Install by clicking Download Free Software > MOM-I Free Download Menu on the website (http://www.greeninet.or.kr/).

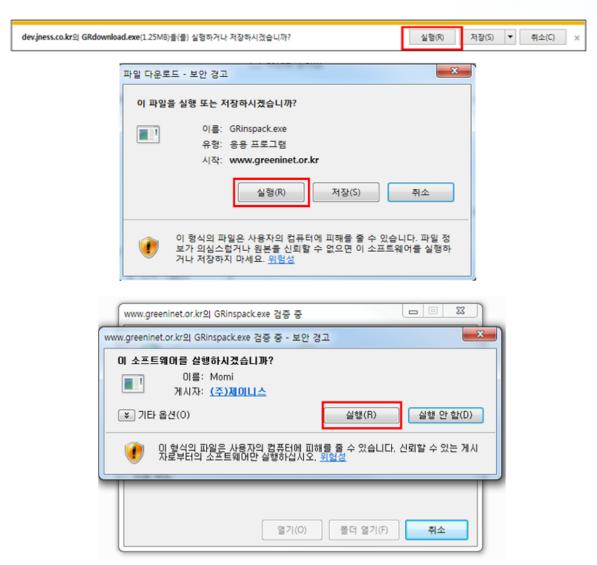

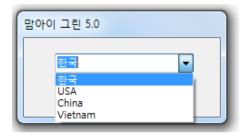

1) Continue download by clicking [Run] button.

- 2) Choose a language and click [OK] button.
  - \* Language choice is to input user data for installationonly. MOM-I Program will be installed in Korean Language.

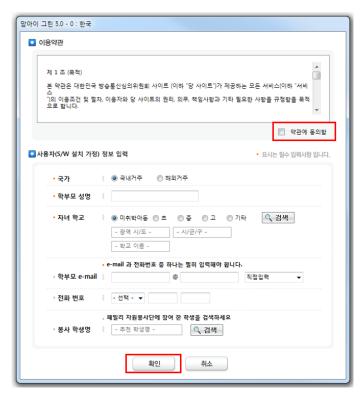

3) To install the program in your current PC, input required data after clicking [Agree with terms and conditions]. Then click [Confirmation].

4) Create a password before installation. Insert a Parents Authentication Password, Andthe installation will begin when you Click [Confirmation] button.

\* Password should be from 4 to 12 digits with a mix of number and English.

5) After installation, MOM-I Green Icon will be registered in System Tray.

**J**INESS

### 2. Execute Configuration

Execute Configuration Menu with Tray Icon at the end of the right hand side of Task Bar.

1) Choose Configuration Menu.

2) The main menu of configuration will be executed when you enter Parents Authentication Password.

### 3. Setting PC Available hours

You have three options toset up available hoursfor your children's use.

Same limit for everyday / Distinction between weekdays and weekend / Different hours for each day of the week

#### 1) Same limit for everyday

PC is available for set-up time. The least input increment isone minute.

#### 2) Distinction between weekdays and weekend

You can seperately set limits for weekdays(Mon~Fri) and weekend(Sat~Sun).

e.g.) Set 1 hour per a day for weekdays, 2 hours and 30 minutes per a day for weekend

③ 평일/주말 설정

평일: 1 ♣ 시간 00 ♣ 분
주말: 2 ♣ 시간 30 ♣ 분

#### 3) Different hours for each day of the week

You can set different duration for each day of the week, and the least input incrementis 30 minutes. If you choose ② 요일별 상세 설정 , a window for [Different hours for each day of the week] will be automatically executed.

Choose 'time slot available for PC use' by using time graph, and you can set up available hoursin detail by entering 'Available Hours within the chosen time slot'

\*\* When you click the time button, it is to be specified in order of  $\blacksquare \to \blacksquare \to \blacksquare \to \blacksquare$ . If you click and drag, you can specify desired time slotin a row for block or permission.

e.g.) Guidelines to set available hours on the above example

Mon $\sim$ Fri: Between 7am  $\sim$  11:30pm, Available for 2 hours

Saturday : Between 7am  $\sim$  11:30pm, Available for 3 hours

Sunday: Between 12am ~ 11:30pm, Available for 2 hours and 30 minutes

#### 4) Application

After you set available hours, click [Apply] button which is at the bottom of main window.

### 4. Setting Available hours of Game

You can set up 'Available hours per a day to play games' for your children, and the games can be played within the available hours for PC use.

#### 1) Setting available hours per a day
