Raised Air Bed – BD-3324FCB

INSTRUCTIONS

Verify the following items are in the package:

- Raised air bed
- Electric pump for inflating and deflating
- 3 universal size nozzles
- Carry & storage bag
- Repair Kit

Now you are ready to set up the air bed!

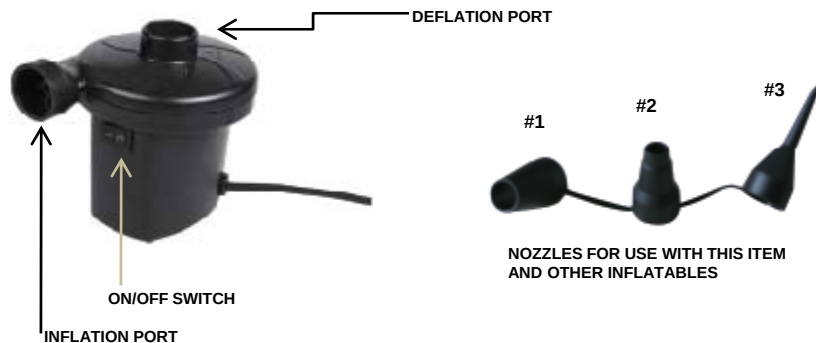

INFLATION:

- Unfold the product on a flat surface. Check your surroundings for any sharp objects that may cause damage while inflating.
- Connect the electric pump to a power outlet. Keep the switch in the OFF position.

- Locate the 1" double cap valve on the side of the bed and remove the sealing cap. Carefully insert the pump into the valve. Push the pump in more to secure the connection firmly & properly.
- Inflate the bed by switching on the pump. You can see the product growing rapidly to its full shape with 4 minutes, and it's a hands-free operation!
- As the bed reaches its full working pressure (you'll hear the pitch of the pump get higher), switch the pump off and pull out the nozzle. Quickly cover the valve with the sealing cap.
- Seal the valve nicely by its sealing cap.

DEFLATION:

- Remove the 1" double cap valve.
- Connect the electric pump to a power outlet. Keep the switch in the off position.
- Fit the nozzle (either #1 or #2) onto the top of the pump.
- Carefully insert the nozzle of the pump into the valve.
- Turn on the pump and the air within the sofa will be sucked out within a few minutes.
- Fold the item up nicely and put it in the bag for storage or travel. Keep the sofa in a dry, cool place. Avoid direct sunlight and/or any appliances that may generate heat.
