use&care guide

owave Ovens, Trash Compactors, Room Air Conditioners, Dehumidifiers, Automatic Washers, Clothes Dryers, Freezers, Refrigerator-Freeze

Parts and features

Wipe out the dryer drum with a damp cloth to remove dust from storing or shipping.

See your "Dryer Guide" for information on fabrics, drying special-care items, drying tips and other details.

Copy your Model and Serial Numbers here

When you need service or call with a question, have this information ready:

- **1. Complete** Model and Serial Numbers (from the plate located as shown).
- 2. Purchase date from sales slip.

Copy this information in these spaces. Keep this book, your warranty, sales slip and "Dryer Guide" in the Laundry Information Center on the back of the dryer console. Complete Model Number

Complete Serial Number

Purchase Date

Service Company and Telephone Number

There is no warranty registration to return. Proof-of-purchase is all that is required for in-warranty service.

Your Responsibilities

Read this "Use and Care Guide" and your "Dryer Guide" carefully for important use and safety information.

You are personally responsible for making sure that your dryer...

- is installed by a qualified installer.
- is properly maintained.
- is installed in an area protected from the weather.
- is properly installed and leveled in a well ventilated room* on a floor that can support the weight.

- is located in an area where the temperature is above 45 F (7.2 C).
- is connected to the right kind of outlet, electric supply and grounding.*
- is properly connected to fuel and exhaust systems.*
- is used only for jobs normally expected of home clothes dryers.
- is not run where there may be explosive fumes.
- is not used by children or anyone unable to operate it properly.
- *See the "Installation Instructions" for complete information

Safety first

ALWAYS unplug the power supply cord or turn off electrical power before attempting to service the dryer. Shut off the GAS VALVE if yours is a gas dryer.

ALWAYS shut off the gas valve before leaving on vacation.

NEVER use flammable fluids (dry-cleaning solvents, gasoline, kerosene) in or near your dryer.

ALWAYS hand launder or air dry fabrics treated with flammable fluids before putting them into your dryer.

NEVER dry items containing wax or paint in the dryer. The fumes can create a FIRE HAZARD.

FIRE HAZARD and DAMAGE to some materials can result from:

- drying heat-sensitive materials with heat (see page 4).
- operating the dryer with the lint screen loose, damaged or missing.
- allowing lint to build up inside the dryer (see page 9).

NEVER allow children to operate, play with, or crawl inside the dryer.

NEVER operate the dryer if...

- it is not working right.
- it is damaged.
- parts are missing.
- all panels are not in place.

DO NOT let dust, lint, paper, rags, chemicals, etc., pile up around or under the dryer. DO NOT install against drapes or curtains.

FOR YOUR SAFETY

IF YOU SMELL GAS:

- 1. OPEN WINDOWS.
- 2. DON'T TOUCH ELECTRI-CAL SWITCHES.
- 3. EXTINGUISH ANY OPEN FLAME.
- 4. IMMEDIATELY CALL YOUR GAS SUPPLIER.

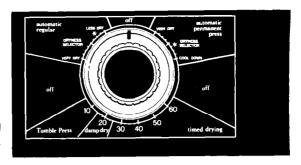

FOR YOUR SAFETY •

DO NOT STORE OR USE GASOLINE OR OTHER FLAMMABLE VAPORS AND LIQUIDS IN THE VICINITY OF THIS OR ANY OTHER APPLIANCE.

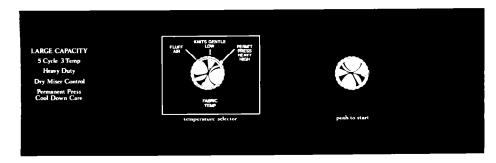

SAVE THESE INSTRUCTIONS

Selecting a cycle and starting your dryer

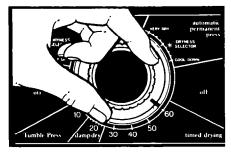

Before starting your dryer, be sure laundry is sorted and loaded properly (see your "Dryer Guide"). Be sure the door is tightly closed.

	SUGGESTED TEMPERATURI
AUTOMATIC REGULAR	PERM'T PRESS HEAVY HIGH
AUTOMATIC PERMANENT PRESS	PERM'T PRESS HEAVY HIGH
AUTOMATIC PERMANENT PRESS	PERM'T PRESS HEAVY HIGH KNITS GENTLE LOW
AUTOMATIC PERMANENT PRESS	KNITS GENTLE LOW
TIMED DRYING	
20-30 MINS. 20-30 MINS. 40-50 MINS. 15-20 MINS.	FLUFF AIR
	AUTOMATIC REGULAR AUTOMATIC PERMANENT PRESS AUTOMATIC PERMANENT PRESS TIMED DRYING 20-30 MINS. 40-50 MINS.

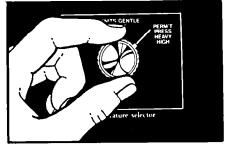

Select a 1. CYCLE

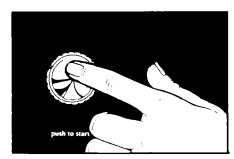

Turn the Control Knob either way to point to the cycle and setting you want. See page 6 for information on the cycles.

Set TEMPERATURE 2. SELECTOR

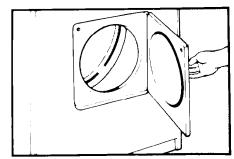

Turn the Temperature Selector to the needed drying temperature.

Push the **3.** START Button

The dryer will start tumbling when you push the START Button.

To stop and restart the dryer

To stop the dryer, open the door (or turn the Control Knob to OFF).

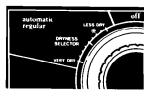

To restart the dryer, close the door, select cycle, if necessary, and push START.

Operating instructions

The automatic cycles

The automatic cycles allow you to select the degree of dryness you prefer for the clothes being dried.

The Control Knob moves and stops several times until the load reaches the dryness setting you selected. Then the knob automatically moves to OFF and tumbling stops.

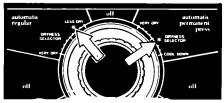

Use AUTOMATIC REGULAR to dry heavy and medium-

weight cotton items. The load tumbles without heat during the last 5 minutes. This helps make the load easier to handle.

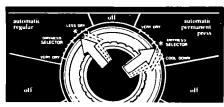

Use AUTOMATIC PERMANENT PRESS to dry permanent

press, knits and other synthetic fabrics. The load tumbles without heat during the last 10 minutes. This helps keep wrinkles from setting in.

For the first few loads, set the Control Knob to point to an* in either automatic cycle. When the dryer stops, feel the dried items.

 If items are drier than you like, use a setting to the right of the * the next time you dry a similar load.

 If items are not as dry as you like, use a setting to the left of the * the next time you dry a similar load.

OVERDRYING CAN CAUSE SHRINKAGE, STATIC CLING AND DAMAGE TO SOME FABRICS.

Timed drying

Use the TIMED DRYING Cycle for any load you want to dry by time. For example: small loads, large bulky items, items to be fluffed or dusted with the FLUFF AIR heat setting.

- Turn the Control Knob to the number of minutes you want – from 10 to 60.
- The last 5 minutes of this cycle are without heat – a cool-down time. This helps make the load easier to handle.

Drying tips

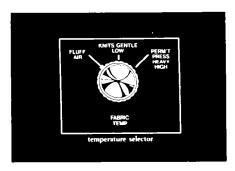

The dryer does not heat when the Temperature Selector is set on FLUFF AIR. This setting can be used to fluff bedding, plastic tablecloths, foam rubber pillows, stuffed toys, sneakers, etc.

TUMBLE PRESS Setting

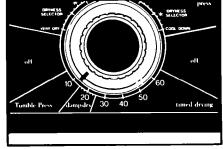

The TUMBLE PRESS setting removes wrinkles from dry clothing such as items that may have been packed in a suitcase, closet, or items not removed from the dryer.

- **1.** Turn Temperature Selector to FLUFF AIR.
- Turn Control Knob to the number of minutes you want in the TIMED DRYING CYCLE.
- 3. Push START Button.

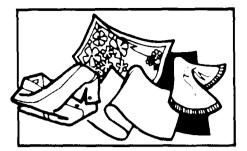

- 1. Turn Control Knob to TUMBLE PRESS.
- Turn Temperature Selector to PERM'T PRESS HEAVY HIGH.
- 3. Push START Button.

The load will tumble in heated air for 10 minutes. The heat shuts off and the dryer continues to tumble the load for 5 more minutes.

For best results, TUMBLE PRESS only a few items at a time. Put them on hangers or fold them as soon as the dryer stops.

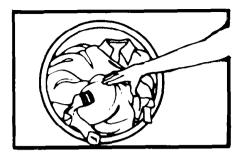

Mixed loads

When drying a load with different kinds and weights of fabrics, use the cycle suggested for the lightest fabrics. When the dryer stops, remove dry items and reset the control.

To reduce wrinkling, take the load from dryer as soon as tumbling stops. This is important for permanent press, knits and synthetic fabrics.

Drying times

Drying times

Drying times will vary depending on:

- amount of moisture in the clothes.
- type and weight of the fabric.
- size of the load.
- room temperature around the dryer.
- temperature of the wash rinse water.
- amount of lint in the lint screen.
- dryer temperature selection.

See page 6 in your "Dryer Guide" for more information.

Lint signal

Clean the lint screen **before each load.** If you neglect to clean your lint screen, the signal will sound. The whistle tone signal lets you know the air flow is being restricted. Restricted air flow reduces drying efficiency.

Turn off the dryer and clean the lint screen as shown on the next page.

Lint screen

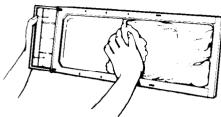

Clean the lint screen before each load. A screen blocked by lint can increase drying time and may be a FIRE HAZARD.

Open the lid and pull the lint screen straight out.

WARNING: DO NOT run the dryer with the lint screen loose, damaged or missing. Doing so can cause overheating, can damage fabrics and can be a FIRE HAZARD.

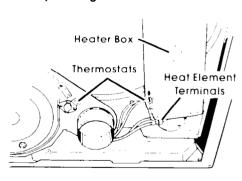

ROLL the lint off the screen with your finaers.

DO NOT rinse or wash the screen.

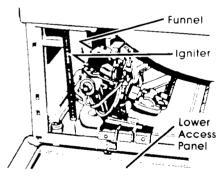

Push the screen firmly back into place.

Lint removal

Lint can gather inside the dryer and create a fire hazard. This lint should be removed every 2 to 3 years, or more often, depending on dryer usage.

GAS DRYERS

Cleaning should be done only by a qualified person.

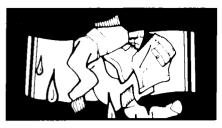

- Avoid electrical shock hazard – unplug power supply cord or turn off electrical power.
- Avoid injury or damage do not put hands inside cabinet.
- Make sure dryer is cool.

- 1. Remove back panel (electric) or lower access panel (gas).
- 2. Avoid damaging wires, thermostats, funnel or igniter.
- 3. Remove lint from shaded area see art – with a soft brush or vacuum cleaner.
- 4. Replace panel; reconnect and re-level dryer.

Caring for your dryer

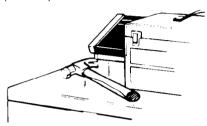

Remove sharp objects from clothing before drying — pins, buckles, etc. Close metal zippers.

Never leave wet or damp laundry in your dryer.

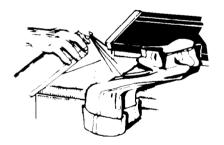

Wipe off all spills with a damp, soft cloth. Spills allowed to remain may dull or damage the finish.

Sharp or heavy objects should never be put on or in the dryer. Check pockets for bolts, nuts, etc.

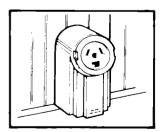

Non-colorfast items can stain the drum. Wipe **carefully** after drying to make sure there is no dye to be transferred to items in the next load.

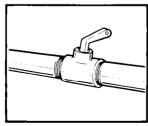

Some pretreatment products can damage dials, console and finish. Do not use these products on or near your dryer.

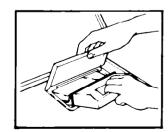

Vacation care

Unplug power cord or turn off electrical power.

For gas dryers, close gas valve.

Clean lint screen.

If you need service or assistance, we suggest you follow these four steps:

1. Before calling for assistance...

Performance problems often result from little things you can find and fix yourself without tools of any kind.

DRYER DOES NOT RUN:

- Is power supply cord plugged in?
- Is door closed tightly?
- Did you push START Button?
- Are fuses blown or a circuit-breaker tripped?

DRYER DOES NOT HEAT:

- The AIR setting is without heat.
- The last minutes of heat settings are without heat.
- Is gas turned on? If not, turn Control Knob to OFF. Turn on gas. Wait 5 minutes. Reset controls and start.
- An electric dryer uses a circuit breaker or 2 fuses. If one fuse is blown, the dryer may run, but not heat.

DRYING TIME SEEMS LONG:

- Is the lint screen clean?
- See page 6 in your "Dryer Guide."

2. If you need assistance*...

Call Whirlpool COOL-LINE* service assistance telephone number.

Dial free from:

Continental U.S. . (800) 253-1301 Michigan (800) 632-2243 Alaska & Hawaii (800) 253-1121

and talk with one of our trained Consultants. The Consultant can instruct you in how to obtain satisfactory operation from your appliance or, if service is necessary, recommend a qualified service company in your area.

3. If you need service*...

Whirlpool has a nationwide network of franchised TECH-CARE* Service Companies. TECH-CARE service technicians are trained to fulfill the product warranty and provide after-warranty service, anywhere in the United States. To locate TECH-CARE service in your area, call our COOL-LINE service assistance telephone number (see Step 2) or look in your telephone directory Yellow Pages under:

APPLIANCES - HOUSEHOLD MAJOR - SERVICE & REPAIR OR	ELECTRICAL APPLIANCES - MAJOR - REPAIRING & PARTS
