SAFEGUARD 4 part security set

You can completely secure your home with this set, without using wires.

The set consists of:
1x SC 9000 HomeController with built-in telephone modem and siren
1x MS90 Wireless motion detector
1x DS90 Door/window sensor
1x KR21 Keyring remote control

An easy to use user manual and three window stickers are enclosed.
The set can be easily expanded. A few possibilities are illustrated below.

Art. nr. 🇬🇧 09613 - 🇪🇺 09604 - 🇦🇺 09615

TOTALGUARD 7 part security and burglary prevention set

The TotalGuard has the same characteristics as the SafeGuard, but offers you extra prevention measures with the smart presence simulator. The TotalGuard also gives you a complete Home Comfort system.

The set consists of:
1x SC 9000 HomeController with built-in telephone modem and siren
1x MS90 Wireless motion detector
2x DS90 Door/window sensors
1x KR21 Personal remote control
1x SH624 Comfort remote control
1x LM12 Lamp/dimmer module

An easy to use user manual and three window stickers are enclosed.
The set can be easily expanded. A few possibilities are shown below.

Art. nr. 🇬🇧 09614 - 🇮🇹 09620 - 🇪🇺 09605 - 🇦🇺 09616

WIRELESS MOTION DETECTOR MS90

- Reacts to movement.
- Suitable for securing larger spaces.
- Suitable for wall mounting.
- Built-in tamper contact.

Dimensions: 76 x 100 x 42mm • PIR range: 90° - 12 meter • Power: 2x AA batteries • Colour: off-white • Art. nr. 09582

WIRELESS DOOR/WINDOW SENSOR DS90

- Very compact.
- Also suitable for an extra wired magnetic contact.
- Built-in tamper contact.

Dimensions: 43 x 87 x 20mm. • Power: 2x AAA batteries • Colour: off-white • Art. nr. 09583

KEYRING REMOTE CONTROL KR21

- A unique key with a unique code.
- Very compact.
- For switching lights on and off.
- Equipped with panic buttons for instant alarm.
- Max. 16 remote controls per security system.

Dimensions: 38 x 57 x 13mm • Power: 2x CR2016 3V batteries • Colour: grey • Art. nr. 09169

HOME CONTROLLER SC9000

- Equipped with telephone modem • Record your own message • Built-in siren: 100 dB • X-10 lighting
- Tamper contact • Partial alarm • Entry/exit delay
- Silent alarm • Emergency power supply

Max. 30 wireless and 2 wired sensors • Range sensors: 15-30 m indoor, 100 m free field • Telephone: analogue or using ISDN with an analogue input • Built-in Marmitek X-10 transceiver • Dimensions: 215 x 142 x 43mm • Power: 230V • Colour: off-white.

COMFORT REMOTE CONTROL SH624

- For switching your security system (and partial alarm) on and off.
- Also suitable for controlling lights and equipment.

Dimensions: 72 x 115 x 20mm • Power: 4x AAA batteries • Colour: grey • Art. nr. 09170

LAMP/DIMMER MODULE LM12

- Wallplug module
- Suitable for switching and dimming lights, from 40 to 300W.

Dimensions: 52 x 122 x 33 mm (excluding plug) • Colour: white • Suitable for all Ohm loads • Art. nr. country-specific

Range sensors:	15-30 m through walls and ceilings (100m free field).
Number of sensors:	30 wireless and 2 wired connections.
Frequency:	433 MHz.
Backup battery:	12 hours standby on 4xAA batteries (included).
Telephone connection:	Can be used with all analogue telephone connections (ISDN via analogue switchboard).
Certifications:	R&TTE, CE approved.

ALSO AVAILABLE

Extra siren PH7208	Art. nr. 08929
Lampmodule LM15	Art. nr. 09191
AM12 Appliance / Switch Module (Art. no. country specific)	
Wireless smoke detector SD90	Art. nr. 09652

See www.marmitek.com for more information.

Phone message in emergencies

In the case of an emergency, you (or e.g. your neighbour) will receive a telephone call and will hear a message you recorded yourself. After this message has played you can listen to what is going on in your home. You do not need to pay any extra charges or fees! You can also control the entire security system by phone. If you have forgotten to activate the system, you can do it remotely!

Panic button

Home alone? Activate the alarm with one press on the panic button of the wireless remote control to scare off intruders. You can also send an automatic telephone warning to neighbours or friends. Feel good and feel safe.

Reliable and wireless

Because the Marmitek system is totally wireless, you can make your house safe without damaging walls, doors and windows. The system can be easily expanded or removed if you move house. The advanced Secured Wireless Technology (SWT™) makes false alarms and tampering near impossible. All sensors are constantly and automatically checked. The clear user manual makes the system easy to install; no technical knowledge is necessary.

Easy and better security

Do you want to feel your home is safe when you're away? Or feel safe when you're at home? A Marmitek wireless security system makes it possible: easy and without high fees.

Marmitek makes your home smarter and your life more comfortable

Burglaries can often be prevented: by automatically switching on the lights, the house always looks occupied. What if someone still tries to enter your home? Then you (or e.g. your neighbour) receive an immediate warning by telephone. This is much more effective than a siren or lights alone. You can even phone up the security system. This gives you the opportunity to control it remotely, wherever you are.

Just the way you want it

The Marmitek system is modular, which means you can adjust it to your needs and wishes. There are two complete sets available to make your home safe: quickly and without spending a fortune. The SafeGuard is a complete, wireless security system, the TotalGuard also contains parts that offer you effective measures to prevent burglaries.
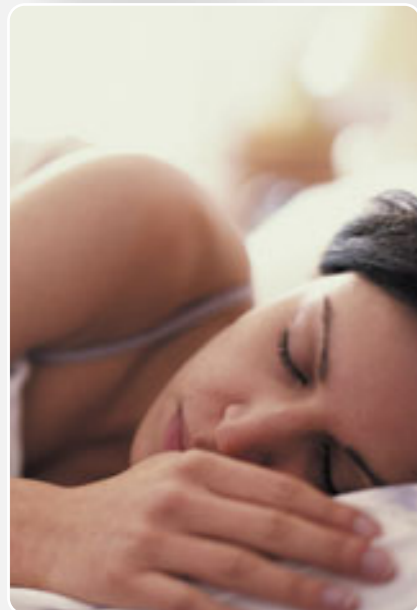

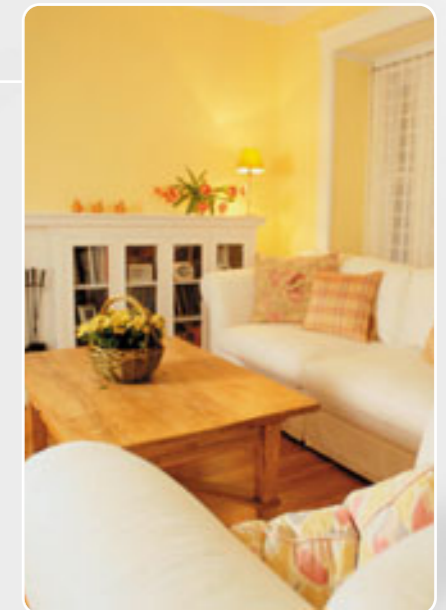

Save on unnecessary costs

When you buy a Marmitek security system, you do not need to pay any monthly fees! In case of an emergency, the system will ring the numbers you programmed, without using a radio room. This not only saves you money, but also valuable time!

- Sensor status checks
- Menu in your own language
- Timer for prevention
- Light control
- Silent alarm possible
- Memory for six telephone numbers
- Two wired inputs for (for example) smoke detector
- Personal code lock
- Emergency power supply
- Telephone modem for calling in and dialling out.
- Built-in siren
- Individual message

Smoke detector (optional)

Home Automation

Up to 30 wireless sensors

max. 16 Remote controls

Telephone

It appears as if there is always someone at home.

An alarm in case of an emergency is fine, but prevention is even better. The built-in timer and wireless light system make sure it appears as if there is always someone at home.
You can use the Marmitek X-10 system to make your home smarter as well. Never come home to a dark house anymore, simply program the outdoor lights to automatically switch on when someone approaches your home. When you hear strange noises outside, one press on a button is enough to turn on the outdoor lights. The system works before any damage is done.
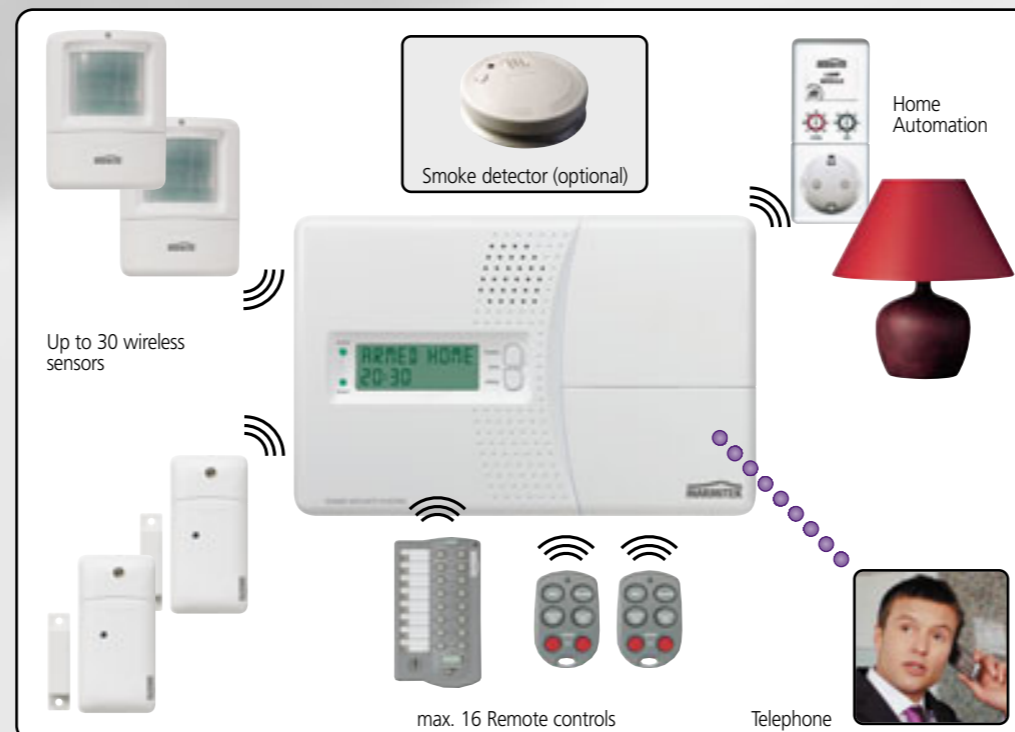

No need to get out of your chair...

Marmitek uses the universally applied X-10 system, which offers a broad range of possibilities. You can switch all the equipment in your house with your remote control. Dim the lights to create the right atmosphere. Turn off all the lights at once when you want to go to bed. You can use your phone to control the system remotely, wherever you are. Switch on the air-conditioning by ringing the system on your mobile phone.

Remote control

You can control the security system via the console and secure it with your own PIN code. For daily use you can control the system using the remote control. This electronic key gives you the opportunity to e.g. switch the alarm on or off or turn the lights on when you come home at night. You can purchase extra remote controls (max. 16) for family members or guests.
