## Inspire White HD-SDI DVR Range

### Logging into the DVR

---

A user may be required to login to the DVR to be able to use any of the features. To do this follow the procedure below:-

- Front panel      Press **Menu** button  
                         Enter password (Default 888888)
- Mouse            Right click  
                         click **Menu** Icon  
                         Enter password (Default 888888)
- IR Remote        Press **Menu** button  
                         Enter password (Default 888888)

The screenshot shows a login interface with a dark background. At the top, a title bar reads "Login - Logged Out". Below this, the text "Time remaining to login:9" is shown. The "User name" field is a blue dropdown menu currently displaying "Admin". The "Password" field is an empty rectangular box. At the bottom right, there are two buttons labeled "OK" and "Cancel".

On the login screen you can change the user name that you wish to log in as, press OK and use up /down keys to select from the drop down box or the mouse to change selection.

The password can be entered by using the number keys on the front panel or the virtual keyboard using the mouse.

After entering the password press **OK** to log in.

| P. | Display 16 channels (16 channel DVR only)       |
| Q. | Start sequence display                          |

In PTZ mode the mouse can also be used to control the movement of the PTZ camera.

# User Manual

## Inspire White HD-SDI DVR Range

### Mouse Playback Toolbar

There are two types of mouse playback toolbars available, Basic and Timebar.

#### Basic mouse toolbar

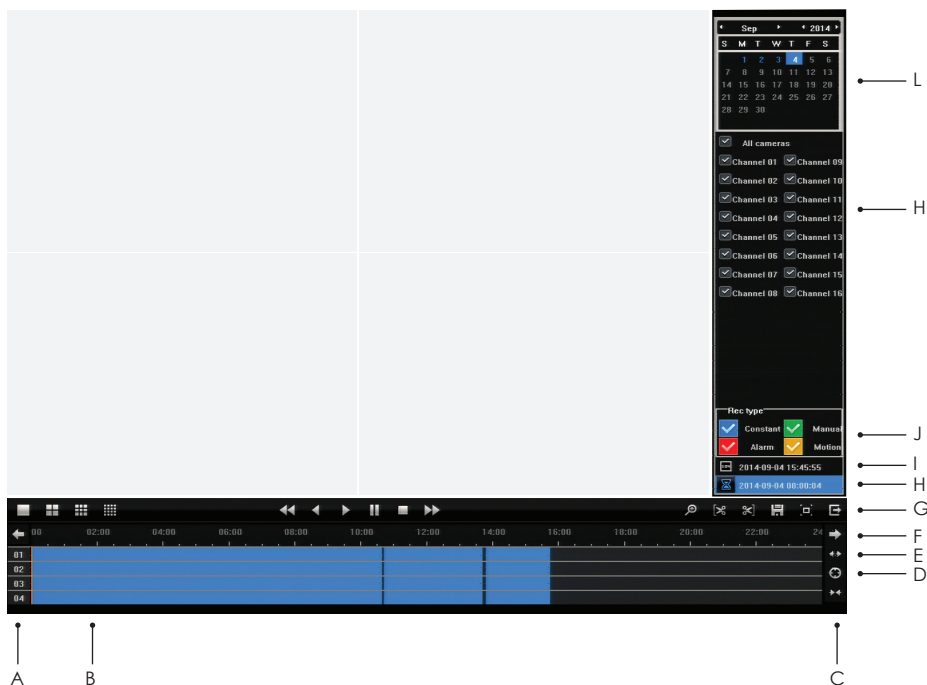

- A. Switch to single channel view
- B. Switch to 4 channel view
- C. Switch to 9 channel view
- D. Switch to 16 channel view
- E. Decrease playback speed
- F. Change playback direction to backward
- G. Change playback direction to forward
- H. Pause/Play
- I. Stop playback
- J. Increase playback speed
- K. Move forward 60 minutes
- L. Move backward 60 minutes
- M. Move forward 30 minutes
- N. Move backward 30 minutes
- O. Move forward 10 minutes
- P. Move backward 10 minutes
- Q. Enter digital zoom mode
- R. Copy video
- S. Exit playback

# User Manual

## Inspire White HD-SDI DVR Range

### Timebar

- A. Channel number
- B. Playback area (double click to switch playback to this time)
- C. Zoom out time bar
- D. Restore time bar to 24 hour
- E. Zoom in time bar
- F. Navigate across time bar
- G. Switch to full screen video
- H. Input specific playback time and date
- I. Current playback time
- J. Select record types to display in time bar
- K. Select cameras to playback
- L. Select date to search

### Live View

---

To change the multiscreen view on the display press the "Display" key. Pressing the display key multiple times will cycle through all the available screen layouts. If using the USB mouse right click the mouse button and select the desired multiscreen view from the mouse menu.

To bring up a camera full screen:

#### **DVR Front Panel**

Press desired camera number key

#### **Infra Red Remote**

Press desired camera number key

#### **Mouse**

Using left mouse button double click the desired camera channel or right click to display multiscreen view.

Using the USB mouse the layout of the multiscreen views can be altered. To move a camera channel to a different location on screen, click the left mouse button on desired camera and hold the button down. Drag the camera to another location and release left mouse button. The camera channel will now move to the desired location. If another camera channel was already in the desired screen location the two camera channels will simply swap places.

To enter digital zoom:

#### **DVR Front Panel**

In multiscreen use **Arrow** keys to select desired camera, press **OK** key to enter digital zoom mode. Use **Arrow** keys to move around screen. To exit digital zoom mode press **Back** key. In single screen view press **OK** key to enter digital zoom

#### **Infra Red Remote**

In multiscreen use **Arrow** keys to select desired camera, press **OK** key to enter digital zoom mode. Use **Arrow** keys to move around screen. To exit digital zoom mode press **Back** key. In single screen view press **OK** key to enter digital zoom

#### **Mouse**

In multiscreen view mode click **Left** mouse button to select camera then click **Digital Zoom** button on mouse tool bar.

In single screen view click **Digital Zoom** button on mouse tool bar.

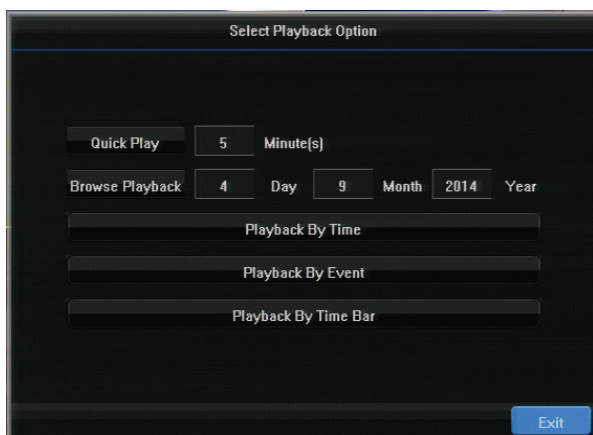

Click **Left** mouse button and hold to move to different area of the screen.

# User Manual

## Inspire White HD-SDI DVR Range

### Playback

To enter the playback menu press the "Play/Pause" button on the DVR front panel or IR remote. If using USB mouse right click to display the mouse toolbar and click the "Play" button.

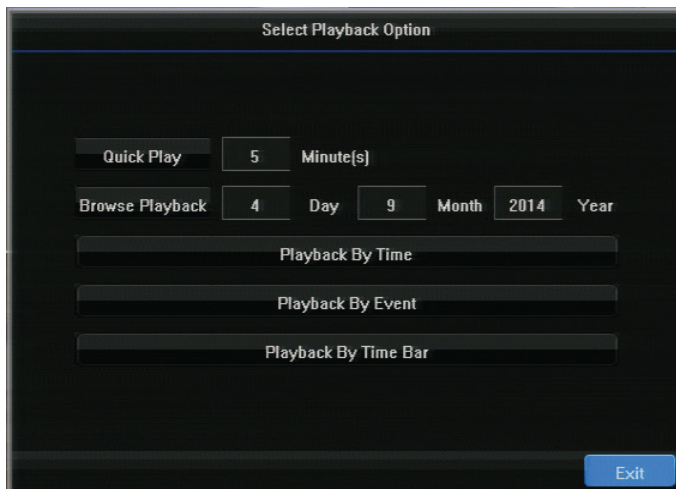

There are five playback modes available on the Inspire White range of DVRs.

- |                             |  |
|-----------------------------|--|
| <b>Quickplay</b>            | Quickly playback from a short time ago by inputting the amount of minutes to playback from. Quickplay can playback from 1 minute to 99 minutes.  |
| <b>Browse Playback</b>      | Browse playback is designed for playing back a specific date from midnight and quickly navigating between hours.   |
| <b>Playback by Time</b>     | Use playback by time to playback a specific date and time  |
| <b>Playback by Event</b>    | Search the DVR event log for all events occurring between a specific time range. Event results will be displayed in a list with an option to playback.   |
| <b>Playback by Time Bar</b> | Time bar playback displays a much more advanced interface for reviewing footage. This option is only available when using a USB mouse and will not appear in the playback menu if a USB mouse is not being used. |

### Quickplay

The quickplay feature is a playback method designed to make playing back footage from a short time ago faster.

The default setting for quickplay is 5 minutes, this can be changed from 1-99. If the minutes are changed the DVR will remember this setting until a power off has occurred.

#### Front panel

Use **Up** and **Down** arrow keys to navigate to the playback option.  
Press **Right** arrow key to select minutes option.  
Input desired amount of minutes using number keys.  
Press **Left** arrow key to highlight Quickplay button.  
Press **OK** key to start playback.

#### Mouse

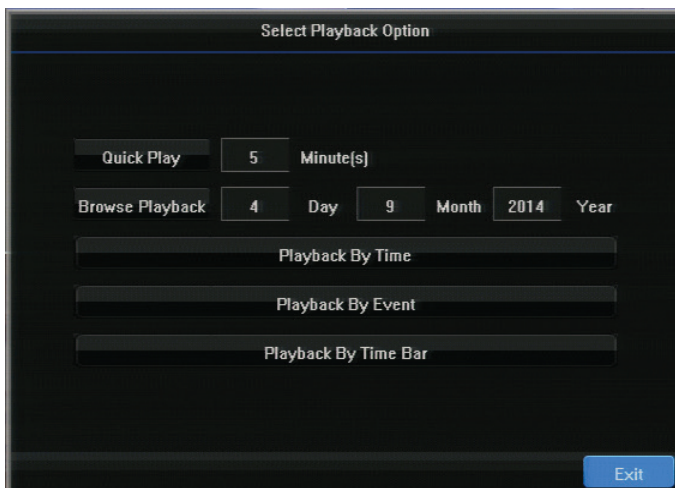

Click **minutes** box to bring up virtual keyboard.  
Use virtual keyboard to input desired amount of minutes.  
Click **Quickplay** button to start playback

#### IR Remote

Use **Up** and **Down** arrow keys to navigate to the playback option.  
Press **Right** arrow key to select minutes option.  
Input desired amount of minutes using number keys.  
Press **Left** arrow key to highlight Quickplay button.  
Press **OK** key to start playback.

## Browse Playback

The browse playback feature will playback from midnight on a chosen date.

The default setting for browse playback is the current date. If the date is changed the DVR will remember this setting until a power off has occurred.

### Front panel

Use **Up** and **Down** arrow keys to navigate to the playback option.  
Press **Right** arrow key to select day, month or year option.  
Input desired day, month, year using number keys.  
Press **Left** arrow key to highlight Browse playback button.  
Press **OK** key to start playback.

### IR Remote

Use **Up** and **Down** arrow keys to navigate to the playback option.  
Press **Right** arrow key to select day, month or year option.  
Input desired day, month, year using number keys.  
Press **Left** arrow key to highlight Browse playback button.  
Press **OK** key to start playback.

### Mouse

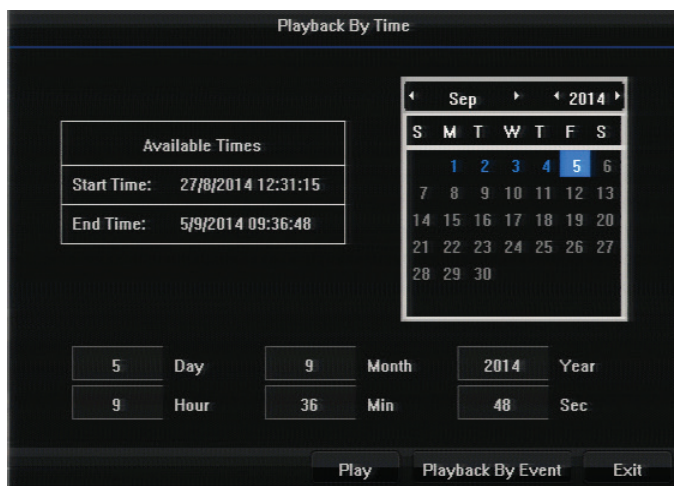

Click **day, month or year** box to bring up virtual keyboard.  
Use virtual keyboard to input desired date.  
Click **Browse playback** button to start playback.

# User Manual

## Inspire White HD-SDI DVR Range

### Playback by Time

The Playback by Time feature can be used to playback a specific time and date.

The default setting for playback by time is the current date. If the date is changed the DVR will remember this setting until a power off has occurred.

#### DVR Front Panel

Press **Arrow** keys to navigate menu  
Press **Number** keys to input desired time and date  
Highlight **Play** button and press **OK** to playback time

#### Infra Red Remote

Press **Arrow** keys to navigate menu  
Press **Number** keys to input desired time and date  
Highlight **Play** button and press **OK** to playback time

#### Mouse

Click **time and date** boxes to bring up virtual keyboard.  
Use virtual keyboard to input desired date and time.  
Click **Play** button to start playback.

#### Available Times

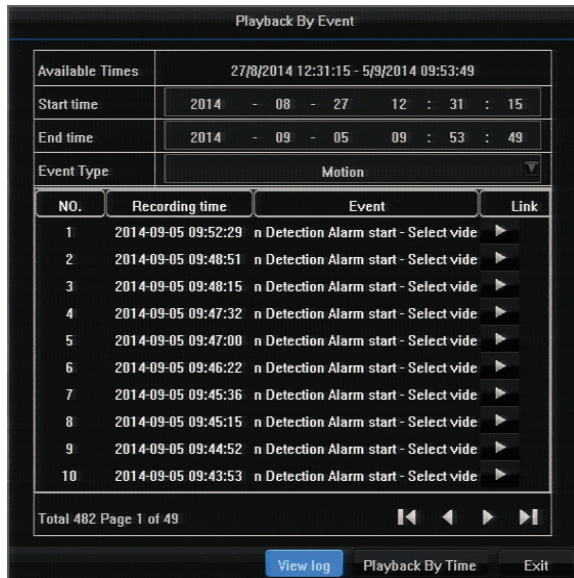

Displays the available times stored on the hard drives.  
Start Time is the earliest date and time stored on the hard drives.  
End Time is the latest date and time stored on the hard drives.

<b>Delete</b>	Delete copy entry from the queue
<b>Erase</b>	Format the copy device
<b>Copy</b>	Start the copy

# User Manual

## Inspire White HD-SDI DVR Range

### Using COP player 2 software

When making a backup to CD/DVD or via USB media if the file format chosen is Cop then the Cop Player 2 software is vital in order to playback the recordings.

After inserting the disk or USB media containing the copied recordings into a PC double click the Cop Player 2 icon. This will run the Cop Player 2 software.

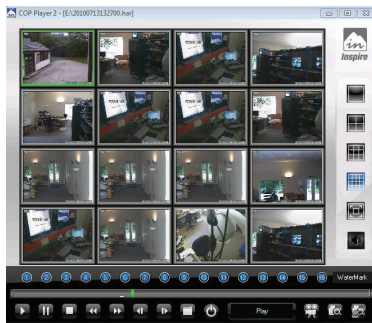

To open a file containing recordings click on the Open File icon

Click on the file that you wish to playback and then click Open

The Cop player software will now open and display the selected video file.

# User Manual

## Inspire White HD-SDI DVR Range

To bring a camera up full-screen, double click on desired camera or use the full-screen icon on the right hand side of the viewer.

If required, the recordings can be converted to AVI format, this will enable them to be played back in most viewing applications such as Windows Media Player.

To do this click on the video camera icon at the bottom of the viewer.

Select the camera channel you would like to convert and if you wish to include audio. Then click next.

When prompted, select a destination for the new AVI file to be saved.

The AVI window will disappear and once the AVI conversion is complete the viewer will display a window to confirm it was completed successfully.

There are also options to save a Snap Shot or Print Image in the bottom right of the viewer.

### Smartphone viewing

#### Viewing the DVR

This guide shows how to connect using an Android smartphone, but all smartphone apps require the same information to connect to the DVR.

Start TMeye App  
Press Settings button

Start App

Press  
Settings

Click Add

Enter device name (for your reference)

Enter the IP address of the DVR in to Address: (example 84.92.95.178)

Enter the mobile port number in to PORT: **7050** (this is the DVR default)

Enter a user ID and password

Default user ID: **Admin** (case sensitive)

Default password: **888888**

Press Save and you DVR settings will be saved

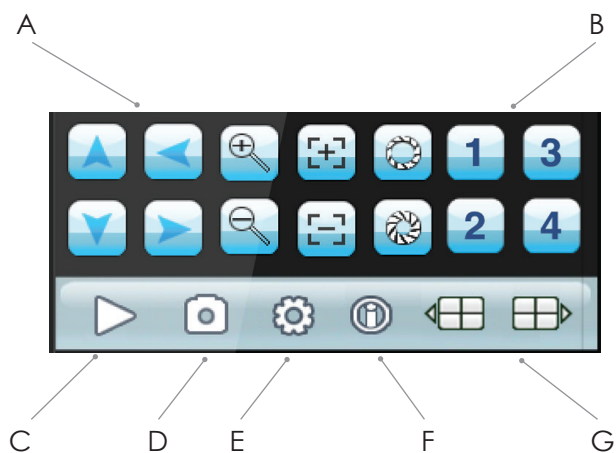

Click DVR on device list  
Select camera to view

On the free applications, you can only view live images one channel at a time.

### Connecting via PC

---

**Note: Viewing on a Apple Mac currently not supported.**

#### Connecting via Windows PC

To start, open up Internet Explorer and type the DVR IP address into the address bar and press enter. (e.g. <http://192.168.0.100:86/>)

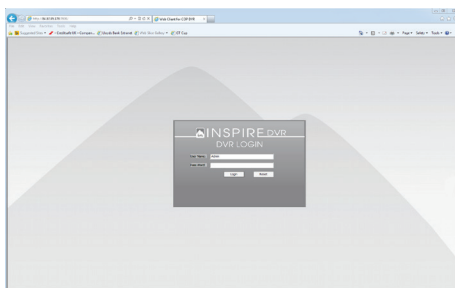

When connecting to the DVR for the first time, installation of the DVR ActiveX control is required. Usually a pop-up bar will appear.

Right click on the pop-up bar and choose install.

**Note: Depending on internet explorer security settings the ActiveX control may not install, for further advice contact your network administrator.**

Once the ActiveX is installed correctly the user should be presented by the Inspire Log On screen.

To log in the user must type both their Username and Password into the required fields.

**Note: Default Username is Admin** (case sensitive)  
**Default Password is 888888**

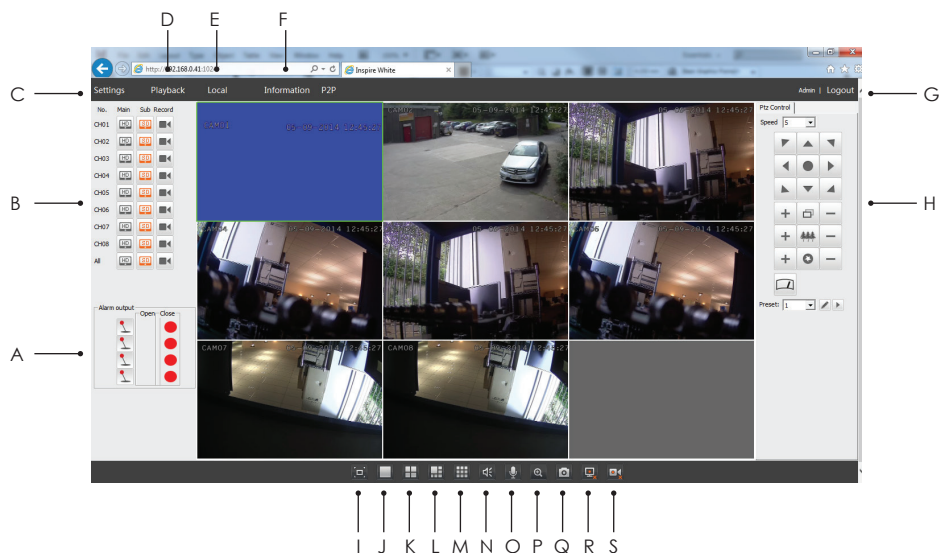

Once the required fields have been entered click login button.

# User Manual

### Live Images

Once logged into the DVR the user will be presented with the live images screen.

- |                                   |                      |
|-----------------------------------|----------------------|
| A. Relay Control                  | K. 4 channel view    |
| B. Camera & Stream Type Selection | L. 8 channel view    |
| C. Settings                       | M. 16 channel view   |
| D. Playback                       | N. Audio on/off      |
| E. Local Settings                 | O. Talkback on/off   |
| F. Information                    | P. Digital Zoom      |
| G. Logout                         | Q. Take Snapshot     |
| H. PTZ Control                    | R. Close stream      |
| I. Switch to full screen          | S. Stop local record |
| J. Single channel view            |                      |

### DVR settings

The device parameters feature allows the user to change settings that are saved on the DVR such as record settings, event settings and more.

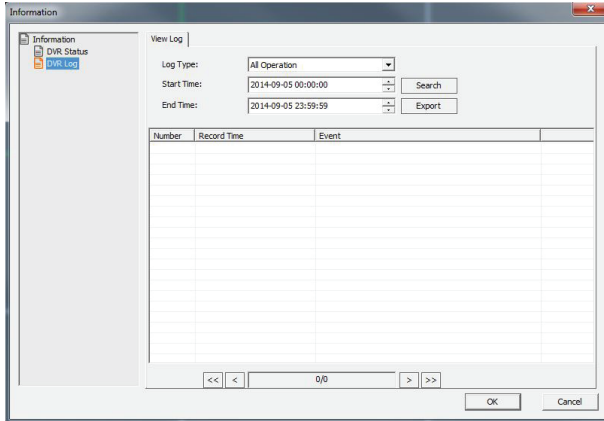

# User Manual

## Inspire White HD-SDI DVR Range

### DVR log

The DVR keeps a log of events such as illegal power downs, motion detection events, alarm input triggers and more.

The user can search for specific times or type of events using the options at the top of the window.

The log can also be exported to the remote PC as a html file. This enables the user to be able to copy the log to a removable device or even email it.

**Note: Searching the full or large sections of the log may take several minutes dependant on amount of event entries.**

### Local record over network

If, when viewing the camera images over the network the user would like to save the live stream to the PC, the user can use the Local Record feature.

To use Local Record click the Local Record button, the destination path and duration of the file can be set in the Local options. Local Record can be stopped at any time by clicking the Stop Local Record button.

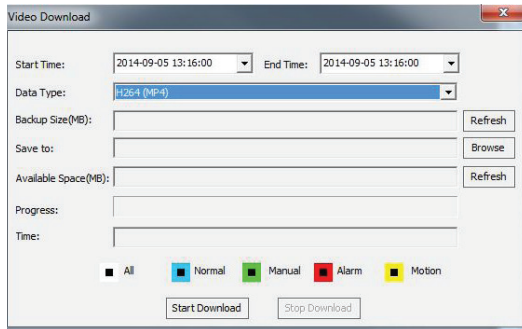

**Note: Local record files are saved as .mp4 files and can be played back in standard media player software.**

# User Manual

## Inspire White HD-SDI DVR Range

### Copy over network

If there are recordings on the DVR HDD(s) that need to be retrieved remotely this can be done using the copy feature.

To use the copy feature:

Enter playback mode  
Select camera, date and click "Query"

Click the  icon

Enter required start and end times  
Click "Refresh" to estimate file size  
Click "Browse" to choose a location to save the file to.  
Click **Start Download** to start the remote copy.

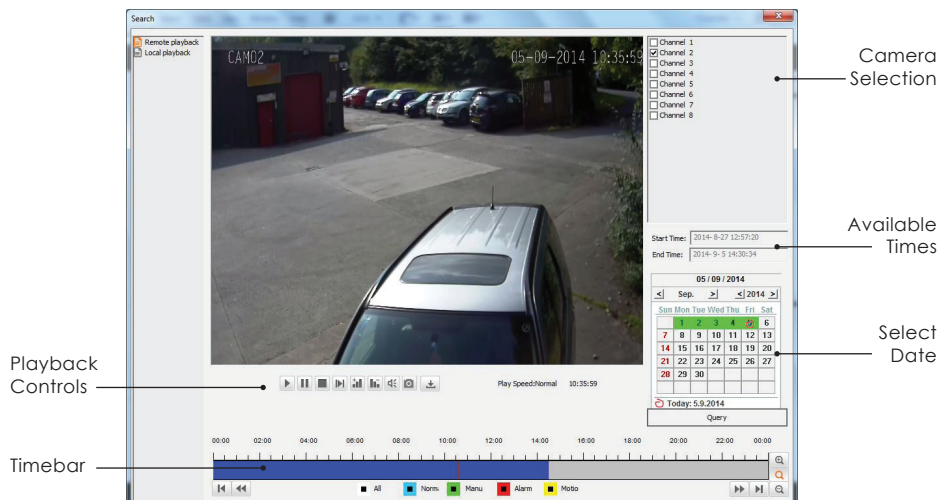

Full administrator rights may be required and UAC (User Account Control) must be disabled when copying over a network.

# User Manual

## Inspire White HD-SDI DVR Range

### Playback over network

The viewing of recordings stored on the DVR HDD(s) can be done using the Playback feature.

To playback images select a camera to play from the camera selection panel. Select a date from the calendar, Highlighted dates indicates that there is recorded footage available, no highlight indicates there is no recordings available. Once the date is selected click "Query", the time bar should now populate.

Double click a time in the time bar to play it.

The colour of the time bar indicates the type of record available.

<b>Blue</b>	Continuous recording
<b>Red</b>	Alarm input recording
<b>Yellow</b>	Motion detection recording
<b>Grey</b>	No recorded footage

## Talkback

---

### Duplex Talkback

The DVR features a full duplex talkback system. When a microphone is connected to the Line Input and a broadcast unit is connected to the audio output of the DVR click the Talkback button.

Once Talkback has been selected the audio stream from the DVR Line Input will be played through speakers or a headset connected to the remote PC.

### Broadcast

If a microphone is also connected to the PC then when the user talks their voice will be broadcast out through the DVR audio output.

### Audio

The DVR can support up to sixteen microphones (model dependant). To listen to the audio from a required channel, select the channel in full-screen. The audio will now be played through the remote PCs speakers or headset, providing microphones are connected to the audio inputs of the DVR.

**Note: It is not possible to use duplex talkback or broadcast when using audio microphones with camera inputs.**

# User Manual

## Inspire White HD-SDI DVR Range

### PTZ control

The DVR web browser supports control of PTZ cameras if connected and programmed in the DVR.

To use the PTZ feature single click on desired camera.

It is recommended to only use PTZ control when viewing the Sub Stream.

#### PTZ Speed

Select the speed in which the PTZ camera moves

**Note: This may be limited by the capabilities of the PTZ camera connected**

Pan or Tilt the camera

Zoom the PTZ camera in or out

Open or close the iris (this will make the image brighter or darker)

Adjust focus far or near

Turn on the PTZ wiper blade (compatible models only)

#### Preset

Select preset position then click Go to move to position or Set to save current position as selected preset number.
