

PUP TENT

Instructions apply to Part Number 9556-406K

When You Are Ready To Set Up Your Tent

- Select a level campsite clear of rocks, branches and other hard or sharp objects.
- Do not set up your tent under trees.

Front and Rear Pole Assemblies

1 Layout & Positioning of Tent

- Layout and position tent with door facing desired direction.
- Stake down tent keeping the floor taut.

2 Set-up Tent

- Insert pole tip through grommet at the peak of the tent above the door.
- Raise the tent by pushing up on the pole until you can place the bottom of the pole on the ground. (illus. 2)
- Stake out attached Guy Line directly in front of tent.
- Repeat for opposite end of tent

Things You Should Know

- Under certain conditions (cold weather, high humidity, etc.) condensation will form on the inside surfaces of your tent. Condensation is caused by water vapor from your breath, perspiration, or any wet clothing inside your tent. It is NOT LEAKAGE through the tent fabric. It can be minimized by removing wet clothing from your tent and by providing good ventilation through the tent.

- Never store tent, even for a short period of time, without drying it thoroughly and brushing off caked dirt. Do not pack stakes or poles inside your tent. Use separate storage bag.

- STAKES SHOULD BE REMOVED BY PULLING ON THE STAKE ITSELF. NEVER PULL ON THE TENT FABRIC OR TENT STAKE LOOP TO REMOVE STAKE.

- TENT POLES SHOULD NOT BE LEFT TELESKOPED TOGETHER DURING STORAGE.

- Do not leave your tent set-up for weeks at a time, be aware that exposure to the ultraviolet rays of the sun can seriously damage nylon material and/or cause it to become discolored.

WARNING: KEEP ALL FLAME AND HEAT SOURCES AWAY FROM THIS TENT FABRIC. This tent meets the flammability requirements of CPAI-84. The fabric may burn if left in continuous contact with any flame source. The application of any foreign substance to the tent fabric may render the flame-resistant properties ineffective.
