

NEW DESIGN ANETS Dough Sheeter Offers More For Less Low Profile, Side Operated, Simple To Operate, Single Pass Dough Sheeter

This new versatile, Anets Dough Sheeter provides fast uniform production of doughs. The Anets side operated dough sheeter with high capacity extended infeed table allows operator to feed up to 35 lbs of dough into unit. Roll rectangular sheets or round shapes of dough with this easy to operate low profile design. Heavy duty 1 H.P. motor handles large loads of dough easily, safe and fast hour after hour. Special pusher tool allows operator to safely guide dough through infeed table. Large 20" chrome rollers handle super size dough pieces while minimizing operator fatigue at an economical price. Indexed precision machined rollers have fast, positive repeat adjustment...sets in just seconds! The new SDR-4HC provides complete operator protection. Safety interlock automatically shuts machine off when any panel is removed for cleaning or service. Chrome roller material minimizes dough adhesion and buildup. Spring loaded scrapers are readily removable which means less clean up time. The special sanitary design makes cleaning easy and safe. All mechanical parts and chains are isolated away from flour and dough areas. Heavy duty welded steel construction with white powder coated finish.

NEW MODEL SDR-4HC

*With High Capacity
Infeed Table*
