

GE Appliances

DSXH43GVWW—GE 6.0 Cu. Ft. Capacity Spacemaker® Gas Dryer

Dryer Dimensions (in inches)

Exhaust Options:

Gas—3-way via rear, right and bottom. Dryer is shipped exhausted to the rear. Alternate exhausting knockouts are supplied.

Gas Dryer Electric Rating: 120V, 60Hz, 6A

An individual properly-grounded branch circuit, with a three-prong grounding-type receptacle, protected by a 15 or 20 amp circuit breaker or a time-delay fuse is required.

Gas (BTU/HR): 22,000. Factory-equipped for natural gas. Tested for LP gas. LP gas supply requires a conversion kit. Check installation instructions for correct kit and have a qualified gas technician install a conversion kit. See dryer ducting information for proper installation.

Note: Dryer wall outlet must be located within 36" of service cord entry and accessible when dryer is mounted in position.

Installation Information: For complete information, see installation instructions packed with your dryer.

Dryer Installation Options

Stacked in Cabinet Installation

Note:
 Closet Installation Requires Additional Minimum Clearances:
 Top of Dryer to Ceiling 15"
 Back of Dryer to Wall 4"
 Front of Dryer/Washer to Closet Door 1"
 A Minimum of 120 Square Inches of Openir Equally Divided at the Top and Bottom of the Closet Door is Required.

Undercounter Installation

Custom Sized Countertop Required

Specification Revised 6/00

Dryer Exhausting Information—Use Metal Duct Only

		Best Performance			
		Maximum Length of 4" Dia. Rigid Metal Duct		Maximum Length of 4" Dia. Flexible Metal Duct	
		Exhaust Hood Type		Exhaust Hood Type	
	Number of 90° Turns	A	B	A	B
		4" Opening	2-1/2" Opening	4" Opening	2-1/2" Opening
Front Loading Dryers	0	60 ft.	48 ft.	30 ft.	18 ft.
	1	52 ft.	40 ft.	22 ft.	14 ft.
	2	44 ft.	32 ft.	14 ft.	10 ft.
	3	32 ft.	24 ft.		
	4	28 ft.	16 ft.		

Special Installation Requirements

Alcove or Closet Installation:

- If your dryer is approved for installation in an alcove or closet, it will be stated on a label on the dryer back.
- The dryer **MUST** be exhausted to the outside.
- Minimum clearances between dryer cabinet and adjacent walls or other surfaces are:
0" either side
3" front and rear
- Minimum vertical space from floor to overhead cabinets, ceilings, etc. is 52".
- Closet doors must be louvered or otherwise ventilated and must contain a minimum of 60 sq. in. of open area equally distributed. If this closet contains both a washer and a dryer, doors must contain a minimum of 120 sq. in. of open area equally distributed.
- The closet should be vented to the outdoors to prevent gas pocketing in case of a gas leak in the supply line.
- No other fuel-burning appliance shall be installed in the same closet with the dryer.

Bathroom or Bedroom Installation:

- The dryer **MUST** be exhausted to the outdoors.
- The installation must conform with the local codes, or in the absence of local codes, with the National Fuel Gas Code, ANSI Z223.

Minimum Clearances other than Alcove or Closet Installation:

- Minimum clearances to combustible surfaces
0" both sides
3" rear

For complete information, see installation instructions packed with your dryer.

Ducting Materials:

For best performance, this dryer should be vented with 4" diameter all rigid metal exhaust duct. If "all rigid metal" duct cannot be used, then "flexible all metal" venting can be used, but it will reduce the maximum recommended duct length.

Exhaust Length Calculation:

1. Determine the number of 90° turns needed for your installation. If you exhaust to the side or bottom of dryer, add one turn.
2. The maximum length of 4' rigid (aluminum or galvanized) duct which can be tolerated is shown in the table. The maximum length for flexible ducts are less than for rigid duct.

A turn of 45° or less may be ignored. Two 45° turns within the duct length should be treated as a 90° elbow. A turn over 45° should be treated as a 90° elbow.

Exhausting the dryer to the outside is strongly recommended to prevent large amounts of moisture and lint from being blown into the room. Gas dryers or any dryer located in a closet **must** be exhausted to the outside.

Caution: For personal safety do not terminate exhaust into a chimney, under any enclosed house floor (crawl space), or into an attic, since the accumulated lint could create a fire hazard or moisture could cause damage. Never terminate the exhaust into a common duct or plenum with a kitchen exhaust, since the combination of lint and grease could create a fire hazard.

Exhaust ducts should be terminated in a dampered wall cap to prevent back drafts, bird nesting, etc. The wall cap must also be located at least 12" above the ground or any other obstruction with the opening pointed down. Other terminations, such as louvered wall boxes, are acceptable provided they are equivalent to a 4" opening dampered wall cap.

DSXH43GVWW—GE 6.0 Cu. Ft. Capacity Spacemaker® Gas Dryer

Features and Benefits

- Extra-Large (6.0 cu. ft.) Capacity
- 4 Temperature Options: High, Medium, Low, Air Fluff/No Heat
- 4 Time Dry Cycles: Regular, Permanent Press, Knits/Delicates, Air Fluff
- 3 Auto Dry Cycles: Regular, Permanent Press, Knits/Delicates
- Cool Down Cycle
- Adjustable End-of-Cycle Signal
- Interior Dryer Light
- Quick Clean Lint Screen
- Spill Savor Top
- Dura Finish Top and Drum
- Leveling Legs
- Heavy Duty Suspension System
- 3 Exhaust Option
- 100% Front Serviceable
- Model DSXH43GVVV - White on white
- Model DSXH43EVVV - White on white
