

HXR-NX30U

NXCAM Palm-Sized Camcorder

The HXR-NX30U, a Palm-Sized Go-Anywhere Camcorder Packed with the Features Professionals Demand Plus Balanced Optical SteadyShot™

The mobile camcorder for the professional videographer

Sony's HXR-NX30U is an ultra-compact, palm-size, professional NXCAM™ camcorder compatible with the latest FULL HD formats including 1080/60p video. It features a 26.0mm ultra wide-angle lens with 10x optical zoom (35mm equivalent: 26-260mm), and a back-illuminated Exmor RTM CMOS sensor for outstanding versatility. Like other NXCAM camcorders, it comes with the features professional users demand, including flexible timecode/user bit settings and XLR audio inputs for high reliability and high sound quality. One of the HXR-NX30U's biggest advantages is the newly developed Balanced Optical SteadyShot™ image stabilization system. This allows the entire optical block, from the lens to the image sensor, to "float" and absorb movement from the body. The result is extremely effective image stabilization even when zooming in, something previously difficult to achieve, ensuring handheld shooting with a new level of image stability. It is an ideal feature if you are out in the field alone and handheld operation is required while walking or using the zoom. Designed to meet the needs of a wide range of professional situations, the lightweight, compact and affordable HXR-NX30U is a powerful tool for gathering footage alone and as a B-camera during multi-camera shoots.

Ultra Wide-angle 26.0mm Carl Zeiss Vario-Sonnar T* Lens and Exmor R™ CMOS Image Sensor

The HXR-NX30U comes with a Carl Zeiss Vario-Sonnar T* lens that minimizes unwanted reflections for faithful color reproduction. It also provides high contrast and high image quality with exceptional resolution from 26.0mm wide angle to 260mm telephoto (35mm equivalent). Thanks to the 6-blade iris diaphragm, you can enjoy exceptionally realistic representations of natural lighting. And when shooting dark scenes, the back-illuminated Exmor R CMOS sensor provides high sensitivity and low noise that are hard to believe come from such a compact unit. What's more, using a 1/2.88-inch type sensor with an aspect ratio of 16:9 is ideal for wide-angle shooting. This lets you record images with even higher definition.

Balanced Optical SteadyShot

The innovative Balanced Optical SteadyShot™ image stabilization system virtually eliminates the influence of camera shake by enclosing the entire optical block, from the lens to the image sensor, in a "floating" space. Combined with electronic image stabilization that compensates for rotation around the optical axis, this new system provides powerful image stabilization even when shooting while zooming, which was previously difficult to

FIXED SHOT mode

To optimize the effect of Balanced Optical SteadyShot™, the HXR-NX30U features a FIXED SHOT mode. Press a button and this expands the movable range of the optical block to keep you locked on your subject. This is particularly convenient when you want to maintain the same shooting angle for an extended period.

AVCHD 2.0 1920 x 1080 Full HD 60p Recording with 24.1 Mega (6544 x 3680) pixels¹ still image capture²

You can shoot at 60fps progressive (1080/60p) with 1920x1080 Full HD resolution. And using a 24p timeline setting with AVCHD $^{\text{\tiny{TM}}}$ 2.0

compatible NLE software enables conversion to smooth slow-motion images up to 2.5x slower. You can also

select 1280x720 60p

1: Realized using the "By Pixel Super Resolution" technology.

2: Dual Rec is not active while recording mode is set to FX or PS.

96GB embedded Flash Memory and Memory Stick® / **SD Multi Card Slot**

The built-in 96GB embedded Flash memory can record and store up to 40 hours of high definition video footage in HD LP mode with

Dolby® Digital audio mode. And there is a multi-purpose card slot that lets you record video images on Memory Stick PRO Duo™ or SD cards, giving you a range of options in your choice of recording media. You can also use these readily available cards to copy data from internal memory.

XLR Adaptor with Selectable Phantom Power and ECM-XM1 Shotgun Microphone Enabling High-Quality Linear PCM Recording

The detachable handle has an ergonomic design that is comfortable and compact. Two balanced XLR audio inputs are built-in with phantom power and attenuation options that professional users require for clean sound quality. Default audio settings for XLR recording are highlighted in green for easy reference in the field in order to reduce operator error under difficult lighting conditions.

The ECM-XM1 shotgun microphone mounted on top of the handle provides audio recording performance similar to larger shoulder-mounted ENG style cameras. The HXR-NX30U is also ready to record high-quality 48kHz/16 bit Linear PCM audio.

Timecode/User Bit Recording and HDMI® Embedded Timecode Output

The HXR-NX30U features the important professional camcorder functions of timecode and user bit settings. Like other NXCAM camcorders, the HXR-NX30U's timecodes can be centrally reset using the supplied infrared remote control to allow easy synchronization of video from compatible* camera models. Using NLE software, live footage shot with multiple NXCAM camcorders can be efficiently edited with timecode sync. Timecodes and user bits can also be output through an HDMI jack.

*Compatible Sony NXCAM camcorder models.

Built-in Light

The built-in light functions as a flash when shooting still images or as an auxiliary light source when recording video. Using the NightShot® mode is particularly effective when recording in low-light conditions and allows you to capture otherwise impossible shots.

Built-in Projector

A built-in projector can project images up to 100 inches wide (when projecting 15 ft from a screen, 40 inches wide when projecting 6ft from a

screen). Large-screen projection of images enables all the staff involved to check the rushes at the end of the shoot and reduces the need for an external display.

Built-in USB cable for easy file transfer/charge

The high-speed, built-in USB 2.0 cable allows for easy connection to your computer for charging or file transfer without having to remember separate cables. It also fits conveniently into the hand strap so it's out of the way until you need it. Charging your camcorder is faster than ever now through the USB; for every two minutes of charge time you get up to one minute of recording time.

Direct Copy to external HDD without PC

Back up your footage while you're in the field, directly from your camcorder by attaching an optional USB hard disk drive*, without the need for a computer. Your camcorder can also access videos stored on the external hard drive for playback on your monitor* allowing you to utilize the camcorder's handy playback features.

- 1. Direct Copy is compatible with USB media that meets the following requirements:
- USB media that meets the USB2.0 requirement
- For external HDD or USB memory under 2TB, an AC powered external HDD is recommended.
 USB media formatted in the FAT32 file system. In the case when USB media is not in
- FAT32 file system, reformatting is required and all data will be erased.

 Note: There may be cases when USB media is not compatible with the Direct Copy function.

 2. When using Direct Copy the camcorder needs to be connected to AC power.
- 3. Using VMC-UAM1 (supplied) cable when the HXR-NX30U is connected to External HDD.
- 4. Connection via USB-hub is not supported

Geotagging with built-in GPS receiver

A built-in GPS receiver makes the HXR-NX30U an ideal choice for professional videographers. The receiver gives you the ability to "tag" your shooting locations as a future reference if you need to return to the same location or to create a log of areas covered when surveying remote locations

Additionally, the receiver automatically adjusts your camcorder's clock to the proper time zone when international travel is part of your assignment. Your locations can be tracked on Google $\mathsf{Maps^{TM}}^{**}$ and all GPS data can be extracted with a CMU is supplied PC software.

Map service requires PC with internet. Service provided by Google and subject to change without notice

OPTIONAL ACCESSORIES

AC Adaptor/Charger AC-VQV10 (AC 100 V - 240 V)

Wide Conversion Lens VCL-HGA07B (0.75x)*

Tele Conversion Lens VCL-HG1737C (1.7x)*

* The supplied step-down ring is required to mount conversion lenses. Conversion lenses cannot be mounted unless the supplied hood is removed. Also, be sure to set the conversion lens mode on the body before using. When using the Wide Conversion Lens setting, switch Balanced Optical SteadyShot off

Memory Stick PRO-HG Duo™ MS-HX32B (32 GB, 16 GB, 8 GB)

SD / SDHC Memory Card SF-32UX (32 GB, 16 GB, 8 GB,)
