoulder strap

Support baby with hands and put down baby at a safe place. Put off shoulder strap.

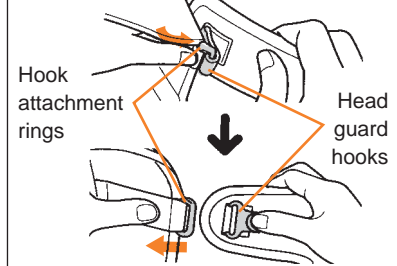

2 Release the left and right head guard hooks

Head guard hooks

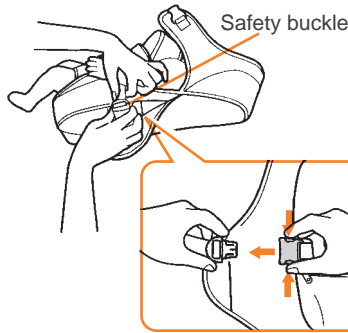

To release head guard hook

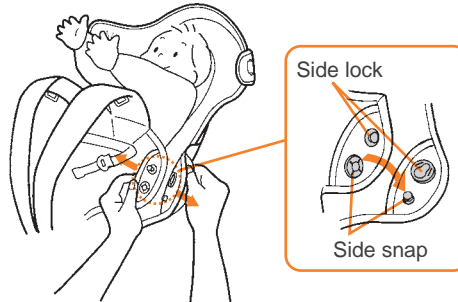

Lift the head guard hook to the outer side. Press on the front end of head guard hook with a thumb and then slide the hook attachment rings to the side to release it.

3 Release safety buckle

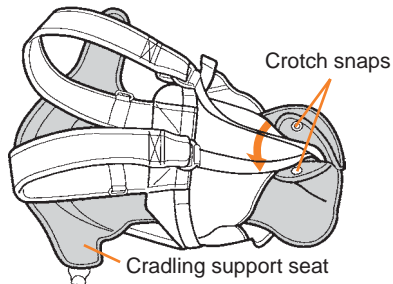

4 Release side lock, side snap and then unseat baby.

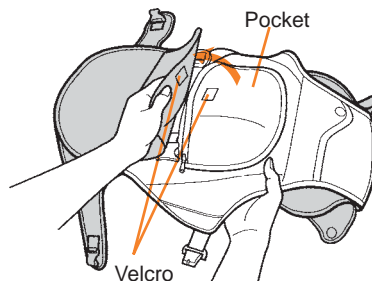

To remove cradling support seat

Cradling support seat is already attached while in sales package. Follow the steps below to remove cradling support seat for washing, or when changing to use in cuddle position.

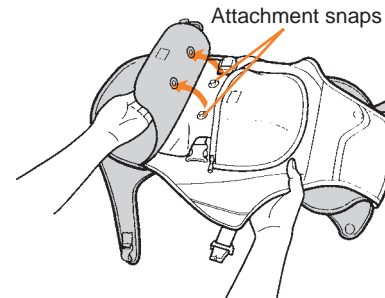

1 Release 2 crotch snaps

2 Release Velcro on pocket

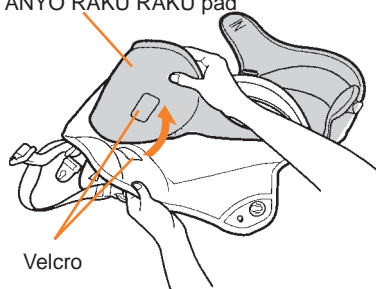

3 Release attachment snap

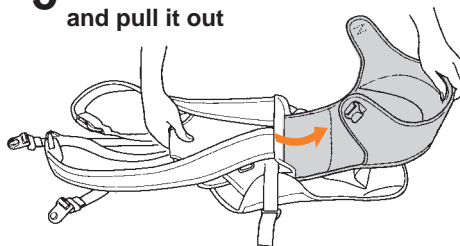

4 Release Velcro on ANYO RAKU RAKU pad

ANYO RAKU RAKU pad

5 Hold on the upper side of seat pad and pull it out

⚠ WARNING

When attaching cradling support seat, please make sure attachment snaps and crotch snaps are secured to prevent baby from accidentally falling off while in use.

To attach cradling support seat

Reverse the above steps to attach cradling support seat. (Step 5 → Step 1)

Before securing crotch snaps, tighten the waist belt and place the belt ends and buckles properly.

Preparation for cuddling

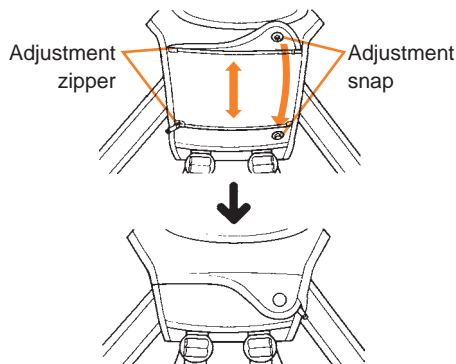

Advice

There are 2 ways to cuddle a baby: ① seating baby first before putting on carrier, or ② putting on carrier first before seating baby. Please choose whichever way that suits your need.

Adjust seat depth with adjustment zipper.

● Close adjustment zipper to use

When baby is still small and there is not much gap in between baby's armpit and safety belt, close adjustment zipper and secure adjustment snap to use. (For baby below 6 months)

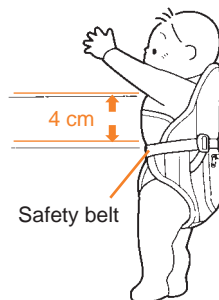

※ Release the adjustment zipper to use in cradle position.

☑ If safety belt is too tight against baby's armpit even when adjustment zipper is closed, put few pieces of napkin or towel on the seat before seating the baby to raise baby's sitting position.

● Open adjustment zipper to use

When there is a gap of 4cm or more in between baby's armpit and safety belt, release the adjustment snap and adjustment zipper to use.

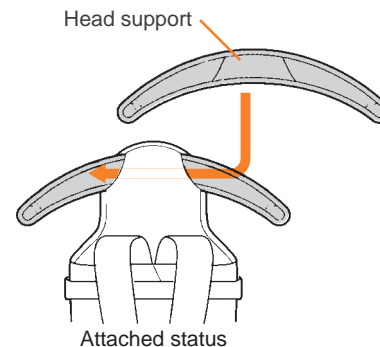

⚠ WARNING

It is dangerous to keep the adjustment zipper close even when there is a gap of more than 4cm in between baby's armpit and safety belt since baby may fall off from carrier while in use.

Apply head support

● Remove cradling support seat after baby's neck muscle has developed, and replace it with head support. (Baby whose neck muscle has developed can use head support up to around 7 months)

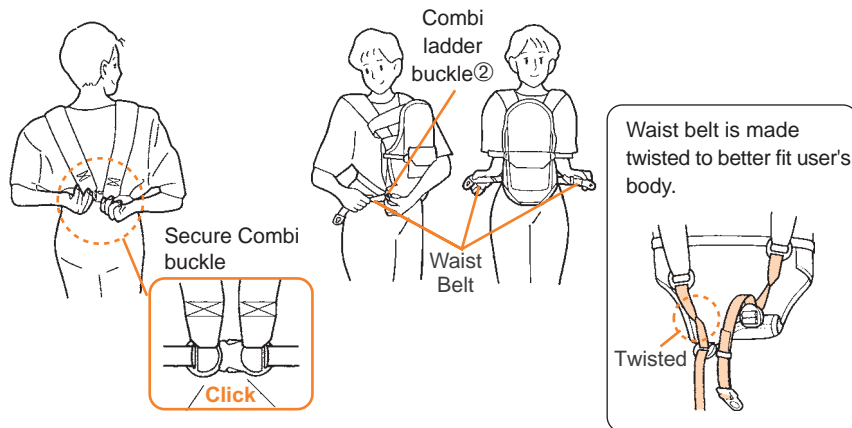

※ Head support is washable.

Preparation for cuddling

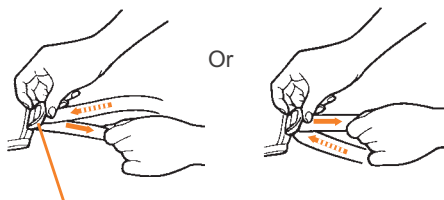

Adjust waist belt length

Adjust waist belt length with Combi ladder buckle ② to fit user before seating baby.

● To adjust

Lift the end of Combi ladder buckle ② and adjust waist belt length.

Combi ladder buckle ②

WARNING

Try to tighten waist belt as much as possible to prevent baby from accidentally falling off the carrier.

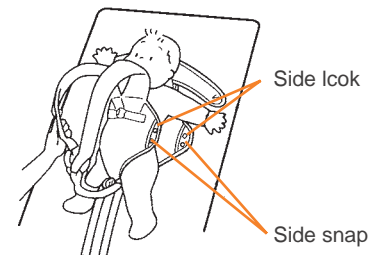

Make sure to adjust the waist belt such that belt ends on both sides are in same length.

Seating baby before putting

1 Seat baby into carrier and secure side lock and side snap

Seat baby at a safe place.

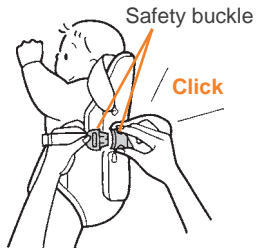

WARNING

- Check to make sure "side lock", "side snap" and "safety buckle" are secured to prevent baby from accidentally falling off while in use.
- Try to tighten "safety belt" and "waist belt" as much as possible to use. A carrier that is too loose or a carrier of which belt ends are in different length may cause baby fall off the carrier upon its sudden and unexpected movement.
- Seat baby at a safe place. (It is recommended to have a third person to assist the operation.) Seating or unseating baby at an unsafe place may cause baby to fall off from the carrier.

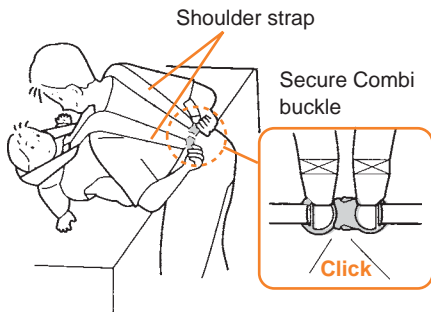

on carrier

2 Secure safety buckle

Secure the safety buckle until a "click" sound is heard.

**4 Secure Combi buckle**

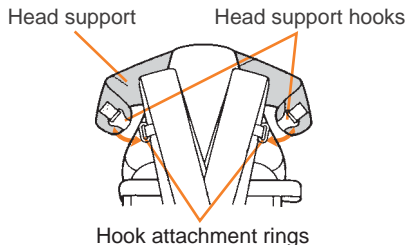

Lean forward, put on shoulder strap and secure Combi buckle at the back until a "click" sound is heard.

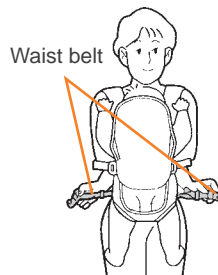

It is suggested to place baby on a bed first and then lean forward to the baby for operation.

3 Secure head support

Secure head support hooks onto the hook attachment ring on shoulder belt. (Baby whose neck muscle has developed can use head support up to around 7 months)

**5 Adjust carrier to fit user**

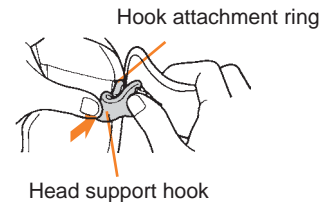

Try to adjust waist belt such that left and right belt end are in same length. Set shoulder strap, waist belt and Combi ladder buckle properly.

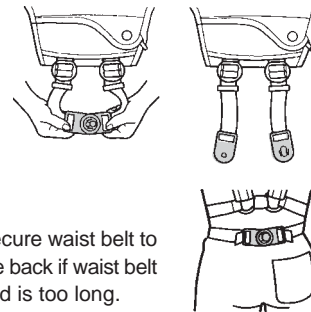

Refer to "To seat baby whose neck muscle is yet to develop" (P.7~8) for how to secure side lock, side snap and safety buckle, and also the way to adjust safety belt length.

To secure head support hooks

Lift head support hook and place it above hook attachment ring. Press the front end of the hook until it clicks into place.

When waist buckle is not used, secure it as shown or leave it open.

Secure waist belt to the back if waist belt end is too long.

Putting on carrier before seating baby

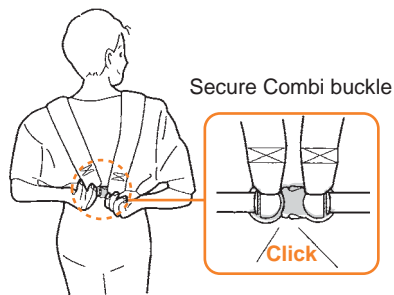

⚠ WARNING

- Make sure "side lock", "side snap" and "safety buckle" are secured to prevent baby from accidentally falling off while in use.
- Try to tighten "safety belt" and "waist belt" as much as possible to use. A carrier that is too loose or a carrier of which belt ends are in different length may cause baby fall off the carrier upon its sudden and unexpected movement.
- Seat baby at a safe place.
(It is recommended to have a third person to assist the operation.) Seating or unseating baby at an unsafe place may cause baby to fall off the carrier.

- ☑ Refer to Step 4, 5 and 6 of "To seat baby whose neck muscle is yet to develop" (P.7-8) for how to secure side lock, side snap and safety buckle, and also the way to adjust safety belt length.

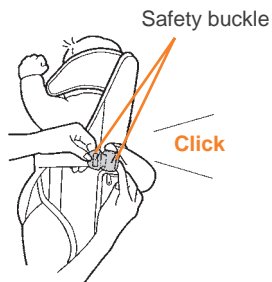

1 Put on carrier

Put on shoulder strap and cross hands to the back to secure Combi buckle until a "click" sound is heard..

4 Secure safety buckle

Secure safety buckle until a "click" sound is heard.

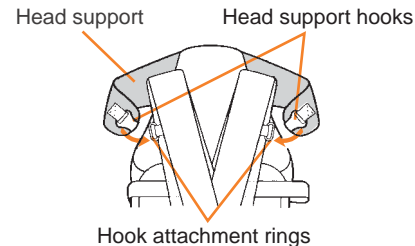

2 Seat baby into carrier

User should sit down first. Seat baby into carrier from either side while holding the baby with one hand.

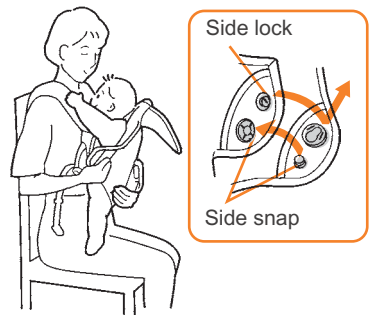

5 Secure head support

Secure head support hooks onto the hooks attachment ring on shoulder strap. (Baby whose neck muscle has developed can use head support up to around 7 months)

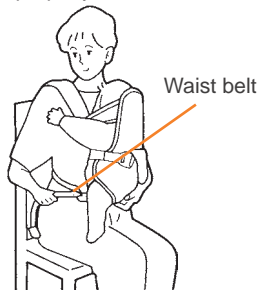

- ☑ Refer to "To secure head support hooks" (P.14) for detailed operation.

3 Secure side lock and side snap.

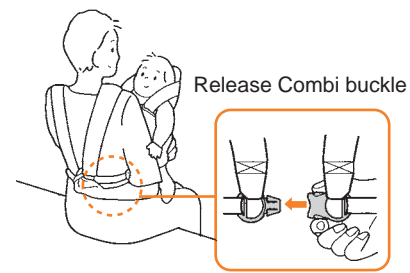

6 Adjust carrier to fit user
Try to adjust waist belt such that left and right belt end are in same length. Set shoulder strap, waist belt and Combi ladder buckle properly.

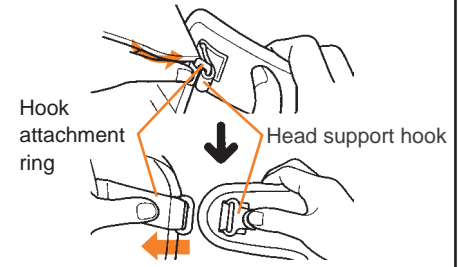

To unseat baby from cuddle position

1 Release Combi buckle
Sit on a safe place. Support baby with one hand and release Combi buckle

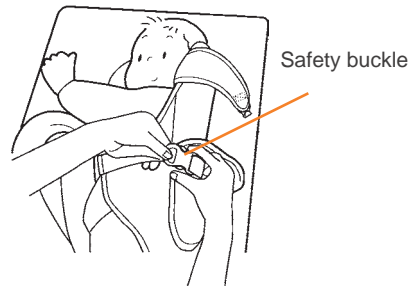

2 Place baby on a safe place and release head support

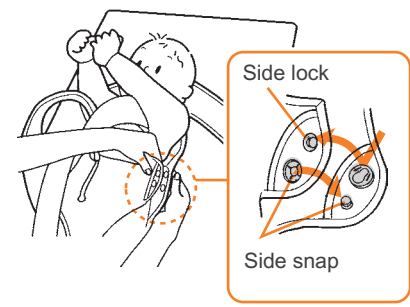

Lift the head support hook to the outer side. Press on the front end of head support hook with a thumb and then detach the hook attachment ring.

3 Release safety buckle

4 Release side lock, side snap and unseat baby.

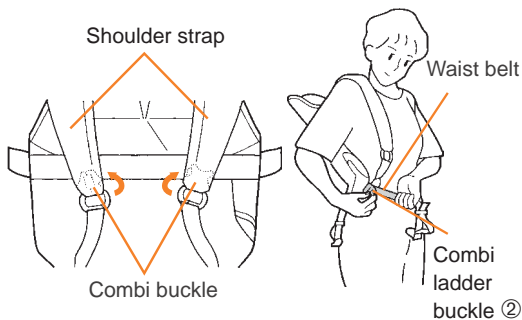

Preparation for back-carrying

Advice

As baby is not seen in back-carry position, it is recommended to unseat baby and check baby's status once every 30 mins.

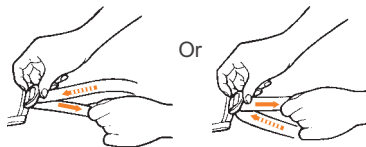

Adjust waist belt length

Store Combi buckle into shoulder strap and adjust waist belt with Combi ladder buckle ② to fit user.

To adjust

Lift the end of Combi ladder buckle and adjust waist belt length.

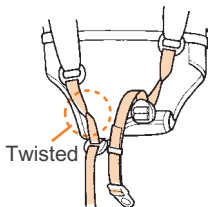

WARNING

Please try to tighten waist belt as much as possible to use. After adjustment, Combi ladder buckle ② should be located at around upper waist of user. If the gap between user and baby is too large or too loose, it may cause baby to fall off carrier while in use.

- Try to adjust waist belt such that left and right belt end are in same length.

Waist belt is made twisted to better fit user's body.

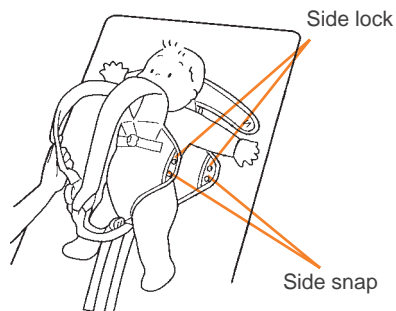

Back-carrying

WARNING

- Make sure "side lock", "side snap" and "safety buckle" are secured to prevent baby from accidentally falling off while in use.
- Try to tighten "safety belt" and "waist belt" as much as possible to use. A carrier that is too loose or a carrier of which belt ends are in different length may cause baby fall off the carrier upon its sudden and unexpected movement.
- Seat baby at a safe place. (It is recommended to have a third person to assist the operation.) Seating or unseating baby at an unsafe place may cause baby to fall off from the carrier.

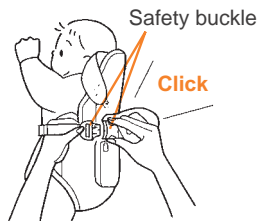

- Refer to step 4, 5 and 6 of "To seat baby whose neck muscle is yet to develop" (P.7~8) for how to secure side lock, side snap and safety buckle, and also the way to adjust safety belt length.

1 Seat baby into carrier. Secure side lock and side snap

2 Secure safety buckle

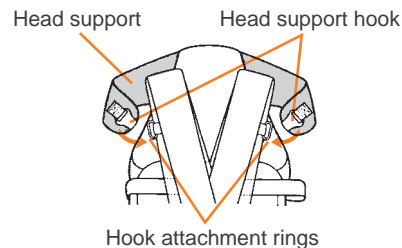

Secure safety buckle until a "Click" sound is heard.

 Refer to "To secure head support hooks" (P.14) for detailed operation.

3 Set the head support

Secure the head support hooks onto the hook attachment rings on the shoulder belt.

4 Carry baby on the back

It is recommended to have a third person to assist the operation.

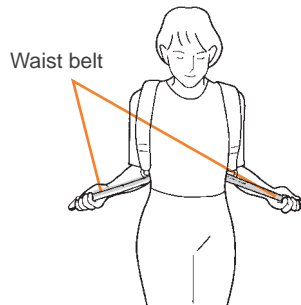

Try to place the baby on a sofa and hold the upper end of shoulder belt when operating on your own.

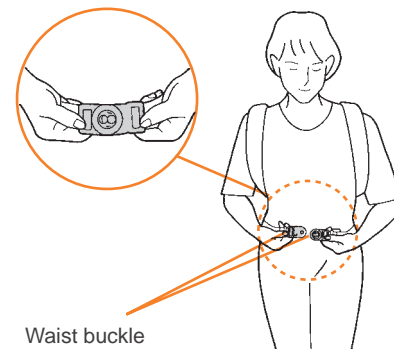

5 Adjust carrier to fit user

Try to adjust waist belt such that left and right belt end are in same length. Set shoulder belt, waist belt and Combi ladder buckle ② properly.

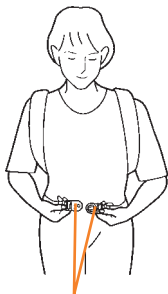

6 Secure waist buckle

To unseat baby from back-carry position

1 Release waist buckle

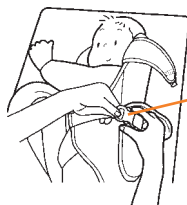

Waist buckle

2 Unload carrier from back

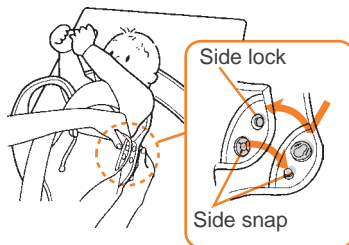

4 Release safety buckle

Safety buckle

5 Release side lock, side snap and then unseat baby.

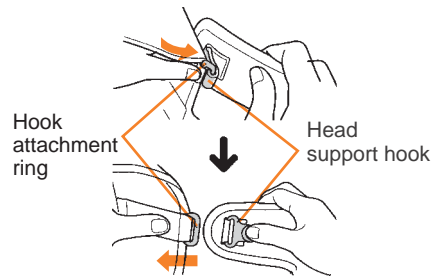

Side lock

Side snap

3 Place baby on a safe place and release head support

Lift the head support hook to the outer side. Press on the front end of head support hook with a thumb and then detach the hook attachment ring.

Maintenance

Daily maintenance

- Use water or warm water to wash carrier. After washing, lay it flat on shaded area to dry.
- Use a piece of damp cloth to wipe off small dirt.

⚠ CAUTION

When saliva of baby is adhered to the fabric, please clean it as soon as possible to avoid the fabric from becoming hardened. Hardened fabric may inflict discomfort to the baby.

Caution about washing

- Wash carrier separately from other colored items to prevent decoloring. Do not soak carrier in water for a long time.
- Do not use bleach or fluorescent brightener as both of which may become potential discomfort to baby. It is recommended to use Combi's detergent series.
- Do not put carrier into washing machine, spinning machine or drying machine, all of which may cause damage to buckle.
