Choose freedom.

TOSHIBA

The Pocket PC e740 series:

Experience the **ultimate** in **wireless** pocket computing.

This revolutionary Pocket PC sets a new benchmark for top-end PDA technology. Making it the ultimate wireless personal productivity tool for today's mobile professional. In fact, it's one of the best connected Pocket PCs you can buy. Choose between integrated Wireless LAN or Bluetooth™ and experience hassle-free access to e-mail, the Internet and office networks.

Phenomenal processing power lets you run the most demanding business applications at lightning speed. When the time comes for expansion, drop in extra functionality or more storage to suit the task via SD™ and CF™ slots. All in a supremely stylish case that's incredibly easy to carry and use in the palm of your hand.

Why choose the Toshiba Pocket PCe740?

- **Always connected** – fully-integrated Wireless LAN or Bluetooth™ give access to the Internet and office networks anytime, anywhere
- **Phenomenal power** – the latest, most advanced processor runs highly demanding applications at extraordinary speed
- **Totally expandable** – instantly add extra storage and enhance functionality via built-in SD™ and CF™ slots
- **Maximum independence** – advanced battery technology provides extended mobile power
- **Ultra-stylish & ergonomic** – combines stunning design with brilliant ease of use

Break free with fully integrated wireless communication.

Want to be more mobile? And better connected? The Pocket PC e740 has arrived. The first-ever Pocket PC on the European market with integrated Wireless LAN, it sets you free to go anywhere in your work environment while keeping you connected to the company network and Internet at all times.

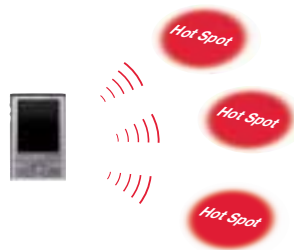

It's the coolest way to be productive and in touch on the move. Link it to a wireless network – using, for example, Toshiba's Magnia SG20 multi-functional wireless appliance server – and you can exchange files, access data and applications or check your e-mail, with no wires to tie you down. Out of the office, connect to the Internet through Hot Spots, the Wireless LAN public access service.

This ultra-desirable little gadget is also available with Bluetooth™ built in. As well as getting you online anywhere, it synchronises calendar, contacts and e-mail with your Bluetooth™-enabled notebook. Using ActiveSync, it's all done for you – by the time you reach your desk they've already updated each other.

There are three Pocket PC e740 models available – one equipped with Wireless LAN, one with Bluetooth™, and a basic version without either of these technologies. All three feature integrated InfraRed which allows cable-free data exchange, Internet access and synchronisation with other IR-enabled devices such as a notebook or printer. In short, when it comes to wireless connectivity, the Pocket PC e740 series is way out in front.

Stay constantly connected to your office network thanks to Wireless LAN

On the road, get online instantly using wireless Hot Spots

Enjoy hassle-free wireless communication via Bluetooth™

Maximum power equals maximum productivity.

The Pocket PC e740 is driven by the fastest, most powerful Pocket PC processor on the market today. And when you carry this much power in your pocket, you can get through a ton of work on the move. Phenomenal performance comes courtesy of the new Intel® PXA250 applications processor with Intel® XScale™ technology at 400 MHz. Add a massive 64 MB of RAM memory and Microsoft Pocket PC 2002, and it breezes through web browsing, video streaming, word processing, spreadsheets and more. All software is pre-loaded, so your e740 hits the ground running.

Multimedia performance is awesome too, thanks to the latest graphics, audio and video technology, plus a dazzling 3.5" TFT reflective colour display that's incredibly easy to read. Presentations, games and video clips have never looked so good, from any angle, in any location.

Internal Secure Digital™ (SD) and CompactFlash™ II (CF) slots support a wide range of state-of-the-art storage, communication and expansion options.

Unlimited expandability means you're ready for anything.

Want extra functionality? Simple. Use the Secure Digital™ card slot to include instant Bluetooth™ capability. Or add up to 256 MB of storage, to turn your e740 into a massive mobile database, a video player, MP3 jukebox or digital photo library.

The integral CompactFlash™ slot provides even more expansion options. Plug in wireless LAN, for example. Or a 1 GB microdrive, a conventional modem card, even a barcode reader. Maybe add an Ethernet card for wired networking, or a GSM/GPRS card for mobile telecommunications.*

Toshiba's optional Pocket PC Expansion Pack gives you direct USB porting for a keyboard, plus VGA output to connect to a projector or monitor for big-screen presentations.

* Please ask your CF™ card vendor for the appropriate driver

Making you more independent.

The Pocket PC e740 keeps going for longer. So you stay on top of business wherever life takes you. As a top-end travel companion the Pocket PC e740 is exceptionally small and light – and gives you greater independence. The exchangeable standard battery lasts up to eight hours. But add the optional high-capacity battery pack and you're suddenly looking at up to an amazing 22 hours of continuous use. Take the e740 with you whenever you go on business and run it continuously without needing to recharge. Thanks to the built-in back-up battery all your important data stays safe even if you do run out of power.

Boost battery life to up to 22 hours for incredible independence with the optional high-capacity power pack.

A masterpiece of ergonomic design.

The Pocket PC e740 doesn't just thrill with leading-edge technology, it's also superbly designed and engineered. The result? It's impeccably portable, sheer pleasure to use – plus it looks fantastic.

At 125 x 80 x 16 mm and weighing between 175 and 185 g, this tiny lightweight powerhouse can be comfortably carried in a pocket all day long. Take it out to use and it fits beautifully in the palm of your hand, with easy quick access buttons, 5-way navigation, a navigator dial for scrolling, selecting or volume, plus direct data input via the 3.5" touch sensitive TFT colour display. Also included are an integrated microphone, speaker and a one-touch voice recording function for memos, reminders or ideas.

The USB cradle is the easy way to synchronise data between the PDA and your PC
